Appendix A Supplementary Data

ForestGEO Site-specific acknowledgements

Ailaoshan: The 20-ha Ailaoshan forest dynamics plot is a collaborative effort by Xishuangbanna Tropical Botanical Garden's Forest Ecology Group and the Ailaoshan Station for Subtropical Forest Ecosystem Studies. Many thanks to the research team Fan Zexin, Yang Xiaodong, Zhang Jiaolin, Wen Handong, Lin Luxiang, Yang Jie, Hu Yuehua, Song Xiaoyang, Sun Zhenghua, Lu Zhiyun, Luo Kang, Chen Si, Yan Qiaoshun, plot Principal Investigator, Cao Min, and many other technicians, students, and staff.

Amacayacu: The 25-ha Long-Term Ecological Research Project of Amacayacu is a collaborative project of the Instituto Amazónico de Investigaciones Científicas Sinchi and the Universidad Nacional de Colombia Sede Medellín, in partnership with the Unidad de Manejo Especial de Parques Naturales Nacionales and the Forest Global Earth Observatory of the Smithsonian Tropical Research Institute (ForestGEO). We acknowledge the Director and staff of the Amacayacu National Park for supporting and maintaining the project in this National Park as well as coworkers from the Palmeras Indigenous Community for their assistance in fieldwork.

Badagongshan: Work at Badagongshan was supported by the National Natural Science Foundation of China (31270562) and the Chinese Forest Biodiversity Monitoring Network (29200931131101919).

Baishanzu: The 25-ha Baishanzu forest dynamics plot was established with the cooperation of East China Normal University, Sun Yat-sen University, Zhejiang University, Wenzhou University, Lishui University and The BSZ Nature Reserve Management Department. Thank you to the field team Shuping Yang, Yixin Zhen, Dinyun Chen, Junjie Zhong, Yan Chen, Shuwen Ye, Ziying Wang, Dinghan Huang, Chenyang Lou, and many other technicians, students, and staff, and to plot Principal Investigators Fangliang He and Minhua Zhang.

Baotianman: The 25-ha Baotianman forest dynamics plot was funded by the National Science and Technology Support Plan (2008BAC39B02), the State Key Laboratory of Vegetation and Environmental Change (LVEC2011zyts01), the Natural Science Foundation of China (31070554, 31270642, 31370586), and the Biodiversity Committee of the Chinese Academy of Sciences. Thanks to hundreds of college students, graduate students, local workers, and researchers for their hard work. Thanks to State Key Laboratory of Vegetation and Environmental Change, Institute of Botany, the Chinese Academy of Sciences, Chinese Forest Biodiversity Monitoring Network, Henan Agricultural University, Nanyang Normal University, China University of Mining & Technology (Beijing), Pingdingshan University, and Baotianman National Nature Reserve for their cooperation and kind support.

Barro Colorado Island: The BCI forest dynamics research project was made possible by National Science Foundation grants to Stephen P. Hubbell: DEB-0640386, DEB-0425651, DEB0346488, DEB-0129874, DEB-00753102, DEB-9909347, DEB-9615226, DEB-9615226, DEB9405933, DEB-9221033, DEB-9100058, DEB-8906869, DEB-8605042, DEB-8206992, DEB7922197, support from the Forest Global Earth Observatory (ForestGEO), the Smithsonian Tropical

Research Institute, the John D. and Catherine T. MacArthur Foundation, the Mellon Foundation, the Small World Institute Fund, numerous private individuals, and through the hard work of over 100 people from 10 countries over the past two decades.

Bidoup: The Bidoup Forest Dynamics Plot was funded by the project TN3/T09 within the Vietnam National Key Programme KHCN-TN3/11-15 (Tay Nguyen Programme No. 3), Smithsonian Tropical Research Institute and Vietnam Ministry of Science and Technology through the Scientific and Technological Cooperation with the US Program.

Bukit Timah: The Bukit Timah Dynamics Plot has been funded mainly by the National Institute of Education of Nanyang Technological University and the Smithsonian Tropical Research Institute.

Changbaishan: Zhanqing Hao and Xugao Wang were supported by The National Key Research and Development Program of China (2016YFC0500302), National Natural Science Foundation of China (31570432 and 31370444), Key Research Program of Frontier Sciences, CAS (QYZDB-SSW-DQC002).

