## To The Reader:

Many questions are frequently asked of the personnel in the Office of Institutional Research about enrollments, faculty, grades and numerous other subjects, with reference both to the present and the past. Some people simply need an enrollment figure while others might require a more in-depth analysis of data over a period of time, while still others might need an entire research report.

The purpose of this Factbook is to provide a ready source of current information. It is not meant to provide a complete history of Salisbury State College, but to provide a picture of Salisbury State College as it is today, with some reference to the past five years. Hopefully, the information contained in it will be helpful to both employees of the College as well as to persons outside the College who are interested in it.

I hope many of your questions will be answered in this Factbook. Suggestions for improvement in the presentation of the data are welcome.

## Introductory Information

## COLLEGE ENVIRONMENT

Salisbury State Colleges is located in Salisbury, Maryland, on the Eastern Shore of Maryland. The Eastern Shore of Maryland is that part of the Delmarva Peninsula in Maryland between the Chesapeake Bay on the west and the Atlantic Ocean on the east. The state of Delaware borders the region and a portion of the state of Virginia lies to the south (see next page).

Because of its miles of shoreline and many rivers, the Eastern Shore has become known for its recreational offerings. Tourism and both recreational and commercial fishing and shellfishing are important sources of income. Agriculture has remained an important industry since settlers first landed in the early $1600^{\prime}$ s. The Atlantic beaches, relatively mild winter temperatures, and relaxed lifestyle attract both summer vacationers and permanent residents. According to the 1980 census, the total population of the Eastern Shore, consisting of nine Maryland counties, was 296,620. The population is projected to increase 10\% by 1990.

Salisbury is the largest city on the Eastern Shore with a metropolitan population of 38,000 . It is the county seat for Wicomico County and a major distribution point for supplies and materials to the rest of the Shore area. Manufacturing and processing industries employ the largest number of residents, but both wholesale and retail firms and service industries are important components of the community's economy. Salisbury is located 115 miles east of Washington, D.C., 125 miles south of Philadelphia, and 30 miles east of Ocean City, Maryland. The population of Wicomico County (in which Salisbury is the major city) has increased by 63\% from 1950 and is expected to increase anothex $25 \%$ by 1990.

Salisbury State College and the Eastern Shore

## HISTORY OF THE COLLEGE

In 1922, the Maryland State Legislature established a commission to determine a location for a two-year normal school on the Eastern Shore of Maryland. A site at Salisbury was selected by the commission and the institution was opened in September, 1925.

The school offered a two-year course for the preparation of elementary school teachers until 1931 when the program was expanded to three years. In 1934, the course of studies was again expanded to four years and in 1935, by action of the Legislature, the College was authorized to grant the bachelor of science degree and to change its name to the State Teachers College at Salisbury.

In 1947, expansion of the teacher preparation program occurred to include the junior high school level. In 1960, the program was expanded to include teacher preparation for the senior high school level and the establishment of a four-year program in the arts and sciences, with majors in several academic fields, leading to the bachelor of arts and the bachelor of science degrees. In 1962, the State Board of Trustees approved a graduate program leading to the master of education degree.

By legislative action, the five state teachers colleges in Maryland became state colleges in 1963, with the word "teachers" deleted from the name, and a new board of trustees was established known as the Board of Trustees of the State Colleges. Under the jurisdiction of this governing board, the major emphasis was placed on the development of the college's undergraduate program, with majors in the arts and sciences as well as professional preparation leading to teacher certification.

Since 1963, the College has expanded rapidly and presently offers 26 undergraduate majors including professional programs in business administration, social work, medical technology, and nursing, in addition to curricula in education and the arts and sciences. In 1971, a program leading to the master of arts degree in history was approved; in 1974, a master of arts degree in English was approved; and in 1975, a master of arts degree in psychology was established. Most recently, graduate programs leading to a master's of business administration and a master's in nursing were added in 1982.

Salisbury State College is the largest higher education institution on the Eastern Shore of Maryland with an enrollment of approximately $3,300 \mathrm{FoT} . \mathrm{E}_{\mathrm{e}}$ students. As an integral part of the public system of higher education in the state, the college is supported by appropriations authorized by the State Legislature.

## THE COLLEGE MISSION STATEMENT

1. The faculty and administration of Salisbury State College accept the responsibility to foster in our students an ability to obtain, understand and accurately assess information and ideas, to think reasonably and independently, and to speak and write intelligently and effectively.
2. In order to give focus and direction to the students course of study, the college is committed to introducing them to a system of ideas about the nature of man, the universe, and the world created by art and thought. To this end, the college offers as the cornerstone of learning an integrated curriculum which examines the salient ideas in the humanities, social sciences, natural sciences and mathematics. This curriculum serves both as the foundation for more specialized study and as the source for a set of convictions which can guide the conduct of their lives.
3. Furthermore, what we teach and how we teach ought to foster in our students a disposition for responsible conduct. Specifically, we must encourage attitudes of integrity and fairness, respect for others, dedication to the pursuit of truth, and the courage both to uphold and to challenge one's own convictions. These attitudes should instill in our students a desire to do things well, to sustain rather than disparage high principles, and to participate as informed, committed citizens in the public forum.
4. The College also assumes the responsibility to prepare students to work confidently and effectively in their chosen careers; to this end it provides practicable counselling and a number of professional and technical degree programs. Career preparation is not the exclusive province of such programs, however; certain attributes--the power to think clearly, judge soundly, and communicate effectively, the ability to interact with people in a productive and considerate way, and the capacity to adapt and learn in new and unfamiliar situations-must be learned in all courses. And, most important, our graduates should be instilled with a spirit of dedication to their vocations and a sense of service to society.
5. The College recognizes that the students have needs and interests that go beyond the scope of academic life, and it therefore provides additional services and sponsors extra and co-curricular activities which are consistent with the goals and purposes of the institution. Services that support the physical and mental health of the students, and activities such as student government, athletics and cultural events that enhance their lives are sponsored by the college as necessary components of the education of the whole person.
6. Finally, we recognize the important contribution that the college and its faculty make to the surrounding community. Use of College faculty and facilities in lecture programs, seminars and the like-so long as these activities do not detract from the primary task of educating our students--merit our encouragement and support.

NOTE: This chart reflects a new organizational structure by which twenty-two academic departments will be subordinated under five schools, each headed by a dean, by the end of the spring 1984 semester.

*CUPA refers to the College and University Personnel Association which sponsored a national survey on 1983-84 faculty salaries. This data, from which the above figures were taken, was published in the February 29, 1984 issue of The Chronicle of Higher Education (Vol. XXVIII, No. 21). The data was reported by administrators at 215 member institutions of the American Association of State Colleges and Universities. AAUP salary data for 1983-84 was not available at the time this publication was prepared.
