VOL. 24—NO. 1

SALISBURY STATE COLLEGE, SALISBURY, MARYLAND

SEPT. 14, 1964

Largest Enrollment In SSC History

Salisbury State College has opened for its 38th year this week with anticipated enrollment promising to be the highest in its history. According to Dr. Wilbur Devilbiss, president, the total enrollment will number between 600-650 with approximately 255 members of the incoming freshman class.

As a result of the increased enrollment, Dr. Devilbiss stated five faculty members would be new to the campus this year.

Named as professor in the department of political science is Dr. Justin Y. Shen. A native of China, Dr. Shen holds a bachelor of arts degree from St. John's University, Shanghai, China. His master of arts degree was conferred by Columbia University and his doctor of philosophy degree was earned at the University of Wisconsin.

A naturalized citizen of the United States, where he has resided continuously since 1935, Dr. Shen served for 25 years with the foreign service of the Chinese government, holding such positions as the special assistant of the Chinese Embassy at Washington, D. C., working with Dr. V. Wellington Koo, now one of the 15 judges of the International Court of Justice at the Hague.

Dr. Shen also served as consultant of the Chinese Delegation to the International Jurists Conference for drafting the United Nations Charter, and to several sessions of the United Nations General Assembly.

Prior to coming to Salisbury State College, Dr. Shen spent six years at Brenau College, Gainesville, Georgia, as professor of political science and history and as chairman of the history department. Academic and professional associations of which he is a member include the American Political Science Association, The American Society of International Law, and the American Historical Association.

Joining the faculty as associate professor of physics is Dr. Frank E. Hoge of Morgantown, W. Va. A native of West Virginia, Dr. Hoge attended the City College of San Francisco before receiving his bachelor of science degree from Concord College. His master of science and doctor of philosophy degrees were earned at West Virginia University where he served as a research assistant in the Department of Physics. Dr. Hoge holds memberships in the Blue Key National Honor Fraternity, Sigma Pi Sigma (national honorary fraternity in physics), and Sigma Xi (national honorary fraternity in research).

Named as assistant professor of mathematics is William Forest Buckler. Mr. Buckler, a native of Illinois, received a bachelor of education degree from Eastern Illinois State College before earning his master of arts degree from the University of Illinois. He has taught in the public schools of Illinois and has been a participant in five workshops for teachers of mathematics sponsored by the National Science Foundation at the University of Wisconsin.

Mr. Buckler is a member of the Illinois Education Association, the National Education Association, and the National Council of Mathematics Teachers. Mr. Buckler currently holds a commission in the U. S. Naval Reserve. He and his wife will make their home at 308 Clairmont Drive in Salisbury.

David Bruce Miller will join the faculty as an instructor in Sociology. Mr. Miller, who comes from Oregon, attended Walla Walla State College in Washington before receiving his bachelor of science degree from Oregon State University. He earned his master of science degree from Mississippi State University where he served

"Necessary Evil Awaits Freshmen

With the opening of each college year, freshmen are oriented on the many student and campus activities available to them at Salisbury State College. The new frosh is told that college can be a rewarding and pleasant environment — intellectually and socially. Freshmen, however, learn shortly after orientation that there is one college activity which is not pleasant or rewarding; nor, intellectually or socially stimulating — standing in line to pay their college tuition and fees.

This tragic experience, which has been suffered by every upperclassman, is appalling and unhealthy for students since it requires them to remain on their feet for periods exceeding two hours.

The cause for this annual foot-swalling contest cannot be blamed on the college administration, on freshmen, on upperclassmen or on any one individual. It can only be blamed on what society describes as a "necessary evil."

"Necessary evils" do not have to be totally painful. In fact, careful observation reveals that if four suggestions were initiated, standing in the pay line could become a most stimulating experience . . . in one way or another.

First, freshmen should listen very carefully to the instructions, concerning the subject of paying their college debts, given to them during the orientation period.

(See EVIL — Page 3)

Advice for College-Bound

(The following is an excerpt from the Jenkin Lloyd Jones column, "Advice for College-Bound" which appeared in the Washington Star on Monday, Sept. 2, 1963.)

—o—

Dear Frosh:

So you're going to college. Your parents and their adult friends have told you you are lucky. And they are right. But a college education isn't what it was 25 or 30 years ago. It's better. And, generally, it's harder to achieve.