Cocoli: The 4-ha Cocoli forest dynamics plot is supported by the Smithsonian Tropical Research Institute. Thank you to the plot Principal Investigators Richard Condit, Rolando Pérez, and Salomón Aguilar, and many field workers, students, technicians, and STRI staff.

Danum Valley: The Danum plot is a core project of the Southeast Asia Rain Forest Research Partnership (SEARRP). We thank SEARRP partners, especially Yayasan Sabah, for their support, and HSBC Malaysia and the University of Zurich for funding. We are grateful to the research assistants who are conducting the census, in particular, the team leader Alex Karolus, and to Mike Bernados and Bill McDonald for species identifications. We thank Stuart Davies and Shameema Esufali for advice and training.

**Daxing`angling**: The 25-ha Daxing`angling forest dynamics plot is supported by the Chinese Forest Biodiversity Monitoring Network and the Institute of Botany at the Chinese Academy of Sciences. Thank you to the research team Zhu Daoguang, Cui Fuxing, Chai Chunrong, and Li Jinbo, and plot Principal Investigator Ni Hongwei at the Institute of Natural Resources, Heilongjiang Academy of Sciences, as well as many other technicians, students, and staff.

Dinghushan: The 20-ha Dinghushan forest dynamics plot is supported by the Chinese Forest Biodiversity Monitoring Network, the Chinese Academy of Sciences Institute of Botany, the Arnold Arboretum of Harvard University, and the Chinese Academy of Sciences South China Botanical Garden. We thank plot Principal Investigator Wanhui Ye, Professor of South China Botanical Garden, and the research team Huang Zhongliang, Cao Honglin, Lian Juyu, Bin Yue, and Wang Zhengfeng, and many other technicians, students, and support staff.

Doi Inthanon: The 15-ha Doi Inthanon Forest Dynamics Plot is supported by Osaka City and Utsunomiya Universities (Japan), Kasetsart University (Thailand), and the Royal Thai Forest Department. Thank you to plot Principal Investigators Mamoru Kanzaki and Kriangsak Sri Ngernyuang, as well as many field crew members, research technicians, students, and staff.

Donglingshan: The 20-ha Donglingshan Forest Dynamics Plot is supported by the Chinese Academy of Sciences Institute of Botany. Many thanks to plot Principal Investigators Weiguo Sang and Li Zhu, as well as many field workers, research technicians, students, and staff.

Fushan: Fushan: The Fushan Forest Dynamics plot (FDP) is supported by the Taiwan Forestry Bureau, the Taiwan Forestry Research Institute and the Ministry of Science and Technology of Taiwan. We would like to express our gratitude to all field technicians and students who helped with the implementation and recensus of the Fushan FDP. We also thank the Fushan Research Center staff for providing logistic support.

Gutianshan: We thank Dr Jianhua Chen for their contributions to the establishment and census of the 24-ha permanent forest plot. We gratefully acknowledge support from the Administration Bureau of Qianjiangyuan National Park.

Hainan: This research was supported by the Central Public-Interest Scientific Institution Basal Research Fund (CAFYBB2017ZE001), National Nonprofit Institute Research Grant of CAF (CAFYBB2011004, RITFYWZX200902, RITFYWZX201204), National Natural Science Foundation of China (31290223, 41201192), State Forestry Administration of China (201104057). It was also supported by the Jianfengling National Key Field Research Station for Tropical Forest Ecosystem.

Haliburton: The principal investigators graciously acknowledge the generosity of Haliburton Forest and Wildlife Reserve Ltd., in allowing the Principal Investigators to establish and maintain the Haliburton Forest Dynamics Plot (HFDP). The HFDP has been made possible through work of more than 30 census team members, with notable contributions from census team leaders and data managers Michael Drescher, Rajit Patankar, Jon Schurmann, and Leeladarshini Sujeeun. The HFDP is financially supported through Natural Sciences and Engineering Research Council of Canada (NSERC) Discovery Grants to both S.C. Thomas and A.R. Martin, and by a University of Toronto Connaught New Researcher Award to A.R. Martin.

