Wait! wait! I implore you. Then he told her why he had gone "I should have sought you here upon your arrival were it not for the rumor of

your engagement to Edward Grey," he "My engagement! The rumor was false; it is not I, but my cousin, who married Edward Grey two weeks ago. We are friends, that is all." she, and turned her face homeward. Her

years. She struck me as unusually beautiful for a rustic when I first met her."

A soit, balmy breeze swept through the trellis, rustling the vines and bringing from a distance the perfume of flow-ers. ers. "Then you do love me, Viola! I can keep my love from you no longer, Viola. Will you be my wife? Do not withhold the perfect joy I crave," were the words he uttered, so low that they seemed to chime with the murmuring breeze.

"The joy is ours, Harry!" was the net of rest, so I resolved to go on a hung and fishing expedition. Having hear of the facilities Huntsville affordment he laughingly said, "Hal, do you ment he laughingly said, "Hal, do you call this all 'a mere flirtation?"—Miss

"Witticus, the paragrapuer, was very cross today." "That is nothing unusual. He is always out of humor."-Kate Field's

The Personal Pronoun in Conve The inordinate employment of the possessive case is a vulgar solecism, and not used to excess by those of gentle breeding. There are both men and women who are forever talking about "my carriage," "my house," etc., until they disgust their hearers. One is apt to im agine that such persons are the possessors of newly acquired wealth and its appur-tenances, when this small, two lettered

word slips from their lips with unseeming frequency. The pronoun "I" should not be too often repeated, as it gives too personal and egotistic a turn to conversation, and the frequent recurrence of "I said so and baticus." He describes it thus: "It atso," and "I did so and so," reveals a nature weighed down with a sense of its on Sundays, morning and evening. The

People Who Eat Alone. central board, but this is not so with the majority or even a fraction of the semi-civilized and barbarous nations. The Mardivian islanders dine alone, retiring to the most secret parts of the'r huts for the purpose of eating their tood. This custom probably arose among them in an early period of their history, for A year had passed since Harry Mar.

"Then I got a chance to sell a ring for She gathers them up, to be sure, and carstone which cost me \$42.50. I put the day or so she is seen going into a certain whole \$75 into another stone, which I hairdresser's in Twenty-third street, carried around for a while, and had fully made up my mind to keep, but a butcher offered me \$100 for it and I sold Here." And Dotty Dimple goes with explained.

It to him. It was in a crown setting, her, of course, and carries Rosamond which cost me \$6.25. For the hundred Arabella or Fifine, or whatever the name ment in silence. Cutting the tip off of As he finished Viola sank down in a I got a dandy stone, and I was sure I may be of the potential little lady in his cigar, he placed it between his lips, swoon, overcome by the strain upon her could keep that one, but I have had four bisque. And in a box the

and the sudden reaction. He better ones since, and have got up to \$180. I can't go much higher than that, I guess, for there are few men among my acquaintances who can afford to fortunates came back unsuccessful. After the storm had passed, however, Frank I wouldn't sell it to-night for \$200, be-Hale and his sailboat rounded the peninsula and moored opposite the hotel. In response to a flood of inquiries he replied that he was upon the other side of ring I will make it look like \$250 worth, and I don't think that anybody can persuade me to sell it for anything less. In a lovely blonde wig of real hair-hair that all the changes I don't think that I have curls up about her temples and down he put in more than \$16 or \$18 of my pocket

noney. The rest has all been profit on the stones and settings."-New York In Mortal Peril. Dr. C. C. Abbott, in "Outings at Odd Times," tells a tragic tale of an adventure which once befell an old lady, "long, long ago." The spot where she lived ost a wilderness, and was beset

with the perils of a new and scantily set-tled land. The now almost forgotten Camden and Amboy railroad was in operation, but though scarcely a mile distant, it was as nothing to her. She knew neiher what nor where it was. But where the best whortleberries grew, in the back swamp, that was knowledge worth her possessing.
Although her cousin Abijah had killed

a bear there during the winter, she did not stop to think of that, but one day started for berries where few men would care to follow. With a light heart she gathered and gathered, until at length an ominous shricking fell upon "Could it be another bear?" thought

big basket was not quite full, and there were such loads of fruit within easy each! This was tantalizing, but all her doubt vanished with the second shriller more unearthly scream. The path was no longer plain, nor was he surefooted. As she pitched recklessly forward the berries were bounced by handfuls from her basket, and finally

in despair she threw aside the basket And still sounded through the swamp the terrible screeching of that angrabear. At last she could see her cottage through the thickly set trees, but not so plainly the tortuous path. One misstep and she sank waist deep in the yielding mud of an old well, and there she stood

reaming until her husband came to th "Do be still, Hannah," was his first remark, after she had chokingly called his attention to the still audible cries of the bear, "that's only the new fangled steam ingine whistlin'!" "And to think," the old lady was wont to remark, on concluding this story, "to think I lost all them beautiful berries!"

Wanted-Lymph. One of the local churches furnishes a calendar every week on which are announced the various services and meetings during the week. The pastor usually has a hand in getting up these calendars, and a few days ago he described a new "disease" which affects church members, and he calls it "Morbus Sab-baticus." He describes it thus: "It atown importance, and caring little about patient sleeps well on Saturday night, what other people are doing or thinking.

—Jenness-Miller Magazine.

on Sundays, morning and evening. The patient sleeps well on Saturday night, awakes refreshed, eats a hearty breakfast, perhaps reads a Sunday newspaper. fast, perhaps reads a Sunday newspaper, but at the ringing of the first church bell (10:15) the sickness begins and con-In all thoroughly civilized countries tinues till the service ends. The patient the members of a family and their guests is then well enough to eat a hearty din-partake of meals while collected around ner, after which a walk or a ride is enner, after which a walk or a ride is enjoyed. Returning home the supper is greatly reliabed. But about church time these is another attack of the disease, which lasts about an hour. It is apt to attack the head of the family at first, but the children soon are affected by the contagion."—Springfield Republican.

> The Washington body guard are rapidly giving way to the army of servants employed by distinguished statesmen of later date.—Philadelphia Ledger.

A Club Discussion "Now, ladies, if I have left anything untold, or there is anything not quite nderstood, I am ready to answer ques-

She was the president of a woman's club and had just returned from a visit to the famous "Sorosis." She had been telling them what questions we discussed and what was the programme of the evening. There were a number of women present, and they had all been very much interested. "How is it that you can afford to buy

The president sat down in her chair and waited for questions. There was a silence for an instant, and finally a timid voice from the background said: "I would like to ask a question. it—was it a dressy crowd?"

The president jumped up and said:
"I just want to tell you! Those ladies all had on the most beautiful bonnets.

One was a heliotrope velvet trimmed with gold lace. And another was made of bands of jet and pink roses" (the ladies commenced to gather around her with enraptured expressions). "The handomest of all was worn by Mrs. -..." Just then the president of this woman's club caught a smile on the face of a newspaper correspondent who was present. She drew herself up with great dignity and said:

"Ladies. I think we are wandering from the subject." Chicago Herald.

Latest Use for the Child's Hair. When Dotty Dimple has her first thatch it a few days later for \$35. I got another of long curls cropped off her mother stone for \$30, and had it two months be- doesn't gather them up one by one as she

the curls. Then the attendant gravely measure the bisque pate after he has first removed the shock of flax that covered it, and looks wise over the box of curls and says, "Oh, yes, madam, there will be plenty of them, I think." Madam and Dotty of them, I think." Madam and Dotty Dimple go away after a great many loving pats and admonitions, and in a few days Rosamond Arabella comes home no longer with the flaxen pate, but wearing back just as Dotty Dimple's own does. And that is just what it is, Dotty Dimple's own severed curls. And thus are

the demands of sentiment and fashion united .- New York Evening Sun. The Appropriated Sleigh Bells in July. The well filled stores and gaudy shop windows of the Indiana and Ohio towns seemed to stimulate in men accusto to impoverished and unpretentious Dixie as were Morgan's raiders, the propensity to appropriate beyond limit or restraint. I have never before seen anything like this disposition to plunder. Our perilous situation only seemed to render the men more reckless. At the same time, anything more ludicrous than the manner in which they indulged their predatory tastes can scarcely be imagined. The weather was intensely warm—the hot July sun burned the earth to powder, and we were breathing superheated dust -yet one man rode for three days with

seven pairs of skates slung about his neck; another loaded himself with sleigh A large chafing dish, a medium size Dutch clock, a green glass decanter, with goblets to match, a bag of horn buttons, chandelier and a bird cage contain three canaries were some of the article I saw borne off and jealously fondled. The officers usually waited a reasonable period, until the novelty had worn off, and then had this rubbish thrown away. Baby shoes and calico, however, were the staple articles of appropriation. A fellow would procure a bolt of calico, carry it carefully for a day or two, then cast it aside and get another. - Basil W.

Duke in Century. English Women's Caps "You have some very curious persons Chicago," remarked Mrs. Tennant Mr. Stanley's mother-in-law. "I could not help overhearing what one of them said when I entered the room at the club reception. 'There comes one of 'em,' said the lady in a tone loud enough for me to hear distinctly. 'There comes one of 'em; she's English, I know, for English women when they get old always wear tidies on their heads! 'No, I don't know what the American people call 'tidies, but I'm sure the remark was not complimentary. Still it is the custom with

us to wear caps—why, the queen wears them; I do not mean to give them up." -Chicago News. Carl Boentjen, of Astoria, has on exhipition a marine curiosity. It consists of an ordinary seaweed some 20 feet in of roots has a firm hold of an aggrega-tion of marine shells several pounds in weight. These shells are occupied by a curious inhabitant that has a beak that resembles a chicken's, only it is divided edicularly instead of horizontally.

Better Than They Expected. Some men who had lost an anchor near Linekin, in the town of Boothbay, Me., grappled for it the other day and ight they had it. Twenty men dragged it ashore and upon the beach, when their prize proved to be, not the anchor, but the upper jaw of a whale. It was 13 feet long from the bow in front to either end joint, and 7‡ feet across from and to end.—Philadelphia Ledger.

When the wedding service of the Church of England was adopted for use in this country the adoring sentiment in the above line was dropped out of it, the Protestant Episcopal church retaining the word "obey" in the woman's vow Now, it is easy to see that there was no great risk in the promise to obey a man who had just pledged himself to "en-dow" his wife "with all" his "wordly goods," and also to worship her. The attitude of possessing all that the poor fellow owned, and of having him besides in the attitude of "adoration," might be supposed to be fully the equivalent and balance to the word "obey." As it now stands the promise to obey is

only balanced by the equally neglected promise to give the wife all that the man owns. Neither is carried out, although the last one is frequently made sound, for the first time, by the husband's last will and testament. If he does not live up to his bridal promises he frequently dies down to them. Taken as traditions that convey the sentiment of an entire union of interests, obligations and desires, the whole service should be restored, if poetry is to rule. Taken as the common sense contract solemnized in the midst of the most sacred surroundings, the word "obey" ought to go out promptly, since the correspondingly worshipful words of the old service were dropped

out long ago. - Philadelphia Ledger. Discontent Among Bailroad Clerks. A railroad clerk in this city writes: . I you oblige many railroad clerks by lying that we are the most dissatisfied lass in business? A railroad clerk is seldom advanced on account of merit. I know many who have been at the same desks and for the same salary for years and years, and they are acknowledged to be valuable and competent. The men under whom they work are not to blame because they are not advanced. The fault is at the fountain head. The directors of most companies live in the

Whenever one of those directors has a son or nephew, or the son or nephew of some influential friend, he sends him out west to take a position in the office of the company of which he is a director, Please understand that we do not blame tlemanly fellow and does his work to the best of his ability, and some of them have done well. But it is poor encouragement to an old timer to see this principle in vogue. I do not believe it pre-

A Mouse in a Surplice We have heard of a "bee in a bonnet" and a "flea in a man's ear." but never until a few days since of a "mouse in a surplice." It happened, however, that on a Sunday morning, when a parsonic visitor was unearthing from the parish chest a spare surplice, there fell out from its folds a nest containing several brown mice. Anent the church going mouse a capital story is told. A certain venerable dignitary, remarkable for a profusion of white hair, was one day ving his cathedral when he thought he felt something moving under his hat. This creature he endeavored to capture but in vain. On arriving home, however, it was discovered that a small mouse had taken up its abode in the canonical hair. Possibly this little creature was deputed by a chapter of cathedral mice to plead before the benignant canon their proverbial poverty. He, they thought, being a large hearted man, might take their case into consideration.

