#### POETRY.

From the New York Mirror. TELL HIM I LOVE HIM YET. Miror, and for whose voice it was expressly written. I will try to send you the music one of these days, for it is the most touching and beautiful thing I ever heard Moore, the poet, to whom it was sung a few

one opinion. Tell him I love him yet As in that joyous time ! Tell him I ne'er forget-Though memory now be crime!

Tell him when fades the light Upon the earth and sea, I dream of him by night-He must not dream of me!

Tell him to go where Fame. Looks proudly on the brave, And win a glorious name By deeds on land and wave.

Green, green upon his brow

The laurel wreath shall be-Although that laurel now Must not be shared with me ! Tell him to smile again

In pleasure's dazzling throng-To wear another's chain, To praise another's song!

Before the loveliest there I'd have him bend the knee, And breathe to her the prayer He used to breathe to me!

Tell him that, day by day, Life looks to me more dim-I falter when I pray, Although I pray for him.

And bid him when I die Come to our fav'rite tree-I shall not hear him sigh-Then let him sigh for me !

LIVERPOOL, April 25th.—The protracted debate in the French Chamber of Deputies, on the American indemnity bill, was brought to close on Saturday, when, as we anticipated months ago, the French made a virtue of necessity, and the bill was carried by a majority rejected. The irresponsible letter writers from Washington are busy in misrepresenting the proceedings of the Post Office Department, under its new administration. It is stated that Messrs, Stockton, Reeside and others, have been re-

ror:-we understand that the new Postmaster General, on entering into the Department. took a view of its financial condition, and finding claims against it which could not be discharged, (and among them certain claims of the contractors referred to,) determined to postpone their payment in part, so as to enable him to pay at the end of the present and every future quarter, all demands which should arise within the quarter. Upon this ground, and no other, was the payment of the claims of the contractors named, postponed.

Mr. Stockton and Mr. Reeside are among the most efficient mail contractors in the United States, and misrepresentations which should injure their character and credit, would produce a real injury to the public.—Ib.

The selection of the candidate for the Vice Presidency, was a matter of very deep solicitude among the members of the Convention. Mr. RIVES was presented by the numerous & most respectable delegation from Virginia; and his very high qualifications and claims were urged with great warmth and anxiety. There was not, we believe, a single member of the Convention who did not fully appreciate his great worth. Not one was unwilling to admit his qualification for the Vice Presidency; on the contrary, all conceded, that the elevation of his mind, his pure republican principles, and his high attainments, rendered him every way worthy of the first honor of the Republic. The determination of the Convention turned upon the consideration of the peculiar relation which the two prominent individuals presented to the

Convention, at this moment bore to the country. The principal circumstances which operated on the majority in giving a preference to Col. Johnson over Mr. Rives, were the following. It was urged, that Mr. Rives was comparatively a young man-that his career of active usefulness was but fairly commenced in the Senate, when, in violation of the public will of Virginia, he was recalled by a coalition of nalcontents in the Legislature, who acted without consulting their constituents-that the election of Mr. Leigh, by a subsequently elected Legislature, in direct violation of written instructions, which had made the issue between them, on which the late Virginia elections turned endered it proper that Mr. Rives should mainain his posture before his own State, and enable the people to assert their authority, and vindicate the right of instruction in the person of the individual, in whose case it had been so egregiously violated—that in reserving Mr. Rives to achieve this great victory of principle n his native State, higher honors awaited him than would be conferred, by calling him to the

honorary dignity of the Vice Presidency.
It was insisted that when restored by the voice of Virginia to the Senate, from which he had been ostracised by the foul and dishonest intrigues of the factious Nullifiers and Nationals his lofty principles, his admirable eloquence, and the moral acquired from the persecution he had endured in the cause of republicanism, would put him at once at the head of the Senate from which he had been exiled, and enable him to render still greater services to the cause, and to endear himself still more to the great democracy of the Union, which would ultimately lead to the distinction for which alone the Vice Presidency could be held by

his friends an object whorthy his acceptance.

The considerations which influenced the decision in favor of Col. Johnson were his 30 years services in support of the Democratic party-the devotion he had manifested throughout all this period, not only in behalf of popular rights, but by unwearied and disinterested attention to the private interests of the poorest citizens of every State in the Union, who had claims upon his Government—the ardent patriotism and noble gallantry which had distinguished him in the field of battle, where he had received those wounds that now in the close of life began to bleed afresh, and which may too soon, deprive the nation of an opportunity to mark by its suffrages, its grateful sense of obligation to a veteran, whose unbounded benevolence and patriotism, has made his life one on one occasion, almost of self immulation to his country .- 1b.

OF KENTUCKY.

We give this morning, at some length, the interesting particulars of the late news from Europe, to the exclusion of much other matter which we had intended to lay before our readers. We think no intelligent and patriotic reader, will rise from the perusal of this detail, consisting, as it does, in a great degree, of extracts from the most distinguished English

Journals, without feeling his bosom swell with

national pride, at the commendations passed on the honest republicanism and spirited bearing of our venerable Chief Magistrate. THE WHEAT CROP.-We have hitherto forborne to make any remarks on the growing wheat crop, knowing that all calculations in the early part of the season, are apt to prove erroneous. Fields, which are luxuriant and flourishing through the month of April, are not unfrequently cut off by the fly, or diminished one half in product by a dry month of May. On the other hand, when the prospect in the early

The prospect this spring, not only in this, but in the adjoining counties, has been and still continues to be the most unpromising which we ever recollect to have seen; and the best season which can happen, and the most fortunate issue in ripening and saving the crop, cannot possibly give to the farmers of this section

spring, is as unpromising as it can well be, a

fine growing season through that month some-

time surprises every one in the amount of the

of country, more than one half of a fair crop. This result we have heard ascribed to various causes .- Some attribute it to the severe frosts at present. of the winter, others to the ravages of the fly, and no doubt both combined have extensively operated to produce the result. But in our opinion, there is another and more general cause: and that is, the long continued drought which preceded the seeding season. The earth, during the latter part of the last Summer and the early Autumn, after an unusually wet Spring, was dry and baked hard, and never , until most of the wheat crops had been seeded, was there that degree of moisture in the soil which is requisite to prepare it for the reception of seed. The growth of weeds, wild onions and other trash, which usually takes place in nestly advised that the farmers put in as large general.

September, had not put up, when the crops of a crop of corn, as possible. Col. Taylor has proposed its suborium in declaring it to be in possible. With the wheat sprang up this filth, and the

Was the fly the chief cause of the failure, from the past experience of farmers rich lands and early seeding would have proved a security against its ravages, such however has not been the case; were the winter's frosts the chief cause, the early seeding, according to universal observation, would have fared better than the latter. The reverse of this is the fact. The late seeding, as far as we have remarked it, and from what we have heard from others, is the most promising. We have therefore come to this conclusion, both from the experience of the present crop and former observation, that the unpromising state of the crop of wheat now growing, is more to be ascribed to the peculiar condition of the earth when sown, than to its destruction by the frosts of the winter, or the ravages of the fly, that whoever seeds his wheat after a long continued drought in summer and the early part of autumn, before the fall rains come on and the earth has had time to mellow and throw up that growth of trash which invariably takes place after those rains, whatever may be the preparation for a crop, is destined to reap disappointment.

Being engaged in farming, we have thrown out these suggestions to our bretheren more to elicit information than with the hope of imparting it,& shall be much pleased to have the views and observations of our readers, on the failure of the wheat crop this spring.

saw passed. The passengers were principally German emigrants, and there were twenty cabin passengers in addition, from various parts of the Union. We have no other particulars of this melancholy occurrence, though the papers will doubt less furnish them in a day or

The Cincinnati Republican of the 23d has the following account of this frightful disaster; by g A gentleman who arrived in this city last tice.

New Orleans, called at our office, on his way through this city, and informed us, that the Steamer Majestic had exploded one of her boilers, while on the eve of shoving from the wharf

at Memphis, producing a most melancholy loss of life and limbs. About sixty persons were scalded, a large portion of them mortally, and

nearly all of them dangerously.

The collapse is supp g ed to have been occasioned by the passengers flocking upon one side of the boat, causing it to careen, so as to produce a transfer of the water from the starboard to the larboard boiler. Our informer was on shore at Memphis, and visited the house in order on the shortest notice. which the wounded were confined. He represents the spectacle there exhibited, as heart rading beyond co ception. To add to thedistress of the sufferers, the Cholera is prevail pers, Title Lines, &c. from two lines Great ing at Memphis to an alarming extent.

Thirty four deaths by Cholera had already occurred, in that ill fated city, up to the time of his departure, and 4 had transpired on the day of the accident. The deck passengers were the exclusive sufferers. The cabin passengers were the exclusive sufferers. The cabin passengers will be published as early as possible to the control of the purpose, which constructed the control of the purpose, which control of the purpose and prepared by the control of the purpose, which control of the purpose and prepared by the purpose and prepared by the control of the purpose and prepared sengers were supposed to have entirely escaped. A more full and satisfactory statement of the particulars of this deplorable catastrophe, may

be expected in our Monday's paper.

On this melancholy event the National Intelligencer justly remarks-"Here is another of those dreadful disasters which proceed generally from a disregard of the most obvious dictates of prudence. The engineer probably neglected, or wilfully forbore to let off the steam during the stoppage of the boat, and thus, perhaps to save fifty cents worth of fuel, he lestroyed forty lives.

We have been attentive observers of the steamboat disasters, reported with such apalling frequency by the newspapers, and we do not remember one of them which has not evidently resulted from neglect, incompetency, or wilful mismanagement. It would seem as if those who usually have charge of the engines of our steamboats, were unaware of the tremendous and dangerous power of those agents, and of the necessity which exists for the utmost care and vigilance in their management. Every instance of disaster from them convinces us more and more that the only effectual preventive, is to make the owners pay heavily for all damage arising from their explosion .-We shall then have safe boilers, and a guar-

antee for their careful and safe management." WHEAT CROP IN VIRGINIA. gives the following account of the unpromising appearance of the Wheat Crop in that State. WHAT A FARMER WANTS. The Farmer wants a stable mind, A purpose sure and steady, To patient industry inclined-For business always ready.

Good carerful habits well infix'd, And judgment acting clearly, To sift out truths with error mix'd, Though it should cost him dearly.

He wants a neat and prudent wife, Who, when he carns, can save it: Who kindly souths the cares of life, (Best gift of him who gave it.)

He wants a snug and tidy Farm; And health and strength together, A house and barn to keep all warm In cold or rainy weather.

Heaven's blessings then must crown the whole, Or all his hopes are blasted: But with this resting on his soul, The purest joys are tasted.

He then enjoys a bliss, unknown To those the world calls greatest; Known only to the good alone, The earliest and the latest.

THE CARELESS COUPLE. Jenny is poor and I am poor, Yet will we wed-so say no more; And should the bairns you mention come (As few that marry but have some,) No doubt but heaven will stand our friend, And bread as well as childen send So fares the hen, in farmer's yard, To live alone she finds it hard; I've known her weary every claw In search of corn amongst the straw: But when in search of nicer food, She clucks amongst her chirping brood;

That scratched for one could scratch for ten, These are the thoughts that make me willing To take my girl without a shilling: And for the self same cause, d'ye see, Jenny's reo. 1 el to marry me.

I did not think she could like any thing under heaven but her chair, her broth, and her ottoman.

I have many times observed, however, amongst other things, how her natural piety would break, like momentary sunshine, through the habitual apathy of her existence. The rubbing of her spectacles was as inevitable a liking to she then might have some small chance of apprehending the other. This, in fact was her worst failing; as if not content to have people's throats torn two or three times a-day of necessity; she always were, were thrown away upon he way of discourse, than she wanted to know what it was about; and thus every odd end of conversation that happened to catch the tail of her eye had to be rehearsed again and again. rubbing of her spectacles was as inevitable a her eye had to be rehearsed again and again, by her mother's and withdrew to her room forerunner of this, as knives and forks were of until every word of it haunted the imagination dress, soundly rating the servant girl by

When it is considered then that the motive of the authors of the amendment (the Dupin party) was chiefly to embarrass and weaken, if not to upset Ministers; and that the latter ubjected themselves to this correction rather than run the risque of having the execution of the treaty transferred form them to its enemies, and lose the system of government under which it was regociated, you will agree with me, I think, that the character of the amendment is more a matter of form, than one of serious difficulty. I say it is illusive, hecause it is notorious to the opposition in the Chamber and to the public, that Ministers have already expressed themselves satisfied with the explanation given of the message in the able despatch of Mr. Livingston to the Count de Rigny of the 21th January last; and that in presenting the law (at a previous date to that of the despatch) unlettered with a call for explanation, as well as by their constant diplomatic intercourse with Mr. Livingston up to this date, they have given ample - evidence that they were reconciled with the President's Message; and therefore that they can have nothing more of consequence to demand. Thus is it my impression that Ministers attach no other importance to the obligation imposed on them by the spirit of party in the Chamber, than that of going through the usual diplomatic ceremonies on similar occasions. At all events, no action upon the law can be had until it has passed the Chamber of Peers, when the responsibility of the explanations with which they may be satisfied, will rest entirely with Ministers. My hope is, that they will see the expediency of setting the major whose able and patrictic con-Mr. Livingston, whose able and patriotic conduct through the whole of this unpleasant and complicated negotiation, affords ample guaran tee that whatever settlement may take place. will redound to the honor of our country and

System.—The progress of the feudal system, the conversion of ecclesiastical into secular vassals, the gradual extension of the territorial tribunals, soon made them, like the baronial feudatories judges. In fact they were temporal barons themselves; and were liable like the 1 0329040 1 327878 merest layman to military service, to the 1 034348 jurisdiction herilis, and the other obligations on judgments of blood; he could not pronounce, much less execute, sentences of death; so that the more beinous cases must always have devolved on the tribunal of the court; and in genreal, we find that whenever laymen only were concerned, the judicial functions were not often exercised by the bishop or abbot in person; in which crees, they devolved on his vicars who were always laymen. Where the evidence was presumptive only, recourse was had to 'the judgment of God—especially to ordeals of red hot iron, of boiling water, and by the duel. The duel, however, as a judicial proof in the ordinary istorian Difmar, evidently inspired with disgust even the savage warriors of the day. A count named Waldo, accused another named Gero to Otho II. The accused was committed to close custedy, and as the case could only be tried by their equals, the princes of the empire were convoked at Magdeburgh. The duel was ordered, and the two parties were compelled to engage in mortal combat on a litte island in the river. Waldo, after receiving two severe wounds in his head. after receiving two severe wounds in his head, at length threw his adversary to the earth; and Gero being asked whether he was able to con-tinue the battle, replied, that he was not. By the emperor and noble judges the latter was declared guilty, and beheaded on the spot by a common executioner. But Waldo had received his death wound; for after drinking a cup of water, he fell backward and expired.—Lardner's Cabinet Cyclopedia.

SENATOR KANE.

The subjoined letter from Senator Kane, in reply to a committee of friends, is important, as containing the testimony of an observer, whose sound judgment and opportunities of judging, enable him to speak understandingly of the "amalgamation of the three parties," to which the White politicians are engaged to contribute

The sentiments expressed by Mr. Kane are an honorable contrast to the dernier demonstrations of the partisans of the President's "old friend," whom we once hailed as "the Cato of the South." Alas! our Cato now relies altogether on the aid of the enemies of his professed principles. - Globe.

JACKSONVILLE, May 6, 1835. Gentlemen :- The resolution adopted at a meeting of the friends of the Administration, requesting to know at what time it would be convenient for me to partake of a public dinner with my friends in this place, which you did me the honor to band to me last evening, has planted in my bosom feelings of gratitude too warm to be expressed, and too deep to be destroyed by time. Upon this my first visit to this beautiful part of the State, to be thus welcomed, and by citizens so distinguished for their firm perseverence in sustaining the re-

The circumstances which surround us, require continued efforts to place in security the principles of a sound democracy, as administered by President Jackson. A combined movement of parties in the United States, holding different sentiments as to the character and purposes of our Government, and each hostile to our own, is to be met-manfully met and overcome. If we fall, Nullification, National Republicanism, or Federalism, is to be substituted for the Constitution of this country. One President, as in case of the election of the immediate predecessor of General Jackson; and the third to that toryism which was exhibited by a portion of our countrymen during the late war with Great Britain. It is not possible that the freemen of this now happy country will evmalgamation of these three parties, whatever of ture, will produce better results, is an absurdicess of any one of them, their union but enhances our dangers. The prospect before us, however, is cheering. The recent accessions to our principles from quarters hitherto hostile. furnish reason for the belief that the alliance to which I have alluded is based only upon the hopes of a few madly ambitious men, and is not scated in the hearts of any considerable portion of the American people. We refer to the article of the Star, because distinctly states what the real and only policy of the whigs is, viz. to bring the election nto the House of Representatives. The stand on this question was taken some weeks ago by Pristam Burgess, who thanked God that he ever was a Democrat, and the Whig presses have echoed the same cry. The question whether the President of the United States is to be elected by the People or by the House of Repnow distinctly, and will be kept distinctly beoin and decide the question. No paltering, no subterfuge, no evasion will be effectual in keeping this question from the People. Whige are willing to admit that with the People their chance is desperate. Such an admission is a virtual abandonment of the con-

We intend before long to give our views at ength upon the subject of the election of President by the House of Representatives. We are not disposed at present to enter minutely into the subject, for we shall have time enough to do that before the People are called upon to act. We wish for the present merely to call general attention to the system of tactics which the Whigs have determined on, to state to the people one of the great questions to be agitated, and ask them to reflect and make up their minds upon it. The Whigs have determined that the people shall not elect the President of the U. States. Will the People submit to this decision?

The following very humorous and pithy article, is from the Trenton (New Jersey) Emporium.

"FRESH FROM THE PEOPLE." The Federalists are in a perfect fever of rage and contempt To think that those rag-

ged rascals, the People, should dare to follow the example set by their Lordships in '32, and hold a National Convention at Baltimore.
"Is it not abominable! Heaven help this country, for it's hard telling what we shall come to in time! If our wives and daughters bring out a new fashion to-day, why to-mor-

Such we glean from the Federal papers, are the feelings of those heirs apparent to the name vention. Almost every sheet contains a seer at the delegates to Baltimore, coming "Fresh from the People." In the mean time the People and their delegates, are going on in their own quiet and unassuming way, to accomplish those great ends, for which our forefathers first drew their swords. And by the time their adversaries have invented some new method to make Presidents, the candidates of the Baltimore Convention will be scated in the elevated places for which they were designated by that oody. A consummation to be brought about by a voice "Fresh from the People."

From the Boston Daily Adv. May 29. GREAT MEETING AT FANEUIL HALL.

Fancuil Hall was filled last evening by one of the most crowded assemblies we have ever witnessed in that place. The Hon. John C. Gray, was called to the Chair. Mr. C. P. Curtis introduced in a pertinent speech, a series of resolutions, approving the nonvination of Daniel Webster for the Presidency, and setting forth in forcible and emphatic terms the reasons in favor of the nomination. The resolutions were supported in able and elequent speeches, by Messrs.R.C. Winthrop, R. Chuate, and F. C. Gray.

All the speeches were of a high order and worthy of the occasion. The ingenious and in:pressive speech of Mr. Choate, whose voice was heard for the first time in that hall, was listened to with great attention, and cheered with the most enlivening applause. The excellent speech of Mr. Gray, we regret to say, was not heard in the remote parts of the hall. in consequence of the bustle about the door, as soon as Mr. Choate had concluded, but was listened to with interest and pleasure, by those who were able to hear. The resolutions were adopted by an unanimous vote.

UNITED STATES BANK .- The monthly statement for the 1st of May is publishedfrom which it appears that the loans of the Bank, up to the 14th instant, amount to \$61,-919,435. The loans for the month preceding were 60,100,216-of course, the increase for the last month amounts to \$1,819,209. This is the way in which panic-making Biddle "winds up the affairs of the Bank." From the first of November last, to the 1st of April, the loans were increased \$14,346,015nearly three millions a month-instead of decreasing them two and a half millions, which the Bank declared, a year since, was absolutely necessary to its safety.