There are still a few easy schools, places where they are likely to pass anybody with a discernable pulse. But these are getting rarer. The old-time "country clubs" that used to receive you with open arms after you'd been fired out of the Ivy League are getting pretty pecksniffish. They have got waiting lists.

Some of the big State universities still have to take anyone who has a high school diploma. And because some high schools are pretty awful, the universities enroll a lot of freshmen who aren't ready. But they have a gimmick. They throw out the loafers and the staggerers after a semester. It's sad to be bounced out of college, particularly in these days when there aren't many colleges you can bounce into.

(See ADVICE — Page 3)

WELCOME FRESHMEN!

Dr. Wilbur Devilbiss, President, Salisbury State College

You are one of about one million young men and women who are freshmen in our colleges and universities this September. It is a new adventure which is both exciting and exacting.

I am often asked the question, what is college? It is impossible to give some general answers to this question. However, it is essential for each person to develop an answer of his own. This answer will be determined by what each brings to college in the way of motivation and desire to learn, his hopes and aspirations for the future, and his willingness to pay the price that must be paid if he is to be successful.

What is college? My brief definition is that it is a place in which a student can learn how to learn. It is not a place to pass a specified list of courses with acceptable grades, receiving a diploma at the end of four years as evidence that he has been through college. Rather, it is a place where the academic, social, cultural and spiritual programs of the college are allowed to flow through, stimulating and elevating each student.

Wilbur Devilbiss
President

Campus Clubs Open to Freshmen

Incoming freshmen looking for means to exploit talents will find Salisbury State College overflowing with opportunities for self-expression. There are numerous clubs and organizations which are tailored to fit an individual's abilities and interests. With few exceptions, such as Phi Alpha Theta (honor history society) and Circle K (service organization), membership can be obtained by a show of interest plus a request for membership to a member or the head of the organization.

SGA (Student Government Association) is composed of the stu-

dent body in its entirety. This most important body governs campus life, including the allocating of funds to corporate member organizations. The student benefits not only through organizational activity but through dances and through cultural affairs such as assemblies and coffee hours. In the case of all organizations, the individual student has the obligation of cooperating and maintaining interest if the organizations are to operate at full capacity.

Campus residence life is regulated by the WDA (Women's Dormitory Association) (See CLUBS — Page 3)

Welcome Freshmen!

On behalf of the Student Government Association, I would like to welcome you, the Class of 1968, to Salisbury State College.

You are starting an important phase of your life. It is a time of friendship, independence, experimentation, and intellectual pursuit. Each of these aspects of college life has its place, but one should not outweigh the other. All will go toward furthering your perso-

AVERY SAULSBURY
President, S.G.A.

nal involvement into a mature and responsible individual.

College is not all seriousness, nor, is it a series of good times and parties. It is, rather, a harmonious balance of the two. But, do not be misled. Studying is the most important activity on campus for it is the determining factor of your success in college.

In the midst of all the excitement of the next few weeks, remember that every freshman is a newcomer to Salisbury State. So, let's all get acquainted. I'm looking forward to meeting each of you. See you around campus!

Avery Saulsbury,
Student Government
Assn. President, 1964-65

Bookstore Schedule Announced

The College Bookstore has announced it will be open for the sale of books and supplies from Sept. 14 through 19 on a special schedule which is designed to expedite the acquisition of school supplies by students.

On Monday and Tuesday, Sept. 14 and 15, the bookstore will be open from 8 a.m. until 4 p.m. and Wednesday, Sept. 16, 8 a.m. to 4 p.m. and 5:30 p.m. until 9:30 p.m. On these dates, only upperclassmen will be authorized to purchase books and supplies.

Freshmen will be able to purchase their supplies on Thursday, Sept. 17. On this date, the college bookstore will be open from 8 a.m. to 4 p.m. and from 5:30 p.m. until 9:30 p.m.

On Friday, Sept. 18, the store will be open from 8 a.m. until 4 p.m. and Saturday, Sept. 19, it will be open from 9 a.m. to 1 p.m.

All students, except scholarship students, must make their checks payable to the "College Book Store," in the exact amount of the purchase. In addition, it is suggested that students complete their checks, except the amount, prior to entering the book line.

