Hi Michelle,

Thank you so much for the invitation. Our paper is attached.

Best Regards,
Pei Guo

Hi All,

UMBC recently implemented a digital repository, ScholarWorks@UMBC, here: https://mdsoar.org/handle/11603/14. We're trying to add more publications so that ScholarWorks better showcases what we do at UMBC. I'm wondering if you'd be willing to include your journal article "A comparison of big data application programming approaches: A travel companion case study" in ScholarWorks@UMBC? Adding the article to ScholarWorks@UMBC will also extend access to it beyond IEEE subscribers to the world via Google Scholar increasing citations and impact.

Per IEEE (http://ieeeauthorcenter.ieee.org/publish-with-ieee/author-education-resources/guidelines-and-policies/policy-posting-your-article/), either the submitted or accepted version can be placed on institutional websites, so if you're willing, please email me one of those versions.

Upon Submission to an IEEE Publication

Authors may share or post their submitted version of the article (also known as the preprint) in the following ways:

- On the author's personal website or their employer's website
- On institutional or funder websites if required
- In the author's own classroom use
- On Scholarly Collaboration Networks (SCNs) that are signatories to the International Association of Scientific, Technical, and Medical Publishers' Sharing Principles

The following text should be included on the first page of the submitted article when it first is posted in any of the above outlets: "This work has been submitted to the IEEE for possible publication. Copyright may be transferred without notice, after which this version may no longer be accessible."

Upon Acceptance to an IEEE Publication

If an author previously posted their submitted version of the article in any of the following locations, he or she will need to replace the submitted version with the accepted version and add the IEEE copyright notice (© 20XX IEEE). When the article is published, the posted version should be updated with a full citation to the original IEEE publication, including DOI. No other changes may be made to the accepted article.

- Author's personal website
- Author's employer's website
- arXiv.org
- Funder's repository*

*IEEE policy provides that authors are free to follow public access mandates to post accepted articles in funding agency repositories. When posting in a funding agency repository, the IEEE embargo period is 24 months. However, IEEE recognizes that posting requirements and embargo periods vary by funder, and IEEE authors may
