IN MEMORIAM:
JANE S. MOUTON

Jane Srygley Mouton, internationally known developer of the *Managerial Grid* and president/co-founder of Scientific Methods, Inc., died December 7, 1987. The co-author of 33 books and over 150 articles devoted to the strengthening of human effectiveness, Jane worked with organizations throughout the United States and more than 40 countries. The organization development strategies which she pioneered have been applied in such diverse settings as airline cockpits, hospitals, public schools, and government organizations. Her best known work, *The Mangerial Grid*, co-authored with Robert R. Blake, has been translated into 11 languages.

Jane received her bachelor's degree from the University of Texas in 1950, her master's from Florida State University in 1951, and her Ph.D. from the University of Texas in 1957. She was a Diplomate, American Board of Professional Psychology. In December 1987, she was inducted into the HRD Hall of Fame by *Training Magazine* in recognition of her lifelong achievements and contributions to the human resources development field.