Harvard Forest: Funding for the Harvard ForestGEO Forest Dynamics Plot was provided by the Smithsonian Institution's Forest Global Earth Observatory (ForestGEO), the National Science Foundation's LTER program (DEB 06-20443 and DEB 12-37491), and Harvard University. Thanks to many field technicians who helped census the plot. Jason Aylward was instrumental as a field supervisor and with data screening and database management. Thanks to John Wisnewski and the woods crew at HF for providing materials, supplies, and invaluable field assistance with plot logistics. Joel Botti and Frank Schiappa provided survey expertise to establish the 35-ha plot. Special thanks to Stuart Davies and Rick Condit for field training, database assistance, and plot advice. Sean McMahon and Suzanne Lao were extremely helpful with field planning, data questions, and many plot logistics. Thanks to Jeannette Bowlen for administrative assistance and to Emery Boose and Paul Siqueira for help with plot coordinates. Thanks also to David Foster for his support and assistance with plot design, location, and integration with other long-term studies at HF.

Heishiding: The Heishiding forest plot was partly financially supported by the National Natural Science Foundation of China (31925027, 31622014 and 31570426 to Chengjin Chu).

Hong Kong: We thank HSBC for funding the plot and the Policy for Sustainability Lab, Faculty of Social Sciences, HKU for coordinating the project.

Huai Kha Khaeng: We thank the many people who helped to create the permanent research plot in Huai Kha Khaeng. The administrative staff of Huai Kha Khaeng Wildlife Sanctuary helped with logistical problems of the plots on many occasions. The Huai Kha Khaeng 50-hectare plot project has been financially and administratively supported by many institutions and agencies. Direct financial support for the plot has been provided by the Royal Thai Forest Department and the National Parks Wildlife and Plant Conservation Department, the Arnold Arboretum of Harvard University (under NSF award #DEB-0075334, and grants from USAID and the Rockefeller Foundation), the Smithsonian Tropical Research Institute, and the National Institute for Environmental Studies, Japan. We acknowledge the Royal Thai Forest Department for supporting and maintaining the project in Huai Kha Khaeng Wildlife Sanctuary, Thailand.

Ilha do Cardoso: The 10-ha Ilha do Cardoso Forest Dynamics Plot was established with support from the project Parcelas Permanente São Paulo (PPSP, BIOTA-FAPESP) and the Universidade de São Paulo. Thank you to the plot Principal Investigator Alexandre Adalardo de Oliveira and many field workers, research and data technicians, and staff.

Indian Cave: The Nebraska Game and Parks has been an important partner in the establishment of the Indian Cave plot. Funding was provided by the University of Nebraska-Lincoln and Jacqueline Mars.

Ituri (Edoro and Lenda): The Ituri 40-ha plot program is a collaborative project between the Centre de Formation et de Recherche en Conservation Forestière and the Wildlife Conservation Society–DRC, in partnership with the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute. The Ituri plots are financially supported by the Wildlife Conservation Society, the Frank Levinson Family Foundation, and the Smithsonian Forest Global Earth Observatory. The Institut Congolais pour la Conservation de la Nature graciously provided the research permit.

Kenting: The 2008 tree census was funded by a grant to SHW from the Council of Agriculture grant, Taiwan.

Khao Chong: We thank the many people who helped to create the permanent research plot in Khao Chong. The administrative staff of Khao Chong Botanical Garden helped with logistical problems of the plots on many occasions. Direct financial support for the plot has been provided by the people of Thailand through the Royal Forest Department (1991-2003) and the National Parks Wildlife and Plant Conservation Department since 2003, the Arnold Arboretum of Harvard University, the Smithsonian Tropical Research Institute, and the National Institute for Environmental Studies, Japan, as well as grants from the US National Science Foundation (grant #DEB-0075334 to P.S. Ashton and S.J. Davies), US-AID (with the administrative assistance of WWF-USA), and the Rockefeller Foundation. Administrative support has been provided by the

Arnold Arboretum, the Harvard Institute for International Development, the Royal Forest Department, and the National Parks Wildlife and Plant Conservation Department. In addition, general support for the ForestGEO program has come from the Arnold Arboretum of Harvard University, the Smithsonian Tropical Research Institute, the John D. and Catherine T. MacArthur Foundation, Conservation, Food and Health, Inc., and the Merck Foundation. All of these organizations are gratefully acknowledged for their support.