It now appears, that in six months only, from November 1st to May 1st, the Bank has increased its loans over sixteen millions of dol-

The distribution of the loans of last month is remarkable. The whole amount discounted at the mother Bank and all the branches, in April, was \$1,819,209. Of this sum, Boston alone has received nearly ONE MILLION. beyond its former accommodation. There was a like disproportioned increase in Philadelphia and N. York last year, previous to the elections in those cities. The game of corruption is repeated here. The loans in this city, at our branch amounted in March to \$3,525,199-and were increased during the last month to \$4,-462,461. As the Fancuil Hall Webster Cau-cus approaches, the business wants of the community" increase. The Bank tories want money and must have it voters, and must have them. The supply, accordingly, corresponds with the demand. The Bank understands the price of adhesion to its attorneys .- Boston Daily Chronicle.

### VOICE OF THE PEOPLE.

The Whigs object much to members of the State Legislatures appointing delegates to the Baltimore Convention. Who nominated Mr. Webster? A single State Legislature. Who nominated Judge White One State Legislature, ten members of Congress, and Davy Crockett. But, they say, five or six Legislatures have gone for Mr. Van Buren, objection, then, lies to the number only, and not to the mode. A nomination by the Legislature of a single State is the "voice of the people;" but if the Legislatures of five or six States recommend a nomination, it is an infringement of the rights of the people. What admirable logicians the Whigs are. - Louisville Advertiser.

Effects of truth telling .- We once heard the editor of a daily Journal say, that he had never told a wholesome truth in his paper that did not cost him eight dollars. If he attacked a corporation, some one of its directors would lavor him with a laconic note to the following purport-"Stop my paper." If he spoke well of a corporation, some enemy to corporations would imitate the example, and send him word "stop lected by the People or by the House of Reg- my paper." If he said a word that squinted at resentatives, is one of the great questions to be favoring the abolition cause, he would hear decided at the next Presidential election. It is "stop my paper" from some member of the colonization society, and if he whispered a word ore the People. It is an issue made by the against it he would hear the same thing from Whigs in which every Democrat is willing to somebody on the opposite side. In fine his position was as bad as that of the boys many years ago. If they were caught below Market street, they were in danger, in the border wars of that day, of being pelted with brickbats as up-towners, or if above Market street, they ran the same risk as being down-towners. In truth, between the up-towners and downtowners of that day, we well recollect, it was no easy matter for a boy to escape a broken pate - Newburyport Herald.

> CAPTURE OF A SPANISH SLAVER. A Spanish brig, of 300 tons, named the For-midable, which had acquired no small notoriety among the British cruizers on the coast of Africa, by her own speed and the boldness and dextery of her captain, was captured on the 17th of December. off the mouth of the old Calabar river, by his Britannic Majesty's brigantine Buzzard. The action was commenced by the Slaver, after a chase of some hours, and was maintained for some time with great spirit on both sides. At length the brigantine ran the slaver on board, and the latter almost mmediately surrendered. The captain of the Formidable, an officer of the Spanish navy, behaved with great gallantry, fighting and encouraging his men until disabled by three musket wounds. The captors found on board the prize, 700 slaves, and a crew of sixty-six men, armed with muskets, pistols and cutlasses.-The battery of the slaver was eight guns. Four of the Spaniards were killed, and 11 wounded; of the British, six wounded.

We invite the attention of our readers to the very eloquent speeches of Mr. Holt of Kentucky, and Mr. Lytle of Ohio, delivered in the Baltimere Convention, which will be found on the second page of this morning's paper.

The Virginia Delegation must be hard run for an objection to the Democratic principles of Col. Johnson, when the only aberration from 28 years duration, is in his vote on the Maysville road bill. We have no objection that our should be submitted to the "ORDEAL OF BAT-TLE," politically; but, if a solitary vote for a work of internal improvement, is to condemn the Democratic principles of one of our candidates, what goes with the boasted Democracy of Mr. Calboun, Mr. McDuffie, and Mr. Clay?

Nullification in South Carolina, are not, it seems, after all that has been said to the contrary, disposed to support Judge White, for Preswas invited as a guest. In the course of the day both gentlemen replied to complimentary toasts, by addressing the meeting, and both of females. - Bal Gaz. took occasion to disavow the course taken by a portion of the party to which they belong in support of Judge White, as a candidate for the Presidency; declaring that such a procedure would not be in consonance with the principles for which they had been contending, and advising that the State should keep entirely aloof from the presidential contest. All this sounds, very well,-but we must keep our eye upon novements of the many colored opposition.

From the National Intelligencer. THE WHEAT CROP.

The farmers of Virgina, never, within the recollection of the oldest inhabitant, had so gloomy a prospect for a crop, as at the present time. From the commencement of Spring, we have hoped against hope, that some favorable change in the weather might revive the perishing remains of our crops. But the question is now settled. Fields which in ordinary seasons would bring twenty bushels to the acre, are ploughed up, and put in Indian corn, or oats; and many of the most skilful and hitherto successful farmers are willing to compromise for their seed. A few, a very few, who are peculiarly favored, will do a little better; but there is now little doubt that a very large portion of the grain growing part of Virginia will not, upon an average, produce the seed which has been sown. In the most productive part of this country, two dollars a bushel have been offered and refused for seed wheat. In this disastrous condition of the farming interest, we are turning our faces to the South

THE CROPS -- We regret to see in the papers unfavorable accounts of the wheat crop of this spring. "The severity of last winter (says the Salt River Journal) has done great injury to the wheat. In many parts of this state & the adjacent counties of Illinois, the farmare ploughing up their wheat fields and putting in spring grains, believing that the crop will not be worth gathering. The high price of cotton, and the large profits! and successful speculations which have been made by those who have recently adventured to that favored region, has produced a sort of mania for emigration, which threattens to leave desolate, not only the inferior hands, but the rich and healthy mountain regior also. The general cry is, "We cannot make wheat. If What else can we devote our lands to? THOMAS H DAWSON & SON HAVE the pleasure of announcing that they can now offer to their customers and the public, a full and complete assortment of fresh and

genuine articles in their line, consisting of Drugs, Medicines, and Chemicals, of every kind now in use, Perfumery, in great variety, Confectionary, of various kinds,

Brushes, of nearly all sorts. Yellow, Prussian Blue, Red and Yellow

THE public journals have, no doubt, already conveyed to you the disastrous intelligence of the total destruction by fire, on the two o'clock, of the STEAM MILL, erected by us for the purpose of grinding Tomsoni-an Medicines. The Dyeing Establishment of Ward Sears, the Last Factory of the Messrs. Larrabee's and their Dwellings, shared a similar fate.

Amidst the havoc made by the devouring element, we have reason to rejoice that our Med icine Depot, in which the pulverised and compounded articles were kept, was a considerable distance from the scene of conflagration; con-sequently, we are still in a condition to fill, with promptitude, and upon our usual accommodating terms, any orders which our friends and a generous public may be pleased to forward; and the confidence we repose in the punctuality of our patrons , affords us reasonable assurance, that, our establishment will have risen, Phœnix-like, from its ashes, and be in full operation, before our present supply shall

have been exhausted.

OR THE SPORTING AND DRAMATIC COMPANION.

ON: the third of January, 1835, was commenced in Philadelphia, a new periodical, bearing the above comprehensive title .-Its contents will be carefully adapted to the wants of that portion of the public who patronize Dramatic Literature, the Turi, Sporting and Fashions. From the growing wealth and increasing population of the United States, and the near assimilation of the national appetite with whatever promotes the rational Recreations of Life, it is presumed that this Journal, -possessing, as the projectors of it will, ample means to diversify its pages, & a determination to be fancifully strewed with any of the charms delphia and Baltimore, of novelty to ensure it popularity and encouragement, has been not the least embarrassing bstacle which the projectors of this work had to surmount in its inception. Feeling confidently assured, however, that its success is certain when its character become properly known, the best selected English periodicals to assist in procuring materials for its columns.

It is not altogether feasible, when a new publication is completed, to present in detail to the public its prospective attractions. It is necessary, nevertheless, that its principle features should be drawn out, as it is by them that its merits, if it has any, shall be judged .-This is the more readily accomplished, the publishers being satisfied that whatever industry and a watchful zeal can effect in completing the filling up, will be done, and that they never will be found deficient or neglectful in the prosecution of this enterprize, and in striving to produce a beneficial and profitable result to themselves and to others.

THE DRAMA Will form a material portion of the Gentlemen's Vade Mecum. It is intended to publish alternately, every week, an entire play and farce-to be selected with a single eye to their merits alone; a preference, however will be extended, in all cases, to native productions, when they can be attained. Independent criticisms, carefully excluding all invidious comparisons, and recommended by their brevity, will be regularly inserted—besides Biographi cal Sketches, Anecdotes, and Bon Mots, of prominent Comedians of the present and past iges, of which a rare and inexhaustible compi lation is in store.

THE TURF. A fiaithful record will be kept of all the Running and Trotting matches in this country and England. Biographies and correct Portraits of celebrated thorough-bred Horses will be published once a month. Every fact relative ately, otherwise they will be placed in officers to the breeding, management, keeping, and diseases of this invaluable animal, will be particuiarly selected.

SPORTING

Under this occupation will be enumerated and Caroline Advocate, will copy the above. accounts of Shooting Matches, Pedestrian Feats, Gymnastic Exercises, Aquatic Excursions, Fishing, Gaming, &c. with Anecdotes of noted Dogs.

GENTLEMEN'S FASHIONS. A quarterly review will be procured, explamatory of the various improvements and changes which costumes worn in the fashionable circles constantly undergo; by which it will be rendered an easy task for drapers and tailors : a distance, to suit their customers with the most approved colors and modern style of dress, OOACH, GIG, AND HARNESS at the earliest possible periods. It is absolutely necessary that the House and this nation should understand the real question before us: for arguments have been advanced upon premises which do not exist, and remarks predicated upon a case which is not embraced by the bill. This makes it my duty to call attention to the real question, that we may not dwell longer upon supposed cases. This is not so dangerous as to induce a Government of union between the States. DREADFUL EARTHQUAKE IN CHI LI.-DESTRUCTION OF THE CI-

By the ship Coral, Capt. Whitten, arrived at New Bedford in 85 days from Talcahuana, we learn the melancholy fact of the entire destruction of the cities of Conception and Talcahuana by an earthquake on the 20th of February. The New York Star says, a gentle-man who was an eye witness of this terrible calamity, describes it as follows:

"The morning of the 20th was clear and seto the miserable people now inhabiting the border hills in this vicinity. The first shock commenced at 20 minutes past 11 o'clock, and lasted with but slight intermission for 47 minutes, causing the hills and valleys to rise and fall like the waves of the ocean. During the continuance of the first shock, which was much the most severe, I expected to be destroyed every moment-it was almost impossible to

Recapupright.

Talcahuana is completely demolished—the buildings were not only shaken down but the ruins of houses, stores, &c. were completely swept away afterwards by the sea, which retired about 15 minutes after the first shock, leaving the shipping entirely dry, at anchor in the harbor-it came in again in about two minutes, to the height of 25 feet above the usual mark, overwhelming the whole place. Men, women and children fled for the mountains, but many were overtaken and swept to the o cean by the receding waves, which completed the entire destruction of the town, depriving hundreds of their second garments-many who were in good circumstances are now completely destitute. Furniture of all kinds was carried away with the houses: not even leaving a vestige to inform the owner of the situation of his former residence. It would require an eye witness to be made acquainted with the complete destruction of the town by this awful ca-

The number of lives lost could not be correctly ascertained. A new cathedral, building in Conception, buried twenty workmen in its ruins. There were but two American ships in the harbor of Talcahuana at the time, besides the Coral—the Milton and the Nile. A small schooner was driven from her auchoring and drifted over the town,

The scene during the first shock was appal-ling. The trembling of things around—the boiling of the sea, as when the water is heated over a fire-the earth opening wide, giving forth the most terrific means, and laboring with internal fires. Buildings dottering in ev ery direction, and whole blocks of brick buildings cocking to their for n lation. In their f ill they met others, and all, as if locked indeath, sunk, with a tremendous crash, into the gaping earth, leaving no trace of their existence save memory, and the smoke and ashes which arose from the confusion. The scene was one o

thrilling and awfed suffirmity.

When the first intimation of the breaking up of the convulsed earth was received by the inhabitants of the cities and towns, they, struck with horror, ran into the middle of the wide streets and knelt in fervent prayer to God, to nave them from the threatening destruction .-Our informant, who was among the number says that he saw families run from their doors and just as they left their buildings, mostly of brick, came tumbling down after them. It is a most fortunate thing for the people of the country, that the shock came at mid-day .find it taken place in the middle hour of night, they would have been compelled to flee for salety, without even the one suit of clethes they now have, making their sufferings much

It is a matter of history, that between the years 1520 and 1752, five great earthquakes oc-curred in Chili. That on the 15th of March, 1657, destroyed a great part of the capitol; that on the 18th June 1730, drove the sea against the city of Conception, and overthrew its walks; and that on the 26th of May 1751, completely descroyed that city, which was again inundated by the eca, and levelled with the ground all the fortresses and villeges tying between lat. 34 and 40 south. The shocks continued at inter-rals more than a month. Not an individual framan life, however, was test on this occasion except some invalids who were drowned in nception." In 1751 Conception was rebuilt o the north side of the river Biobio, about a league from the sea.

THE PARISIAN SIBYL. Whence comes it that man has such a desire to interrogate the future, such an idle anxiety to divine the weited secrets of fortune In every nation I discover traces of the imprudent curiosity. The Jews had their witches, the Greeks their sibyls, the Persians their magi, the Spaniards their gipsies, the Romans had their augusts, whose oracles they respected; the French had their sorcerers, whom they frequently finished, by burning them with

great ceremony. In former days the business of servery was not exercised in France with impunity, and those who were given to shuffling fortunes from cards, asswered for it too often with their lives. Our good ancestors were in the habit of barning without scruple all who were guil-ty of witcheraft; and my good ladies Villen-e ive, N! i h , and Le Normand, now in full table a purse of indefinite weight, and ran to

I saw that she was not herself very well persuaded of the truth she wished to impress upon me, and I thought that of all who came into her house, the young sibyl herself had the least faith in the infallibility of her oracles.

> While I was in Baltimore, various inquiries were made in relation to Mr. Clay. I was often asked whether I believed he would be a candidate for the Presidency at the next election; and I invariably responded in the negative. I stated that I believed Mr. C. understood his position too well to consent to enter the list against the democratic candidate-that he saw a portion of his old friends zealously his leading friends united in declaring that he would not be a candidate.

In reply to the inquiry "What part will Mr You are married, sir; sixteen or seventeen Clay "take in the struggle which seems to be months ago you espoused a young lady about inevitable between Mr Van Buren and Judge White?" Mr. Clay does not lack information as to the political action of Judge White. He knows that, as a Senator, the Judge has fought, "shoulder to shoulder," with the Nullifiers, against the National Republicans, thus he is now moving, as "the Southern Candidate," un der the influence of Mr. Calhoun-and that, from the justice, patriotism, or magnaimity of an administration, brought into existence by what the Nullitiers term "the South," Clay and his friends could expect nothing but reproach and scorn. ANNAPOLIS, May 30. A party of pleasure, including the family of Col. Jamaica papers have been received at New York to May 16th. The Kingston Commercial Advertiser gives the result of the Governor General's recent visit to the Caymanas Islands, the object of which, it appears, was to inform the inhabitant proprietors of those islands that in consequence of their apprentices (manumitted slaves) not having been duly registered, they have become absolutely and unconditionally free, and are not bound to render service for any period of time whatever. The time appointed for the registration was the 1st of August, 1834. The Proclamation of the Marquis of Sligo admits that this is a great hardship and apparent injustice to the proprieors, inasmuch as the Registration Act did not extend to those islands, but the Abolition Act s imperative in its terms, and the law-officers of the crown have decided that it is also universal in its application. The Governor recommends a patient submission to the bardships and an application to Parliament for redress; and this course the proprietors, it seems, have implicitly followed.

There had been a further arrival of European emigrants, to labor on the plantations The Despatch of May 9th says, "The weather has been seasonable in most of the Leeward Parishes, and the rain fell abundantly in Manchester, Vere, &c. The prospect of a Coffee crop in the former, is said to be very cheering. The crops in Vere are forward, and we feel much pleasure in stating, on good authority, that the people work well and cheerfully.'

Curious Icelandic Custom. - The Icelanders have a curious custom, and a most effectual one, of preventing horses from straying, which I believe is entirely peculiar to this Island. Two gentlemen, for instance, are riding together without attendants, and wishing to alight for the purpose of visiting some object at a distance from the road, they tie the head of one horse to the tail of the other, and the head of this to the tail of the other. In this state it is utterly impossible that they can move either backward or ferward, one pulling one way and the other the other; and therefore, if disposed to move at all, it will be only in a circle, and even then there must be an agreement to turn their heads the same way.

A good old age .- Last week at Keighly, a donkey, well known in that town under the name of Old Adam, died. The above Ass was the property of Edward Carr, machine-maker, he states that it had been in his and his ances-Wightman In the Legislature of Connecticut, of wind struck her-the main boom jibed, and tors' family above eighty years, and that it instructing the Senators from that State in Con- carried one of the young ladies overboard. | was 14 years old when they got it. > Wool .- The whole amount of wool raised ast year in the United States was seventy-five millions of pounds, in addition to which about three millions were imported from abroad, making the whole quantity manufactured in American factories, seventy-eight millions of pounds. In addition to the above, manufactured woollen cloth was imported to the amount

> Cholera.-The last Mississippian says:-"This scourge of the human family has again made its appearance upon our borders. Many have already fallen victims to it upon the river.

> CLEVER HIT .- We cut the following from the Boston Morning Post. It is "too true to make a joke of. "There is a man living at Aylesbury, who

has acquired so complete a command over the

muscles of his face that he can cry on one side and laugh on the other at the same time." Of This Aylesbury man is not the only one same time. The Whig party turnishes many striking instances of the same feat, particularly since the result of the Baltimore Convention. They give a sort of Hyena grin, indicative of suppressed sorrow and forced joy.

THE TURNED HEAD .- Duff Green is republishing the story of the "Turned Head." If one should be permitted to judge from the editorial articles in the Telegraph, the editor's head and brain too, has been turned over since he turned his coat .- Balt. Rep.

We published, some time since, an account of the death of a Law student, of the name of Cooper, at Torento, U. C. who fell in a mysterious duel. The Canada papers have recently given an account of a youth who committed sucide, leaving a written acknowledgment that he was the antagonist of Cooper. The death of the former, by his own hand, furnishes a strong illustration of the sentiment expressed by Sir Walter Scott, in the Antiquary, that it is an ill fight where the survivor has the worst of it ."-Bal. Amer.

CONVERSATIONAL INTERCOURSE WITH THE SEXES, -What makes those men who associate habitually with women, superior to others' What makes that woman, who is accustomed to, and at ease in company of men, superior to her sex in general; Why are the superior to her sex in general; women of France so universally admired and loved, for their colloquial powers? Solely because they are in the habit of a free, graceful and continual conversation with the other several and continual conversation with the other sex.

Women in this way lose their frivolity, their faculties awaken, their delicacies and peculiar ties unfold the'r beauties and captivation, in the opirit of intellectual rivalry. And the men lose their pedantic, rude declamatory or sullen manners. The coin of the understanding and the heart is interchanged continually. Their aspertities are rubbed off, their better materials polished and brightened; and their richness, like fine gold is wrought into finer workmanship by the fingers of women, than it ever could be by those of men. The iron and stee of our character are laid aside, like the harshness of a warrior in the time of peace and security. - N. Y. Mirror.