-Pall Mall Gazette. About Writing One's Name People who sign their letters with wild flourishes, or initials only, and give no address, offer one of the worst of compliments to their correspondent by egotistically assuming that their handtance to him, or that they and their affairs are so present to his mind that further identification is unnecessary. Having their signature cut from the end of a letter, and the address from its heading pasted on the envelope which incloses a reply, is a bad compliment which many persons bring upon themselves by an unpardonable illegibility. It is a singular fact the accidental misspelling or mispronunciation of one's name generally constitutes a greater affront and is provocative of more an-

noyance than a studied insult.-All the Germany's Celebrated Library, In Germany, fifty of the largest libra-ries have a total of 12,700,000 volumes; in this country the same number of libraries have 6,100,000 volumes, and in England 6,450,000. One hundred and twenty-five librarians and assistants are employed in the celebrated Mudie's cir-culating library in London. The pro-prietor, Mr. Charles Mudie, who died at the age of 72, founded the library thirty-two years ago, and it has now 25,000 sub-

scribers. Its annual income is £100,000. -New York Ledger. Sitting Bull's Pipe. George Connor has in his pos relic which he prizes very highly. It is nothing less than a pipe which Sitting Bull had in his possession when killed. It was sent to Mr. Connor by an acnaintance who took it from the hief's body, and vouches for its genuineness. The pipe is a quaint looking affair.—Manchester Union.

He (trying to play a trump card)—As passed your house last evening I thought heard an angel sing. She (stiffly)-I was at the theatre last evening. Mrs. Mulhooly and her twins were at our house visiting the cook .-In France steam races are not per-mitted. Instead, an official test of the power, speed and steadiness of locomo-

tives on different lines of the republic

has been made, and a prize awarded to

A jeweler tells me that the fashion Ann Grimble, colored, died in New buying expensive diamond rings by young men just engaged is gradually dying out. "Understand me," he said, "the girls still get their engagement "the girls still get their engagement rings, and they are pretty, too; but they don't average over \$70 or \$30 in price. Time was when the haughty bride to be would have turned up her dainty nose at any ring that cost less than \$200, but now, although there is just as much romance and just the same passion for diamonds in her composition, the New York girl rightly reasons that she is living in a practical age, and that a cheaper ring and a more expensively furnished flat will give her the most satisfaction. I know a man with an income of \$10,000 know a man with an income of \$10,000 and the satisfaction of being engaged to a millionaire's daughter. How much do you think her engagement ring cost him?

Just \$150, and the bride went into ecsta-

Little Boy—Mamma, I had the nightmare las' night, awful.

Mamma—That's because you had so

business of the theatrical pres agents has been so annoyingly overdone in this city that the boomers are under taboo in the newspaper offices, and the critics of several of the greater journals deny themselves absolutely to these vis-itors. When it is considered that, even deny themselves absolutely to these visitors. When it is considered that, even after the destruction by fire of the Fifth Avenue, we have thirty-five dramstic theatres in New York and the suburbs, besides almost as many more variety shows, concert halls and other places of amusement, it is clear that the small army of stalwart boomers would become intolerable if permitted. The consequence is that most of the local managers have abandoned the practice of sending solicitors to the newspaper offices.

During the summer of 1889 my eighteen month-old infant was so afflicted with eruptions that ordinary domestic remedies failed to give any rellef. On his hips would often appear the seeming track of a little wire-like own, and other parts of his body bad sores came and remained till I procured the CUTLA RENEDIES. For some time I used the soap and salve without a blood medicine, but they did not do so well as when all were used together. It has now been nearly a year since the eruption was healed, and I very much feared it would return with the warm weather of this year, but the summer is passed and not one sore has appeared on him.

Mrs. A. M. WALKER, Carsonville, Ga.

ing solicitors to the newspaper offices, but instead mail the particulars of their plans and such other matter as they wish to have published. This material is treated differently by the dramatic editors, according to the usages of the various offices. The situation is sometimes a puzzle to the press agents of the traveling companies that come into town. The majority of these energetic gentlemen intermit their la bors largely upon being informed that they are likely to do more harm than good, but the minority do not take a vacation so lazily. One of these workers has this week poetized his usually prosaic efforts. He has sent to each important journal an original and exclusive poem in praise of an actress who employs him. The verses are smoothly rhymed and metred and they extol the lady's beauty and ability with all the enthusiasm of a knight of old exuberant over his lady

has yet gained publication.-New York Cor. Washington Star. Bad Luck at the Funeral. The funeral of the late Ephraim Geissinger, of near Blue Church, Upper Saucon township, was held with considerable difficulty. At the home of the deceased's parents, about two miles from the church, elaborate preparations east and in London and other European | were made all day Tuesday for the dinner which was to be served at the conclusion of the obsequies. A calf was killed and set aside to await the roasting process. When the hour arrived for this n Wednesday the matrons having the

A Blow at Another American Industry The special boast of the supporters of the McKinley bill is that it provides more "protection" for home industries. The truth is that certain favored industries are benefited while others are seriously injured. We are already familiar with the practical effect of the tin-plate clause on the canning business, and now the New York Herald points out that the clause admitting free molasses for making sugar known as "boiling molasses," will have a damaging effect upon the firms in this country engaged in converting it into raw sugar, by exposing them to the competition of Cuban manufacturers, and will also entail a change in transporta-At present, a large number of American

To the purification of your blood, for the benefits to be derived from a good medicine, as in March, Arril and May, Hood's Sarsaparilla is the people's favorite spring medicine. It stands unequalled for purifying the blood, curing scrofula, salt rheum, etc., regulating the kidneys strengthening and invigorating the whole body, as well as checking the progress of acute and chronic disease, and restoring the afflicted parts to a natural, healthy condition. If you have never tried Hood's Sarsaparilla for your "spring

medicine," do so this season. In one respect Ireland receives est ironcled is the Capitan Prat, another being the O'Higgins and another the Amirante Lynch. would not only be a very bad man, and indifferent to public sentiment, but it is impossible to conceive him to be "of approved integrity". When the body politic becomes saturated with corruption, and the executive and legislative depart.

LEGAL OPINION.

R. Ellegood, Esq., Gives His Opin

Assembly of 1890, chap. 538, relating to elections, upon your eligibility for the office of Clerk of the Circuit Court for Wicomico county, came duly to hand. The facts are: 1st. You were appointed and commissioned by the Governor, nnder sec. 166, Supervisor of election for the term beginning May, 1890. 2d, You resigned January 1, 1891; which has been accepted. 3d. You have since your resignation announced yourself as a can-

didate. Quere: Are you ineligible for

that office by reason of sec. 166?

The section reads, omitting unimportant clauses: "The Governor shall biennially appoint, by and with the advice and consent of the senate, \* \* \* three persons, residents in and voters of their respective counties, \* \* \* who shall be men of approved integrity and capacity, and none of whom shall hold office or employment under the government of the United States or of the State of Maryland, and they must not be candidates for office at the next ensuing election, town. or at any election within the term for then proceeds to fix their salary, provides for filling vacancies and prescribes

find it to be: 1st. Mandatory on the lature may deny to electors the right of Governor to appoint "three persons." 2d. Descriptive of the persons to be ap- for an office created by the constitution. pointed. 3d, Closing with the title or

'style" of the office created. It must be conceded that the legislature very properly intended that the best -The late Senator Wilson left an es- ification and disqualification in his ap- but does not create the qualifications results will surely follow.

the Merchants of Newark, N. J., issued prevent crimes, it can only prescribe penalties for crime. Lastly, such a man would not only be a very bad man, and

ments so indifferent to consequences to appoint vicious men, then a cart load of steel ribbed statutes, as severe as the

laws of Draco, would be as waste paper. Manifestly it was not the intention of the legislature to prevent Supervisor from becoming nonresidents, but that

ion-residents should not be appointed Supervisors; not to prevent the Supervi sors from becoming roques and imbeciles but that imbeciles and rogues should not become Supervisors; not to inhibit their bolding office, but that office holders should not be Supervisors. Must we now halt at the next clause and reverse a like and the natural, implication as to candidates? Clearly the inhibition is on the appointment of candidates to the office of Supervisor. This construction is strained, but is natural, and comports with the subject matter and the grammatical and logical order of the whole sentence, and does no violence to any con-

stitutional principle involved in a differ-"We are not at liberty to imagine an intent and bind the letter of the act to the intent." 29, Md., 85, Kirkley's case. of Jones against Brown, Brown pleadevery part," not from an isolated sentence, much less from a clause of a sentence. 26 Md., 478, Miller vs. Hagers-

50c a year. JOHN WANAMAKER.

Perfection of Railway Travel. The inauguration, by the Baltimore

and Ohio, Philadelphia and Reading and Jersey Central Railways of the famous "Royal Blue Line" between New York and Washington via Philadelphia and Baltimore, was an event of the greatest importance to travellers, and it is very gratifying to chronicle the great success and popularity it has attained. It deserves it fully for it is emphasically the best line ever run between the two cities. We say the best from personal experience, for we have travelled over it and its competing lines, and when we say that over the "B. & O." route the highest realization and perfection of railway travel is attained, we are but giving it just praise. Its trains are the safest, the finest and fastest in America and are run on time." A vestibuled limited express, equipped so completely and luxuriously as to leave nothing to be desired, is run between New York and Washington in each direction in exactly five hours, made between the two cities but is the fastest train in America, and the splendid road bed of the route permits the speed with perfect safety. One can realize what a fast train this is when it is considered that the distance from Jersey City to Washington is almost exactly the same as from Boston to New York, whereas six hours is the fastest time ev er made between the latter cities. The Royal Blue Line's train from Jeresy City to Washington performs the journey in four hours and forty-eight minutes. Notwithstanding the superior equipment and train service of this line, no extra fares are charged on any of its trains. Pala tial day coaches accompany all its trains, open to the public at the regular fare, accommodations in sleeping and parlor

Washington. All of them are composed exclusively of vestibuled cars, protected heated by steam and lighted by the Pintsch gas system.

We heartily recommend this route to all our readers and advise them to take it and none other, for it is not only the best as regards speed, luxury and equipment, but it exacts no extra charge on any of its trains .- Christian Leader.

Your distressing cough can be cured We know it because Kemp's Balaam within the past few years has cured so many coughs and colds in this community. Its remarkable sale has been won entirely by its genuine merit. Ask some friend who has used it what he thinks of ch, cured in 30 minutes by Wool-Kemp's Balsam. There is no medicine at Sanitary Lotion, never fails Sold by so pure, none so effective. Large bottles

Till my heart and soul applaud perfection, noth-ing less. —Robert Browning.

When Elizabeth held the fort in England, and Sir Walter Raleigh used to go to be worth 6,000 crowns, then it became the fashion for a man who was in love to neglect his apparel, as if he were too much occupied to bother about such

his garters were not to be tied. So that A beautiful custom truly, and a Chris- at Wanamaker's could such a when an Elizabethan dude walked down the Mall with these useful appendages hanging on behind him it was equivalent to saying that his heart was gone. Here we have Shakespeare in "As You Like It" putting these words into the mouth of fair Rosalind, "There is none of my uncle's marks upon you; he taught me how to know a man in love. Then your hose should be ungarted, your bonnet unbanded, your sleeves un-buttoned, your shoes untied, and everything about you denoting a careless desolation."-Clothier and Furnisher.

A City at the Bottom of the Sea. The city authorities of Rovigno, on the peninsula of Istria, in the Adriatic sea, which fragments were brought up from the sea bed. A year or two ago a diver streets below the water.

The city authorities recently decided to investigate. They sent down a diver who, at the depth of eighty-five feet, found himself surrounded at the bottom for myself, too.

seaweed and incrustations. He traced the masonry for a distance of 100 feet, where he had to stop, as his diving cord did not permit him to go farther. He had proved beyond a doubt that he had found the ruins of a once inhabited town which, through some catastrophe, had been sunk to the bottom of the sea. Some people think that they identify this lost town with the island mentioned by Pliny the Elder under the name of submerged town may have been a settle-

disappeared.-London Letter. A sample of the first run of sugar from a beet sugar factory situated at Grand Island, Neb., which has been received at this office shows this new product to be as fine as any sugar sold in the marret. It is of clear white, sparkling crystals, and sweet and pleasant to the taste. It cannot be told from the best quality of cane sugar. A circular accompanying it says that the factory has a capacity of 350 tons of beets, or 275 barrels of granulated sugar of the finest quality, over 99 per cent. pure, each twenty-four hours.

The factory is fitted with machinery from France, where this industry had its so great that its capacity will be imme-diately doubled, and numerous factories will be erected in the vicinity to produce further says: "Unfortunately our season proved to be the dryest known for seven teen years, and some farmers failed to raise not only corn and small grains in paying quantities, but beets as well. Many, however, have raised crops which

dustry has come "to stay."-Watertown in diameter. Round the periphery of the wheel thus formed about seventy tons of No. 5 wire was tightly wound, -Philadelphia Record

Miscellaneous Cards.