Scholarship students should inquire (See BOOKSTORE — Page 3)

ACCEPT THE CHALLENGE

What is a young college graduate? Simply, he is the architect of our country's future with a desire to strengthen the pillars of the American way of life. His ideas are outlines of our nation's policy in the near future; his enthusiasm, ambition, and educational background are the tools he uses to draft his own and the nation's destiny. This is the college graduate . . . a person who entered college to equip himself for the challenge and responsibility that the future holds, not to appease the demands of his family. He is a self-made person in that he, alone, secured those opportunities offered by college to promote his welfare and the welfare of America.

Those of you who are freshmen this year, must now seriously consider whether or not you will take your place in the future, whether or not you will seize the opportunities of college, whether or not you will be an architect of the future, whether or not you will be a self-made man; and most importantly, whether or not you will be a college graduate.

Your decision will be the most important action of your life and it can only be determined and achieved by YOU. I hope that you decide to be a college graduate . . . a young, capable person of action ready to assume the leadership of tomorrow.

Remember, the world exists as it is today and tomorrow will exist as we choose it. In order for us to accept the responsibility of the challenge assigned to our generation, we must now prepare ourselves intellectually and socially. The opportunities of college may become lost to you if you decide not to take advantage of them today; and, if you lose them, they may never reappear.

Salisbury State College is an excellent institution for obtaining the intellectual and social stimulation which will shape the future of our great nation. The faculty is dedicated to the ideal that you, as a future leader, deserve the best of their intellectual talents and the college is dedicated to the ideal that you deserve a curriculum and environment helpful to self-improvement in thinking, feeling, and acting.

Naturally, college, in one respect, is not an easy road. It will demand the maximum of your resources and it will require you to tap and develop those energies which you have not discovered or have not dreamed you possessed. College is, however, easy, in another respect, when you consider the words of Jenkins Lloyd Jones in an article, "Advice For the College-Bound." He stated, "College is not the only way to get an education. The world abounds with effective self-taught men and women. College is merely the easiest way to get an education. It hands you carefully programmed and in logical sequence the FRUITS OF MAN'S DISCOVERIES."

Senator J. William Fulbright of Arkansas once stated, "The emphasis in America is on young men with ideas and initiative to lead our growing nation. This is true in government, business, the arts, and the many other enterprises which absorb our national energies." Unless you prepare yourself to lead, America will suffer. Our nation has solved many problems but the future holds bigger and more complex problems and will require leadership to provide the answers, make decisions and guide our national course with wisdom. Colleges are the most effective suppliers of leadership and wisdom.

Why not accept the challenge and responsibility of tomorrow by accepting your responsibility today as a college student and future citizen.

(Editorial)

WITH CARE AND CONCERN

Within the next few weeks, members of the Freshman Class will have to perform a duty which, I feel, should be executed with extreme care and concern — the election of class officers and representatives.

The officers and representatives that you select will be charged with the responsibility of representing you. Those you select should be of such a calibre that they will serve you dutifully and diligently and reflect credit upon your class, the student body and this college.

There is no simple guideline to follow in choosing representatives either in college, national, state or local elections. The words of a philosopher of Ancient Greece, Plato, may, however, serve as an insight to the requirements necessary for electing effective, efficient, and responsible leaders.

Plato stated, "Shall we not require for our rulers men who are by nature of good memory, speedy in learning, high-minded, gracious in manner, friends and brothers of truth, justice, courage, and self-control."

The HOLLY LEAF Staff extends to President Wilbur Devilbiss a sincerest desire for a speedy recovery from his recent illness.

Program Innovation

Innovation, according to the American College Dictionary, is defined as the introduction of new things and methods.

Even though the definition is simple, the word, innovation, can be the nucleus of a program to improve our college, our student activities and our ability to improve ourselves intellectually and socially. It can be IF we accept the challenge to implement the meaning of innovation into action. How can this be done?

By innovating, through cautious experimentation, new methods of study for ourselves to broaden not only our consumption of knowledge but our understanding.

By innovating new ideas which will improve the programs of campus organizations to avoid complacency in their purpose.

By innovating new methods to implement those ideals, theories, and concepts expressed by instructors or writers which may be beneficial to the programs of self-improvement that each of us have.

By innovating new methods of research for ourselves to improve upon the quality of our term papers.