Hail Storm .- We understand that a very violent Hail Storm passed over the lower part of this county on Friday evening last accompanied by a tremendous wind. So violent was the raging of the storm, that several vessels at anchor in the river were cust loose from their moorings and capsized - a new vessel belong-ing to Mr. Emory Riggin, was blown from the stocks and slightly injured. The wheat crops, we regret to learn, are literally destroyed,where, but a few days ago, the wheat was seen growing luxuriantly, now presents a most awful spectacle-indeed vegetation of all kinds has sustained immense injury. The Swamps, also, are seriously damaged—fortunately, however, the storm was confined, principally, to a narrow strip of country. The hail stones were of an enormous size, measuring from 5 to 7 inches in circumference .- Princess Ann (AN.) HerMAR

#### OF NEW YORK. FOR VICE PRESIDENT,

RICHARD M. JOHNSON.

OF KENTUCKY.

On the first page of this morning's paper will be found the speech of Col. Johnson, the on a motion for the in-lefinite postponement of fully rapid and she could not stop herself until the bill to renew the charter of the old U.S. she piched against a jutting bank of hard clay. Bank. The great fundamental principles of rate of action. He then tought side by side for a strict construction of the Federal Constiintion, against the Federal doctrine of implied powers. Let those who question the orthodox principles of R. M. Johnson, read this speech of his early political life,& point out in what parriculars he has abandoned his original faith.

THE FEDERAL WHIGS .- The Webster flar is at last hoisted, and we may fairly conclude, "nailed to the mast" for victory or death. The organ of our Federal Senator is laboring to show that there is no irreconcileable difference between the friends of Judge White and dish of coffee on the breakfast table, every those of Mr. Webster; that although one of these distinguished leaders, from his earliest pulitical life, has been the champion of State rights and of a strict construction of the Constitution, while the other has been as uniformly the champion of high Federal powers and a latitudinarian construction,-although one of them has been the unyielding opponent of the treat moneyed monster, the U. S. Bank, and the other its unwavering friend and supporter, -although one of them has been unceasing in his opposition to a protective tariff, and to the tures, and a wise and general system of interthem has been for the last six years the personal and political friend of Mr. Van Buren, and has supported every prominent measure of an administration with which Mr. Van Buren is now, and for the whole of that time has been, friends and organs) that however much he may carned from \$36 to 55. have been opposed to the present administration, and to Mr. Van Buren as the individual cy, yet even the principles and policy of Mr. event. Van Buren are less abhorrent to him than those of Judge White, still there is no irreconcileable difference in their principles, nothing to forbid a union between their friends and sup-

Are these the political principles of our Federal Senator? Does he find no irrreconcileable difference in the principles of these two distinguished men? He will no doubt cry out "corruption! corruption!" "Mr. Webster and Judge White are equally opposed to the corruptions of the present administration, to the Kitchen Cabinet influence, no matter, therefore, what their principles may be."

But how is it, Mr. Senator, that Mr. Webster and all his New England friends, prefer Mr. Van Buren with all his corruption, to Judge White, and, on the sales hand, that Judge White prefers Mr. Van Buren, whom he has aided and supported in all his corruption, to the Hartford Convention Federalist, Webster? How is this Mr. Senator, is it not pas-

sing strange? Let us lift the curtain Sir, or look behind the scene, perhaps we may see the secret prompters there. What do we see there; Judge White's friends are trying to make him Presi dent and they have raised the cry of "Presidential dictation, Office Holders' Convention' ties in a short time. &c. &c. Mr. Webster's friends are trying to make him President; they have mounted him on their shoulders, and are crying lustily "behold the champion of the Constitution!" "come to the rescue of the Constitution," "the Constitution is in danger," "to the rescue, to the rescue."

But who are those in the back ground' what do they say? "White men, Webster men, all good and true Whige, come give us a lift .-Down with Jackson,-Down with Van Buren-Down with the Kitchen Cabinet-What if some of you are for the Bank, and others op-posed to it? What if some are for a high the navigable waters of Chester River, about tariff and others opposed to it? What if some three miles from Chester Town. There are are for internal improvements and others against them? What if some are Nullification and marsh, and the balance in wood. The im-Democrats and others Consolidation Federalisis? Come all good and true Whigs, help us elect our members of the Legis-Lature, so as to continue our present county and state officers, and re-elect the Hero of Myrtle Grove to the U. S. Senais. No mat ter whom you make President, nor what are his principles, so as we are continued in office, all will be well." This is Federal Whig put riotism, these are Federal Whig principles.

ANOTHER CARICATURE. We "catch the manners living as they rise" about as quickly as any nation, particularly is two shillings is to be gained. The Wall-street perambulators were tickled this morning with a now caricature. General Jackson is represen ed standing perfectly stiff and erect holding is one hand a long of money labelled 25,000,000

and in the other a tolerably thick shillalat, vita

the label, "It's well that you paid it, or by the Eternal." Opposite him stands Louis Phillippe, replying thus-"Not another word, my dear General, your apology is sufficient." It is a little piece of pleasantry, tolerably well done, and about as near to an apology as the old Chief will give under his present feelings. [N. Y. Star.

SPORTING AND DRAMATIC COMPANION

ON the third of January, 1835, was comof novelty to ensure it popularity and encouragement, has been not the least embarrassing obstacle which the projectors of this work ha to surmount in its inception. Feeling confid'ntly assured, however, that its success is certain when its character become properly known, they have already incurred considerable expense in forming correspondents over the Union; and have also ordered regular supplies of the best selected English periodicals to assist in procuring materials for its columns. It is not altogether feasible, when a new

publication is completed, to present in detail to the public its prospective attractions. It is necessary, nevertheless, that its principle features should be drawn out, as it is by them that its merits, if it has any, shall be judged .-This is the more readily accomplished, the publishers being satisfied that whatever industry and a watchful zeal can effect in completing the filling up, will be done, and that they never will be found deficient or neglectful in the prosecution of this enterprize, and in striving to produce a beneficial and profitable result to themselves and to others.

THE DRAMA Will form a material portion of the Gentlemen's Vade Mecum. It is intended to publish alternately, every week, an entire play and merits alone; a preference, however will be extended, in all cases, to native productions, parisons, and recommended by their brevity, will be regularly inserted—besides Biographical Sketches, Anecdotes, and Bon Mots, of prominent Comedians of the present and past ages, of which a rare and inexhaustible compi-

AN OFFICIAL BLUNDER .- On Tuesday The value of improvements and property connected with and arising from the anthracite coal trade of Pennsivania, in the three great coal fields, is estimated by a committee of that State as follows, viz: rail roads and canals made by companies and individuals, including part of the State Canals, 489 miles, 6,750,927 42; collieries, boats, cars, &c. 1,270,280; capital invested in coal lands; 4,900,000; mining capital, 480,000; value of towns in the coal fields, 3,374,000; making an aggregate of \$19,186,1217, 42 to which may be added the value of the storehouses, and other places, together with 480,000; value of towns in the coal fields, 3,-374,000; making an aggregate of \$19,185,-1817, 42 to which may be added the value of the storehouses, and other places, together with the value of vessels and capital employed in shipping coal.

The bituminous coal lands in Pennsylvania are supposed by the same Committee to comprehend an extent of 21,000 square miles, and the anthracite of 975 square miles.—Since the opening of the anthracite coal trade in 1820 its average annual increase has been 33 per cent.

The Committee believe that it will continue during the next ten years to increase in the same ratio in which case, the consumption in 1843; will be 10,510,980 tons, the value of which, at \$5 per ton, will be 52,544,450. Supposing the increase not to exceed one half of the above estimate, the trade of that year, in the article of coal alone, will amount in value to twenty six milligens dollars.

part of the Crew. A month or two since, we copied from a Canton paper, a brief paragraph, mentioning the arrival at that port of two American sea-men, late of the whale ship Mentor, lost in the be:n beld in slavery, by the savages of the in a long conversation obtained from them the following particulars:-

On the 20th July, 1830, the Mentor sailed from New Bedford, for the South Seas, on a whaling voyage, with a complement of twentytwo men, including the officers. On leaving New Bedford, the first place they touched at, was the Azores. After a short stay at Ferrol, they passed through the Timore Straits, and continued their voyage without any thing remarkable o curring, until they passed Amboyna, with the intention of going to the Tinian Islands, near the Philippines.

It was then advanced in the month of May 1931, and for some days previous to the 21st the weather had been so extremely boisterous' that they were unable to take any observation. On the 21st of May the weather became still worse, and a most tremendous storm came on, which obliged them to take in almost all their sails; the gale continued and between eleven and twelve o'clock that night, whilst the vessel was steering under a close-reefed maintopsail, and a back topmast-stay-sail, she struck upon a coral reef running out from the nearest of the Pelew Islands.

It was evident to all on board that the vesse pieces, and a boat was lowered from her and eleven of the crew got into it, who pushed off impossible that any boat could live long in though without a hope to save the ship. They cut away the masts and did every thing they could to right her, but she still lay on her beam ends a helpless mark for the fury of the waves. Her crew at length gave up their useless efforts by lashing themselves to the weather side of the ship, where they remained until morning. As soon as the day dawned, they launched the remaining boat from the ship, and the cleven survivors got into her and rowed along the reef about two miles from the wreck, where they got on dry land. Here they remained two or eight pounds of bread, which was all they took from the wreck except some of their clothes, two or three cutlasses, a musket and a wards them, one of which was two or three miles a-head of the others. The captain of the ship immediately informed his men that they would be soon surrounded by savages, and rerushed on the men, from whom they took their not days, must have terminated their have savages carried into their canoe, and then auto which they insisted the seamen should acand whatever else they could carry in their canoes. All the canoes went away except one, letter from the captain of the ship which took which remained, the savages in which made them from the island, describes their situation, signs to the seamen to throw them a rope, and and the circumstances under which be fell in they would tow them to land. The seamen accordingly threw them a rope, and the savages towed their boat until they were near the land, when they suddenly stopped, and used such threatening gestures towards the boat's crew, that the Captain ordered Mr. Nute to monly called Lord North's by the English utmost exhaustion.

The place where they landed at was a small they saw a canoe approach them with two friendship The seamen in return caught a large crab and held it up as an answering signal, and the savages then landed, came close pleased with the meeting. COLVING ESTABLISHMENT BROKESTED. On Monday afternoon, Mr. Constable Ball, of this place, received information, confidentially, confirming the suspicions heretofore entertain ed concerning the existence of a counterfeit foreign coin establishment in the neighborhood o Belleville. As the offence is appropriately under the cognizance of the United States Courts, Mr. B. communicated the facts to the Marshal of the district, Gen. Darcy, who procured the necessary writs, and with Mr. Ball, Sheriff Robinson, Constable Jones, and Mr. James Keen, proceeded to the place yesterday morning, and broke up the mint, arresting the principal, an Englishman, by the name of Joseph Gardner, and John Campbell, one of his

supposed accomplices.

They found in the cellar of the house which is the last dwelling on the left side of the Newlage,a complete and efficient die sinking establishment, tools, presses, and metals. Gardner and his wife professed of course to be entirely innocent of any thing like coining money. He pretended to be a mere die sinker by trade. nd a stamper of medals, &c.; and nothing further to criminate him was found in the house. Convinced, however, of the criminal character of the establishment, the party continued their search, and in the course of two or three bours discovered two Spanish dollar dies in a stone wall under the barn. Other dies, of different kinds, were subsequently found in a stone fence adjacent to the house. One of the genlemen, observing a muddy spring hole at a hort distance, thrust his hand in and pulled up bag of spurious Haytien coin. The search of the house was then renewed, which resulted in the discovery of a package of fine gold, supposed to be worth some hundreds of dollars, and several pieces of spurious silver Mexican

#### RICHARD M. JOHNSON.

Ifhonorable wounds received in the service of one's country, constitute any claim to the admiration and gratitude of his fellow citizens, the distinguished individual whose name we place at the head of this article, has perhaps more of these to exhibit than any other person now alive in the United States.

RICHARD M. JOHNSON, who has been nominated as a candidate for the office of Vice President of the United States, was born in Kentucky, in 1781. He is now in the fifty-fourth year of his age—in robust health—and has been for nearly 30 years actively and efficiently engaged in the public service.

After having received a liberal education, he qualified himself for the Bar, and immediately entered upon the duties of his profession, un-W. C. Rives. der the most flattering prospects. Before he Upon motion of John Ross Key, Esq., of Attained his majority, he was elected to the Legislature, and distinguished himself by the lisplay of those solifl and useful talents which have marked his whole career.

While yet under the age of five and twenty. he was elected a member of Congress, and where, we believe, he has continued to sit ever since, and where he has rendered as many important services to his fellow citizens as any other individual in the United States.

His politics were always steruly and truly lemocratic-ho was identified with that great party from his first appearance in public life. and it will be seen that there have been a stability and consistency in his course, which have marked the career of few if any of our public men. He was the firm and unbending supporter of the administrations of Jefferson and Madison-and with what energy and enthusiasm this veteran and patriot discharged his duty to his country during the war of 1812.it wilbe the duty of the future historian to recor! He voted for the war, and he gallantly shed his blood in the field to bring at to a speedy and glorious termination.

He has early shown with what readiness ho was prepared to fly to the standard of his country. In 1802, before he was of age, le had volunteered his services to march to New Orleans-when that port, in violation of an existing treaty, was closed against the citizens of the United States.

In the summer of 1812, he raised a volunteer regiment, and marched at its head to the relief of Fort Wayne, the march was a long and arduous one, & although no decisive military operations took place, still the example of Col. Johnson and the gallant men under his command. animated his fellow citizens, and inspired them with that determined spirit which carried us riumphantly through the war. His conduct luring the expedition, both as an officer and as a man, was such as to merit the highest encom-

Military operations being closed, Col. Johnson hastened to Washington and took his seat in the Congress of 1812-13, and manfully supported the administration, in every measure e.ne.l necessary to prosecute the war with rigor. Having obtained permission to raise a regiment of a thousand mounted volunteers, he nastened home immediately after adjournment of Congress, to carry that important scheme into effect.

The reputation which he had acquired enibled him to accomplish the undertaking in a few weeks. He immediately marched to the frontiers, and shared freely in all the dangers and the glories of the campaign of 1813. The distinguished part he took in the celebrated battle of the Thames, one of the most important of the war, will never be forgotten by his countrymen. It was in that battle that he slew with his own hand, the formidable Indian Chief, Tecumseh.—The British forces were completely routed, and General Proctor, a cruel and relentless enemy, was forced with a few dragoons, to save himself by flight. Colonel Johnson was wounded in several placesand twenty-five balls either passed through his

clothes, or penetrated his body. The victory of the Thames put an end to the war on the North Western frontier, and relieved our citizens from the combined ferocity of the British and the Indians. The wounds Col. Johnson received in battle were so severe that his life was for a long time despaired of.

His health continued for some months in a very precarious state-but such was his devotion to the public service, that he resolved while he was still very unwell, to proceed to Washington and resume his seat. He arrived there in February, 1814, and was received with the utmost cordiality by persons of both

He continued his congressional labors till the var was brought to a close, and sustained all the measures that the exigencies of the times required, with the same firmness in the councils of the nation, that he had displayed in the

Our space will not permit us to enumerate the many important legislative labors that have marked the career of this distinguished veteran and patriot. We shall, however, be pardoned for enumerating the following.

No public document has ever excited more resolution offered by Gen. T. M. Forman on laid before the public in 1829. Great excitement prevailed at the time, and powerful efforts On motion of John W. Thomas, Esq. of were made to prevent the transmission of the mail on Sunday. Col. Johnson's able and conclusive Report, however, settled the quespowerful argument, and is marked with that candor, sincerity and humanity, which have always been characteristic of its author.

Such is a very imperfect outline of Richard M. Johnson, who has been nominated as a candidate for the Vi.e Presidency of the United States. The great Democratic party with which he has always acted, and with which he and to each county in the State to appoint a is completely identified, will, we trust, hereafter declare by a triumphant majority, that this veteran soldier-covered with honorable wounds received in defence of his countryand this experienced and upright legislator, is worthy of the station for which he has been named as a candidate.—Pennsylvanian.

> Rats and Rattlesnakes .- Some time since, the master of a vessel took home with him a rattlesnake of rather a large size. In order to ascertain in how short a time the sting of the reptile would produce death, he produced a rat and put it in a cage with the snake, who darted on it, and in something less than five minutes it was dead.

Some time after he was induced to try the experiment; but on the latter occasion the result vas by no means the same. On being placed in the cage, the rat retreated to one extremityand the snake to the other and, having sprung his rattle (a process which usually occupied about a minute) and placing himself in the usual attitude he darted on the rat who having dexterously avoided his assailant, before he had time to prepare himself for another attack, had in his turn made such a furious assault upon the snake, which he seized by the back of the neck, that in ten minutes the reptile ceased to exist; the rat never for an instant let go his hold till he had strangled his antagonist.—N. Col. John-

The signs are every day gathering against the Judge-North and South, and all around We learn that he cannot carry Mississippi with him. Alabama is already shivering in the wind-and even in his own Tennassee, we know that there are men, who will abanden him the moment they find he is taken up by the Whigs to run down the Republicans. One of his staunchest advocates, and one of the most active in bringing him out, made that declaration not ten days ago. But how can he hesitate about the complexion of his supporters'-Who are concerned in the attempt of getting up White meetings in Virginia? The Whigs .-What politicians disclaim him here, and generally in the South? The Republicans—friends of the Administration, and opponents of the Whigs. Who are the prominent "preformers" at the great meeting, (as it is called,) which was got up the other day at Mobile.—
They are "men who have always opposed the Administration, and supported the Bank." If Mr. Bell and the Judge's friends are determined on his ruin, they may persevere at their plea-sure—but he will rue it as long as he lives.

Among the most unpropitious signs which have recently appeared we would point out the movements of the Federalists in Boston—and nor was there one word in the article of the of the Nullifiers in South Carolina. 1st. Now, it was but the other day, that the

Whig of this city declared: "Mr. Webster. will decline the nomination of the Massachusetts Legislature: we learn so from good authority." Mr. Walsh was sure that this is an utter mistake"—and the meeting in Fancuil Hall, whose proceedings are now laid before our readers, shows what little confidence is to daily filled. We called the attention of our be placed in the statements of the Whig. The meeting is said to have been numerously attended-and their resolutions breathe the most enthusiastic attachment to the interests of Mr. Webster. They declare that they "concur in the nomination of Daniel Webster as a candidate for the Presidency of the U. S., and tender it our decided and earnest support; that, though ous and irresponsible Department of the Ex-Liberty and the Country, but to meet the crisis with zeal, as well as firmness, and to adhere forsonth, he aspires to yet higher station, and to what we esteem principle and duty, let who thinks it his interest to be or appear honest. will fly." Here then we have the flag unfurled in Massachusetts. The Whigs of the North will probably go for Webster—not, for Judge to do so. The business habits and capacity of White. As the Southern Whigs, therefore, the Postmaster General are admitted on all even if they were to concentrate their votes upon the Judge, are unable to elect him, will he still consent to become a tool in their hands, to deleat an election by the People, and transfer it to the House of Representatives? 2d. But the recent signs of the South are e-

qually discouraging to his prospects. Some of he leading Nullifiers of South Carolina are taking the field against him. On the 21st. ult. there was a great Military Review at Barnwell Court-house which was succeeded by a public dinner. The Charleston Courier gives he following account of it:

"On Thursday, at one o'clock, the citizens of Barnwell gave a public dinner to Gov. Mc-Duffie, at which Gen. Hayne, Commander of er one,—the assertion and maintenance of printhe division, was invited as a guest. In the ciples. From this object we will not be dicourse of the aftornoon, both gentlemen replied verted. to complimentary toasts, by addressing the meeting, and both took occasion to disavow the course taken by a portion of the party to which they belong, in support of Judge White as a candidate for the Presidency, declaring that with the principles for which they had been with the principles for which the State should contending, and advising that the State should contending, and advising that the Presidential contest. We understand that it was the intention of the Committee of A rrangements to apply for the speeches, for the purpose of publication."

