ON FRIENDSHIP.

What truther and base

Will have in their presession?
Profusion specifie notice part

Of Breakly, of heart,
And dailing; of discretion.

But as the gen of richest cost

But long experience speaks me men, Therefore that consign scorning, Will proceed to mark the shelves. On traich so many dash themselves, And give the simple warning.

Youth, unadmon sh'd by a guide, Will trast to any fair outside: An error soon corrected;
For who, but learns, with riper years,
That man, when smoothest he appears,
Is most to be suspected!

But here again a danger lies Lest thus deluded by our eyes

An acquisition rather rare,
Is yet no subject of despair;
Nor should it seem distressful,
If either on forbidden ground,
Or, where it was not to be found,
We sought it unsuccessful.

Ne student a bide the test
That stands on sorded interest
And mean self-love erected,
Nor such, as may awhile subsist
Twict sensualist and sensualist,
For vicious ends connected.

Who hopes a friend, should have a heart Himself, well furnished for the part,

A fresful temper will divide The closest knot that may be tied, By ceaseless sharp corrosion
A temper passionate and fierce
May suddenly your joys disperse
At one immense explosion.

At one immerse expectable to the calkative unite With hope of permanent delight, The server just committed: There drop through mer desire to prate, Forgetting is important weight, over simply the property seems, All thoughts of friendship are but dreams in the calkative with the calkative to th

A man repayined for repartee, Will sellom scruple to make free Will friendship's finest feeling, Will thrust a dagger at your breast, And ill you, twas a special jest, By way of balm for healing.

Beware of tattlers; keep your ear Class stopped against the false they bear, Fro.45 of their own incention; The separation of chief friends; Is what their kindness most inlends; Their sport is your dissension.

Friendship that wantonly admits
A juco serious play of wits
In brilliant altercation,
Is union such as indicates,
Like hand-in-hand in-urance-plates,
Danger of conflagration.

Some fields creatures boast a soul True as the medic to the pole; Yet shifting, like the weather. The origin constancy forego For any a selly, and show its variations rather.

The great and small but rarely meet On terms of atmity complete:

Courtier and partial cannot mix Their bet regeneous publicks Without an efferenceme. Such as of salts with lemon junce. But which is rarely known it induce, Like that, a coalescence.