By innovating new methods of behavior which will reflect nothing less than credit upon ourselves, our classmates and our college.

By innovating a new school spirit and a sense of pride toward our college.

By innovating a program to acquaint ourselves with the principles and functions of the Student Government Association and its relationship to students.

By innovating new spirit and new methods to improve ourselves in athletic competition.

By innovating new ways to improve our political awareness.

By innovating ourselves to Erasmus of Rotterdam's belief that nearly all conflicts or disagreements between men can be adjusted happily through a little yielding on both sides since every conflict lies in the domain of the human.

By innovating ourselves to academic courses which will broaden our knowledge so that we may better accept the challenge of the future.

The process required to transfer the meaning of innovation into action is a simple one. Think and Act! So, let us, individually, initiate a PROGRAM INNOVATION.

The population of New York City exceeds that of Colorado, Wyoming, Idaho, New Mexico, Arizona and Nevada combined, the National Geographic says.

Freshman Tips

By Sally Trashmouht

Hi! There! Studentio Froshio! Here is your favorite reporter back again with more news for you to spread around the campus — news to begin your favorite radical campaign. Let's get started; we can't keep the young Freshman radicals waiting!

Our advice today concerns the do's and don'ts which you may find helpful in your relationship with certain segments of our college society. Doesn't that sound like fun!

First, do not purchase binoculars if you live in the men's dormitory (self-explanatory). If you do, please remember that the bird-watching hours are from 7 until 9 a.m. Remember, no bird looks its best in the early morning.

Second, no sun bathing on the Science Building roof during World Civilization classes. A student might confuse the "War of Roses" with the "Battle of the Bulge."

Third, no ripple soles in the library because the squeaks are not helpful to intellectually stimulating research activities. Many of today's authors cause enough squeaks with their writings. So, leave the squeaks to the squeakers!

Fourth, no fog horns are allowed in the main building. Fog horns are not considered authorized fixtures in the main administration building. The regulation covering authorized fixtures may be found in the State of Maryland Handbook 11176589382, page 3, subsection B, paragraph C. The handbook is entitled, "How to Decorate a College in 10 Easy Lessons."

Fifth, no hop-scootch on the new sidewalks, boys! This is where the Rudolph Valentino set of our college play marbles and such other things designed for self-improvement.

Sixth, no drag racing with adults who drive scooters or bikes or dirty white Valiants. Such racing is not considered helpful to the maintenance of the asphalt gardens on campus.

Seventh, don't be shocked when, in a couple of weeks, you see an excited, red-faced, female student with a small shopping bag walking down the hall. She will probably be on her way to Speech Class to give her first "how-to-do-it" speech.

Eighth, do not be shocked if you happen to notice, in a few weeks, that no one is playing cards in the snack bar. This will be the official signal to the student body that a world-shattering event has started — the World Series.

The pulse rate increases after one eats.

(Editorial)

The Process Never Ceases

Many freshmen, who have entered Salisbury State College this year, will discover that the process of individual education is a continuing one and does not necessarily cease with the receipt of a B.A. or B.S. degree.

One Salisbury State College graduate has proven that a person never stops learning.

Phillip Ristaino of 511 Buena Vista Ave. in Salisbury was one of 30 U. S. students who completed the East-West Center scholarship studies — a program that offers awards for classroom and field studies in Asian-Pacific affairs.

The June 1964 completion group, to which Mr. Ristaino belonged, participated in one of the interchange programs administered by the East-West Center in Honolulu.

The Center is a national institution created by Congress in cooperation with the University of Hawaii to promote mutual understanding among the peoples of Asia, the Pacific basin, and the United States.

The American students majored in fields related to the Asian-Pacific region, primarily on the graduate level. Studies were in social sciences, humanities, or in preparation for government and teaching posts in Asia. Students also specialized in one of nine Asian languages offered at the University of Hawaii.

Most of the students spent a semester or longer in language research studies at an institution in Asia.

"College Crush" Affects SSC

This year, Salisbury State College is experiencing the highest enrollment in its history with approximately 6549 students.

One of the reasons for the increase in the number of students may be attributed to what educators and journalists describe as the "College Crush."

The cause of the "College Crush" started in 1946 when Miss Stewart became vice-principal of the newly opened high school. In 1955 she served as the Superintendent's Committee for Curriculum and Supervision and as chairman of the literature committee for state curriculum revision in the teaching of English.