Mr. McDuffie followed up the blow by a

speech which he delivered on the 26th at Ham burg.—According to the Augusta Chronicle, "His exposition of the madness, the folly, the stupidity, of taking part in the pending contest for the Presidency, was most powerful and impressive. Would to God that every State Rights man had heard it—that we could do the least justice to it; but the latter we would not even pretend to attempt, even if we had now time to do so. It was replete with biting, withering sarcasm, founded upon the most irresistering sarcasm, founded upon the most irresistable and conclusive argument; and must have satisfied every State Rights man who heard it, of the utter impossibility of his honorably vo-ting for Judge White, or at all countenancing cates be issued, which the Treasurer reserves his pretensions. Who, asked the eloquent speaker, was Judge White? Who, among his hearers, had heard of him, till he was now put up a candidate for the Presidency-save, perhaps in that most prominent act of his life, when he voted to repeal and blot out forever the Federal Constitution, and deluge our principles in our blood? And South Carolina was called upon, in the very face of her declared principles, to support this man—this "State Rights man," forsooth?—a man—an effigy!— Mr. Van Buren, too, was not spared, and his character and pretensions did not fail to elicit the most marked contempt. Mr. Van Buren, it was said, (observed the speaker) was a conjuror-nay, the very devil himself! And who was to rid us of this devil? Who was suddenly popped upon the Stage, to make battle with him in our behall? Another Punchinello!— Now, gentlemen, observed Mr. McDuffie, be it distinctly understood, that in this contest, I am neither for Punch nor the Devil! Gov. McDuffie, said he wished to be understood as not extending his remarks against the impropriety of engaging in this contest, at all beyond the limits of his own State. That he deeply regretted, that any thing should have occurred in that State, to induce him to speak on such a subject at all. But that palpable indications, in cer-tain editorial quarters, and the inferences drawn therefrom, had rendered it the bounder duty of every one who felt as he did-that for South Caroima to take any part in such a con-

that he wholly and thoroughly washed his hands of it, now and forever!" The Augusta Chronicle adds, that "We feel warranted in saying—and it gratifies us much to do so, as it will, doubtless, our readers generally-that Gen. Hayno fully and zealously accords with Gov. McDuffie, in his views of of the Presidential question—as indeed does prabrily every other distinguished or influen-tial Nutifier of the State—with, perlays, one single exception," (alluding perhaps to Mr. Calhoun.)

test, would bring inevitable ruin upon her prin-ciples, and disgrace upon herself—to speak out, and determinately set his face, against it; and for himself, he wished it distinctly understood;

Thus the friends of Mr. White see how he stands, in the North and in the South—and we assure them, they need not look to Virginia nor to the hopes of division, which are to be brewed by the Whigs, from the Baltimore nomination. They only stick to him for the

moment, because they are perfectly at a loss what course to take, and what steed they are to ride in the field.

An affair of Honor .- On Tuesday afternoon, midshipmen Magruder and Shubrick, met at Bladensburg to heal their wounded honor, and after an exchange of two shots, by which neither were injured, shook hands, and returned to this city yesterday morning.—Bal. Chron. EASTON, MD.

SPORTING AND DRAMATIC COMPANION

ON the third of January, 1835, was commenced in Philadelphia, a new periodical, bearing the above comprehensive title .-Its contents will be carefully adapted to the wants of that portion of the public who patronize Dramatic Literature, the Turf, Sporting and Fushions. From the growing wealth and increasing population of the United States, and increasing population of the national appetite that near assimilation of the national Recreational Recreational Recreational Recreational Recreational Recreational Recreations and the public generally, for the library than the national Recreation and extensive patronage they continue to correct taste in all matters relating to its de- bly enlarged their establishment by adding be funcifully strewed with any of the charms delphia and Bultimore, of novelty to ensure it popularity and encour-agement, has been not the least embarrassing obstacle which the projectors of this work had to surmount in its inception. Feeling confidently assured, however, that its success is certain when its character become properly known, they have already incurred considerable expense in forming correspondents over the Union; and have also ordered regular supplies of the best selected English periodicals to assist in procuring materials for its columns.

It is not altogether feasible, when a new publication is completed, to present in detail to the public its prospective attractions. It is necessary, nevertheless, that its principle features should be drawn out, as it is by them that its merits, if it has any, shall be judged .-This is the more readily accomplished, he publishers being satisfied that whatever industry and a watchful zeal can effect in completing the filling up, will be done, and that they never will be found deficient or neglectful in the prosecution of this enterprize, and in striving to produce a beneficial and profitable result to themselves and to others.

THE DRAMA alternately, every week, an entire play and farce-to be selected with a single eye to their merits alone; a preference, however will be extended, in all cases, to native productions, when they can be attained. Independent criticisms, carefully excluding all invidious com-parisons, and recommended by their brevity, will be regularly inserted-besides Biographical Sketches, Anecdotes, and Bon Mots, of prominent Comedians of the present and past ages, of which a rare and inexhaustible compilation is in store

#### POETRY.

From the N. Y. Mirror. THE WESTERN HUNTER. BY WILLIAM C. BYRANT. Aye, this is freedom !- these pure skies Were never stained with village smoke; The fragrant wind, that through them fies, Is breathed from wastes by plough unbroke. Here, with my rifle and my steed, And her who left the world for me, I plant me, where the red deer feed In the green desert-and am free.

For here the fair savannahs know No barriers in the bloomy grass: Wherever breeze of Heaven may blow, Or beam of Heaven may glance, I pass. In pastures measureless as air.

The bison is my noble game; The bounding elk, whose antlers tear The branches, falls before my aim.

Mine are the river fowl that scream From the long line of weaving sedge: The bear that marks my weapon's gleam, Hides vainly in the forest's edge; In vain the she wolf stands at bay; The brindled catamount, that lies High in the boughs to watch his prey, Even in the act of springing, dies.

With what free growth the elm and plane Fling their huge arms across my way, Gray, old, and cumbered with a train Of vines, as huge and old and gray! Free stray the lucid streams, and find No taint in these fresh lawns and shades: Free springs the flowers that scent the wind Where never scythe has swept the glades.

Alone the fire, when frost winds sere The heavy herbage of the ground, Gathers his annual harvest here, And trains of smoke that heavenward tower, And streaming flames that sweep the plain, Fierce, as if kindled to devour Earth to the well springs of the main.

Here, from dim woods, the aged past Speak solemnly; and I behold The boundless future in the vast And lonely river, seaward rolled. Who moves, I ask, its gilding mass, And trains the bordering vines, whose blue Bright clusters tempt me as I pass?

Broad are these streams-my steed obeys, Plunges, and bears me through the tide Wide are these woods-I thread the maze Of giant stems, nor ask a guide. I hunt till day's last glimmer dies O'er woody vale and grassy height; And kind the voice and glad the eyes, That welcome my return at night. SKETCHES OF LONDON.

so extensive a plan cannot be effected without the aid of Great Britain. Accordingly, at the first coming among them; ruffling up and putlate public meeting of proprietors &c. in the Parish of Trelawny, it was resolved, that a memorial be addressed to the Governor, imploring him to lay before his Majesty's Ministers the present state of the Island, the appresent of the present state of the Island, the appresent of the present state of the Island, the appresent of the present state of the Island, the appresent of the present of hensions of the proprietors as to their security, and "to solicit the aid of the Mother Country to promote an object (emigration) so necessary to secure the safety and tranquility of all classes of his Majesty's subjects in this Island, and to afford the most likely means of continuing, though on a much smaller scale than hitherto, the cultivation of the staple products which yield so large a revenue to Great Britain."

The selection at Baltimore of the candidate or the Vice Presidency although not made with the same degree of unanimity, is, we have no doubt, in strict accordance with public expectation and the wishes of a large majority of the republicans of the Union. Col. Johnson is emphatically a favourite with the People, his popularity is great—almost beyond that of any other man. He has been long in public life, and his career has been eminently distinguished by acts which have won the foresteed and offertion of his which have won the respect and affection of his countryment. As a soldier and a statesman, he is every where known and admired; the honors of war and of peace he has won, and now wear's war and or peace he has won, and now wears with a plainness and simplicity every way becoming a republican patriot. Of his competitor, Mr. Rives, we entertain a very exalted opinion. Had he been preferred by the convention, the choice would have been entirely entirely to Naw York and he would have satisfactory to New York, and he would have received its electoral vote with the same corliality that it will now be given to Cot. Johnson; but the democracy having spoken, we confidently anticipate a united and vigorous effort by the friends of both candidates—that the only rivalry will be which shall do the most to secure our triumph. In this State there is little to be done—New York is no hattle field—the nemy discomfitted and routed, it is admitted by the Whig papers, "can not be rallied."

We take pleasure in submitting to our readers the following interesting correspondence Mr. Van Buren's reply was received by Mr. Stevenson in this city, on Friday last, the morning on which our last paper appeared had it been received the day before, it would have superseded the necessity of the disclaimer which we made on Friday-viz. that we had no arrangement with Mr. V. B. in 1829, or at any other time - that we had never pledged to give him our support, &c. Mr. Van Buren goes further in the letter now before us He challenges both friend and foe-he defies all those who were once his associates, but are now converted into his opponents, to affirm that he has ever solicited their support, or ever sought any arrangement to obtain the nomination, or to secure his elevation. This is a bold and manly appeal-It is worthy or the man, worthy of the occasion.

But the whole letter breathes the same lofty spirit. Bold and frank as this appeal is, it is not more so than the pledge which he offers, to remove any doubt which may be entertained of his political opinions—if any doubt should exist—by answering, on all suitable occasions, the enquiries of his fellow citizens. For the present, be contents himself with declaring that he is prepared to carry out the principles of the ent Administration, and to tread generally in the footsteps of President Jackson.

He dwells most emphatically upon the value of our institutions -and the "immense stake" which we hold "for the weal or wo of man-He pledges himself, if he should be found worthy of the confidence of his country men, to watch over the "Union as the pal ladium of our safety"-and by a few but masterly strokes of the pencil he delineates the two rules which are essential to its preservation: the 1st is, to exercise the powers which are delegated to the government, "in a spirit lofty of moderation and brotherly love"—and the 2d ruin. s, "religiously to abstain from the assumption of such (powers) as have not been delegated by the constitution." WASHINGTON, May 29th, 1835.

GENTLEMEN: I have the honor to acknowstant. The nomination you have been deputed to announce to me presents the only contingency, upon the occurrence of which, I could ent to become a candidate for the high office of President of the United States. When my name was first associated with the question of General Jackson's successor, more through the ill will of opponents than the partiality offriends, I determined to wait for To And'w. Stevenson, Esq. President, and the development of the views of the Republicans of the Union, and to pursue that course only which their anhiassed judgment should finally recommend. I deemed that course to be due to the Administration, of which I was a member-to the best interests of the country -and to the indirichildy of a political party, by the original organization of which, th overthrow of Republican principles in the U. States was prevented, and upon the ascendancy of which we can alone depend for their pre servation. To the offers of support which were at that period occasionally made to me from different quarters of the Union, I respectfully replied, that the public good, in my opinion, required the services of Gen. Jackson for a econd term—that the agitation of the question of his successor, at that early period, must of mecessity embacrass the Administration-and that it was my desire that my name should not be connected with the subject. From that time to the present, I have neither solicited the aid nor sought the support of any man in reference to the high office for which I have been nominated; auless my replies to interrogatories from my fellow citizens upon public questions, and my sincere endeavers to make myse worthy of the respect and confidence of the American People, are liable, to that construction. For the truth of this declaration, I can safely appeal to the hundreds of honorable men who composed the recent Convention-to the erous editors and politicians throughout the Union, who have distinguished me by their preference, and to my private correspondents and intimate friends, not excepting the considerable mumber of persons, once my friends and associates, whom the fluctuations of political dite have converted into opponents. In none of these classes, or in any other of our community, is there a man who can truly say, that I have solicited his political support, or that I have entered or sought to enter with frim into any arrangement, to bring about the nomination which I have now received, or to secure my elevation to the Chief Magistracy of my country.

The liberal men of all parties, I trust, an you and those you represent, I am sure, will purdon me for having thus spoken of my own conduct in reference to a goint upon which I have been the silent object of attack, as cause-less as it has been violent and unremitted; My, as I alone can answer for it in relation to all my country men, although thousand may be ready to answer in relation to them-

Under these circumstances, the Democracy of the nation, in Convention assembled, having, no you inform me, with a degree of unanimit that I cannot too highly appreciate, pronounce me worthy of so great a trust, I cannot hesitat in making their wishes the rule of my conduct.

I do, therefore, with a deep, and I hope abiding

But now that he is the regularly nominated candidate of the democray, presented for the pepular suffrage by the egates from the states, by a preponderating vote, and with great although not entire unanimity, he is the subject of aspersion and assault in every form of gross personal and political nostility.

Fortunately for the character of our public mon and the welfare of the country, such attacks rarely fail to react moved by bonest and generous impulses; and in a just and generous pirit, they come, with a more confiding zeal and with redoubled energies, to the vindication of a tellow citizen who is the particular objects of federal obloquy and aspersion. The popular support, under such circumstances, is in a ratio with the virulence of the attack, and the want of decency and truth by which it is characterized. The case of Colonel Johnson will add another to the exhibitions of the popular feeling in this respect: and another rebuke to the labors

and misrepresentation of the opposition. We annex a correction of one of the allegations of the opposition against Colonel Johnson. It comes from a source of undoubted responsibility,-a highly respectable citizen of Kentucky, and a personal friend and mear neigh-bor of Colonel Johnson. It meets, it will be perceived, the statements from hostile quarters and the admissions of friends,-admissions made undoubtedly from the belief that at least some portion of the charges of the opposition were entitled to credit:

Min-pending between France and the United States. It would seem from the tone of Parisian journals that a very comprehensive apology is expected from the President of the United States for his "brutal language" towards France. We are afraid our "ancient ally" will be disappointed. Mr. Livingston was about leaving France to return to this country. His arrival may be looked for daily. The Constitutionel of the 20th April remarks

the cost of the making up of the quarrel be-tween France and the United States. No sooner was the discussion closed, than the Journal des Debats signified to him that he was ill placed at Paris, that he would find himself really embarrassed, after having publicly spoken ill of France, and in the most persuasive tone, urged him promptly to retire, and not to return. Mr. Livingston might probably have turned a deaf ear to this council if a powerful auxiliary had not come to the succor of the Doctrinary repugnance. The Government of the United States instructed its Ministers to retire either to England or Holland imme diately after the vote of the bili, and to resign his powers to Mr. Barton. Our Cabinet, therefore, may make a show of energy without peril, and holdly demand the removal of a man who probably made his preparations for departure immediately after the sitting of Saturday. All this is wretched. If the reparation required by our Cabinet is to stop here, the Chamber will have cause to regret having assigned the care of French honor to the keeping of a Ministry so easy to satisfy. We agree with the Debats, that, after what has passed the Cabinet cannot continue its relations with Mr. Livingston, but the country requires a more signal satisfaction than the equivocal disgrace of an ambassador. After all, Mr. Livingston has only done his task as a diplomatist, and his duty as an American, and we could, perhaps, find more than one mealy mouthed Ambassador, who stands well at Court, that might be convicted of more irreverential disdain of the French government than the frank language of Mr. Livingston. The insult to France is not in the confidential letters themselves but in the publication of them by the President, and still more in the President's Message. When he insulted and threatened it was the American nation speaking by his mouth; and the calculated silence of the Congress was neither retraction nor a reparation. It is therefore The dangers which have at various times rom the Government of the United States, in the person of its President, that satisfaction ought to be obtained. Such is the intention of the amendment adopted by the Chamber. Assuredly, the part our Cabinet has to act is easy. With such a government as that of the United States, which prize money so much thirty nul-

The Constitutionnel (moderate opposition) of 20th of April, observes that the Chamber has passed to the vote, and it is no longer in ts power to recall it. Yesterday, it was the eeper of the finances and the honor of France. It depended upon it, and upon it alone, not to impoverish the Treasury by an enormous sum, and to protect the dignity of the country against the insolent pretensions of the foreigner. Now it has nothing more to say, for it belongs to the Ministry alone to dispose of the 26 mitlions according to the treaty. It is for the Ministry alone to judge of the satisfaction that the Chamber requires, and to measure the degree of reparation demanded of Gen. Jackson After all, we are far from considering the adop tion of this bill as a Ministerial victory. Many Deputies were induced to vote for it from local considerations, and others from their esteem for America and a pious remembrance of Gen Lafayette. Let these 80 votes be deducted from the majority, and we shall then have the liberty. exact number of Deputies who have voted systematically for Ministers.

The National, (republican opposition) of 20th April, affirms that Gen. Valaze's amend ment has not amended any thing, and adds:-"This deplorable affair then is consummated and we shall have nothing more to say of it than to thank the independent gentleman to whom we are indebted for so magnificent a result. Oh! what flourishing despatches Mr. Livingston must have drawn up last night! It is now Mr. Lubecki's turn. 'The Chamber is in the vein. It is looking for him; let him present himself, and he will be well received. We have money for every body."

The Impartial (Opposition) of the 20th April, regards the speeches of M. Dacos and M. de Tracy as having had great influence in survived the rejection of the Bill but it will be with a cargo valued at 10,000 dollars, have out the world, to lay the foregoing information far from gaining new strength by its adoption both been seized by this pirate, and nominally before their readers,

The adoption of the Bill is no triumph for the Ministers, and we will not do them the injury to suppose that they do not feel the bearing of the amendment of the tiers parti.

The Tribune (violent opposition republican) of 20th April, anticipated the adoption of the "infamous bill," but did not imagine that are indifferent to the injustice and contradic tions in the American claims, and the falsification of the documents upon which they are grounded; they are indifferent to the contempt and indignation of the nation and against the well as that now in jeoparday, is nearly all turpitude of this parliamentary misdeed. General Valaze's amountment was a-dopted for form's sake, but now the money is voted, can it be supposed that a government like that of America will refuse explanations? Besides, it knows with what a government it has'to do, and it will give these explanations, without doubt, in terms agreed upon and prepared beforehand. - It knows that the Cabinet of the Palais Royal is not difficult, If the American government had the least generosity, t would not explain at all: this would be a fresh insult that it might spare us. For what can it say? That it is sorry for the slap of the face that President Jackson has given to France. We would rather that the Americans should take the money we do not owe them without saying a word

Paris, April 22—It is affirmed that Com-modore Elliott, who was present at the debate on the affair of the 25 millions, left the sitting very much dissatisfied at having heard the Duke de Broglie support the amendment of M. Valaze. He said on going away that Gen Jackson would refuse all satisfaction, and that the American nation would not bear an insult, though it might lose 25 millions.

Paris, April 23, 1835 .- The two Deputies who tought in the wood of Vincennes were M. Baude and M. Bessieres. The quarrel did not arise from words spoken from the tribune, but from the following occurrence:-When the Chamler was proceeding to vote on the first article of the Bill for the 25,000 000 fr., M. Baude exclaimed that it was a shame thus to lavish the money of the people upon foreigners. M. Bessieres, who was scated near M. Baude, took these words as addressed to himself personally, and the meeting ensued.

LONG ISLAND RACES.

The races of yesterday, we think, might challenge competition on this continent-but when we look at the races that have taken place this spring, we can almost challenge the world. The entries were as follows:

J. C. Steven's b. m. Clara Howard, W. R. Johnson's b. h. Chas. Kemble, L Laird's b. h. Henry Archer, W. Gibbon's b. m. Marigold.

Only three started, Marigold having been lrawn

THE NEW YORK RACES .- A Match. Race for \$3000, two mile heats, came off on Saturday between R. Tillo:son's Post Boy, by Henry and by J. M. Botts's Rostlie Somers, both of whom were favourably known to the lovers of good racing: the latter having taken the three year old sweepstakes last spring, beating Florantine and others, and the former having won a match last fall and made a very good race for the two mile purse. The horses started at a killing pace for four years olds, the mare leading around the first mile, when she was passed and the colt kept it steadily until they came round the last turn, when the mare went at him hard but it wouldn't do, and he beat her about a length, lin 3m. 45s. THE COMET POSTPONED .- So, after al'. the great comet is not to appear. Nobod knows better than Herschel-better than Dean Swift did when he put off the eclipse.