Catarrh

[Sa blood disease. Until the poison is 1 expelled from the system, there can be no cure for this loathsome and dangerous malady. Therefore, the only
effective treatment is a thorough course
of Ayer's Sarsaparilla—the best of all
blood purifiers. The sooner you begin
the better; delay is dangerous. "I was troubled with catarrh for over two years. I tried various remedies, and was created by a number of physicians, but received no benefit until I began to take Ayer's Sarsaparilla. A few bottles of this medicine cured me of this troublesome complaint and completely restored my health."—Jesse M. Boggs, Holman's Mills, N. C.

"When Ayer's Sarsaparilla was recommended to me for catarrh, I was inclined to doubt its efficacy. Having tried so many remedies, with little benefit, I had no faith that anything would come me. I became emaciated from loss cure me. I. became emaciated from loss of appetite and impaired digestion. I had nearly lost the sense of smell, and my system was badly deranged. I was about discouraged, when a friend urged me to try Ayer's Sarsaparilla, and referred me to persons whom it had cured of catarrh. After taking half a dosen bottles of this medicine, I am convinced that the only sure way of treating this obstinate disease is through the blood."

—Charles H. Maloney, 113 River st., Lowell, Mass.

Ayer's Sarsaparilla,

Dr. J. C. Ayer & Co., Lowell, Mass.

Price \$1; six bottles, \$5. Worth \$6 a bottle. SLATE! SLATE! the best Harrord county, Md., Slates, the best in the country, I am ready to put on Slate Boofs, plain or ornamental, at a very low figure, and guarantes satisfaction. I can also furnish Slate Chimneys. Caps. Paving. Steps. Posts, Hearthstones and various other articles made of Slate. All orders receive prompt attention. Address DAVID JAMES, General Slate Agent and Roofer, SALTESURY.

The first thought of almost every on an hearing a good story is to find some people make a few stories stand them in good stead for a long time, and a tale is told of a Vermont man who had just one story, and who told that on every possi-

doubt, the story of a gun which had once belonged to a friend of his, and he told it well, though perhaps it might have been improved by a little condensation. But his anxiety to bring forward this tale never abated. One new listener in a group of people was quite enough to encourage him to give his "gun" story in all its details.

It is said that he always brought the conversation around to guns as soon as possible; then he would say, "And speak ing of guns reminds me of a good story,' and then begin his narrative. There is a legend in his native town that on one occasion a number of peoole who were well acquainted with this hrilling tale endeavored to keep guns

out of the conversation at a dinner given by a club of which he was a mem-ber to a "distinguished visitor." In vain the gun man tried to bring the talk round to his favorite weapon, and as time went on his expression be came gloomy in the extreme. As the guests rose from the table at last, so the story runs, he stamped violently on the floor as he approached the distinguished guest, and then said, "Just a little cramp from sitting so long, my dear sir, but that sounded almost like a gun; and, speaking of guns, reminds me"-and inking his arm in that of the visitor, he bore him triumphantly from the room to the music of his cherished anecdote. -Youth's Companion.

This is a boy's essay on his family reson. Ma's name is Mrs. Shrimp, and Mr. Shrimp is her husband. Pa is my father. My name is John George Washington Shrimp. Therefore pa's name is Shrimp, so is ma's.

My ma has a ma. She is my grandma She is mother-in-law to pa. I like grandma better than pa does. She brings me limes and bolivars. She don't bring any to pa. Maybe that's why he don't like

Aunt Jerusha is, my aunt. When pa have discovered a little south of the was a little boy she was his sister. I the bottom of the sea. It has been observed for some years that fishermen's her outriding on my sled. Aunt Jerusha nets were sometimes entangled in what don't like her. She calls her "that Mopps appeared to be masses of masonry, of girl." I think Aunt Jerusha ought to be ashamed of herself. Aunt Jerusha lives with us

Aunt Jerusha has a state of health, too. On washing day she has the headsche, and does her head up in brown

of the sea by ruined walls. He says he Aunt Jerusha says nobody knows what "I promise, darling!" replied the strong man brokenly, as he strained her to his bosom and mingled his tears with the layers of mortar.

Any kind, all the layers of mortar.

Continuing his explorations he traced the line of walls, and was able to distinguish how the streets were laid out. He why that's any reason she should scold did not see any doors or window open-ings, for they were hidden by masses of Golden Days.

Describing a Thief. A while ago a lady in passing down a crowded thoroughfare was relieved of her pocketbook. It was two hours before she missed it. After two hours more of search, and returning to places where she might have carelessly left it, it occurred to her suddenly that she had been jostled by five or six men at a street corner. The circumstance made no par-Cissa, near Istria. This island cannot be ticular impression upon her mind at the found now, and it is thought that the time, only that she glanced around with the thought that the street was unusually crowded, and that the men were taking up more room than was necesand in relating the incident she described three of the men so accurately, their features, their clothing, and ever the design on one of their neck handkerchiefs, that they were recognized immediately as being the most notorious pick-

pockets in the city. The pocketbook was found rifled of the money, but with the valuable papers intact, in the engine room of a prominent building. The engine room had a sky-light that opened into the alley near the corner where the men had crowded her. They kindly lifted the screen and dropped it upon the marble floor near the en-gineer. She was not indebted to the art first development. Its success has been of observing closely for the loss or the return of the pocketbook, but a slight hint was given of its value in the unveiling of the brain picture, of which she raw sugar for the refiners. The circular | was unconscious of receiving.-Chicago

Herald. Mr. Disraeli and Sir Robert Peel. Mr. Froude's story about Sir Robert Peel having once asked "a distinguished friend" to carry a challenge to Mr. Dis raeli is a most nonsensical romance, and show a profit of from \$20 to \$60 per scre, it is wonderful that he could print such and it may be truthfully asserted that our farmers are jubilant and that the inrubbish. The truth is that Mr. Froude's fiction is based upon the fact that ther was once a stormy scene in the house of commons between Mr. Disraeli and Sir Robert's brother, Gen. Peel, which In the works of the Mannesmann Tube | would certainly have resulted in a hoscompany, in England, there is a heavy tile meeting but for the intervention of fly wheel ingeniously designed to be absolutely free from any danger of bursting. As this wheel is about twenty feet his story is all wrong, for the general in diameter, weighs over seventy tons and runs at 240 turns per minute, it was feared that a cast iron wheel would be The whole affair was over in less than unable to stand such a centrifugal force. half an hour, as the aggressor frankly The wheel consists of a cast iron hub, to apologized. Lord George Bentinck was which are securely bolted two circular Mr. Disraeli's "friend" and Admiral

plates or disks of steel about twenty feet Rous acted for Gen. Peel. - London thus binding the whole securely together and making a wheel that is practically beyond possibility of breakage by centrifugal power. The circumference of this great wheel travels at the rate of 2.85 miles per minute, about three times as fast as the most speedy express trains.

Philadelphis Record. The Origin of Piccadilly. in a certain street, which from that time came to be known as Piccadilly.—

Clothier and Furnisher. Credence in Medicinal Charms. It is not only among the rude savages of India that the virtue of medicinal charms is implicitly credited. The illiterate and simple minded of England repose all necessary faith in the same fascinating delusions, and there is no ancient woman in any of our remote villages, who professes the customary knowledge and superiority of her age who has not a specific charm for whooping cough, ague, teething, convulsions, pilepsy and every other common ail ment and disease. Every one is acquainted with the effi-cacy of the "royal touch" in cases of the king's evil, or scrofula, and scarcely

week passes that we do not see in our

One has to go back to the days of the famous Spanish "marches," or frontier towns built and defended in Spain's he-roic age by her proudest knights, to find a fit parallel in history to the position held by Gen. Vallejo during the closing years of the Mexican rule in California. He had absolute sway for a hundred miles or more, and he "kept the border." His men rode on horseback to Monterey and to Capt. Sutter's fort on the Sacramento, bringing him news and carrying his letters. Spanish families colonized the fertile valleys under his protection, and Indians came and built in the shad

ows of the Sonoma mission. He owned, as he believed by un able title, the largest and finest ranch in the province, and he dispensed a hos-pitality so generous and universal that it was admired and extolled even among the old Spanish families. J. Quinn Thornton, who visited the coast in 1848, and published his experiences, says:
"Governor General Vallejo owns 1,000
horses that are broken to the saddle and bridle, and 9,000 that are not broken. Broken horses readily bring \$100 apiece, but the unbroken ones can be purchased for a trivial sum." More and more in the closing years of

the epoch and the days of the conquest Gen. Vallejo became the representative man of his people, and so he has received, among many of the old families, the reproachful name of a traitor to California and to his nation. The quiet inensity of this bitterness, even today, is startling thing. I have seen men of oure blood, famous in provincial history, leave the room at the name of Vallejo .-Charles Howard Shun in Century. Columbus' Body.

Christopher Columbus died in obscurity and poverty at Valadolid, Spain, May 20, 1506. By special favor of the monks of St. Francis his body was, for a time, deposited in the vault of their church in that city, but some years later, in pursuance of his own expressed wish, the remains were translated to Hispaniola and placed in a crypt under the cathedral of San Domingo. In 1529 the body of Diego, the son of Columbus, was also buried in the crypt, and some years afterward that of Luis, the discoverer's grandson, was laid with the other two In 1795 the Spanish part of San Domingo was ceded to the French, but before the cession permission was given for the removal of Columbus' body to Havana. A metallic case, supposed to contain the body of the discoverer, was removed and placed in the Cathedral of Havana, and the matter rested until 1877, when a metallic casket was found in the San Domingo vault, which beyond all doubt was that of Christopher Columbus. It was inscribed both within and without with his name and titles, and proved beyoud question that, through haste or carelessness, the persons who effected the removal in 1795 had carried away the body of Diego, the son of Columbus and that the remains of the great admiral now rest beneath the Cathedral of San Domingo.-St. Louis Globe-Demo-

A Northern Hoodoo. Slug No. 4 was a pretty good printer and a jolly fellow outside when the last form had gone down. But he was a southern man, and he couldn't, to save his life, get rid of the dialect of the darky. "I doan't know how it is," he used to say, "but yo' fellahs seem ter see sumpin bery sahprisin' about the way I talk." The boys in the same alley used to have a good deal of fun with No. 4 and his dialect, and one day they teased him so that, dropping a stickful of agate type, he turned upon the one nearest to him, and raising both hands exclaimed: "I cuss yo'! I cuss yo'! I cuss yo' till de hoodoo gits vo'!"

That was all very funny for the boys, but the strange part came three weeks later, when the one who had been "cussed" was discharged for cause. He "subbed" around for a couple of days after that, but couldn't find work again. It looked as if the hoodoo had caught

Slug No. 4 was treated very respect fully after that. Somehow the boys didn't like that hoodoo business. It was too uncanny for them .- New York Even Eugene Smith, secretary of the New

York Prison association, tells a remarkable story of the answer a thief gave to the question, "Is honesty the best pol-It was in the Elmira reformatory, where a class was undergoing instruction. A young man asked permission to answer the question. "I believe hon-esty is the best policy," said he, "because of a case where I knew it to work that way. See? There was two young fellows in New York and they was crooked, see? and they didn't succeed. They went to Philadelphia, and they turned over a new leaf and agreed to be square and honest. They opened a clothing store, see? and they prospered. They got everybody's confidence, and they bor-rowed \$100,000 to enlarge their business, and then they failed and got away with every cent of the money, which they never could have done if they hadn't been honest. See?"-San Francisco Ar-

Remarkable Memories. There was a Corsican boy who could chearse 40,000 words, whether sense or nonsense, as they were dictated, and then repeat them in the reversed order without making a single mistake. A physician, about sixty years ago, could repeat the whole of "Paradise Lost" without making a single mistake, although he had not read it for twenty years. Euler, the great mathematician, when he became blind, could repeat the whole of Virgil's "Æneid," and could remember the first line and last line of every page of the particular edition which he had been accustomed to read before he became blind.—Spare Moments.