According to the U. S. Census Bureau, approximately 3, 728,000 youngsters are now college age. This figure is almost 1,000,000 more than last year.

A survey of state universities and colleges shows that applications for college are 32 percent ahead of last year.

Since the increase is so astonishing, statisticians and writers have investigated the "College Crush" and they have observed some amazing facts.

First, most students can find a college somewhere that will accept them if a student is willing to do a lot of searching.

Second, public college, such as Salisbury State, and public universities, such as University of Maryland, have to shoulder the burden of making room for the new students.

As an example of the growth of state institutions, Pennsylvania State University has received more than 5,000 applications than last year and University of Maryland has had to completely discontinue out-of-state women applications because of the lack of dormitory facilities.

On a nation-wide average, state universities and colleges will accept 16 percent more freshmen this year than they did for the 1963-64 school year.

This is the statistical picture. In 1953, total enrollment in colleges and professional schools was 2.4 million. In 1957, it was 3.1 million and 4.2 million in 1962. Last year, enrollment was 4.4 million.

This September enrollment in colleges is expected to be 4.8 million; in 1965, 5.2 million; in 1970, 7 million; and in 1975, 8.6 million.

As with the growth of Salisbury State College, enrollment is almost certain to rapidly continue.

BOOKSTORE (Cont. from Pg. 1)

from the Bookstore Manager, Mrs. Margaret S. Kelly, that they are scholarship student before their books are rung on the cash register. Scholarship students only sign appropriate sales sheet which will be available at the check-out counter.

All students are also reminded that they should have available for use of the bookstore personnel, registration form which gives course title, course number, and course instructor. This form will enable the sales people to provide quicker and more efficient service to students.

Freshmen should be aware that they are required to purchase Tusawards for classroom and field studies, and Succeed, Tura's Manual for Writers, The American College Dictionary, and Salisbury State College freshman cap.

SC (Cont. from Pg. 1)

a research assistant, Mr. Miller, his membership in Alpha Kappa Delta.

Joining the faculty as social director of the college will be Miss Audrey Stewart of Salisbury. Miss Stewart attended the Campus Elementary School of the College, Wicomico High School and Averil College in Danville, Va., before receiving her Bachelor of Arts degree at the University of Maryland.

She has done her graduate work both at the University and Salisbury State College. It was in 1950, while she was teaching English and psychology at Wicomico Senior High School, that she earned the distinction of being Maryland's "Teacher of the Year" as part of a program sponsored jointly by the United States Office of Education and the Council of Chief State Officers. For 10 years, Miss Stewart was the guidance counselor at Wicomico Senior High School in Salisbury before her appointment in 1954 as vice-principal of Wicomico Junior High School. In 1955 she served as the Superintendent's Committee for Curriculum and Supervision and as chairman of the literature committee for state curriculum revision in the teaching of English.

department of the Sunday School at Allen Memorial Baptist Church, secretary to the Board of Trustees for the Nursing Home Project, Inc., and a member of the Home Rule Advisory Committee.

EVIL (Cont. from Pg. 1)

Second, freshmen should very carefully examine the "Summary of Expenses" sheet in the College Information Booklet. This will save considerable time because students will have an estimate of their college debt and will not have to faint or cause a commotion when notified of the amount they owe by the college business manager.

Third, freshmen should fill in their checks except for the amount prior to entering the pay line. Checks should be made payable to Salisbury State College. If this is done, two hours and 5 minutes of the total time required to stand in line may be eliminated. As a matter of information, the amount of time saved was computed by multiplying 30 seconds (the time required to fill in the date, the pay-to line and the signature line of a check) times 255 (the approximate number of freshmen).

Fourth, every freshman should urge their fellow classmates to listen very carefully to the business manager's instructions and quickly, but efficiently, execute them. If this advice and that of suggestion three is followed, it will only take 30 seconds for a student to complete his transaction with the business manager.

The prompt and efficient application of the above suggestions will relieve you, as a freshman, of the quick and efficient use of epsom salts and hot water which is a major compound for relieving pain of sore metatarsals and phalanges (feet and toes).

ADVICE (Cont. from Pg. 1)

Remember this: The first 90 days are critical. If you're on top of your work by Christmas you'll probably survive. Don't let the glamour get you.