The Comet .- A letter from Vienna announces that M. Lettrow, Director of the Observatory in that city, has received from the celebrated English astronomer, Herschell, now residing at the Cape of Good Hope, the remarkable intelligence that Halley's Comet, of which so much has been said, and which is positively expected in August this year, will not be visible, because it has long since changed the direction of its course, and now revolves in a different orbit. A report by the German astronomers on this important subject is expected very shortly, and will be published.

OF KENTUCKY.

We invite attention to the letter of Mr. Van Buren, accepting the nomination of the National Convention, to be found in this morning's paper.

This shows the necessity of the immense curtailments which she made during the fall and winter of 1833 and '34 which created such a panic. What say the Federalists and Bankites to this?

OUR FEDERAL SENATOR AGAIN .- We do not intend to imitate, nor do we wish to be understood as attempting to approach, in any degree, the chaste and dignified style of the article of the HON. SENATOR, under the editorial head of his Federal organ, the last Easton Gazette. The remarks which have a personal application only, we leave to the judgment of our peers, feeling well assured that ample justice will be rendered to each, by those to whom our respective characters and pretensions are intimately known. The gentleman's political principles and opinions are public property, on them we propose again to offer a few

In the article in the Whig of the 9th inst. we said "the organ of our Federal Senator is la boring to show, that there is no irreconcileable On Pratt Street, Baltimore, and on Choptank difference between the friends of Judge II hite and those of Mr. Webster." This the Senator charges upon us, as a "gross misrepresentation, proceeding from willfulness or stupidity," when in the same article his whole effort is to show that the friends of these men should unite to put down the administration of Andrew Jackson, and to prevent the election of Mr. Van Buren. We did not attempt to quote the Senator's language, we merely spoke to the character of his remarks, and the object he had in view; viz. to show to the friends of Judge White, that (although as wide asunder as are the poles, in a little of the poles, in the poles of Judge White, that the poles of Judge White, the ical principle,) they might become reconciled, and unite in support of the same men and D. Smith, Boot-maker, I understand this

If the sapient gentleman had read our remarks through, he might have saved himself the awkward position in which he is now placed in having charged another with "willful to purchase can examine the premises for themmisrepresentation or stupidity," for ascribing to selves, or enquire for particulars of Peter his article the only meaning of which it is susceptible. He would have found that we even gave the ground of reconciliation between the public sale, on the premises, on Thursday, the friends of Judge White and Mr. Webster, the same in substance which the distinguished Senator has given; viz. "that Mr. Webster and
Judge White are equally opposed to the corrustions of the present administration, to the ruptions of the present administration, to the Kitchen Cabinet influence," &c. and therefore they should unite, however much their political principles were at points with each other, But as the gentleman insists that we have misrepresented his article, we will ask him to explain what was his object in writing the article plain what was his object in writing the article a large and commodious Store House, with a in the Gazette of the 6th inst. if it were not to brick cellar; and there is also attached a subshow the friends of Judge White or Mr. Calhoun, that, however much opposed to each other in principle there was nothing to prevent a reconciliation, or union, between them and the friends of Mr. Webster, in order to defeat Mr. Van Buren? What does he mean where he says "Besides, if men opposed to the same quite sufficient to keep a bay vessel constantly things, succeed in their opposition, they inevitably assimilate themselves to each other in producing the necessary reform?" Does he mean here to promise for his friend Daniel that the Nullifiers shall come in for a share of the "necessary reforms" which will take place, provided they will help to elevate his friend to the Presidency? Or, does he mean that the principles of Hartford Convention Federalism and Nullification, will assimilate to each other, if erty for themselves, or, for information, may successful in defeating Mr. Van Buren? We must confess our duliness of comprehension, and the sublime obscurity of the distinguished Senator's article, if this be not the object he had in view. White men, Nullifiers, State Rights Democrats, says the talented Senator, come to our caucus, come and assist to elevate a Hartford Convention Federalist to the Presidency and an old Blue Light to the U. S. Senate, our principles will assimilate if we are successful. What if we approved of the Proclamation and the bloody bill, as almost the only righteous

ON the third of January, 1885, was commenced in Philadelphia, a new periodical, bearing the above comprehensive title .-Its contents will be carefully adapted to the wants of that portion of the public who patron-ize Dramatic Literature, the Turi, Sporting and Fashions. From the growing wealth and increasing population of the United States, and the near assimilation of the national appetite with whatever promotes the rational Recreadifficulty of sketching out such a plan as might be fancifully strewed with any of the charms of novelty to ensure it popularity and encour-agement, has been not the least embarrassing obstacle which the projectors of this work had to surmount in its inception. Feeling confidently assured, however, that its success is certain when its character become properly known, they have already incurred considerable expense in forming correspondents over the Union; and have also ordered regular supplies of the best selected English periodicals to assist in procuring materials for its columns.

It is not altogether feasible, when a new publication is completed, to present in detail to the public its prospective attractions. It is necessary, nevertheless, that its principle features should be drawn out, as it is by them that its merits, if it has any, shall be judged .-This is the more readily accomplished, he publishers being satisfied that whatever industry and a watchful zeal can effect in completing the filling up, will be done, and that they never will be found deficient or neglectful in the prosecution of this enterprize, and in striving to produce a beneficial and profitable result to themselves and to others.

THE DRAMA Will form a material portion of the Gentlemen's Vade Mecum. It is intended to publish alternately, every week, an entire play and farce-to be selected with a single eye to their merits alone; a preserence, however will be extended, in all cases, to native productions, when they can be attained. #### POETRY.

It must be so, my friend, thou reasonest well; Else whence this pleasing hope, this fond desire, This longing after something good to eat; Or whence this secret dread and inward horror At empty vacuus? Why shrinks the stomach Un like a purse and startles at starvation? 'Tis the deficiency that gnaws within us; 'Tis hunger's self bids us go to dinner, And intimates an appetite to man. Appetite! thou pleasing dreadful thoungt! Thro' what variety of untried dishes, Thro' what new soups and sauces must we pass? The wile, th' unbounded table lays before me; But napkins, plates and platters rest upon it. Here will I hold, if there's a thing called hunger, And that there is my bowels cry aloud With all their might; they must be cured by victuals, And that which cures them must fill up the stomach. But when or where? This world was made for eat-

I'm weary of starvation: this must end it. (Laying his hand on his knife and fork.) Thus am I doubly arm'd my knife, my fork, Cold ham and pigeon pie are both before me, This in a moment relishes my mouth. While this informs me I shall never starve. The mouth secure of such repasts doth smile At the roast turkey, and defies the pig; My sides shall fall away, my teeth themselves Grow dull with use, and beef ferment with age: But thou shall flourish my immortal taste Unburt amidst the war of elements,

Bonaparte, having robbed a nation of its independence, was hurled, a dethroned Emperor, into exile, and the terrified earth hardly thought him secure enough even under the custody of the ocean. Even whilst exhausted and chained to a rock, he was struggling with death, Europe dared not lay down her arms in her fear of him. He died; and this event, published at the gate of the palace before which the conquerer had proclaimed so many funerals, hardly arrested the passer by. What, indeed, had citizens to weep for?

Washington and Bonaparte both arose out of the bosom of a republic; both were born of liberty; the first was futhful to it; the second betrayed it. Chief Justice Marshall arrived in this city

Thursday, June 11, 1835. Pursuant to previous arrangement, Captain Don Pedro Gibert, and Juan Montenegro, Manuel Castillo, Angel Garcia and Manuel Boyga were yesterday morning summoned to prepare for their immediate execution, agreea-bly to their sentence, for having, while belonging to the schooner Punds, committed piracy by robbing the brig Mexican of \$20,000 and after wards attempting to destroy the crew and all evidence of their crime, by setting fire to the vossel. It is understood, that when the prisoners became thoroughly convinced that there was no longer any ground to hope for a further respite they entered into a mutual agreement to commit suicide on Wednesday night .-- Angel Garcia made the first attempt, in the evening, by trying to open the veins in each arm, with a fragment of a bottle, but was discovered before he could effect his purpose, and a stricter guard was afterwards maintained upon all of them during the remainder of the night, and every thing removed with which they might be supposed to renew any attempt upon their

Yesterday morning, however, about 9 o'clock, while the avenues of the jail resounded with the heavy steps of a host of acting marchals, and the "busy note of preparation"struck solemnly upon the ears of the spectators within reach of its echo, Boyga succeeded in inflicting a deep gash on the left side of his neck, with a piece of tin. The officer's eye had been withdrawn from him scarcely a minute, before he was discovered lying on his pallet, with a pecular trembling of his knees, which induced the officer to examine if any thing had suddenly happened to him. They found him covered with blood, and nearly insensible; medical aid sewed up, but Boyga, who had fainted from loss of blood, never revived again. Two cath- ably, to most of our readers. olic clergymen, the Rev. Mr. Varella, a Spanish gentleman, and pastor of the Spanish congregation at New York, and Rev. Mr. Curtin. of this city, were in close attendance upon the quarter past ten, under the escort of the Marin the rear of the jail.

When the procession arrived at the foot of the ladder, leading up to the platform of the gallows the Rev. Mr. Varella, looking directly at Captain Gibert said-"Spaniards, ascend to heaven." Gibert mounted with a quick step, & was followed by his comrades at a more moderate pace, but without the least indication of hesitancy. Boyga, unconcious of his situa-tion and destiny was carried up in a chair and seated beneath the rope prepared for him. Gibert, Montenegro, Garcia, and Castillo, all smiled subduedly as they took their appointed stations on the platform. Judging only from Gibert's air, carriage and unembarrassed eye, after he ascertained his position on the stage, he Alston walk on that plank till it tilted over inapparently lifeless Boyga was seated on the chair, bent over his shoulder and kissed him very affectionately.

He then resumed his station, but occasionally turned to Mr. Peyton the interpreter, and the clergymen. Addressing his followers, he said—"Boys, we are gaing to die, but let us be firm, for we are innocent." To Mr. Pevton removing his linen collar, and handing it to him from the physician himself with no other in- bad securely planted the batteries of oppression he said-"This is all I have to part with, take it as a keepsake. I die innocent, but I'll die like a noble Spaniard. Good bye, brother, we die sent. Castillo addressed himself to an individual whom he recognized in the front rank of the officers below the stage, and said-"Adieu my friend -I shall see you in heaven-I do not care so think I am guilty," [culpable.] All of them expressed great satisfaction at the intelligence of De Soto's reprieve.

The Marshall having read the warrant for their execution, and stated that De Soto was respited for 60 days, and Ruiz for 30, the ropes were adjusted round the neck of the prisoners, and a slight hectic flush spread over the countenance of each, but not an eye quailed, nor a limb trembled, nor a muscle quivered. As the cap was about to be drawn over Gibert's face, the Spanish Priest fervently embraced him, and during the operation of covering the face of the others, the Rev. Mr. Curtin advanced to the railing of the stage, and read a brief declaration on behalf of the prisoners, addressed to the citizens of America assembled, setting forth that an officer, in the chair, which was so placed as to fall with the drop.

At a quarter before eleven, after every pre-

paration was completed, and while they were repeating to themselves, in scarcely audible tones, their prayers, Deputy Marshal Bass the spring, and the platform fell without even the cracking of a hinge. In falling, Boyga's chair struck against the bodies of the Captain and Garcia. Boyga struggled slightly once after his descent; and Montenegro and Castillo but little; Captain G. did not die quite so easily, the rope being placed behind his neck. Garcia struggled most and longest-about three minutes. After being suspended 30 minutes, the physicians in attendance pronounced them dead, and they were cut down, and placed in black coffins, in

readiness in the yard. After the execution was over, Ruiz, confined in his cell, attracted considerable attention, by his maniac shouts and singing. At one time, bolding up a piece of blanket, stained with Boyga's blood, he gave utterance to his ravings, in a sort of recitative, the burden of which was-"This is the red flag my companions

The crowd assembled on this occasion, is estimated at from 20,000 to 30,000, and occupied every point that afforded the least opportunity for witnessing the execution. The roofs of a couple of sheds, contiguous to the jail yard, gave way beneath the pressure of the numbers who had seated themselves on them; and there were two or three avalanches of men and boys, some of whom were considerably injured. The

The following extract from the message of Governor EDWARDS of Connecticut, contains some striking views upon the subject of Bank currency : An idea was at one time entertained, that

Banks might be safely left to themselves in the management of their concerns; that their interest was so far identified with the interest of the public, that prudent and discreet management on their part, might safely be rehed upon. Experience has shown that this was a mistake. It was stated by high authority in the year 1828, that of the five hundred and forty-four Banks which had been established in the United States, forty-four had been openly declared bankrupt, and about fifty more had suspended business. This bankruptcy is in some degree the result of fraud, but a considerable extent has probably arisen from indiscretion and mismanagement. The loss sustained by the community has been severe, and in some instances distressing. Whatever the cause may be, the result indicates the necessity

Banks are the creatures of legislative power, and on this power is devolved a respon-sibility for the faithful and salutary administration of their affairs. There is a constant tendency on the part of Banks to increase and extend their circulation. Banks are anxious to increase their profits, and individuals to increase their business. The constant operation of these two causes is, to keep the community flooded with the full amount of bank paperwhic can be kept out. This amout is frequently exceeded, and a reaction takes place. It is found necessary to dimmish the amount; and to accomplish this, individuals are pressed for payment; the usual accommodations are withheld-distrust and want of confidence ensue, and distress and ruin follow. There are fluctuations in business, under any circumstances and there will be a season of prosperity and adversity in all countries; but those changes which are natural and which arise from the operation of physical and political causes, in are superadded changes which arise from causes peculiar to themselves. The fluctuations in business are found to be most frequent in those countries which have a paper currency, and to be about in proportion to the ex-tent of the paper medium. In addition to those fluctuations incident to our system of banking, and which are inseparable from it, fluctuations in business may be designedly occasioned, by sudden and great contractions and expansion of circulation. The State Banks are so circumscribed in their capitals, and the sphere of

HORNED SNAKES.

The accounts given of these reptiles are generally considered fabulous; but some of our fellow-citizens have lately had occular evidence that there are such "varments." We have been informed by two respectable gentlemen that Mr. John Scott of this county, while walking along the western declivity of the Blue Ridge a few weeks since, was astonished, almost to the hill in the form of a hoop, and, "for all the world," just like a hoop trundled by a schoolboy, or any other boy. After rolling some distance, it ceased its circumgyrations; lost indeed, its gyrous form, and spread at full length upon the soil. Mr. Scott approached the spot and killed it; when, "mirable dictu!" wonderful to relate!—it had driven its tail some inches into the earth. #### FOR VICE PRESIDENT, RICHARD M. JOHNSON.

OF KENTUCKY.

To our PATRONS .- The period within which our subscribers may avail themselves by payment in advance of the reduced price for the semi-weekly Whig for the current year; namely, the 1st of July, is now near at hand; it therefore seems proper that we should call their attention to it. The reduction of the price of the weekly paper to two dollars, and of the semi-weekly to three dollars per annum, for the benefit of prompt payment, was never intended to impose a precise observance of the day of payment, but no departure from the terms virtually must be expected.

We learn with deep regret, from the Philadelphia U. S. Gazette, that the venerable Chief Justice MARSHALL remains very unwell at his lodgings in that city .- Bak Am.

AN AFFAIR OF HONOR took place yesterday afternoon at Govenstown woods, between Lieut. B. W. WRIGHT, of the Navy, and GEORGE STYLES, Esq. of Chestertown, Md. The premium paid by Messrs. J. I. Cohen Jr & Brothers, for the two million loan of the State of Maryland, bearing six per cent interest, and irredeemable for thirty-five years, was 816.40 for every hundred dollars. The State Preasurer issues bonds, and not certificates, for the loan .- Balt. Amer.

#### MR. VAN BUREN.

The truth is, their only ground of opposition to Mr. Van Buren is to be found, as we said before, in the fact of his continuing to be a firm fried of Jackson, and a tower of strength to his administration, against the assaults of those who have been laboring so hard for the last two or three years to pull it down. And this, the only objection urged against him by the Nullifiers, recommends him strongly to the support of the friends of Jackson, and the lovers of the constitution and Union in Georgia .-Southern Banner.

Whiggery is a dull article in New Je sey .-It has fallen from moderate to flat. The knowing ones are coming over to Van Buren by hundreds, and what we shall do, if the flood continues, we know not-certes, we shall carry ten counties in the State in the fall. SPORTING AND DRAMATIC COMPANION

N the third of January, 1835, was commenced in Philadelphia, a new periodical, bearing the above comprehensive title.-Its contents will be carefully adapted to the wants of that portion of the public who patronize Dramatic Literature, the Turi, Sporting increasing population of the United States, and the near assimilation of the national appetite with whatever promotes the rational Recreational Recreations and the public generally, for the liband Fashions. From the growing wealth and be fancifully strewed with any of the charms delphia and Baltimore, of novelty to ensure it popularity and encouragement, has been not the least embarrassing obstacle which the projectors of this work had to surmount in its inception. Feeling confi- embracing every variety, selected with the utdently assured, however, that its success is cer- most attention and care, and confidently believe tain when its character become properly known, that with the experience they have in the busithey have already incurred considerable ex- ness, and the assistance of the very best of workpense in forming correspondents over the Union; and have also ordered regular supplies of they will be able to meet the wishes of all those the best selected English periodicals to assist who may favor them with their custom, in all in procuring materials for its columns.

It is not altogether feasible, when a new publication is completed, to present in detail to the public its prospective attractions. It is necessary, nevertheless, that its principle features should be drawn out, as it is by them that its merits, if it has any, shall be judged .-This is the more readily accomplished, he publishers being satisfied that whatever industry and a watchful zeal can effect in completing the filling up, will be done, and that they never will be found deficient or negble result to themselves and to others.

THE DRAMA Will form a material portion of the Gentle-tofore, will be attended to with promptness, and men's Vade Mecuin. It is intended to publish all kinds of repairing done at the shortest nomerits alone; a preference, however will be subscribers specifying the kind of carriage wan-extended, in all cases, to native productions, ted, will be immediately attended to, and the when they can be attained. Independent crit- carriage brought to the door of the person oricisms, carefully excluding all invidious com-dering it-also all kind of Steel springs made and repaired to order, and all kinds of Silver parisons, and recommended by their brevity, will be regularly inserted-besides Biographical Sketches, Anecdotes, and Bon Mots, of prominent Comedians of the present and past nges, of which a rare and inexhaustible compilation is in store.

THE TURF. A fiaithful record will be kept of all the Runming and Trotting matches in this country and England. Biographies and correct Portraits of celebrated thorough-bred Horses will be published once a month. Every fact relative to the breeding, management, keeping, and diseases of this invaluable animal, will be particularly selected.

SPORTING Under this occupation will be enumerated accounts of Shooting Matches, Pedestrian Feats, Gymnastic Exercises, Aquatic Excursions, Fishing, Gaming, &c. with Anecdotes of noted Dogs.

GENTLEMEN'S FASILIONS. A quarterly review will be procured, explanatory of the various improvements and changes which costumes worn in the fashionable circles constantly undergo; by which it will be rendered an easy task for drapers and tailors at distance to suit their customers with the a distance, to suit their customers with the most approved colors and modern style of dress, at the earliest possible periods. Provided sufficient encouragement shall be given by this portion of the parblic, a full length engraving, allustrative of the same, will also be prepared and published.

