INTERNATIONAL SOCIETY FOR EXPLORING TEACHING & LEARNING

Officers and Board Members

Alexander Crispo, President
Bruce Saulnier, Past President
Craig Abrahamson, Society Board Member
Peter Doolittle, Society Board Member
Susan Henry, Society Board Member
Angela Humphrey, Society Board Member
Jeanne Miller, Society Board Member
Anne Nardi, Society Board Member
Gail Rice, Society Board Member
Jerry Samples, Society Board Member
Christina Shorall, Society Board Member

Appointed Positions

Ken Klopfenstein, Treasurer
Jim Dolhon, Secretary
George Watson, Historian

Conference Committee

Gloria Balderrama, Registrar
Shelia Wood, Associate Registrar
Gail Rice, Proceedings Editor
Christina Shorall, Papers Review Chair
Diane Aschenbrenner, Conference Site Coordinator

DISTINGUISHED FELLOWS OF THE SOCIETY

Samuel N. Postlethwait, Professor Emeritus, Purdue University
Joseph E. J. Habowsky, University of Windsor
Charles Wales, West Virginia University
Kenneth F. Klopfenstein, Colorado State University
Jean E. Wold, California State University
Donald Borchardt, Rutgers University
Robert A. Stager, University of Windsor
A. Jeanne Miller, University of Central Florida
Eunice L. Krinsky, California State University
Anne H. Nardi, West Virginia University

PAST PRESIDENTS OF THE SOCIETY

1970-71	Samuel Postlethwait
1971-72	Dave Husband
1972-73	Ben Meleca
1973-74	Robert Hurst
1974-75	John Hinton
1975-76	Sally Short
1976-77	Stan Nelson
1977-78	John Zimmerman
1978-79	Mary Lynch
1979-80	George D. Brown
1980-81	Warren D. Dolphin
1981-82	Joseph E. J. Habowsky
1982-84	Charles E. Wales
1984-85	Blaine Carpenter
1985-86	Donald E. Borchardt
1986-87	Jean E. Wold
1987-88	James Marlin
1988-90	Kenneth F. Klopfenstein
1990-93	William J. Mullin
1993-95	Bonnie Johnson
1995-97	Kenneth Brown
1997-99	Shirley Rickert
1999-01	George Watson
2001-2003	Bruce Saulnier
2003-	Alexander Crispo

Objectives:

The objective is for attendees to gain knowledge concerning the barriers students perceive regarding the online classroom and the implications for teaching drawn from this research.

Intended Audience:

This presentation is most appropriate for faculty, instructional designers, and support staff to online students.

Activities:

Discuss will be used to actively engage participants in thinking about the application of this research to their on online learning environments.

Abstract:

Implications of Student Perceived Barriers to Distance Learning

The purpose of this survey research is to identify students' perceived barriers to online learning in various environments: higher education, community colleges, and the workplace. Furthermore, the study is meant to identify the relative weight of the barriers depending upon selected demographic characteristics.

The significance of this research, from a practical standpoint, is that these efforts will help in guiding educators as they develop online courses and facilitate student learning. Additionally, since this is a first attempt to statistically verify a framework of students' perceived barriers, an emphasis is placed on identifying potential areas of future research.

The Current Study

There have been several attempts to identify the barriers to distance education (e.g., Betts 1998; Galusha 1997; Gellman-Danley and Fetzner 1997; Hara and Kling 1999; Rezabek 1999). These were mainly in the context of higher education and often from the perspective of the instructor or administrator in distance education programs. The prior barriers research has varied in its construction, generally the researchers used a theoretical approach or they used data gathering through a survey or case study.

The authors of the current study conducted an extensive review of the literature concerning students' perceptions of barriers to distance education (online education specifically). In his review of literature, Berge (1995) summarized the responsibilities of the online instructor using four categories: pedagogical, technical, social, and managerial. For the current study, and as a matter of convenience, we started with Berge's simple, straightforward framework. Each of the barriers identified from the literature was grouped into one of the four categories.

Pilot Survey

A pilot survey was constructed using a Likert scale for each of the 61 barriers. Ten demographic questions were also asked of each respondents: gender, age, ethnicity, place where the respondent is a student (e.g., post-secondary

graduate student, workplace, community college), self-reported online learning effectiveness, self-reported enjoyment of online learning, number of online classes completed, the number of online classes dropped, and the self-reported likelihood of that the respondent would voluntarily take an online class in the future. Additionally, voluntary comments were collected from respondents.

Conclusions of the Pilot Study.

The Berge model developed in 1995 that listed the responsibilities of faculty is not a very good way to categorize students' perceptions regarding perceived barriers to online learning.

Main Survey

Instead of the Berge framework, the main survey was grouped in six parts corresponding to the results of the factor analysis of the pilot study: technical, infrastructure/support services, social, prerequisite skills, motivation, and time/interruptions.

Theoretical Framework

The authors turned their attention to reviewing literature that spoke from the students' perspective and also matched the six factors that were concluded to be the best model for the responses to the pilot study. Garland (1993) had studied student perceptions of the situational, institutional, dispositional and epistemological barriers to persistence. Later, Schilke (2001) updating Garland's model of barriers to persistence in distance education and added a technical factor. While parts of all five Schilke's factors are included in the six factors coming from the current pilot study, the constructs are somewhat different for several of these.

ISETL 2004 Proposal

For ISETL 2004, we propose to review the results from the main study regarding students' perceived barriers to online learning. We also propose to use discussion with the attendees during the presentation to focus on the implications of this research to online teaching.