Bellows-What makes you fear your son out in Colorado is dead? Fellows (with a sign)—He hasn't written for money for nearly a month .-

result of the settlement of my estate. My family had always been accustomed to live generously, and I had in a general way considered that my estate would clean up enough to educate and graduate my children and make comfortable provision for my wife. After 1 was my administratrix began. My partners, who had always been absolutely fair and square with me, did not see any value in the business we had been years in building up, other than the value of the goods at forced sale. All the firm's indebtedness was a fixed sum-no discount. All amounts due us were liable to shrinkage. Everything seemed to have a new principle of valuation quite have already taught and provided with employment a large number, who are making over \$2000 a year each. It's NEW and SOLIB. Full particulars FITEE. Address at once. E. C. ALLEN, Box 430. Augusta, Maine. alive and a part of it. The more I All Round-trip Tickets good for sixty days. studied the situation I found everything correct, but none the less unfortunate fo my family. I realized that a widow with the cash value, surviving partners' valuation (which by the way was higher than any one else would appraise it), of my estate, would come about five thousand dollars a year short of what I could make he same capital yield certainly, and ome seasons double or treble. Some one made the remark that it was strange I never had insured my life, and I felt like kicking myself as I saw it was just the point which I had left uncovered When my partners wanted the widow to leave her money in the concern at the terest, and I knew that we always had to pay six, I turned over in my grave and waked up. Waked up to the value of life and life insurance, and 1 sent for L. H. NOCK, General Agent, Washington Life, Sali bury, Md.

Money loaned to members of the club at \$4 per cent, No entrance fee.

E. W. HUMPHREYS, Gen'l Agt. Salisbury Md uncements of coming social events. and Van Bibber carefully selected the names of five estimable ladies who were giving receptions that afternoon, and who were making a desperate fight to get into society, as the proper people to rob. At 4 he ordered a hansom, put his list inside his hat, placed a fresh chrysanthemum in his coat, and started smil-

MERCHANUS' HOVEL with keen delight and with much excite-"Now, then," said Travers promptly and decidedly, "the thing for us to do is to send a detective after him and have

him arrested." "Exactly," said the rest. Mr. Van Bibber alighted first at a very handsome brown stone house, just few doors off the avenue on Fortythird street. There was an awning over the door, and a line of carriages on either side of the street. The name of the lady who was paying for this he discovered by referring to his slip, to be Nobles. The man saw him through the door and opened it, saying, "Third floor, front." Mr. Van Bibber pushed his way mums, and threw his overcoat in a corner. There was no one in the room, and Van Bibber, while adjusting hi ver toilet articles. He picked some of these up and bit them, in a most professional manner. "Plated," he remarked, with some disgust; "lady probably gets her silver from a caterer

Hardly worth while to try down stairs. Guess I'll move on to next place." He picked up his overcoat and hat rathered up four silver photograph frames, a complete manicure set of silver, a gold watch, which hung in a slipper at the side of a bed, and a pair of silver backed hair brushes. He placed nese carefully in his overcoat, and went lown stairs in a stately and dignified

In the rear room there was a long table overloaded with things to eat. He gathered up three or four spoons, one at a stored them away back of a bit of china on a sideboard, then he went back after more spoons. Nobody paid any attention to him, and he paid no attention to any one else. He carried a plate with some salad on it in his hand, and picked at this daintily with the arrown as he history of members, but all their public.

The late President Grant once spoke of our western Cordilleras as the "strong box" of the nation. He realized the fact which many people are alow to recognize, that the larger part of our resources is west of the Mississippi. at this daintily with the spoons as he transferred them from the table to the sideboard. When he had a dozen he covered them with his handkerchief and clipped them into his coattail pocket.

Then he water his greatest and some he is recorded as not voting or paired will be recorded in the huge book and future biographers will find Then he put on his greatcoat, and went out as calmly as he had come in. Salisbury, Md.

With a cup in his hand, nodded pleasant
With a cup in his hand, nodded pleasant-

glance at the tea, if he had got what he wanted.

"Yes, thank you," said Van Bibber cheerfully. "I think I have." At the next place he was somewhat surprised to see the same stranger drinking more tea and apparently watching him. But Van Bibber put this down to the fact that he was unduly suspicious, and that his imagination was excited. He was just going out without having made any seizures, when a fat, pompous gentleman, who he was sure must be the host, took pity on his apparently neglected condition and said: "I see you are looking over my bric-a-brac, sir. It is not much of a collection, and I have not had time lately to give it the attention it needs." Then he proceeded, at great length and with evident satisfaction to himself, to describe each separate piece of crockery on the wall. Van Bib-ber was greatly bored, but he was too polite to say so, and was rewarded when the gentleman said, "This piece of Satsums cost me five hundred dollars." Van Bibber kept his eye on the plate, and, when his host turned to greet a

new arrival, slipped it into his coattail pocket and bowed himself out. He placed it under the seat of the hansom very carefully, and drove on to the next place quite assured that he had won his bet, but anxious to settle it without a question or doubt. He did not see the stranger with the heavy mustache pass him in a close cab and dart into the house to which he was going just a minute before him. Van Bibber elbowed his way, with many apologies, to the third floor. There was a dressing table covered with silver trifles, and Van

Bibber smiled complacently. There was a bed in the room, and he could see this as he looked in the mirror. But he could not see under the bed. His overcoat was on a chair, and he made several trips to it and filled the pockets with silver backed brushes and combs. But on the third of these trips his heart stood still, for out from under the bed Why shouldn't I start out some after. came the big stranger with the heavy mustache. He came very leisurely and determinedly "Don't make a row," he said: "vou're under arrest." At that moment two young men came

into the room, pulling off their over-"Help!" screamed Van Bibber; "look!" this afternoon and bring back more than five hundred dollars' worth of silif any of you have any sporting blood." Then he fell on the officer's head just as relentlessly as he would have dropped on a football, and banged his nose into the carpet and sat on his shoulders. The while they thus pinned him to the floor they punched him vigorously in the ribs

> "Look at this!" said Van Bibber, catching up his overcoat by the tail and spilling all the silver over the floor. "Look at what he had stored away! Hold him, will you? while I get a po-

> stairs, so he could not go down that way, and so ran to the back and went down the kitchen stairs and on into the dining room, whence all the waiters had fled. He was quite unobserved in the confusion, and accordingly took time to fill his pockets with spoons and forks of heavy silver. Then he walked out through the excited women, and stepped into his hansom, and told the driver to go to the club.

calmly, as he produced his treasures from the bottom of the hansom, "will probably be around here when he gets his nose patched up. In the mean while I will ask you to value these articles roughly and ring for some messenger

An authority said the lot was worth \$700, and the separate exhibits were promptly returned to where they be-longed by messenger boys, who were instructed to leave them at the door and run. The detective was pacified by some of the club's best brandy and a twenty dollar bill. But whenever Van Bibber enters the club now the men feel nervously for their watches and the waiters count the forks. - New York

THE INCREASE OF FLATTERY.

SALISBURY, WICOMICO CO., MARYLAND, SATURDAY, MARCH 21, 1891.

Personalities of Society. occupation with personality is certainly an American—possibly more or less a generally modern—trait; but our present orgy of compliment is, I think, new variant of it. And it cannot be that we are becoming Frenchified to the point of social insincerity for the mere sake of moral perversity. The truth probably is that as we progress in social ivilization—or perhaps better, as social civilization spreads increasingly and metrates our bewildering and encourging succession of nouvelles couchesthe desire to make one's self agreeable, instead of merely important, is increasng proportionately.

Now, amenity as an art is a difficult one. To succeed in it demands either the "certain felicity" which Bacon affirmed to be necessary to the painter who would improve upon nature, or that long course of social civilization whereby tradition secures the sinking of effort in unconsciousness, and the substitution of inherited for acquired capacities. In the absence of either of these advantages it is the shortest rather than the wisest road to the end of being agreeable that is pretty sure to be taken, and the grosso modo pursuit of, as I said, the line of least resistance results in an amount and degree of personal flattery at the present moment which are alto gether notable.

We have probably not yet wholly emancipated ourselves from the wish to be appreciated, as well as to be agreeable. On the contrary, when we prais our friends for their qualities or their performances in the blank and stark way sanctioned no doubt by our unquestioned sincerity, but dictated perhaps by an imperfect taste, it is probable tha with our motive of being agreeable is very subtly associated a desire to be deemed discerning. We act on the assumption-so tacit, to be sure, as to be unconscious—that the fact of our appreciation of them attests to them acute ness in us. Our well known and universally acknowledged genuinenessthat heirloom inherited from the savages of the Elbe and Weser marshes-prevents our perspicacity in these circumstances from being distrusted.—Scrib-

The Walk of the Farmer. It is well known that country folk, from being so constantly on their feet, are usually blessed with understandings of more generous proportions than those with the neatest, slenderest and most dapper little feet in the world. But then they don't plow from dawn to sunset. As a rule, however, a countryman can be detected in a city by the size of his

Following the plow, too, naturally inluces a jerkiness of gait—a peculiar unertainty about the body's motion, which tirely remove. In the man from the districts where the land is still very rough these marks of his calling are ac centuated. Where the land is full of burnt stumps and rocks plowing requires considerable strength and more skill and the continual bracing up of the plow in the furrows has a tendency to make the farmer get into the habit of walking with his legs wide apart, as in this position he obtains greater control over the plow and maintains his equilibrium.—Detroit Free Press.

The century's closing decade may bring to woman a far wider and fuller entry into her domain. It is but a little over four decades-less than forty-two years ago-since the meeting of the first woman's rights convention. The women only that convention but all that has followed it of right and justice to women a possibility, are some of them still with us. Those of them who have "gone over to the majority" went thither within the full memory of a generation now living and working. The names of Lucretis Mott, of Angelina and Sarah Grimke, of Frances D. Gage, of Abby Kelly Foster, of Sojourner Truth, born a slave and rightfully coming to wear the title of the "Libyan Sibyl," were but a few years ago answered to on earth by their possessors. Today they may be well written on every woman's golden roll of remembrance of the dead .-

E. Dickinson in Scranton Truth. Dress skirts are growing wider, particularly for evening dresses. Wast and tulles are not so much worn in the evening as formerly, except for young girls. There are charming new shades one of the most delicate and becoming: The pale reddish mauve is one of the best worn shades in foulards, particularly for yokes and sleeves with the spotted

or ringed foulards.-Boston Transcript. The cottage built by the actor Joseph place was on the avenue itself, and was

How to Take Care of a Piane. With proper care and attention a good piano should last a family a lifetime. If

erang Element in Latter Day this is not given it the piano will in time become harsh and "tin-panny," and afford little satisfaction or delight to its owner. Ordinary practice, whether by a child or a grown up person, will not injure a piano in any way. It is not necessary to be a professional piano player and to know exactly with what orce to strike the keys in order to keep the instrument in good condition. Of course it will not be improved by thumping the case or by striking the keys with any hard substance. Neither does this remark apply to scho institutions where playing is taught, and the instrument is used continuously for

ten or twelve hours every day. In the latter case the felt portions will wear out sooner than if it was used in a private family.

The matter of tuning should not b neglected, and should never be intrusted to any other than an experienced person. Incapable tuners very often work irrep-arable injury to the most perfect and costly instruments. During the first year a new piano should be tuned every three or four months at least. After that it will only be necessary to have it tuned at longer intervals.

Dampness is the most dangerous en-emy the piano has to contend against, and for this reason the climate must be considered. If the instrument is placed in a damp room, or left open in a draught of air, the result will be that the strings, tuning pins and the various metal parts will become coated with rust, and the cloth used in the construction of the keys and action becomes swollen. It is positively painful to play on such a piano.—Charles H. Steinway in Ladies' Home Journal.