MISCELLANY

Although the purpose of our sheet may appear to be confined to the four leading subjects which have been stated-we deem it proper to say that there will, be, in addition to these, a considerable space allowed for Miscellaneous matters-such as Tales; Poetry; an Eastern Shore of Maryland. Epitome of News; List of Hotels in this city, and Places of Amusement; Statistics; the Grain Market; Agriculture; Prices of Stocks; List of Broken Banks, Counterfeit Note Detector-also, the American Songster, consisting of popular airs, set to Music; and all other the 1st of November next; one other fourth, \$12 to insure a mare with foal, payable the first without interfering with his ordinary agricult matters, regarding which an interest may be with interest on the balance of the purchase of March, 1836, or as soon as she is ascertain- tural operations. It is worthy of notice, that its patrons, in the course of one year, will be furnised with fifty-two popular Plays and Farces the price of which, separately, at any of our bookstores, would be at least THIRTEEN DOLLARS! Here there is an absolute saving of ten dollars, in the pur-chase of a well-stored Dramatic Library—(to be had for an unprecedented small sum!)-not taking into consideration the multiplied variety which is to accompany it, without additional charge! Tailors who desire to procure early and correct information of the changes in dress, will find this an invaluable guide.

The " Gentlemen's Vade Mecum" will be published every Saturday, on fine imperial paper, of the largest class, at three dollars per annum, payable in advance.

By enclosing a Five Dollar Note to the publishers, postage paid, two copies of the paper will be forwarded to any direction ordered, for one year. It is respectfully requested that those who desire to subscribe for this Journal will forward their names immediately-the Lerras will be strictly adhered to.

#### POETRY.

From the Boston Traveller. EVENING MELODIES. BY O. W W. The Bird of Hope. The Bird of Hope, in former days, That waved his sumy wings, Now seek no more the han I that plays, Nor thrills the hart that sines: The music which how many a tone Of early joy imparted, Hath left me now, to weep alone That Bird so soon departed.

In former scenes, and ealier hours, Wish dreams of silent love, I turned from Youths enchanting flowers, To that bright bird above; But farther, farther from my view. He shone o'er hill and river, Till O! his wings of sunny hue, Are lost to me forever.

The ride by moon'ight. O far from the smiles that illume the hall, And far from the haunts of the gar, O'er the slumbering flowers, and moss-covered wall, My steed, we will hasten away; The stars as they meet us-the no m as she peers From her beautiful home in the skies, Shall shine as they shone in our earlier years, Ere Life had been shaded with sorrowful tears, Or clouded with dark memories.

Away-like the breeze of the evening we rove, We thrill at its musical sound, My pirit is a med by the monlight abov , And the magic of Nature around I heed not, I ask not the smile of the gay, I woo not the joy of the throng, While the stars seem above me in beauty to play, And music is calling my spirit away To Youth and its exquisite song.

THE PLANETS INHABITED. We cannot discover any reason why all the planets should be provided with atmosphere, unless it was that they might all be habitable;

but those planets claim our attention on another account. The axis of every planet, as far as we can discover, is inclined to the plane of its orbit. The effect of such inclination, like that of the earth, is a change of seasons—a change that seems to be calculated to increase the fruits of the soil for the benefit of man and beast. From the proofs already stated, and this additional circumstance, we inter, without hesitation, that the planets are all inhabited. -Scientific Tructs

FELLOW-CITIZENS: Having been honor-

ed by being one of your representatives in the late Baltimore Convention, you will, I think, pardon me for submitting to you the following reflections:

Society is every where divided into two classes. The greater class constitutes the democracy; the smaller class the aristocracy. In every nation but ours, the smaller class controls the greater: hence, in our country, the smaller class deems the authority of the great er a species of political usurpation. Numerical strength, however, which in all countries con stitutes the only element of natural power, constitutes also, with us, the only element of legal power. Hence our minority bear the double disadvantage of contending against both nature and law.

The weaker party is from necessity usually licentious in politics. Unable to defeat any measure, they are reckless what they oppose an I, unable to consummate any measures, they are reckless what they support. The majority is master of its own actions; but the minority, determined to disagree, can move only in opposition. Hence, when the majority, obeying the impulse of duty, points, as now, its head northeast, the minority, (like the baser extremity of a weathercock,) must point south-west. These are the ordinary characteristics of nearly all political minorities; but the minority with which we conten I, from the peculiar difficulties of their position, and deeming themselves like deposed monarchs, deprived wrongfully of power, by mere brute force, are exrebels. Hence their principles (if principles that may be called which has no principle) permit them (since they cannot rule) to derive grity. an emasculate gratification in frustrating the majority: and for this end to lend themselves to any fraction of any, party which is treacherous enough to receive such assistance, and numerous enough to reader the treachery

To counteract an enemy thus inclined, National Convention is admirably adapted; and in proportion to its efficacy are the misrepresentations against it of the minority; but their efforts, like the wind, which sought to dispossess a traveller of his cloak, only cause the People to press the institution more closely to their hearts.

In the selection of a Chief Magistrate, our national compact coerces the States to regard the preferences of each other, -a majority of all being necessary to a choice of President even by the House of Representatives. But the electoral colleges also, must regard each other's preferences, for should each State insist on a candidate of its own, we should find as many candidates as States. The three largest States would thus engross the Presidency, for they would perpetually originate the three highest candidates.

But though the constitution insists on concert, it says not how concert shall be attained Equity has supplied the deficiency by inducing a concession that the President should be selected from alternate sections of the Union, and by the preference of the largest mass of the

To ascertain the preference, two modes have been adopted —a nomination by detached mastion from all. The first mode exhibits nothing but the preferences of the nominating party, But it advances not a step towards concession to conflicting preferences.

by conver 1800. The convention was held at Philadelphia in May, and was composed of the repubican members of Congress. Its first fruits was the election of Thomas Jefferson. Similar conventions gave to the nation James Madison and James Monroe; and subsequently, by a kindred convention, Andrew Jackson. National conventions have therefore originated our Presidents for the last thirty-six years, with the exception of the first term of Gen. Jackson when the unequivocal voice of the People ren dered a convention unnecessary, and with the further exception of four years, when Mr. Adams administered the office in opposition to a convention. What a lesson we may read in this simple recital! The only President elected in opposition to a convention-Mr. Adams! His diplomacy is connected with nearly all our treaties, and his life has run parallel with 1812. Out of 133 republican members of our whole history. Possessing, also, patriotism ardent and acknowledged;—a resolution steady, and a comprehension extensive, yet he

failed utterly in satisfying the country, and it lay under his guidance, (and without fault o

his,) like Sampson shorn.

Had Providence designed a contrast of mer and circumstances to teach us the secret of our strength, that contrast could not be more striking than in Mr. Adams and General Jackson, publican members, of whom the whole, (exand in the events of their administrations. To all human views, Mr. Adams, in his highly wrought statistical education, possessed every advantage for success; and Gen. Jackson in his simply military occupations, every disadvantage. I will not run an ungracious parallel between those distinguished individuals, but while every heart is glowing with gratulation at the position of our country, (with the Bank dead at its feet, and the Queen of Europe abashed at its rebuke,) we may see in the contrast to which I have alluded, (and with no abatement of our admiration for Gen. Jackson,) that to be a powerful nation at home or abroad, we must possess not merely a competent, but a popular President,-and to be popular, he must be the offspring of the democracy,brought into being at their own time and their own way, and hence feeling a moral obligation to comform to their views of government and policy. The more decidedly an administration is marked with party characteristics the more popular it will be, and hence more powerful and useful. A coalition administration is as ill adepted to our habits, as an amatgamation of religions, or a community of property. With all the energy of Gen. Jack-, we might have fallend is honored slaves into the arms of the Bank; and self condemner as the nation was by the dodging of the Senate

State to protect its local interests with its full constitutional strength.

Of the estimation in which the people hold such conventions, history furnishes a few m-

structive examples : On the resignation of President Jefferson. two candidates devided the perferences of the Republicae party, and, for a period, endanger-ed its supremacy. In this dilemma, a conven-

ernment of his competitor by conducting the Department of State.

The democracy of both candidates was unquestioned, and had Mr. Monroe resisted the cis icience by supposing that his election involved no change of national policy. Mr. Monroe reasoned more wisely. A woman who submits to be maintained by a libertine, and expects to preserve her purity, is not more ignorant of human nature, than a politician who submits to be elevated by his enemies, and expects to retain his party principles.

At the termination of Mr. Madison's second was held at Washington, March 16,1816, of one hundred & not permitted to Mr. Clinton. The whole Union into the service of the opposition by a direct important members except nineteen, A strong disposition existed towards Mr. Crawford, Mr. Monroe received the nomination by the service of the ford, Mr. Monroe received the nomination by a majority of eleven votes. The eventual elevation of Mr. Monroe well illustrates the Rocandidate in 1808.

Again the unsuccessful candidate acquiesced is integrity, arose solely from a providential honesty is a good policy for nations as for men. infliction, which many persons deemed over whelming. The estimation, however, in which the public held his former acquiescence, may be read in the address to the people of the nominating convention of 1824. It says, "we must remind you, that the candidate whom we recommended, has established a peculiar claim structions, but to ascertain on whom the pretraordinarily licentious. Nay, he would not in such a case, have convention of 1800, which nominated Thomas lefferson for the Presidency, and Aaron Burr for Vice President, no diversity of opinion existed, as to the respective stations which these citizens were to occupy. When, however, by a defect in the constitution, the House of Representatives were to elect between Jefferson and Burr, a temptation was presented to Col. Burr of becoming instrumental "in compromising the integrity of his party."

Col. Burr's own views of what was due to the will of a majority, are found in his poler of tinue to prevail, or party become a chaos. December 17, 1801, to an honored gentleman Should this occur, I fondly believe in the enthen and now living in Baltimore, and which was published at the time. It says, "every man who knows me, ought to know that I ceived an ungracious stab. Party confidence would utterly disclaim all competition with Mr. is the strongest bond of the Union. Like 1the Jefferson. My friends would dishonor my relation of husband and wife, it destroys inviews, and insult my feelings by a suspicion, that I would submit to be instrumental in counteracting the wishes and expectations of the United States.'

These declarations seemed explicit, but the but of the whole. agle eye of party, deemed the close of the letter equivocal. The Presidential contest which ensued in the House of Representatives, laid a heavy hand on the political character of Col. Bur. If he really intended no competition with Mr. Jefferson, if a mere suspicion of such an causes them (flattered by the smallest victories) intention has been sufficient to produce the events which compose the subsequent political majority, are all benevolent dispensations of istory of Col. Burr, we may learn even more strongly than though he were guilty, the estimation in which the People hold an attempt to rush uncalled into their high places.

Even New York, from whose affection Col. Burr had derived his potency, forgot that she to yield patriotism the excitement of a contestwas a mother, when she thought he had forgoted triumph. The late elections in Virginia

I refer to these events historically. Col. Burr yet moves among us, the interesting and still brilliant relic of another age. Long may he remain! I would not rudely bend a hair of a head, so honored as his, by time and talent.

In 1812, another instance occurred of dissent from the decision of a Presidential Convention. The preferences of the democracy were divided between Mr. Madison, who was a candidate for re-election, and Mr. Clinton. A nomina ting convention met at Washington, May 17. Congress, only 82 would attend, and they voted unanimously for Mr. Madison. The friends of Mr. Clinton stigmatized this meeting as a convention of only Mr. Madison's supporters, and hence deemed Mr. Clinton plicated by its decision. The people thought differently. To fly a court, will not, in such a

case, prevent a verdict. The Legislature of N. York contained 91 recepting 4,) nominated, unanimously, Mr. Clinton, for the Presidency, eleven days after the Congressional nomination of Mr. Madison. In an address to the people of the U. He enjoys our utmost confidence. We Party; he is sensible that he appeals, for the urge these facts as a claim, but if we urged most part, to the friends of his own cause, and them even as a persuasive, what American heart, susceptible of feeling or gratitude, would

The American heart is tender in a good cause, but it is also adamantine when its rights are usurped .-Whether Mr. Clinton or Mr. Madison should be the President had become merged in the greater question-of whether, like the ancient English, we should enlist under the personal heretofore under the stars of the Union.

THE APPEAL TO THE OFFICE HOLDERS.

Since Mr. Webster's recent visit to this city, he Editor of the Intelligencer has become affluent in editorial matter. His press is again teeming with the idea which buoyed up Mr. Clay for a time—"Give us patronage and we be frequently brought back to the first princiwill make ourselves popular." In a succession of numbers, under the head of "the prospect Jefferson once said, the ship of state should be before us," this Gormand of the Treasury, with an eye of retrospect to the rich feasts he has enjoyed, appeals to all who live on office, and stinulates them by the grand principle, which

is the soul of his party. It is monopoly.

This principle, which, in various forms, embodies all the classes at war with the toiling million, and striving to appropriate the fruits of their labors through the medium of some Government privilege, may always be safely looked to in whatever shape and wherever it appears, as the natural ally of the politicians who are hostile to popular rights-or in other words, to equal rights. It is a consciousness of this, that directs the editor of the Intelligencer in his present movement on the Office HOLDERS .- While he adroitly addresses them as, in the main, supporters of the administration, and endeavors thus attach whatever of odium may belong to them, to the Republican that his arguments all tend to array the whole, as a class, against the principles of the Democ-

From the New Haven (Conn.) Register. INSTRUCTIONS.

We have transferred to the columns of the Register, an article on the right of instructing representatives, in which will be found several extracts from a report formerly made by Mr Leigh, the present Senator from Virginia, who then strongly maintained this old Republican doctrine. Mr. Leigh will have an opportunito soon to test his principles by his acts, for he will be instructed to vote for the expunging resolutions by the Legislature of his State, as certainly as that body will assemble. We believe that he will resign his seat, nor do we see how he can consistently do otherwise, unless he should change his course in the Senate, (which) he is not likely to do,) and obey the will of his constituents. The federalists will try to persuade him to disregard the wishes of his State to attempt to play the master instead of the servant of the People. In this they will be consistent; their plan was at first to have Senators for life; foiled in their attempt to make a splendid government of this, in which men in office should be every thing, the People nothingthey have been trying ever since the Constitution was formed to make that of it by construction, which they could not do in its creation. They began early to ingraft their monarchical doctrines upon the simple republican system, as it came from the hands of those who framed it. Hence, although the first words in the Constitution are, "We the People"—the Federalists inculcate the doctrine that "the People are their own worst enemies"—that "a ther lose the roof of my house in a transient who are made by the Constitution representatives of the People of a State, are at liberty to disobey their wishes, masmuch as "the representative is not bound by the will of his constituents." To these is now added another, to wit, that the President should be chosen, not by the People at the polls, the many, but by the members of Congress, the few; and that different candidates for President should be started in different sections, not with an expectation of their being elected by the People, but for the purpose of preventing a choice by the many, and throwing it upon Congress, the few -and those few entirely at liberty to disregard he wishes or instructions of their constitu-

We commend the following extract, from the Republican Party who wish to do away with all "landmarks:"

It is better that we should of the trial that is to take place during the experience occasional inconvenience from the varm out burstings of popular feelling, than sink into a decline and waste our liberties away in inaction. A fever may weaken us, but we can recover from it, but there is no hope when we have begun to waste in consumption. It is only the enemies of popular institutions who fear the effects of that political excitement which springs from free and fearless thought. "The nature of man leaves every state of being imperfect; and democracy must have its foibles, its erors, and its regrets. Yet the instinct of the people is wiser than the sagacity of more haughty intelligence. I love to behold the spirit of popular liberty awake and vigorous; for sure I am, that propositions whether wild or wise, after passing through the ordeal of free discussion, can never take effect, unless the spirit of the people in uses into them vitality, and justice adopts them for her children. I fear the whirlwind of popular frenzy storm, than the whole building by the decay of its foundation. The detendant is a married lady, residing in the neighborhood of Hudson, of great personal attractions-young, gay, and accomplished. The alleged cause of action arises, we are informed, from a wanton & cruel breach of faith on the part of the lady, the particulars of which are briefly as follows: In the early part of the presed year, the plaintiff

in the suit, who was then connected as a partner with a large commercial firm at N. Orleans, came to this city to purchase goods, and attend to other business transactions, and in the course of his pursuits he casually met the lady who now with her husband, is destined to figure as the defendants in the law proceeding referred to.-They met at the house of a mutual friend, at a party to which both were invited. She was then unmarried, and the introduction led, after several subsequent interviews, to reciprocal declarations of the most solemn and fervent attachment. Vows of an import so tender and affectionate had not been long exchanged, before were readily accepted, on condition only, however, that he should leave the south and fix his residence in this part of the continent-she not being disposed to leave the bracing and healthy climate of the north for the bogs and morasses of New Orleans. Willing at any risk to oblige the fair object of his fond regards, and anxious to delay as little as possible the consummation of his earthly bliss, he completed his arrangements, bid his loved one adicu, and started, full of hope and joy, to settle his affairs at home, preparatory his return, and in three months after his departure he was again in New York,-ready to fulfil the important engagement he had so gladly entered into. FOR PRESIDENT, MARTIN VAN BUREN. OF NEW YORK.

#### FOR VICE PRESIDENT, RICHARD M. JOHNSON.

OF KENTUCKY.

We congratulate our readers on the re-appearance of our old friend "OBSERVER." The last time we heard from him, was on the subject of the appointment of our Chief Judge; when he lifted the curtain and exposed some of the "wire workers" or managers in making that appointment. The accuracy of his divide the real estate of Samuel Yarnall, late of

my observations; it is only when I think I see, in the course of passing events, "a wheel working within a wheel," or rather, some secret machinations about to be put in operation, to dereive the people and cheat them out of their dearest rights, that I venture to obtrude myself near the above, numbered as Lot 34, on the mon public notice through the columns of a upon public notice through the columns of a

In the last Easton Gazette I note an advertisement from the County Commissioners requesting information from citizens in the different school districts, to assist them in carryinginto operation the Primary School law for this county, in favor of which the people voted so unan-imously at the last election. In the same paper is contained a long communication from "a ties to be approved by the Commissioners, bear-houses, stationery, fuel, &c. be provided in each ing interest from the day of sale. A large por-tion of the people did read the law, others had it explained to them, and it was adopted by an overwhelming majority of the people's votes.

Now, before the law has been carried into effect, before one dollar has been levied for the support of Primary Schools, we are called on to repeal it. I should not notice the communication of "a taxable Parent," did I not know that it came from one of the leaders of the Federal party of this county, and that already, the wire workers among them have decreed that this law shall be repealed.

not, I will, as far as my ability will enable me, or, at least, I will mark the movements of the leading Feds, and direct the public attention to their doublings and twistings to cheat and de-ceive the voters of Talbot out of the law adopted by their free suffrages.

Send me by the mail to-morrow a paper containing the law. If I am to answer "a says he belongs to James Ball, a blacksmith, ry Tuesday and Saturday for four successive taxable Parent" I wish to write "from the Alexandria county, District Columbia—he ap-

OBSERVER.

Chief Judge BUCHANAN, we understand, has been instructed by his physicians, to refrain from judicial duties for a time.—Balt. Gaz.

If Judge White is a democrat, what can the whigs gain by electing him? If he pursues the course of the present Administration, will not the whigs oppose his administration as they oppose that of General Jackson? or are they so fond of opposition, that they will elect him merely for the purpose of opposing him. If they support him, believing him to be a democrat, it proves that they are dishonest in their opposition to the present Administra-

There are a few-a very few-a mere handful of the friends of the Administration in in favor of Judge White, and insist that he will carry out the doctrines and principles of the present Administration. The whigs, who pretend to admire the man, insist that he will pursue a directly opposite course. Now, we can not well conceive how he can satisfy both parties, and neither party will allow that the other is correct. Truly he stands in a most doubtful position. He comes before the Penple in a most questionable shape, and whether he wishes himself to be considered as a whig or a democrat, a supporter or an opponent of the Administration, it defies the ingenuity of any unprejudiced man to find out. Such a man cannot receive the honest support of either party. "Between two stools" he must fall to the ground .- New York Times.

MASSACHUSETTS TEMPERANCE SOCIETY. The Twenty third Anniversary took place on Sabbath evening, at the Old South Church. The following Hymn, composed by L. M. Sargent, was sung a heat such perfection of discipline, is a degree bravest soldiers of the Revolution often said to on the occasion :

God gave the gift to man; But man, with fatal skill, Insensate, form'd the plan To change the good for ill: The poison, tortured from the cane. Like Sampson, hath its thousands slain.