College is a bringing out process. It will not make a bad person good or a good person bad. If you are born intelligent, it will bring out your intelligence. If you are born a bum, it will bring out your bunniness.

There are no college drunks. There are only people who revealing themselves as soon as parental restraints were removed.

But college can be a shocking experience. Some youngsters are

brought up with a lot of beliefs that won't stand the light of academic inquiry. The first class in geology or sociology or political science can be pretty upsetting.

And out of this upset is born the college radical who seeks to compensate for his confusion in hot-eyed activism, or the college cynic who sneers because he is, for the moment, without convictions. Time usually cures both diseases.

Look at it this way: You climb a hill. The world looks different. What you see is merely an enlarged horizon, a broadened perspective. The points of the compass have not been repealed. There are still eternal truths and lasting values and good things worth fighting and dying for. The fact that all Greece can be seen at a glance from a jet plane hasn't rendered obsolete what earth-bound Plato taught in Athens' little Agora.

College is not the only way to get an education. The world abounds with effective self-taught men and women. College is merely the easiest way to get an education. It hands you carefully programmed and in logical sequence the fruits of man's discoveries.

College is a great privilege. Don't just accept it. Squeeze it!

CLUBS (Cont. from Pg. 1)

tory Association) and the MDA (Men's Dormitory Association). Each dorm student is automatically a member of the association in his or her respective dorm.

Membership in the WAA (Women's Athletic Association) and MAA (Men's Athletic Association) is automatic with enrollment in college. These groups formulate and administer much of the athletic program for the college, particularly intramural athletics. Meetings of each are held at pre-announced dates throughout the year and are open for participation by all members.

Separate, yet closely related to WAA and MAA, is the varsity sports program, which is administered by the athletic department. Men may compete interscholastically in varsity soccer, basketball, golf, tennis, track or gymnastics. Women may compete in field hockey, basketball, and volleyball.

The Student Christian Association offers scheduled programs to anyone desiring to attend. The Association works as the coordinating agent among all denominational clubs which include the Wesley Foundation, Canterbury Club, Newman Club and the Bap-

tist Student Union.

Students may join the College Chorus which meets twice weekly to prepare music for many programs throughout the year. A cordial invitation is extended to the musically inclined.

The dramatic group on campus is named the Sophanes Players. This organization usually presents three or four major productions each year. Freshmen who wish to express their dramatic ability are urged to join.

At present there are two campus publications, the Holly Leaf,

which is the campus newspaper, and the Evergreen, which is the college yearbook. Freshmen interested in staff membership on either publication may ask the respective editors about requirements for membership.

Mentioned above are those organizations in which freshmen may participate. There are others: the Camera Club; the Geography Club. Consult the Student Handbook and upperclassmen for further information on campus student organizations.

HIGHLIGHTS OF FRESHMEN ORIENTATION SCHEDULE

MONDAY, SEPTEMBER 14
9-12 a.m. Freshman Tests in Auditorium
2:30-4 p.m. Orientation Meeting (Freshmen only)
Men meet in Dining Hall
Women in Main Auditorium
4:30-7 p.m. Swimming Party and Picnic Supper
Canal Park
8-10 p.m. Freshman Symposium in Main Auditorium
TUESDAY, SEPTEMBER 15
9 a.m. Freshman Registration, Main Auditorium
6:30-7 p.m. Freshman Symposium, Main Auditorium
8-10 p.m. "Mixer," Old Gymnasium
WEDNESDAY, SEPTEMBER 16
9-10:30 a.m. Orientation Meeting, Campus Elem. School
10:30-11 a.m. President's Assembly, Campus Elem. School
1-5 p.m. Freshman Yearbook Photographs
Men wear dark ties and jackets;
Women wear white open-neck blouses
8-9 p.m. President's Reception for Freshmen
THURSDAY, SEPTEMBER 17
8 a.m.-6:15 p.m. Classes
FRIDAY, SEPTEMBER 18
5:30-11 p.m. All-College Picnic, Canal Park
SATURDAY, SEPTEMBER 19
7 p.m. Film, Campus School Auditorium
9-11 p.m. Games Party in Snack Bar
SUNDAY, SEPTEMBER 20
5-5:30 p.m. President's Program for Freshmen, Parents and Faculty