The literary woman of the past was called a blue stocking. The literary woman of the present is a butterfly in dress. The gayest of colors, the richest of decoration, the extreme of the mode characterize her attire at the gatherings of Sorosis, where the literary element strongly predominates, and one is impressed by the brilliancy of the spectacle. The president, Mrs. Clymer, is as picturesque in her attire as she is dignified in her manner. Some combination of heliotrope and gray, with just a touch inal of some quaint old painting. Jennie June, now that she has laid aside her widow's weeds, appears in light colden brown dresses and mantles, with bonnet in the same shade, trimmed

with creamy lace. Mrs. Dr. Lozier surprises every one with a new toilet at every Sorosis meet- was ing as beautiful and dressy as the pa-Mrs. Collis, the Alaskan traveler and writer, is a very handsome and effective dresser. Well, I put off some company's manager there. A portion of other work and completed his suit within the time agreed upon, and sent it to his hotel about dusk with the bill-\$80. The man brought back the money, four \$20 bills, and I put this in the safe and Louis. In 1831 he started with a wagon went home. The next day when I sent train for Santa Fe, but was killed by the my depocit to the bank those four \$20 bills were returned marked 'counterfeit.' Well, perhaps I wasn't mad. I sent down to the hotel, but of course the man had gone. I placed the matter in the hands of the detectives, but they failed to find the swindler. Many years afterward I saw his picture in a rogues' gallery, and learned that he was one of the in Vermont, and former! or Maine, in most expert counterfeiters in the coun-

try. I think he is now in a western penntiary, but it was a long time before the government officers captured and A QUESTION OF EXPANSION. "One of the funniest swindles ever played upon me was by a government clerk, who was brought to me by the chief of his division, for whom I had made clothes for years. I measured the man myself, and was particularly careful about the shoulders and chest, as I pride myself upon the fit of my coats, ent the suit to his boarding house on Saturday night, and the next Monday morning, bright and early, he was down to the store very much enraged because the coat and vest didn't fit him. He price of the engine was sufficient to pay said the trousers were all right, but the coat and vest were altogether too small. I sent up for the garments and compared their measurements with those I had marked on the books and found that they corresponded exactly; so I wrote a note asking him to call in after his office was out in the evening. He did so, Thanked." He says he is reminded by and I asked him to try on the coat and this Chinese formality of a pedagogue west. He went into the back part of the store, and when he came forward with on every occasion. If he asked a boy the garments on they would not meet by what time it was, the proper form for at least three inches. I was nonplussed. his reply was, "Half-past 2, sir, thank I was certain that I had made the correct | you." measurements, but there was the man, The constitutional maxim, "The king fit. I offered to make him others, but official language, be translated, "The he was mad and wouldn't have it. He emperor can do nothing that is not bepaid me for the trousers and was going | nevolent." to leave the coat and vest on my hands. An amusing incident occurred not

made such a blunder, for he liked the the president of the board of ceremo goods. He added in a reflective sort of a way that he might split up the back of the vest and set a piece in so that he could button that, but that the coat day a terrible snubbing was administrated the president of the board of ceremonies. This record is said to honor of having been invited to a sacrificial feast by the emperor, and the next day a terrible snubbing was administration. would always have to stay open. Final-ly he said he'd give me \$20 for the gar-It appears same kind. Herrings cry like men, rooth grunt like pigs, and tench make a noise like frogs. Conger cels bark and codfish hiss. Lobster and crayfish scream when they are boiled, and Paris soles have a way of communicating the fact a week after I saw him at the theatre with the coat buttoned over his chestt was a Prince Albert-and fitting him beautifully. I couldn't understand it until I was told that he had formerly been a contortionist, and had the power to throw out his chest far beyond its normal size. He had just beaten me out of \$15. I didn't make any more clothes for him, but I heard that he 'beat' another tailor in the same way." -Washington Star.

Enterprise can hardly go further than this effort of an uptown grocer: "Fresh aggs warm from the hen."—Binghamton Leader.

In 1755 a wave sixty feet high drowned 80,000 people at Lisbon, and in Scotland a boat on Loch Lomond was carried forty yards inland by a wave which was suddenly formed on the surface of the loch by the same cause.

NEW ORLEANS SECRET ENEMY. "All good citizens are invited to at tend a meeting on Saturday, March, 14 at ten o'clock a. m., at the Clay statue, to take steps to remedy the failure of justice in the Hennessey case. Come

prepared for action." The above call, brief as it was ominous was issued at New Orleans last Friday night above the signatures of the leading professional and business men of the

Chief of police Hennessey was murdered in cold blood in the Italian quarter of New Orleans, October 13, 1890, in the prime of life and usefulness. He died while courageously, and because of fighting his city's secret enemies. The Mafia, an organized band of Cicilian outlaws, has existed in New Orleans for the past thirty-five years. It was against this their villany to be allowed to live. His death was therefore ordered by the Mafia. The Italian vendetta was apprehend-

ed and several arrests were made. At their trial recently, men, whose cuilt was apparent, were acquitted by a jury, which, it is claimed, failed of its duty either because of bribery, or fear of the Mafia. An indignant populace, headed by the first citizens of New Orleans, responded to the call, and marched, their posterity self-respect and uncon-5,000 strong, to the parish jail where Hennessey's murderers were in custody. The prison walls were besten down and eleven of the Mafia were shot dead.

PHILADELPHIA.

TOO MUCH CANNOT BE SAID REGARDING OUR STOCK OF

Black and Golored Dress Goods,

as it excels even all our past efforts. In making the claim to show at all times the largest stock in America of Fabrics for Ladies' Dress, we do not mean to undervalue other excellent stock; but the fact remains that we, more than any other house, make a specialty of the Dress Goods business, largely concentrating our great facilities on it, devoting more selling space to the goods than any house we know of abroad or at home, and naturally transacting the largest business. These facts are recognized the country over, and orders come to us from far and near-Boston, New York and Chicago conceding that conservative Philadelphia leads them in this line of business.

A sight of our long counters these busy days is a most in-

Those who cannot visit our stores in person will be care ully, expeditiously served through our thoroughly organized

eresting and instructive spectacle to every observer.

## Mail Order Department.

We are issuing Department Catalogues, containng illustrations, prices and other information regarding the different stocks, and shall be pleased to forward them on request

Perfection of Railway Travel. The inauguration, by the Baltimore and Ohio, Philadelphia and Reading and Jersey Central Railways of the famous "Royal Blue Line" between New York and Washington via Philadelphia and Baltimore, was an event of the greatest importance to travellers, and it is very gratifying to chronicle the great success and popularity it has attained. It leserves it fully for it is emphatically the est line ever run between the two cities. We say the best from personal experience, for we have travelled over it and its competing lines, and when we say that over the "B. & O." route the highest ealization and perfection of railway travel is attained, we are but giving it just praise. Its trains are the safest, the finest and fastest in America and are run on time." A vestibuled limited express, equipped so completely and luxuriously as to leave nothing to be desired, is run between New York and Washington in each direction in exactly five hours, land—ran their trains almost as they liked, making up time when they had fallen behind; picking up such information as they could as to the state of the track ahead of them, and for the most part plunging ahead with their machines without much more than a surmise whether they should bring up at their destination or at the bottom of some high ampanisment. Which is not only the fastest time ever made between the two cities but is the fastest train in America, and the splendid road bed of the route permits the speed with perfect safety. One can realize what a fast train this is when it is considered that the distance from Jersey City to Washington is almost exactly the same as from Boston to New York. which is not only the fastest time ever same as from Boston to New York, Some of the results of this want of whereas six hours is the fastest time evsystem would have been amusing if they er made between the latter cities. The had not been disastrous. Mr. Laurence Royal Blue Line's train from Jeresy City CONSUMPTION | COUGH OR COLD Oliphant, an English traveler and author, tells in one of his books a rather grim story of a trip which he made by rail, in 1855, from Chicago to New York. Over a part of the distance the train made the extraordinary speed, for that time, of fifty miles an hour, and presently it ran tial day coaches accompany all its trains. open to the public at the regular fare.

> There are six "Roya! Blue Line" trains each way, daily, between New York and Washington. All of them are composed exclusively of vestibaled cars, protected by Pullman's anti telescoping device, heated by steam and lighted by the Pintsch gas system.

We heartily recommend this route to all our readers and advise them to take it and none other, for it is not only the best as regards speed, luxury and equipment, but it exacts no extra charge on any of its trains .- Christian Leader.

ane Author and His Work. That the author is easily led to betray excessive interest in himself is a fact due in a great measure to the peculiar conditions upon which his artistic success depends. Every piece of his work is the product of a mind that should be, from first to last, completely absorbed in its model at will, with the certainty of recovering at a moment's notice the desired

move; each one, to be convincing, must not only shine with the light of varied mstance, but must also show cause for existence by effect upon the others since the interest of a story flags the in-stant its characters are at a standstill. As a natural consequence their creator carries them always with him, really most alert in their behalf when he seems

At home and abroad he is ever playing his game of chess "whereof the pawns are men," with no board to guide him but that mysterious one traced upon the table of his brain. All he sees and hears contributes its mite to the source of suggestion from which he draws, and by his skill in the drawing his power is determined. Intricate problems force them-selves upon him, to be solved with the nicest discrimination out of his own experience. With him eternal vigilance is the price of victory.—Point of View in

A Costly Fan Without an Owner One of the prettiest things in the mu-seum of the dead letter office is a lady's fan made of stork feathers, the plume being rarer and richer than the fines ostrich plumes. It is most magnificen in appearance, and doubtless graced the me of some court beauty in the Old World. It came to this country from Europe many years ago, but no clew to its owner or origin was ever obtained In one of the cases there is a box of wed ding cake, which came to the dead letter office six years ago as unclaimed. It is getting a little old and discolored, but by this time would probably be pretty dry eating. Considering its present characteristics it might be excellent wedding cake to dream on." It certainly has all the elements necessary to produce a fanciful nightmare. Rosaries are quite common in the cabinet and

crucifixes are also plentiful.—Washing ton Cor. St. Louis Globe-Democrat. An F street attorney relates that h received an application for a pension from a country lawyer in Michigan re-cently, in which the claimant signed his name as "Daniel O. Connell." In subsequent papers filed he wrote it "Daniel O'Connell." The attorney wrote to the lawyer to report whether the name was O'Connell or Connell. The provincial Blackstone retorted in what he evidently ing up with this bit of bucolic wit,

The name is O'Connell, as any foll
might know; but what difference does it
make, anyhow, whether you say, 'Mo-Carthy, come out of the house, or come

out of the house, McCarthy?"-Washington Post. Miss Adelina Patti Baird, a goddaugh ter of the diva and daughter of a rich English iron founder, has a string of pearls collected from the days of her babyhood. One of her first gifts was a number of fine unstrung pearls, and to these have been added others from time to time by parents and relatives until she now has a matchless necklace.

Until late years the salutation of "Merry Christmas!" was almost unknown in many southern homes. After the fashion of the "waits," in many places negro men and boys some time be-fore Christmas go in the evenings from door to door singing, in the hope of re-ceiving gifts of money or catables.

If you put a spoon in a glass before pouring in the water the glass will not crack, even if the water is boiling. But if there is no spoon used it takes a new glass to every hot drin...

Time Tables. I knew a boy, a scrap of a lad, who almost needed a high chair to bring him up to the general level of the dining table, who liked to read the encyclopedia. table, who liked to read the encyclopedia. He was always hunting round in the big books of the encyclopedia—books about his own side—for what he wanted to know. He dug in it as another boy would dig in the woods for sassafras root. It appeared that he was interested in natural history and natural phenomena. He asked questions of these books, exactly as he would ask a living anthority and kept at it fill he got an "CAPE CHARLES HOUTE." SOUTH BOUND TRAINS. authority, and kept at it till he got answers. He knew how to read. Soon that boy was an authority on earth-quakes. He liked to have the conversation at table turn on earthquakes, for then he seemed to be the tallest person at the table. I suppose there was no earthquake anywhere of any importance but that he could tell where it occurred and what damage it did, how many houses it buried, and how many people it killed, and what shape it left the country it had shaken. From that he went on to try to discover what caused these disturbances, and this led him into other investiga tions, and at last into the study of electricity, practical as well as the-oretical. He examined machines and invented machines, and kept on read-ing, and presently he was an expert in electricity. He knew how to put in wires and signals and bells, and to do a number of practical and useful things, and almost before he was able to enter

had not read as much about electricity is he had.—Charles Dudley Warner in St. Nicholas. Abstract Numbers. It is not easy for children to conceive of numbers apart from sensible objects. For this reason our el-mentary books in arithmetic present pictures of the articles named. The child learns to add and subtract simply by counting. Such a ractice has its place in instruction, but apt to be encouraged too far. The reult is the ridiculous habit of counting one's fingers in the work of arithmetic. The Wallachian pearant is said to perform all multiplications above four times four by this method. It is evident from the word which we use for the several figures, digit, that they originally represented so many fingers.

The circumstance affords a reason for the decimal system of counting. The highest number that could be expressed by a show of fingers was ten. We know that an early system of counting was by

fives, or by the single hand. Perhaps our duodecimal system of counting by twelve, or the dozen, grew out of the practice of counting the two hands together with the ten fingers. The score, or twenty, was a primitive

ssemblage of fingers and toes. It came into use at a time when people went barefoot. The French use this method in forming their tens; four twenties is French for eighty. The word "score" came from the practice of notching a stick when one had counted to twenty. In the Maya dialects of Central America the word for twenty is the same as for man. It represented his value in mathe matical calculations.—Youths' Compan

Military Reservation in Early Kansas All along the outer margin of the resrvation were grouped the camps of emigrants; not many of them, but enough to present a curious and picturesque sight. There were a few tents, but most of the emigrants slept in or under their wagons. There were no women or children in these camps, and the hardy men had been so well seasoned by their past experiences, journeying to they did not mind the exposure of sleep-ing on the ground and under the open skies. Soldiers from the fort, off duty and curious to hear the news from the outer world, came lounging around the camps and chatted with the emigrants in that cool, superior manner that marks the private soldier when he meets a civil-

ian on an equal footing away from the haunts of men. The boys regarded these uniforme nilitary servants of the government of the United States with great respect, and even with some awe. These, they thought to themselves, were the men who were there to fight Indians, to protect the bor-der, and to keep back the rising tide of wild hostilities that might, if it were not for them, sweep down upon the feeble territory and even inundate the whole

During the present century three girl neens have, before the advent of Queen Vilhelmina, almost simultaneously ascended the throne of a European nation: Maria da Gloria of Portugal, Isabella of Spain and Victoria of En-gland. The two first had the misfortune of attaining to the regal power while still mere children. There has een a wide difference between the histories of the spoiled daughter of Spain and the headstrong Portuguese damsel and that of the grand and conscientious eign over Great Britain. By her close affiliations, through her sister, the Duch-Queen Emma will probably profit by the rample set by the Duchess of Kent in

the education of her daughter.-Cor. Philadelphia Telegraph. Waves 350 Feet High. The waves that hurl themselves against Lot's Wife," one of the Mariana islands, drench it to its topmost pinnacle, about 850 feet above sea level. A tremendous surf sometimes runs at Baker island, even without any strong wind, or perhaps the vind blowing from a contrary direction. An unbroken wall of water twenty-five feet high and one-quarter of a mile long rolls in, threatening to deluge the island, and affording one of the grandest sights naginable. These waves are said to be due to the southwest monsoon blowing strongly in the China seas, many miles away. - Chambers' Journal.