God gave the golden grain To hungry man, for food; But querulous and vain, He spurn'd the proffer'd good; And Egypt's slothful sons, athirst, Drew forth the drowsy beverage first. God gave the clustering vine;

Ingenious man, perverse, Exchang'd the blood for wine, And wrought Cannan's curse : The Patriarch, who had safely past The Deluge, was overwhelm'd at last, The madness came by wine

That wrought Belshazzar's fall; And caus'd the hand divine To write upon the wall,-Scoffer; thy royal race is run! Thy work of wickedness is done!

To the earth, the cup be hurl'd, That holds an adder's sting; And let us pledge the world, With nectar from the spring; That hence, like Rechab's ancient line, \*Though Prophets urge, we drink no wine.

From the Richmond Enquirer. REMINISCENCES OF THE LAST WAR.

MAJOR GENERAL SCCTT.

Our countryman, Gen. Scott, left here this morning for his Head-Quarters in New York. He has been very laboriously engaged here for the last two weeks, in discussing and explaining before a Board of Officers, his system of discipline for the Army of the U. States. which he has prepared with great care, in ôbedience to a resolution of Congress passed the session before the last. The work, of itself, I am informed, will do him much honor, and will add greatly to his military fame. He has been laboriously employed in preparing it, for the last 15 or 18 months, and has brought into it many valuable principles from the French, Russian, German, and Prussian Authors, as well as from the English. It was unanimously sanctioned by the Distinguished Board of Officers to whom it was submitted, without any alteration. Among these Officers, were emy's line, cutting off a portion of that wing, and seated among them on the stage. The auso do I. Gen. Macomb, the Commander-in-Chief of and showing himself again to his own army in the Army, Gen. Jesup, Gen. Towson, Gen. Roger Jones, Gen. Gibson, Gen. Fenwick. flitary work consisting of 3 volumes, should have wet with the unanimous approbation of field, his left turned and cut off; his centre accended the stage; it happened that the subject such men, could not have been otherwise than extremely gratifying to him.

That it would have been well done, is what every one expected; for what work, as a sol-dier, did ever Scott undertake that was not well performed? His gallant contrades, composing this Board, who have seen him so oftene in trying eircumstances, when his military skill and talents were fully tested, can answer the question. His work, at Chippewa, never was surpassed in style, on this continent—or that of Bridgewater, in the heroic energy with which the business of the evening was despatched. The first, you recollect, was performed in an open field, on an extensive plain, under a clear, bright sun, in July. It was a fair open-field fight, of two highly-disciplined armies, led on by as gallant Officers, on both sides, as ever appeared upon the field of battle. The skilful military movements of Scott, upon this plain, united to the heroic courage of ciplined and drilled and prepared for battle, a-

chieved this brilliant victory over superior Such was the battle of Chippewa, (says his biographer,) as it appeared to the eye of a scientific soldier. But we have heard it described by others who viewed it with an unroism and romantic valor. This victory was that he was disabled by wounds. ### THE DEATH OF MARSHAL NEY

Much has lately been said, both in England and France, respecting the death of Marshal Ney, but with the particulars of that dereadful tragedy, few of our readers, we suspect, are fully conversant. With the strictest adherence to historical accuracy, we shall therefore give a brief and succinct narrative of the facts, more particularly as regards the Duke of Wellington's connexion with it. It will be necessary to give a short review of the events which pre-

Michel Ney was born at Sarre Louis in 1769, and entered when a mere youth into a regiment of hussars, in which he had risen to the rank of sous officers when the revolution of 1789 was effected. During the sanguinary wars waged by nearly the whole of Europe against the French republic, he served in every campaign, and for his good conduct, talent, and patriotism, was made general of brigade in 1796. In the following year he commanded a division under the celebrated Hoche, and subsequently under Schaumberg, Massena, and Moreau, contributing in no slight degree to the gaining of the glorious battle of Hohenlin-

In 1804 he was, for his distinguished merit, created a Marshal of the empire by Napoleon, and the following year gained the battle of Elchingen, in Suabia, for which he was created Duke of that name. Marshal Ney subsequently commanded a division at the decisive battle of Jena, with the most signal success, but as it would occupy too much space to enumerate all the invaluable and glorious services he rendered his country during his life, we shall only add that the terrible battle of the Moskwa, in Rusia, Ney commanded the cen tre with his usual talent and success, for which the Emperor conferred on him the title of Prince of the Moskwa, observing at the same time, "Le Marechal Ney est to brave des braves-his soul is of tempered steel !"

After the disastrous campaign of 1814, finding it was no longer possible for Napoleon to continue to reign, he was one of the first generals who submitted to the Bourbons, who soon after created him a Peer of France.

In 1815 he was at Coudreaux when Napoleon landed from Elba; he immediately received orders from the Bourbon Government to assemble a military force at Besancon, with which he marched towards Lyons; but some proclamations from Napoleon having reached the troops at the same time that intelligence arrived of his triumphal entry into that city, Ney, in a few days again occupied the Tuilleries.

During the hundred days, Marshal Ney used every exertion to save France from a second invasion; and, two days previous to the decisive battle of Waterloo, seriously checked the Anglo-Belgian army commanded by the Duke of Wellington, in the actions of Ligny and Quatre Bras.

After the deleat and partial destruction of the French army by the allies, Ney proceeded to Paris, where he gave a true statement of the few moments' consideration will place its indisaster in the Chamber of Peers; and being justice in a still stronger light. averse to the new order of things, .e. red from

In the meanwhile the English and Prussian armies approached Paris, where the remains the inhabitants of Paris, possessing a certain of the French army had rallied, and being reinforced by several divisions not engaged at armies for their safety and inviolability. The Waterloo, it still presented, with the national guard, a very imposing force; but Najoleon terms were assented to, which precluded all baving signified his intention to abdicate, a further resistance. But can it for a moment convention for the capitulation of Paris was be supposed that the object of the besieged agreed to between the Duke of Wellington was to obtain a mere temporary protection—a minumarismat blucher, on the one side, and the respite for lorty-eight hours? and that the same Governor of Paris on the other, to the effect army which had kept in awe a lundred thou that private property should be respected, and sand men, surrendered at discretion to a govno person be molested for their past political or other conduct. By virtue of this convention Louis XVIII. entered the capital, and was a second time proclaimed King of France.

Notwithstanding the above convention, Marshal Ney was arrested on the 21th of July, and thrown into prison, accused of having contributed to the revolution of the 20th of March, or, in other words, having aided the return of Napoleon. A court martial was summened to try him, Marshal Moncey being appointed sit in trial on such a man, for wh c'i he was imprisoned three months in the chalcau of Ham.

The presidentship now fell by seniority upon Marshal Jourdan, who accepted it, and with Marshals Massena, Mortier, and Augereau, and three lieutenant-generals, composed the court-martial, which in its second sitting declared itself incompetent to try the prisoner, and immediately dissolved itself, to the undisguised delight of the French people, with whom Ney was, as he merited to be, highly An ordinance of the King next directed that

he should be tried before the Chamber of Peers: and so great was the interest excited by the approaching mock trial, that, in addition to the capital being surrounded by the English army, (during Ney's trial and execution, be it observed, the English were the only foreign could boast, exhibiting to the last moment that troops remaining in Paris,) special commissioners of police were appointed, the press was rigorously restrained from alluding to it, men were selected from each regiment of the line, for their opinions, for the service of Paris, the national guards were removed from the principal posts, pat oles traversed the town in ali directions, and the city was filled with gendarmerie, plainly indicating the apprehensions of the Government, lest the coldblooded murder should be prevented.

About the beginning of December the Peers stated in public opinion than the victim! assembled in the palace of the Luxembourg, ter having been violently interrupted by the which was surrounded constantly by two President, he continued-"It among the memthousand men, and immediately proceeded to bers who voted for the death of Marsial New the trial of Ney, who was ably defended by the who sit in this assembly, there is one who con celebrated advocates and deputies, M. Against these expressions M. M. Berryer

and Dupin vehemently protested, and produc ed the convention of Paris as a complete de fence; this the president refused to allow to be heard, and ordered them to continue the delence without reference to that document!

Murshal Ney, on hearing this, rose and said, "I forbid my counsel to defend me more: my judges, I well knew, were long since deter- take not, produce a singular impression in Amined: I am accused against the faith of trea- merica. attempt to save him, by showing that Sarre have dispensed with giving.

Louis was included in the territory ceded to t Prussia; and consequently, Ney was not a subject of France; but he relused to allow the plea, the American Government shall have given to and indignantly exclaimed, "Never-I am a Frenchman in my heart, and a Frenchman I will die!"

While the Chamber was still affecting to de liberate, Ney returned to his room : he appeared to be supported by a feeling of deep resolution : he embraced his defenders, who had nobly exerted themselves, exclaiming, "It is all affair in question. During the whole course of over, my dear friends, we shall meet each other n another world!"

He ate his dinner calmly, and with appetite; and observing that a small knife was an object of uneasiness and attention to the persons charg-

ed to guard him, he exclaimed : "Do you think that I fear death?" and with satisfaction from the claimant, after the acquit-

smile threw the knife away. We now come to the Duke of Welling'on's share in this transaction, to which we entreat our readers to pay great attention; and in paricular to the following letter, upon which the unfortunate Ney had placed so much reliance: "To his Grace the Duke of Wellington, Generalissimo of the Allied Armies, &c.

"Your Excellency cannot be ignorant of the gross violation which has taken place in my person of the Convention of Paris, on the faith of which the French army laid down its arms, and I remained in France.

"It was on the following articles I relied; and now appeal to you, not for justice, but simply as the only party to that Convention remaining in Paris, who possesses the power to see that solemn engagement enforced:

"ARTICLE 12. Private persons and property shall be equally respected. The inhabiaccount, either as to the situations they hold or cal opinion

"ARTICLE 15. If difficulties arise in the execution of any one of the articles of the present Convention, the interpretation of it shall be made in favor of the French army and of the city of Paris."

"Without these terms, is there a human being who believes I would not have died sword in hand joined and supported by all the brave and viruous that remained in France?

"It is then in direct contradiction to this capitulation I am now under arrest; and as a soldier, an Englishman, and an honorable man, I demand of you my instant and unqualified liberation. MICHEL NEY."

After several visits to the Tuilleries, his grace found leisure, in the intervals of his yielding to the desire of the entire army and a splended entertainments at the Palais de l'Elyunited people, declared for the Emperor, who see Bourbon, to reply to the unfortunate writer. His answer must ever be considered as a stain upon the national character. With the casuistry worthy of a pettifogging lawyer, he observed, that the 12th article applied only to the military authority established in Paris; and was not intended to tie up the hands of the Frenc's Government.

That this was a most treacherous and jesuiti cal interpretation of the 12th article, must alone be evident to every unbiassed mind; but a

Mar hal Ney was clearly included in the terms of article 12, for he had his residence in the capital in law and fact. The army and force, stipulated with the generals of the all die competency of that force being thus admitted, not a soldier at its command without the cooperation of the allies.

Such a Machiavelian doctrine is contrary to all reason, and such a principle once established might cover the earth with scaffolds. England, who prides herself on her advanced state of civilization, cannot suffer such detestable maxims to be promulgated, and must view with horror their advocate and author.

Ney was informed of his sentence late at President; Moncey, however, nobly refused to night, and was hurried to execution early the next morning. The sentence was carried into effect on the 7th of December, 1815, in a clandestine manner, near the observatory, for all who were in any way connected with this detestable transaction, appear to have been ashamed

When Ney reached the place of execution, he walked firmly from the coach to the fatal spot, and refusing to have his eyes blinded, calmly faced the detachment: taking off his hat with his left hand, he exclaimed, " 'Je proteste solemnellement devant Dieu et devant les hommes de l'iniquite de mon jugement-'histoire me juggera," Then placing his hand upon his heart, he added, "Soldiers straight to the heart - Vive le France-feu!" He fell dead upon the spot, twelve balls having taken effect. Thus perished one of the gratest men France undaunted courage which had ever distinguish ed him in battle. It needed not wait for posterity, as Ney predicted—the justice of his

death is already decided.

As the noble and patriotic Armand Carrel, the most talented political writer in France, boldly stated to the peers, many who had condemned Ney being of the number, when sitting in judgement on the National, for breach of privilege, "Time has pronounced; at the present period the judges have more need of being reinbers who voted for the death of Marsial Nev

This feeling is deep, and we may say uni be expected that the Duke of Wellington, as commander merely of the invading allied name would pass without indignant remark were it not a lamentable error in his otherwise glorious career.

(\*I solemnly protest before God and man a gainst the iniquity of my sentence-History will judge me!)

WHAT EFFECT WILLTHE AMEND

MENT OF M. VALAZE PRODUCE IN THE UNITED STATES The amendment of M. Valaze, which has been adopted by the Chamber, will, if we miswill merely be considered as a proof of incon-

This amendment requires that the twentyfive millions of francs should not be paid until France satisfactory explanations as to what were its intentions in preferring is claims,-Now there are two contradictions in this; not on the part of the opposition, which appears not to have comprehended a word of the whole matter, but of the majority, which in all other points, has well understood the nature of the the discussion, these two principles have been

admitted: 1. That a demand made by a creditor, even in offensive terms, cannot relieve an honest debtor from the obligation of paying what he owes, but only gives him a right to demand tal of the debt.

2. That in fact the President's Message cannot be considered an affront offered to France, as, it having been annulled by the Senate which is essentially a part of the Executive, and by the House of Representatives, it was only a formal act of Mr. Jackson-an act disavowed by the American nation in all that could appear to be hostile, and therefore unworthy of engaging the attention of France for an instant. On these two principles the whole discussion

seems to have been tounded. Who does not then see the contradiction of M. Valaze's amendment. To resolve that no payment should be made until the United States shall have given satisfaction for the outrage committed by them against us, is to act at once against both the principles which had formed the basis of the whole question. It is, in the tants, and all individuals who shall be in the first place, supposing that an insult had been capital, shall continue to enjoy their rights and given after having acknowledged that none liberties, without being disturbed or called to was given. In the second place, it is a moral admission, that an offence on the part of the may have held, or as to their conduct or polin- creditor may be considered as full payment of just debt; for, it there be any meaning in M. valaze's amendment, it must be, that the twenty-five millions should not be paid, in case the United States should refuse the explanation about to be demanded of them-a conclusion at once absurd and dishonorable.

Thus it plainly appears, that there are two inconsistencies in this vote. That the opposition did not perceive it, is not at all extraordinary; but the majority, which had, until this moment, given proofs of great sagacity, and had not allowed itself to be taken unawares by ginia has always contended," &c. "Let the had not allowed itself to be taken unawares by any of those sophisms prepared with so much care and skill, should have discovered the blunder we now point out.

It is probable that many members may have had no other object in voting for the amendment, than to stop the torient of idle words been passed, and which, by the by, has not been wanting, even as things are. They may moreover have thought that the Americans would easily see the harmlessness of this vote, and be certain that ii would bring on no serious difficulties between the two countries; it that they were induced so easily and readily to throw this sop to the patriots of the taverns and

reading rooms. We are of their opinion on this last point .-In America, where people reflect and act consistently, this instability of opinion will be easily understood, and they will not be so silly as to get in a passion, when the French Envoy asks for the explanations required by the amendment of M. Valaze. These explanations will be very simple; it will only be necessary to read the resolutions by which entions, and there the matter will end. THE RIGHT OF INTRUCTION.

The cloud is not yet dissipated. Mystification still the order of the day. We have not yet met with one man who can undertake to say, whether the Governor has or has not communicated to Mr. Leigh the certificate of his election. The law says, So soon as any elecmonwealth, the Clerk of the House of Delegates shall notify the same to the Governor, who shall cause a credential to be made out and the seal of the Commonwealth affixed thereto, shall sign the same, and cause it to be delivered to each Senator," Why call upon the Clerk, so soon, to notify the fact to the Governor, if the Governor, is not forthwith to noti-fy it to the Senator. Has the Governor done it, or has he not! If he has not, why has he not! At all events, how does it happen, that

in a Republic, so open and so removed from all secrecy and diplomacy as ours is, is a simple fact like this veiled from the public eye How comes it to pass, that any thing like mystification should be observed among a People, so generally above board as the Virginians are? We were asked the other day, how did it happen, that the Whigs were so anxious to

precipitate the election of a Senator, on the very first week of the last session-that they asigned as a reason for it, that Virginia ought always to have a Senator ready-and yet, when the election was made, the credential was not communicated-the office was not accepted-the Senator was not in fact in esse! We leave the problem to the solution of those, who best understand it.

We cannot yet believe, with one of our correspondents, that "Mr. Leigh is not going to resign"-or rather, is going to accept. Let the Whig or the Compiler take what ground they may, we will not believe that they speak the wishes of Mr. Leigh. We will not permit ourselves to think, that he will subscribe to such sophistries of such counsellors, as the following from the Compiler:

But Mr. Leigh knows too well what is due to himself-what is due to the great principles of civil liberty-to suffer himself to be driven from his post by political harpies, until it is clearly demonstrated, that he will not be allow-Legislature instruct him to oppose the present Bank, or any other national Bank, and he can obey in perfect accordance with his own sentiments and those of the State. ### MR. JEFFERSON & COL. JOHNSON.

The Albany Evening Journal, a strong Federal print, (the conductor of which, lowever, has always shown himself to have a better discernment than his brethern, as to the intelligence and magnanimity of the American character.) gives this caution to those of his contemporaries at present engaged in the fierce and indecent persecution of Col. Johnson: "If the whig papers[says the Evening Jour-nal] really wish to second the efforts of the Albany Regency and promote the election of Mr. Van Buren, they can in no way so effectually do so, as by writing and publishing just such attacks upon Col. ### PETRIFIED BUFFALO.

This extraordinary curiosity was discovered about two years since, by some trappers belonging to Capt. Bent's company, lying on the side of one of the beaver dams of the Rio Grande possesses the petrifying qualities to an eminent degree, its shore abounding in specimens of various animal & vegetable productions in a petrified state. The petrified Buffalo is discribed. by those who have seen it, to be a perfect in its petrifaction as when living, with the excepinches in diameter, around which the hair has been worn off probably by the friction of the water, in which it must have lain for ages past to have produced such a phenomenon. hair on the hump and shoulders, neck, forchead and tail, though concerted into almost a smooth surface, may be easly discerned. The horns, eyes, nostrils, mouth and legs, are as perfect in their stone as in their pristing

The country in which this rare specimen was found, is inhabited by the Euleaux, a roving tribe of savages, who subsist, a great portion of their lives, on insects, snakes, toads, roots, &c. This tribe being particularly hos-tile to the whites, renders the acquisition of this curiosity an undertaking not a little hazardous; notwithstanding this, and many other difficulties to be surmounted, such as distance, expenses, &c. our enterprising citizen, Capt. Charles Bent, contemplates procuring and bringing it to the United States with him, on return from Santa Fe during the ensuing autunin. We heartily wish him success in his praiseworthy undertaking.

"We saw from our office windows yesterday morning, says the Gloucester, Mass. Telegraph, a sight which, bad we lived and seen it n the superstitious days of our ancestors, would have made our very hair stand on end with terror. It was a large vessel, under a press of canvass, apparently sailing in the air at an elevation of not less than a hundred feet from the water, directly across the mouth of our harbour, Knowing, however, how to account for it on natural principles, it filled our mind only with delight. The sun was shining very brightly at the time—the image of the vessel reflected in the mist above her was perfect, and as she passed swiftly by, coursing through the air "like a thing of life," we thought it one of the most beautiful "pictures" we ever beheld."

THE Executive Committee of the Hartford county Silk Society, have commenced a monthly publication, called the Silk Culturist and Earmers Manual.