And was much surprised to notice the sult of the settlement of my estate. My family had always been accustomed to live generously, and I had in a general way considered that my estate would clean up enough to educate and raduate my children and make comfortable provision for my wife. After I was buried, the troubles of my wife, who was my administratrix began. My partners, who had always been absolutely fair and square with me, did not see any value in the business we had been years in building up, other than the value of the goods at forced sale. All the firm's ndebtedness was a fixed sum-no discount. All amounts due us were liable to shrinkage. Everything seemed to have a new principle of valuation quite alive and a part of it. The more I studied the situation I found everything rrect, but none the less unfortunate for my family. I realized that a widow with the cash value, surviving partners' yaluation (which by the way was higher than any one else would appraise it), of my estate, would come about five thousand dollars a year short of what I could make the same capital yield certainly, and some seasons double or treble. Some one nade the remark that it was strange I ever had insured my life, and I felt like kicking myself as I saw it was just the point which I had left uncovere When my partners wanted the widow to leave her money in the concern at the risk of the business at four per cent inrest, and I knew that we always had o pay six, I turned over in my grave and waked up. Waked up to the value of life and life insurance, and I sent for L. H. NOCK, neral Agent, Washington Life, Salis bury, Md.

# HYLHS + PLOW, # AS IMPROVED FOR 1891.

It is solid comfort to Plow with it, and the Farmers say it is the

Sole Agents for Maryland and Delaware, THE IMPROVEMENTS ARE:

Ist. The High Arched Standard cannot be choked, and is provided with Side Flanges on its front arm and a clamping device on its rear arm which POSITIVE. LY prevents any side movement to the Beam, insuring the proper "land" at d the correct running of the Plow, no matter how long in use.

2nd. The Beam is disconnected from the Handles, and is secure d to the standard by two bolts assisted by the Improved Beam Scat and Beam Helding Device, uniting and holding these parts together with more firmness and greater security than is possible under any other known arrangement.

3rd. Under the rear end of the Beam is a simple device to make the Flow rundeen or shallow, or to land, more or less, to regulate both the papers and wings of deep or shallow, or to land, more or less, to regulate both the DEFTH and WIDTH of the furrow. This is the most perfect "Beam Adjuster" yet devised, and she until the examined to be appreciated.

4th. As with all of our Plows, neither handle is attached to the Moldbeard to ollect trash, weeds, etc., and their lower ends are not near enough to the ground

OUR WHITE'S CHILLED PLOWS

Are made with the same Beam Securing and Beam Adjusting devices now used on the Atlas and herein described. The shape of the Mondborrds of our Chilled Plows has also been imitated, but the metal used in ours is fulled not the common hard white iron used in the Moulds of many so called Chilled Plows. We warrant the moulds of our Chilled Plows and to be as easily corroded.

Best Chilled Plows Made Try them with other so-called Chilled Plows and be convinced. They are made at the best appointed Agricultural Implement Foundry in the State, and using the best brands of Virginia Pig Iron, the Castings made by it for the Atlas. White's Chilled and other Plows are superior to other makes for durability smooth-

'Bus meets trains and boats. the cup. Yours truly." Mr. Bulles said: "That will do. When they are finished let me see them." He thought he detected a slight unbending After 28 years' experience at the forge Geo. E. Marvel, the modern Vulcan, is still working at the bellows on East Camden St. He can forge anything from a bill-hook to a thunderbolt (over the left) and asks the public to continue to treat him with that consideration shown him in the past. I remain yours in the leather apros. GEORGE E. MARVEL, SALISBURY, MD. them later, and I'll post them myself." Office of the Co. Commissioners of Wic. Co. SALISBURY, MD., Dec. 23, 1890. day following he refused three invita-

tions to dine with distinguished people, ordered an architect to call and see him issued July 1st., 1886, will be redeemed on the 1st day of July 1891, interest will about building a country house at Newport, and wrote to order a diamond neckstop on said bonds if not presented for redemption on the said 1st of July 1891. The typewriter girl began to take a D. J. HOLLOWAY, Clerk.

on.

But on the fourth day she appeared with even a colder and more haughty air, and laid three letters down upon his lesk. She always opened his mail for im, and divided the private notes from "are three notes which I did not know whether to hand to you or to the clerk." Bulles glanced at the bottom of one of

them and read the name "Charles Bur gess." The note ran: "HENRY BULLES-Dear Sir: I am in receipt of a note signed by you and bearing the number of your office, which refers to a yacht and an imaginary cor-respondence which has passed between us on the subject of such a yacht. As I do not know you or anything of any such yacht I can only imagine that some one

is imposing upon you, and return you your letter. Yours truly, "CHARLES BURGESS." Mr. Bulles grew exceedingly red and dared not look up. He wondered how

far the girl had read. The second note said:

"The private dining room and supper ward has never been satisfactorily decither explicitly or by inference, by the ordered by you for Tuesday evening termined, but what perplexes and pureless scientists most is its persistent variation.

Why the magnetic needle points northesid to have been extravagantly lauded, either explicitly or by inference, by the bachelor who exclaimed, "I'm glad of its scientists most is its persistent variation."

One Registered Jersey Bull, "St Helier of St. Lambert," terms \$2; One Jersey Bull (can be registered) terms \$1; One Jersey Red, and one Berkshire Boar, terms \$1 each. All these animals are thoroughberd and are for service on my form the Williams Homested between

tained a clipping from a newspaper.
"Dear Hen," the note ran. "Have
you seen this Associated Press clipping,
and what in Heaven's name does it mean! Some one has evidently been playing a practical joke on you, and one that must strike you as a most unpleasant one."

The clipping read as follows:

E HENRY BULLES INSANE?

WELL RECOVER HEW TORK STOCKED OFFER HE PRINCIPE GREAT CONCERN.

AMERICAN GREAT CONCERN.

AMERICA

Mr. Bulles laid the clipping down and gazed desperately at the typewriter girl.
"Did you post those letters?" he asked.
"Yes," said the duchess severely. "I found them on your desk after you had left, and supposed you had forgotten them, so I posted them myself. Wasn't that right?"

wept the hours away last night, O night more wretched than the day! lot doubting but with morning light To see your face across the way, he current was not deserved. "I guess," said Mr. Bulles, "that I To see your lace acree the way.
The curtain was not drawn saide,
No face leant smiling on the sill;
The rain still fell, the bleak winds sighed,
Your house was desolate and still.

—New York Tribune.

air or water.

THE NEW TYPEWRITER.

THE EMPTY HOUSE.

The rain fell heavily last night—
I gazed across the street in vain,
Mad hope, to see your flickering light
Shine in the locely room again.
A tempest shook the house last night,
The torrants best against your room.
And not a star peeped from the height
Your house was silent as the tomb.

Mr. Bulles, the broker, had a new type-writer. He made his head clerk try the different applicants and test their skill and engage the best one. The one the head clerk engaged was a large, impressive looking soman of much beauty and with the haughtiness of a duchess. She dres well and richly, and her manner when sitting before her machine was that of a grand woman of society who condescended to play occasionally on the piano. She had much the air of a woman who was employing the men in the office to take care of her millions and make out her accounts. Mr. Bulles always feit as though he ought to ask her permission o smoke, and was almost afraid to ask her to take down any of his correspondence. What work he dared to give her she did as well as it could be done, so he had nothing against her except her pride. He determined finally to break down her pride. He had been uncomfortably im-

pressed with her dignity; now she should earn what it was to feel that way toward So the next morning he called her in, and after dictating a few obsiness letters he said: "Now on the smaller paper, places, are you ready? Let me see." He mused as he bit carelessly at the top of his cigar and gazed out of the win-

the position of minister to so important a city as St. Petersburg to succeed

"The Hon. James G. Blaine, Washington, D. C." The typewriter girl took this down

her in again during the afternoon and dictated the following note: "Delenation of the largest private dining rooms for finds a five dollar counterfeit bill in his me this evening and prepare supper for money drawer at night, is liable to argue 100? I find my rooms are too small, and that he cannot well afford to lose the will have to have one of yours. Serve amount, and also that a counterfeit the same supper as ordered and prepare if or for dancing. You can go to any length in the matter of decoration, but keep the cost of the flowers down to

The other note was: "Dear Old Man: I should be very But its mission does not end here. Per-glad to accept, but Tuxedo never did haps the last holder of the bill can tell agree with my digestion. Certainly, you | who paid it to him. If so the countercan have all the horses you want. The feit starts to retrace its course, but it two leaders are in town, but I will have rarely goes very far before it stops, and them sent out to you. I think the price the whole scheme is worked over again. you offer for the coach is reasonable, We frequently have counterfeit money and I will let you have it fer that, as I offered for deposit. A merchant may am going to give up coaching and get a bring in several hundred dollars, and

am sure, if looks go for anything, that Does he destroy it? Perhaps, if he is the subject is that other states, if not all she should beat anything affoat. I hope a scrupulously honest man."—Chicago of them, are destined sooner or later to follow Nevada's example. The population on this continent cannot necessarily Old English Customs Railway ticket offices still retain the in the superior manner of the young Another curious survival is the prac-woman, but he was not too hopeful. "If tice of eating game and venison "high." those don't impress her." he said, "I'll we never eat poultry or beef and mutwrite a letter of regret to the queen toton "high," but game and venison used here, and that they will continue in their

days, when the names of intending pas-sengers were literally booked. Another curious survival is the prachim I can't come over this summer to siderable time on the road, so that they spend August with him." When the girl brought in the letters, finished and Hence it became customary and even ready for his signature, he tossed them fashionable to eat them "high," and the carelessly aside and said: "I will sign practice has endured to the present day. Then there is the old fashioned greet-He signed them and slipped them in their ing, "God be with ye." Perhaps not all envelopes under his other papers, where know that the meaningless words "good-the clerks might not see them, and by" are a compression of the above pious planned more for the future. On the wish.—London Tit-Bits.

It is amusing to watch how broken and bankers who put their bonds and stocks in their boxes in the vanlts of the New York Stock Exchange overnight close them. Some pull away at the han little more interest, and said "Yes, sir," close them. Some pull away at the han-instead of simply "Yes," which was dle of the lock as though they would something. He felt that he was getting pull it off in their anxiety to make sure on. largely the result of nervousness; others take it very easy, give the handle one or two turns and go off satisfied. One gentleman said to another down in the vaults the other day: "A queer thing happened some five years ago. Inoticed that the door of a certain box was on the crack and its key sticking in it. I im-mediately notified Mr. Cole, who is in

charge there, and who at once closed it. "I then went to the gentleman who had forgotten to lock up. 'Oh, it's all right,' he said; 'I intended to go back.' But I noticed that he was all in a tremble, and that he went over to the vaults in a jiffy. He staid there an hour counting over his securities. There must have been a million dollars' worth in that box, for I noticed loans of one and two hundred thousand dollars apiece. He didn't even take the trouble to thank

me when I went over and notified him of his carelessness."—Epoch.

a hoax, or has some one forged your name? Awaiting your reply, etc.,

"DELMONICO'S."

Mr. Bulles sank still farther into his chair. He opened the last letter with a trembling hand. The girl still towered above him like an avenging spirit.

The letter was from a friend and contained a clipping from a newspaper.

"Wave of the needle varied from 10 degs. 15 mins. east to 6 degs. west. In Dakota the average variation is 13 degs. and 30 mins. east; in Minne are sota 11 degs. east, while in Montana it it is 20 degs. east. It does not point due north except in a few localities, and at no place does it continue to point with a given angular distance from the north given angular distance from the north for any stated length of time.

for any stated length of time.

In many places it changes secularly, annually, diurnally and hourly, and is, besides, further subject to fluctuations reducible to no method of tabulation.

In the vicinity of iron in any shape, or of magnetic sands, it is deflected toward the material attracting it. The needle has been known to vary 5 degs. in a distance of one mile, and 1 deg. and 30 mins. in two hours when left stationary in a certain locality.—St. Louis Re-

it is first necessary to explain that this
western part of the world, known as
North and South America, is from the
scientific point of view an inferior continent, as compared with the land masses of the other hemispheres. By that is Caribbean sea, where the sun has been productiveness, it is less adapted for the support of animal life. To show that this is so, make a little comparison for yourself between the beasts of this hemisphere and those of the other. The ele-phant of the Old World is represented here by the tapir. What we have as a substitute for the camel is the llama, which is just big enough and strong enough to carry what would be a load for a man. The lion and tiger of Asia and Africa are represented on this side

of the earth by little more than big cats. LOOK AT OUR MONKEYS. "But to arrive at the most marked exhibition of this contrast you cannot do better than consider the monkeys, which torms, and the graceful flying fish, which are most highly developed of all beasts, countless myriads of minute animal life is there to be found in the Americas to floating about, so that when the sun is correspond with the anthropoid apes of seems to be filled with motes. Only some withered blossoms, Crumbling to dry decay; Only a glove half torn into, And idly throws away. Only a heart that's breaking— That is, if hearts could break Only a man adrift for life, All for a woman's sake. Only a few such tokens,
Prized by a love sick fool,
Naught but the ashes that when love's hot fiame grows could be first man by thousands. The dupe of a heartless first, Not the first time that priceless love was treated like common dirt.

Only in jest, you know it

Now, though it's rather late—
Rather too late to turn your life
And seek another fate.

You're not a man life thousands,
With heart that will veer and twirt,
And feel a glow at the word and giance
Of every firting girl.

Finished forever and done,
Wrecked by a treacherous smile:
Following madly a will-o'-the-wisp,
Haply it but for a while!
Only a heart that's broken—
That is, if hearts can break;
Only a man adrift for life,
And all for a woman's sake. A Detroiter who deals in real estate law, insurance, loans, lawsuits, politics, etc., went over to Chicago the other day While nearing that city a man came to him and confidentially remarked: "There's a chap in the car back there trying to get a \$20 bill changed. It's a

base counterfeit, and I want to put you on your guard." He was warmly thanked for his kindness and passed on, and five minutes later a man appeared with a bill in his hand and asked: "Friend, can you change this twenty?"

"Sorry to say I can't," was the prompt reply.
"Well, let me have ten and you keep the bill until we get to Chicago." "Can't do it."

"Can't you let me have five?"

about it," said the stranger, and off they as to how he wanted the different charwent to the conductor. "Give me two tens for this?" brusquely queried the stranger, as he handed out "If I can," replied the conductor, scarcely glancing at it.

He made out a ten and two fives and passed them over, and the Detroiter handed over the amount of his bet,

kicked himself into the next car, and he never saw a bit of Lake Michigan as the train made its way into Chicago.-Detroit Free Press. "No, sir, but I'll take that bet of yours hours the next morning at 9:30 for Albany, where a black cloud rising up into the clear skies. But for its blackness one might believe it a signal snoke made by the Indians. It is a cloud trying to lift it self over the mountain from the east side. It began forming fifty miles away, and it has traveled slowly and followed the windings of the windians. It is a cloud trying t over, we repacked and took a train the hours the next morning, and the after- water have

nours the next morthing, and the manager noon was spent listening to the manager read a new play and give his directions as to how he wanted the different characteristic from its first formation. The cloud lifts itself up and up, and in "That night after the play we took its struggles it sways like a balloon. As be with you, good friend? Have you the 1:35 a. m. train for Rochester, where it nears the mountains the vapors are we arrived in time for breakfast. Then condensed and become heavier, and as let us talk it over. It is a duty you owe we arrived in this for oreariss. Then we rehearsed the new play till noon, and in the afternoon we rehearsed the old one. The hotel westopped at was a poor one. The hotel westopped at was a poor thunder and lightning; only a black one, and the meals were worse. My menacing cloud fighting itself.

dressing room at the theatre was so cold Up! Up! Up!
Ah! Heaven help them! There is that I got a sore throat. We took the 2:20 a. m. for Buffalo, after almost nothing but animal life in the valley so freezing to death at the hotel, and in far as we can see, but every on-looker order not to mar the even tenor of our utters a groan of despair as he sees the cloud suddenly fall out of sight behind We all counted, however, on being the peaks. What does that signify? It able to get some rest at our hotel in means that the cloud could not lift itself high enough to clear the mountain, and means that the cloud could not lift itself fast we were ordered to report at the that when its lower edge hit that tall that we were ordered to report at the theatre for rehearsal. We rehearsed till a o'clock, and were told to be back at 3 to rehearse an act of the old play. I lay down for a moment after dinner and did not awake till supper time. Of course I missed the rehearsal, and of course I was fined \$5.

ON THE ROAD.

"The next day being Saturday the manager was good enough to leave us to manager was good enough to leave us to that when its lower edge hit that tall peak on a line with us there came cloudburst. The tons of water in that big cloud fell to earth a force you can scarcely conceive. Trees were made into matchwood. Rocks weighing a thousand tons were whirled about. Bowlders which a hundred horses could not pull from their beds were sent flying down the mountain side like marbles. manager was good enough to leave us to Every handful of earth, every tree, shrub, ourselves in the morning. But, my love, you may be sure that if any one spent vine, flower, every stone, rock, and bowlder which could have been moved the time taking in the sights of the city it was in his dreams, for no one got up

only by the blast of a hundred pounds of powder is swept in one awful avalanche into the mouth of the valley!

We hear the crash. We feel the mountain quiver under us. We are warned of what is coming. Every living thing below us has heard the crash reached Chicago Sunday afternoon at 5 in sight in the valley is rushing down its to snatch an hour's sleep at the hotel; the right or left and finds a place where then I had to rush to the theatre, for in he can ascend, and a big wolf scrambles up the almost perpendicular bank at our feet, and there lies crouching and whin-

A WILD RUSH FOR LIFE. Look up the valley. No man will ever see such a sight twice in his lifetime. There is a wall across the valley—a wall of roaring, tumbling, seething, foaming waters. Its height is eight or ten feet and its speed is that of a railroad train. The buffaloes were the furthest up the valley. Watch them comevery animal runs for his life. Now buffalo, deer, wolf, horse and hare are coming in a wild mob, and close behind them that foam crested wave of death As it reaches the trees they melt away. As it tears along the sides of the valley great rocks are loosened and carried The rush is led by a sorrel horse-his

new coat shining like velvet—his eyes full of excitement—his ears laid flat back. He is 200 feet ahead of everything, and we wave our hats and cheer him as he passes us. Roll! Tumble! Foam! Crash! The waters are littered with trunk and branch and bush. The noise is deafening. The

ROLLA MOORE, Fostmaster.

SATURDAY, MARCH 28, 1891.

-The subject of Maryland's oyster industry is more and more claiming the thoughtful and serious attention of thoughtful and serious Marylanders. Much has recently been said and written on the Chesapeake oyster and the immediate necessity for the adoption of measures to protect the industry and prevent its utter destruction. Wednesday night of last week a very largely attended meeting was held at the hold at the executive mansion until Miss selects. The young spat of 1890 was Academy of Musicin Baltimore, at which Frances Folsom became the President's very promising and had attained conthe speakers were Prof. W. K. Brooks, bride, and the only lady who was ever siderable size. Mr. Gunby calculated

It is said The meeting was presided over by Mayor Davidson. It was shown by the speakers that the question was one that On the other hand, Mrs. Millard Fillinvolves many and varied interests. Perhaps more real information of the oyster, its life and habits, was given than has ever before come to light.

ted States steamer Princeton, in 1844. and wonderful development." He thinks | General Zachary Taylor, President of the White House. President Lincoln's funeral also came forth from the same els in a half century-but more than that forth on men's shoulders to die at Elberon by the seaside, and later the victims amount annually. To establish this beof the burning of the mansion of Secretary Tracy were laid in state in the East

"That the bay has vielded this vast amount of a most delicate, delightful and the President's house. nutritious food as a free gift from bounteous nature, without any aid from man, and withstood this enormous draft for more than half a century, is most conclusive evidence of its fertility and value. The constantly increasing demands on alth have been too much

for the recuperative power of the briter heds, and, though they have great vitality and propagate with astonishing rapidity. the beds are now being scraped from the bottom of the bay. Indifference and lack of foresight and blind trust in natural advantages have brought the grand inheritance in the Chesapeake bay into great danger. Even if the oyster beds had held their own and were still as valnable as they were fifty years ago, it would be no just ground for satisfaction. In this age of progress the oyster interest, instead of holding its own, should be developed and improved along with the advance made in other matters.

"Four hundred million bushels of oysters is a vast quantity and testifies to the immeasurable value of the state's waters. but every one who has studied the sublect, either on its scientific side or in the light of the experience of other countries. knows that the harvest of oysters from the Chesapeake bay has never, even at its best made any approach to what it might have been if the bounty of nature had been aided by human industry and intelligence. The 400,000,000 bushels is the wild crop which has been supplied by nature, without any aid from man and it compares with what might have been obtained from the water in about the same way that the nuts and berries which are gathered in the swamps and forests compare with the harvest from cultivated fields, gardens and orchards." In 1875 there were 16,000,000 bushels

of first-class oysters carried to Baltimore firm, who will also furnish any one of alone. In striking contrast to this magthem at the rate of a two-cent stamp for each copy desired upon application to nificent showing is the 3,000,000 bushels them or your druggist. Let us sing. of small, inferior oysters of 1891.

The line of the arguments made by the gentlemen last week, is that the only way to restore our exhausted oyster bot-Levin Skinner, who died a short time toms is to use some systematic means to that end. Many methods have been suggested. Among the suggestions is one by Mr. Cowen, who says:

"The state should not hesitate for one instant to transfer say 10,000 acres of oyster lands to the Johns Hopkins Uni- late James Gore, of Vienna district, a not such an agency as is adapted for oys- affairs who accummulated much properter farming, the keen business men who ty and exercised much influence in the are at its head can provide ways by county, that he was never outside of which that land can be made valuable to the state. They will have to aid them all the scientific research which is at He came frequently to Cambridge on their command. The scientific research which has done so much good for us in the past will, when applied to the oyster farm of the university, give an example To the purification of your blood, for at which will be of vast advantage to the no season is the body so susceptible to state and the individual proprietors who | the benefits to be derived from a good cultivate these oyster grounds in the fu- medicine, as in March, April and May. ture Prof. Brooks and his colleagues | Hood's Sarsaparilla is the people's favorwill conduct their experiments in future | ite spring medicine. blood. During the long, cold winter, ti blood becomes thin and impure, the body becomes weak and tired, the appetite may I lost, and just now the system craves the ai of a reliable medicine. Hood's Sarsaparill is peculiarly adapted to serve this purpose It increases in popularity every year, for it i

Hood's Sarsaparilla "My health was very poor last spring and seeing an advertisement of Hood's Sarsaparilla I thought I would try it. It has worke wonders for me as it has built my system up. I have taken four bottles and am on the fifth. I recommend it to my acquaintances." JOHN
MATTHEWS, Oswego, N. Y.

N. B. If you decide to take Hood's Sarsaparilis, do not be induced to buy any other.

Be Sure If you have made up your mind to buy Hood's Sarsaparilla do not be induced to take any other. Hood's Sarsaparilla is a peculiar medicine, possessing, by virtue of its peculiar combination, proportion, and preparation, curative power superior to any other article. A Boston lady who knew what she wanted, and whose example is worthy imitation, tells her experience below:

To Get "In one store where I went to buy Hood's
Sarsaparilla the clerk tried to induce me buy
their own instead of Hood's; he told me their's
would last longer; that I might take it on ten
days' trial; that if I did not like it I need not
pay anything, etc. But he could not prevail
en me to change. I told him I knew what
Hood's Sarsaparilla was. I had taken it, was Hood's Sarssparilla was. I had taken it, was satisfied with it, and did not want any other.

Hood's When I began taking Hood's Sarsaparilla I was feeling real miserable, suffering a great deal with dyspepsia, and so weak that at times I could hardly stand. I looked, and had for some time fike a person in consumption. Hood's Sarsaparilla did me so much goodshas I wonder af myself sometimes, and my friends frequently speak of it." Mrs. ELLA A. Gorr, & Terrace Street, Boston.

A Big Chase After Beynard.