The object of the publication is to disseminate a thorough knowledge of the cultivation of the Mulburry Tree, in all its varieties-The rearing of Silk Worms-The production of Cocoons and the Reeling of Silk, in the most approved method. The importance of this nett profit of land devoted to the culture of Silk is double, if not triple, to that derived from any other crop which can be put upon it. It is also a fact, that every moderate farmer can raise several hundred dollars worth of Silk, without interfering with his ordinary agricultural operations. But in order to avail himself of this facility to obtain competency and wealth, which our soil and climate have given him, he must possess himself of information on the subject-for without it his attempts will be truitless. It is, therefore, the object of the Committee to diffuse this information as ex tensively as possible; and at the cheapest rate. The publication will contain a complete manual or directory from sowing the seed to reeling the Silk, together with such facts and experiments, as will enable farmers to raise Silk and edge or assistance. It will also contain interesting matter on agricultural subjects in

IV. Internal Improvments.—The vote given of his opinions concerning the powers of the Federal Government upon the subjects of Internal Improvements; and is not unfrequently made the subject of the most vehe-ment denunciations. Either from the unexceptable character of his political career, or some other cause, it has usually so happened, that in the points in which he has been most bitterly assailed, he has, in the sequel, been found to be least vulnerable. I deceive myself greatly, if such shall not ultimately be the case delivered by Mr. Van Buren in the Senate of the United States, on the powers of the Vice ident, and in which he gives his views at large upon constitutional principles, and conns, in the strongest terms, the latitudinariofficial course upon the subject in general.

"Mr. Van Buren is by no means certain that in this respect he himself has been altoge-

It was authorized during the administration of Mr. Jefferson, (although it has been a matter of constant reference) that has been satisfactory to his mind. All that he can say is, that if the question were again presented him, he would vote against it; and that his regret for having done otherwise, would be greater, had not Mr. Monroe, much to his credit, put his veto upon the bill; and were it not the only vote in the course of seven years' service, which the most fastidious critic can torture into an incosistency with the principles which Mr. V. B. professed to maintain, and in the justice of which he is every day Fice President to call to order, &c.

"WASHINGTON, Jan. 15th, 1834. "Dear Sir :- I received last evening your letter of the 12th inst., in which you apprize me of your intention to unite with some of the friends of the present Bank, in an application to Congress for the incorporation of a new one to have its principal seat at New York. I will not conceal from you, my dear sir, my regret that you should have been able to bring your mind to this conclusion. The right to make such an application is certainly open to all our citizens, and I have surely no disposition to prevent or embarrass its exercise. Those who know me, will not, I am confident, suspect me upon the subject of Internal Improvements, he thus speaks of the vote m question, and of his sary for me to repeat them here. And without having communicated with the members, or laying claim to information that is not open to all attentive observers, I cannot hesitate in believing, that it would be impossible to obtain a dozen votes in favor of such a proposition, in both branches of the National Legislature. Vice Presidents of the National Convention. TO RICHARD M. JOHNSON, Esq., of Ken-

GREAT CROSSINGS, 9th June, 1835. Gentlemen: I have had the honor to receive your letter, informing me that I have been nominated by the recent Republican Convention Vice President.

For this expression of confidence from the Republican party of the Union, I have not though not boisterous support, which I have produced not from a whirling motion, but from language to express my gratuude. For the exalted talents, pure character, and sound principles of the gentleman, whose name was brought in competition with mine, no man can have a higher respect than myself; and had be been preferred by the Convention, it would have afforded me the highest pleasure to give him my cordial support. To my greater age and longer public service, and not to superior qualifications, can I attribute the preference of the Convention; and if any injury should actrure to the Republican cause from that preference, no man will deplore it more than myself. As, however the Convention were undoubtedly better qualified to judge on that point, than one or a few individuals possibly can be, I have but to accept the proffered nomination, and resign myself to the will of the People, as it may be expressed at the polls. The gratification I feel at the honor done me is not un mingled with regret-a regret, arising not from the preference of another by a portion of the Convention, but from the error under which they appear to have labored in relation to my political principles. I do not know myself, if my pinciples do not accord with those of Thomas Jefferson, the Patriarch of Republicanism, and his disciples who constituted the late Convention. During almost the whole period comprised in the Administrations of Jefferson, Madison, and Monroe, I was a member of Congress and gave them my cordial support. From the earliest moment, luniformly acted with the Republican party, founded on the principles aserted by Virginia in 1798, and never withheld my support on any occa-sion, from either of the distinguished men, who, in succession, became the representatives of these principles at the head of the Government, save only in the struggle of 1814, '15, and '16, for the establishment of a National Bank. which I sincerely entertain, which have been President Madison then, and many of my Republican associates in Congress, who concurred with me in principle, felt themselves constrained to yield up their objections to what they considered the highest law-pullic necessity I continued to believe the remedy worse than the disease. I had voted against the recharter present prosperity, than I do. All that I can of the old Bank of the United States, in 1811, n fure with propriety accomplish, to carry it from a conviction of its dangerous tendencies as well as its unconstitutionality Upon the same grounds I lelt constrained to vote against form. The support of the proposed measure is the establishment of the present Bank in 1816, not of that character; and will not, I am per-although advocated by the Administration to which I was attached.

I voted against the bill to recharter this Bank in 1832. In 1834, I voted for Mr. Polk's resolution, declaring, that the Bank of the United States ought not to be rechartered, every point at which it was assailed, with a view to sever the connexion between the Government and the Bank, and to make sure of deed, I have never wavered in my opinion aof the Bank, or of any such unconstitutional monopoly, unless it be from the circumstance that I did not, with the ardor of younger politicians, pledge myself against every possible substitute for the present Bank. General Jackson, in one of his annual messages, sug rested the outline of a substitute without stock holders, or power to make loans, as I understood it; and in his veto message, he declared that he could have furnished a plan which would not be liable to constitutional objections. Many of his friends believed that it would be permission to show it to whomsoever he pleas- absolutely necessary to have some substitute, and suggested a variety of schemes. To all these the propriety of the step they were about ta- posing or supporting any one, except in the event of failure in the experiment to use thes. Banks Buren's letter, suspended all further proceed- & then only such a scheme as should be entirely approbation of the A dministration and the Republican party.

The recent developements of the power of doing mischief possessed by a National Bank, several points mentioned in your letter, and in and the uncontrollable tendency to use this the other communications addressed to me, I power to direct the politics of the country, have satisfied me that no such institution should be tolerated, under any circumstances. The facility and success with which the public business has recently been done through the State Banks, have, in my opinion, proved that a National institution is as unnecessary as it is unsale and unconstitutional.

In relation to the tariff, my views appear also not to be understood. At the close of the last war, the general sentiment seemed to prevail among our emment statesmen, especially those who had supported the Government in that conflict; that it was the true policy of the Government so to regulate the tariff, as to promote the establishment of manufactures, within our berders. In this opinion, many o the statesmen from the South united with those of the middle and western States. Without being distinguished as a peculiar advocate of the course of legislation which grew up under these circumstances, I gave it my support in pursuance of public opinion. As soon, however, as I perceived the dangers which were likely to grow out of this species of legislation pushed to excess, I became an advocate for the reduction of the tariff, and voted for every procitizens as putting an end to the question. prudent and patriotic man will, I am sure, ever attempt a renewal of that species of legislation. For myself, I can sincerely say, that I should consider any attempt of that sort as savouring of enmity to the government, inasmuch as s unnecessary as a measure of policy, and has left a large family. more would certainly revive a controversy interests of a portion of the people.

The same remarks are applicable in a great

tance of the same. We take pleasure in per-torming this duty, and respectfully solicit an ments. In relation to them, it may also be degree, to the subject of internal improveobserved, that the success of the several States

such works as are universally conceded to be of a National character.

In fine, I consider the views of President Jackson, on the Tariff and Internal Improvements, as founded in true wisdom; and my carnest endeavors to give them efficacy in the administration of the Government.

On these leading subjects, I felt it my duty to touch, because it seems to have been errone disposed to use the influence of high official of the room. station, to restore an expiring Monopoly, and certain mischievous systems of policy which t Baltimore, as a candidate for the office of experience has exploded. It is mortifying to me, that such an impression should have obtained any credence whatever, since the steady, called. The violence appears to have been successful warfare on those systems. But these

alike by inclination and duty. On other subjects, a public life of thirty years' uninterrupted activity has, I trust, been sufficient to enable my countrymen to understand my principles and my motives of action. I believe no man will charge me with derele tion of duty towards my country. In devotion to my country, po one will say that I have been wanting; and I trust that mine has not been 'a faith without works." My con-tituents have never charged me with neglect of their interests, collectively or individually; and, to an American citizen, complaining of wrong, and asking the aid of a friend, wherever residing, or however poor, unknown and humble, I have never turned a deaf ear, or refused to labor for him, as for a brother. To this faithfulness, and these exertions to be useful, more than to any extraordinary qualifications in me, do I attribute the honor which the Convention devastation. They made a minute examinahave done me; and should the People respond favorably to the recommendation of that body, my highest political ambition will be more han satisfied. It will be a confirmation, by be voice of my whole country, of the repeated proofs of approbation, given by the people of ny own State, to the well-meant labors of a life evoted to the service of the nation.

But, whatever may be the fate of the recommendation which I have received from the kind partiality of the members of the convention, coming from almost every State in the Union, as the representatives of the Democratic Party, with which it has been my pride to act, throughout my public career, I shall ever cherish with the most affectionate recollections. a deep sense of the obligation they have conerred.

You will please, gentlemen, to accept the assurances of my high respect and consideration, while I remain, most respectfully, your friend and fellow citizen, R. M. JOHNSON.

late severe Tornado which visited New Brunswick, has been more destructive than we gainst its constitutionality, and have never seen the moment when I would have given my vote hundred and fifty houses were destroyed, and for any similar institution. I cannot conceive that the loss of property may be estimated at how the opinion got abroad that I was in favor one hundred thousand dollras. Several lives were lost, and many persons seriously injured The storm was most terrific, and has not left a tree or house standing in its passage. It first made its appearance with the falling of ice, and on reaching the hill at New Brunswick, it remained, says the Brunswick Times, apparently ixed for a minute or two, presenting the appearance of a pillar of fire—its base resting or the earth, and its top reaching a mass of black

We copy the following account from the New York Gazette: Among the extraordinary occurrences, which took place on this melancholy occasion, the fate of the son of William G. Dunham (a small ad) was the most singular.

He was taken off the piazza of the house corner of New and George streets, carried in the air a distance of three hundred yards and landed on the wharf at Burnet street, having only sustained a slight injury in one of his arms On being questioned as to his feelings, he stated that he recollected passing through the top of a willow tree, and that the sensation produced by being carried up in the whirlpool was like that of being pulled in contrary directions.

A bedstead was taken from the third story of a house in Schureman street, carried a distance of two hundred yards, and landed in make no concealment of their purpose; but Burnet street, without having sustained the openly avow their intention of defeating the slightest injury. A cow was killed in the street, which a woman

had been milking a few seconds before. After leaving New Brunswick, the tornad passed down the river a short distance, then look a course across the river and passing over the farm of James T. Dunn, tore up several trees by the roots, laid all his out buildings in ruins, without doing the slightest damage to his dwelling. It then passed down to the farm of Joel Randal, and carried away part of the root and gable end of his dwelling .- Thence it course was over Piscataway, a small town containing about a dozen houses, situated two miles from New Brunswick. Here, every building except two in the place, including the gret to add, that Mr. Thomas W Harper, of New York, was killed by being struck on the head with a beam .- We understand that Mr II. had just received the deed of some property which he had been purchasing, and that hi visit to Piscataway was for the purpose of making some arrangements respecting it. I saw what it was and ran into the house and closed all the windows before it reached us. The whole atmosphere was filled with fragments of timber, &c. -in a moment the house opposite was unroofed, as if it had been covered with paper. The as far as I may hereafter be enabled, it will be house in which I was, being at the edge of the current, escaped uninjured, save that a rater from the roof of a house about half a mile distant, thirty feet long, struck the edge of the window tearing away the brick work and ously apprehended by some, that I would be demolishing the sash and passed into the wall

The track of the Tornado was from Nortl .west to southeast, and from a minute investigation of its effects, does not appear to have been of the nature of a whirlwind ordinarily so two currents rushing towards each other-at effects are more strongly marked in the woods, where the direction of almost every ree accords with this statement-at the extreme edge the trees are nearly at right angles with the course, sloping more as you proceed towards the centre, where there is some confusion, but the direction is almost invarially with the current.

A gentleman of our acquaintance, who happened to be in New Branswick during the tornado, remarked to us, that previous to its commencement, the atmosphere was usual heavy, and respiration was with the greatest oppression. There was, said he, many a my erious dread, or supernatural feeling of some-

thing unusual about to occur.
When the intelligence of the disaster reached Princeton, several of the Professors of the College immediately proceeded to the scene of tion of the spot visited by the tornado, and will doubtless furnish the public with an interesting scientific statement on the subject of this occurrence-the like of which has never before

occurred in this latitude. As some persons may be disposed to doubt the account respecting the lad Dunham, we will merely state that during a whirlwind which occurred in Burgundy in 1755, the particulars of which are given by Abbe Richard, it is stated that "two men were enveloped in the whirlwind and carried to a distance, without experiencing any injury; a young shepherd was lifted high in the air, and thrown upon the banks of the river-yet his fall was not violent the whirlwind having placed him on a verge where it ceased to act." The case of the shepherd is precisely similar to that of young Dunham, and in fact the whole account of the above mentioned tornado which took place in the town of Mirabeau, bears a surprising simlarity to the one we have just related."

COL. JOHNSON.

The virulence with which this patriot and statesman has been assailed, and the libels with which the opposition prints are teeming again t him, only prove that his weight is felt and his influence dreaded throughout the confederacy. His calumniators know they can make no unfavourable impression in the west-but they in.agine his popularity may be effected in the east and south, by charges which are as false as they must be disgusting. In due season the persecutors of the Colonel will be put down by "a plain unvarnished tale"-by a statement of facts ciate his private as well as public conduct.

We could reply to the ribald essays of the Journal-which are too obscene for perusalbut it would be a waste of labor and of time. The general character of that print, and the rancour and obscenity displayed in the articles to which we refer forbid supposition that attacks on the hero of the Thames can fail to increase

his well earned popularity. The single fact, that he represented a district in Congress for twenty-eight years, the population of which is second to none in the Union in point of virtue, intelligence, and retirement, sufficiently manifests that he is not obnoxious to the charges urged against him .- Louisville (Ky.) AN ANGEL CAUGHT. - The Magazine and Advocate says, that while the Mormon prophet Jo Smith, was in Ohio, engaged in proselyting people to the faith of the "Golden Bible," ha sought to give additional solemnity to the baptismal rite, by affirming that on each occasion an angel would appear on the opposite side of the streams and there remain till the conclusion of the ceremoy The rite was administered in the evening in Grand River, near Painesville, not by the prophet in person, but by his disciples. In agreement with the prediction of the prophet, on each occasion a figure in white was seen on the opposite bank, and the faith of the faithful was thereby greatly increased. Suspicions, as to the incorporeal nature of the reputed angel, at length induced a company of oung men (unbelievers of course) to examine the quality of the ghost, having secreted themselves they awaited its arrival. Their expectations were soon realized, by its appearance in its customary position, and rushing from their lair, they succeeded in forcing it into the stream, and although its efforts to escape were powerful, they succeeded in bringing it in triumph to the opposite side of the stream, when who should this supposed inhabitant of the upper world be but the Mormon prophet .- Roches. ter Republican.

FOR PRESIDENT, MARTIN VAN BUREN. OF NEW YORK.

FOR VICE PRESIDENT, RICHARD M. JOHNSON.

OF KENTUCKY. We perceive by last Saturday's Baltimore papers, that Mr. Livingston passed through that city, on his way to Washington on Friday last. We may therefore expect, very some official imformation (or at least such

toon affairs with France.

We have devoted a large portion of this morning's paper, to an expose of the views and opinions of Mr. Van Buren in reference to the great questions of policy which now agitate the country. The position in which this distinguished statesman now stands, a candidate for the suffrages of the people for the highest elective office on earth, not only justifies, but calls for, the most minute inquiry into his political opinions. The article commences with the first page. The importance originated our Grand Charter of Liberty, we, of the subject will be a sufficient aploogy for its the undersigned, are authorised, as the Comlength.

We offer to our readers this morning the letter of Col. Johnson, accepting the nomination of the Baltimore Convention. As might have been expected, the old hero of the Thames seems a little indignant that the orthodoxy of his political faith should have been questioned at this late period of his political life. That a man who had formed his principles on the basis of the Kentucky resolutions of '99, and while too, the spirit of these resolutions was yet in its too, the spirit of the spiri too, the spirit of these resolutions was yet in its vigor, that one who had served in Congress

But, although incautious in some of his actions, Col. Johnson has shown himself in the general, the stedfast friend and supporter of the great principles of the doctrines of '98, and pledges himself, if elected, to carry them out, as far as may be in his power, in any administration of which he may be a member. Would to God, that all who call themselves Democrats, were as honest and consistent in sup-

We cannot forbear from inviting public attention to the "GRAND MECHANICAL EX-HIBITION" and display of "OPTICAL ILLU-BIONS" advertised in our columns this morning. We have not had an opportunity of conversation with the individual exhibiting these specimens of art, nor can we speak from any knowledge we have of the particular exhibitions now offered to the citizens of Talbot; but if they approach in grandeur & beauty, those of a similar character which we have witnessed vorable opinion of his employers: Nevertheless, in the Cities, they will afford a rich treat to the sight and imagination of the beholder.

But what constitutes the chief excellence of such exhibitions, is the total absence of every thing which can offend the most moral or religious feeling. They consist in an astonishing display of the unlimited inventive powers and ingenuity of the human mind, as creditable to the Exhibiter as gratifying to the Visiter.

Y authority of a decree of the High Court of Chancery of Maryland, I will offer at public sale on the premises, on THURSDAY, the 9th of July next, at 10 o'clock, A. M., all habitants of each district, as will enable them low Charles street, and four doors above the to make such appointments as will be fit and Baltimore and Ohio Rail Road Depot. This

> a three story BRICK HOUSE, with a two story back building at-tached thereto—the front is divided into two stores, and now occupied by Mr. John Simonson, Chair-maker, and Mr. D. Smith, Boot-maker. I understand this Property, from its location, is very valuable, and offers strong inducements to those who are disposed to invest their money in productive real estate. The title is in fee simple, clear of all ground rents, &c. Those who are disposed to purchase can examine the premises for themselves, or enquire for particulars of Peter

Gould, Esq. South Charles street, near Pratt Under the same decree, I will also offer at public sale, on the premises; on Thursday, the 16th of July next, at 3 o'clock, P. M. that beautiful property situated on the Great Choptank river, Caroline county, Md., known as Richardson's or Gilpin's Point, now in the oc-cupancy of Robert T. Keene, Esq. late Sheriff

of which a large portion is covered with valuable Timber, very convenient to navigable water. The improvements thereon consist of a large frame mansion house with kitchen, smoke-house, washhouse, quarters, &c., together with a large and commodious Store House, with a brick cellar; and there is also attached a substantial wharf recently rebuilt, upon which there is a very ample granary for the reception of the produce of the country, with valuable sheds and a carpenter shop appendant. As a stand for the sale of goods, &c. this situation is not surpassed, perhaps, by any country place tablishments in Baltimore, and studied the art on the Eastern Shore. The quantity of grain of Cutting to perfection, he feels confident of giving satisfaction to all who may honor him quite sufficient to keep a buy vessel constantly employed in running it to market. Connected with this property there is a profitable Herring and Shad Fishery. This situation is highly desirable for business or pleasure, being about 12 miles from Easton and the same distance from Denton. The premises being supplied with a spring of never failing water, and re-markable for healthiness, may be considered a-mongst the most beautiful, pleasant and lucra-tive seats upon the Choptank river, and offer great temptations to purchasers. Those who are disposed to purchase can examine the property for themselves, or, for information, may enquire of Gen. Wm. Potter, of Caroline, or of Robt. T. Keene, Esq on the premises.

According to the Terms of Sale of the above

property, prescribed by the Decree, one-third of the purchase money is required to be paid on the day of sale, and the residue in two equal payments of one and two years, with interest from the day of sale, to be secured by bond, with surety to be approved by the Trustee.