At 9 o'clock last Wednesday morning Mesers. J. Bayard Perdue, Joshua Pollitt and William Bratten arrived at the woods ers and hounds, and for two hours one of the raciest and rarest chases of a lifetime was enjoyed: About noon reynard was overtaken; and he died amid the lusty bayings of his enemies, with the cold,

least seventy-five pedestrians joined the ed the recognizance by reason of other chase and were thrilled with the music of the thirty-five hounds. In the party given by the Young People's Association | were several ladies, whose enthusiasm rose higher, if possible, than that of the men. The old hunters declare that the occasion was a rare event. Among those mounted were hunters from Sussex county, Del., Worcester and Wicomico.

Mong the law of sky, Together we measured our horses' pa and the shadows came through the Was it true what you told me then, sweethear In the golden glow of the days that passed, Was it false what you said when 'twas time

From a dream too sweet to last? To-night you sit in the candle's glare And greet the man that they say you'll wed; is there no thought of the summer there, Or the old, old love long dead?

When out through the trees you rode that day,
To keep the tryst that our hearts had made;
Or was it a chance that I went that way.
And met you there in the shade? -Kate Masterson in Texas Siftings

A Wonderful Shoe Shaped Violin. The Paris Figaro announces the sale of one of the most curious violins known to the music fanciers of the world. It is now on exhibition in Paris, where the American tourist can take a peep at it for a few centimes. It formerly belonged to Paganini, the great violinist, and at first sight merely presents the s history is curious. During the winter of 1888 Paganini was living in a maison de sante called Les Neothermes, 48 Rue de la Victoria. One day a large box was brought here by the Normandy diligence, on opening which he found inclosed two inner boxes, and, wrapped carefully in several folds of tissue paper, a wooden shoe and a letter stating that the writer, having heard much of the wonderful genius of the violinist, begged, as a proof of his devotion to nusic, that Paganini would play in pubic on the oddly constructed instrume

At first Paganini felt this to be an im rtinent satire, and mentioned the acts, with some show of temper, to his friend, the Chevalier de Baride. The who converted it into a remarkably sweet toned instrument. Paganini was pressed to try the shoe violin in public. He not only did so, but performed upon it some of his most difficult fantasias, which facts, in the handwriting of the dolinist, are now to be seen on the curi-

One enterprising youth made the phenomenal record of "knocking down" \$25 a day while in charge of a construction train, which, it need hardly be said, is never supposed to carry passengers. Under the rigid rules of the average anditing department it is doubtful whether money turned in from such a source would be accepted by the presid-

But the carrying of passengers fell under the eye of the construction de-partment and a dismissal followed. Discharged for this violation of rules, our premising financier re-entered the serwhere his industry and patience were train. It would appear that he stood better in the confidence of his superiors than in that of his fellow conductors. the more cynical of whom expressed doubts about the company's ever getting the train back after he had left town with it.—Frank H. Spearman in Har-per's Weekly.

The Vietim. He Fanny Brown is engaged. Gueth She-What! That stupid, snub nosed common little creature? Who on earth is going to be fool enough to marry her? He-Well-er-that ith-I am -Lifa

And was much surprised to notice the esult of the settlement of my estate. My family had always been accustomed to live generously, and I had in a general way considered that my estate would clean up enough to educate and graduate my children and make comfortable provision for my wife. After I was buried, the troubles of my wife, who was my administratrix began. My partners, who had always been absolutely fair and square with me, did not see any value in the business we had been years in building up, other than the value the goods at forced sale. All the firm's ness was a fixed sum-no discount. All amounts due us were liable to shrinkage. Everything seemed to have a new principle of valuation quite different from my idea of it when I was studied the situation I found everything correct, but none the less unfortunate for my family. I realized that a widow with the cash value, surviving partners' yaluation (which by the way was higher than any one else would appraise it), of my estate, would come about five thousand dollars a year short of what I could make the same capital yield certainly, and some seasons double or treble. Some one made the remark that it was strange never had insured my life, and I felt like kicking myself as I saw it was just the point which I had left uncovered. When my partners wanted the widow to leave her money in the concern at the risk of the business at four per cent interest, and I knew that we always had to pay six, I turned over in my grave

and waked up. Waked up to the value

of life and life insurance, and 1 sent for L. H. NOCK,

General Agent, Washington Life, Salis-bury, Md.

ghastly upon those who had formerly been his fellow servants, they being afraid to say anything to him. The owner of the drug shop was sick at the time, and this phantom servant soon began to cause him a deal of trouble, performing all sorts of tricks on the in-valid, such as pulling down the bed upon which he lay, burning sheets, coverlets, etc., and at one time even going so far as to throw the lamps in the fire as often as they were brought into the sick room.

During all this time he had never been

them to their exact places.

Later on he began to try the quality of the medicines and to weigh various drug stuffs in a pair of scales used for that

purpose; would pound drugs in a mortar with a "mightie noise," and even serve people who came on business to the shop; in a word, do all that a servant in such

a capacity could do. He looked very

seen in the streets or heard to speak. Finally, one day he put on a cloak that hung in the shop and walked out into the streets, minding no one and turning neither to the right nor to the left. Nearing the churchyard where his mortal remains had been deposited, he met a maid servant with whom he had formerly been on speaking terms. formerly been on speaking terms; accosted her, only to see her fall in a swoon. This single instance is the only one in which he is said to have spoken during the six weeks he was terrorizing all that portion of Silesia. When the girl fainted the gallant phantom essayed to help her to her feet, and placed in her hand a paper written in blood red ink telling the location of much buried treasure. That night Princess Elizabeth Charlotte, the then chief magistrate of Crossen, determined to put an end to the ghostly raids of the drug clerk. She ordered the grave

opened, and the corpse, grave clothes and the coffin burned. This weird proceeding was carried out to the letter, and nothing of the ghost clerk ward, element of him appeared in every window pane in the drug shop building. Some of these pictures, which much re-sembled sand blast work, faded in a few months, but two of them, in an attic window where the clerk lived prior to his death, were plain to be seen up to the time the building was destroyed by fire in 1741. No explanation of these mysterious shadows has ever been

given.-St. Louis Republic.

Cats Enjoy Fun. The sportiveness of kittens is exuberant and makes them the most delightful of pets. Lindsay's remark is superfluous, except that it has to be made for the formal completeness of his treatise that dogs and cats take part in the fun and frolic—sometimes rough and boisterous enough—of their child playfellows. They give every evidence, in fact, that such fun and frolic are the most enjoyed features of that period of their lives. As the animal matures it becomes more sedate, and even assumes a meditative air, but the taste for sport does not die out till infirmity begins to wear upon it.

A cat mentioned in The Animal
World would allow itself to be rolled up or swung about in a tablecloth, an seemed to enjoy the fun, and Wood's dignified Pusset would let his friends do anything they pleased with him—lift him up by any part of the body, toss him in the air from one to another, use him as a footstool, boa or pillow, make him jump over their hands or leap on their shoulders, or walk along their extended arms with perfect complacence. At the same time he was keenly sens tive to ridicule, and if laughed at would walk off with every mani fended dignity .- W. H. Larrabee in

Scotch Thrift. An Englishman, an Irishman and s Scotchman, making a tour around the city a short time since, were observed looking through a confectioner's window at a beautiful young woman serving in the shop. "Oh!" exclaimed Mr. Patrick, "do let us be after spending half a crown with the dear craytur, the we may look at her convaniently, and have a bit of chat wid her." "You ex travagant dog," said Mr. Bull. "I'm sure one half of the money will be sufficient; but let us go in, by all means; she's a charming girl." "Ah, wait a wee," interposed Mr. McAndrew; "dinna ye ken it'll serve our purpose equally weel just to ask the bonnie lassie to gie us twa sixpences for a shilling, and in-quire where's Mr. Toompson's house, and sic like. We're no hungry, and may as weel save the siller."—Birmingham

Mercury. People sometimes have good ground to complain of their grocers, and not unfrequently the grocers have reason to complain of unjust criticisms on the part of their customers. One Saturday evening, when there

eastern city, a gentleman came in in a blustering mood. "See here," he said to the proprietor, "that fancy creamery butter of yours tastes of the firkin." "I don't see how that can be," answered the grocer, "for I keep that but-ter in glass jars."
"Well," said the customer sharply, "it

Antique Stage Properties.

In "The Old Homestead" as it has been given at the Academy of Music in New York, and all over the country as well, an old fashioned New England clock a century and a half old is one of the stage properties; also a gun which was manufactured in 1725, and was used was manufactured in 1720, and was used by Denman Thompson's ancestors in 1776. The old wooden rocking cradle used in the last act of the play is over 130 years old, and has rocked six generations of Uncle Joshuas.—New York Lados.

tastes of the glass jar then."-Youth's

Rheumatism, BEING due to the presence of urio cured by the use of Ayer's Sarsapa-rilla. Be sure you get Ayer's and no other, and take it till the poisonous acid is thoroughly expelled from the system. We challenge attention to this testimony:—

"About two years ago, after suffering for nearly two years from rheumatic gout, being able to walk only with great gout, being able to walk only with great discomfort, and having tried various remedies, including mineral waters, without relief, I saw by an advertisement in a Chicago paper that a man had been relieved of this distressing complaint, after long suffering, by taking Ayer's Sarasparilla. I then decided to make a trial of this medicine, and took it regularly for eight months, and am pleased to state that it has effected a complete cure. I have since had no return of the disease."—Mrs. B. Irving Dodge, 110 West 125th st., New York. "One year ago I was taken ill with inflammatory rheumatism, being confined to my house six months. I came out of the sickness very much debilitated, with no appetite, and my system disordered in every way. I commenced using Ayer's Sarasparilla and began to improve at once, gaining in strength and soon recovering my usual health. I cannot say too much in praise of this well-known medicine."—Mrs. L. A. Stark, Nashua, N. H.

Ayer's Sarsaparilla, Dr. J. C. Ayer & Co., Lowell, Mass

Price \$1; six bottles, \$5. Worth \$5 a bottle.

CAME BACK AFTER DEATH. Here's a Ghost That Evidently Liked Work Connected with a Drug Store.

A curious thing is said to have happened at Crossen, Silesia, in the year 1659. In the spring of that year one Christopher Mouigh, a drug clerk (an apothecary's servant, as the old account says), died and was buried with the usual services of his church. A few days after his death a shadow exactly like his in face, clothes, stature, mein, etc., appeared in the drug shop where he had been employed before his decease. In the shop he would walk about, sit himself down, take boxes, pots, glasses, etc., from the shelves, always returning them to their exact places.

EXAMINE THE SOUTH BOUND TRAINS. No. 9 No. 3 No. 1 No. 79 a. m. a. m. # HYLHS \* PLOW, # AS IMPROVED FOR 1891, and don't be Humbugged into buying any other until you do. It is solid comfort to Plow with it, and the Farmers a. m. p. m.

say it is the Boss of the Farm.

Miscellaneous Cards.

Sole Agents for Maryland and Delaware. THE IMPROVEMENTS ARE:

Ist. The High Arched Standard cannot be choked, and is provided with Side Flanges on its front arm and a clamping device on its rear arm which POSITIVE-LY prevents any side movement to the Beam, insuring the proper "land" and the correct running of the Plow, no matter how long in use.

2nd. The Beam is disconnected from the Handles, and is secured to the standard by two bolts assisted by the Improved Beam Seat and Beam Holding Device, uniting and holding these parts together with more firmness and greater security than is possible under any other known arrangement.

3rd. Under the rear end of the Beam is a simple device to make the Plow run deep or shallow, or to land, more or less, to regulate both the DEPTH and WIDTH of the furrow. This is the most perfect "Beam Adjuster" yet devised, and should be examined to be appreciated. examined to be appreciated.

4th. As with all of our Plows, neither handle is attached to the Meldbeard to collect trash, weeds, etc., and their lower ends are not near enough to the ground to collect dampness and invite decay.

The shape of our Moldboards, as well as our Numbers for them, O X. 1, 2.24, 2, 30. etc., have been adopted by others, and the public is CAUTIONED to look for the word "Atlas" in connection with the above Numbers, when they will be sure to

OUR WHITE'S CHILLED PLOWS

used on the Atlas and herein described. The shape of the Mouldboards of our Chilled Plows has also been imitated, but the metal used in ours is CHLLED and not the common hard white Iron used in the Moulds of many so-called Chilled Plows. We warrant the moulds of our Chilled Plows and to be as easily corroded Are made with the same Beam Securing and Beam Ac

Best Chilled Plows Made Try them with other so-called Chilled Plows and be convinced. They are made at the best appointed Agricultural Implement Foundry in the State, and using the best brands of Virginia Pig Iron, the Castings made by it for the Atlas. White's Chilled and other Plows are superior to other makes for durability, smooth-