Korup: The 50-ha Korup Forest Dynamics Plot is affiliated with the Smithsonian's Forest Global Earth Observatory (ForestGEO). The 3 principal investigators gratefully acknowledge funding and other support received from ForestGEO for our first and second censuses. Funding from the Botanical Research Foundation of Idaho is also gratefully acknowledged. Permission to conduct the field program in Cameroon is provided by the Ministry of Environment and Forests and the Ministry of Scientific Research and Innovation. We also acknowledge the dedicated support of our field team, especially field leadership by Sainge Nsanyi Moses and botanical work by Ekole Mambo Peter.

Kuala Belalong: Funding for the 25 ha Kuala Belalong Forest Dynamics Research Plot was provided by HSBC-Brunei Darussalam, Smithsonian's ForestGEO, and Universiti Brunei Darussalam. We also acknowledge support from Heart of Borneo (HOB)-Brunei Darussalam, Brunei Forestry Department, and the Kuala Belalong Field Studies Centre

La Planada: The 25-ha is a collaborative project between the Instituto de Investigación de Recursos Biológicos Alexander von Humboldt and the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute. We especially thank Martha Isabel Vallejo and Cristian Samper, who made this project possible. For more information on La Planada, visit: http://i2d.humboldt.org.co/ceiba/resource.do?r=planada_parcelapermanente_censo1

Lambir: The 52-ha Long-Term Ecological Research Project is a collaborative project of the Forest Department of Sarawak, Malaysia, the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute, the Arnold Arboretum of Harvard University, USA (under NSF awards DEB-9107247 and DEB-9629601), and Osaka City, Ehime & Kyoto Universities, Japan (under Monbusho/JSPS Kakenhi grants 06041094, 08NP0901, 09NP0901, 26304027, and 17H04602). We acknowledge the Sarawak Forest Department for supporting and maintaining the project in Lambir Hills National Park.

Laupahoehoe and **Palamanui**: The Hawai‘i Permanent Plot Network thanks the USFS Institute of Pacific Islands Forestry (IPIF) and the Hawai‘i Division of Forestry and Wildlife/Department of Land and Natural Resources for permission to conduct research within the Hawai‘i Experimental Tropical Forest; the Palāmanui Group, especially Roger Harris, for access to the lowland dry forest site. We thank the Smithsonian Tropical Research Institute's Forest Global Earth Observatory (ForestGEO), the University of California, Los Angeles, the Pacific Southwest Research Station of the USFS, the University of Hawai‘i, and NSF EPSCoR Grants No. 0554657 and No. 0903833 for support.

Lienhuachih: The Taiwan Forestry Research Institute, Taiwan Forestry Bureau, Taiwan Academy of Ecology, Tunghai University (Taiwan), and the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute.

Lilly Dickey Woods: Funding for the Lilly Dickey Woods Forest Dynamics Plot was provided by the Indiana Academy of Sciences, Indiana University Research and Teaching Preserve, and the Smithsonian Institution's Forest Global Earth Observatory (ForestGEO).

Luquillo: This research was supported by grants BSR-8811902, DEB 9411973, DEB 0080538, DEB 0218039, DEB 0620910, DEB 0963447, DEB-129764, DEB-1546686 AND DEB-1831952 from NSF to the Department of Environmental Science, University of Puerto Rico, and to the International Institute of Tropical Forestry, USDA Forest Service, as part of the Luquillo Long-Term Ecological Research Program. The U.S. Forest Service (Dept. of Agriculture) and the University of Puerto Rico gave additional support. The LFDP has also been supported by the Andrew Mellon foundation and the Smithsonian Institution Forest Global Earth Observatory.

Manaus: The Manaus plot is part of the Biological Dynamics of Forest Fragments Project (BDFFP) of the National Institute for Amazonian Research (INPA). We thank ForestGEO for all the funding and support over the years and for the understanding of the complications of implementing a large scale plot in a hyperdiverse forest. We thank BDFFP for all the logistical support for conducting field work, and for supporting key team members. We thank João Batista da Silva, our field team leader, and the many students that have participated in data gathering and in the challenging endless process of plant identification. Funding for work at the Manaus site has also been provided by FAPEAM (Fundação de Ampara à Pesquisa do Estado do Amazonas, Brazil) and by CNPq (Conselho Nacional de Desenvolvimento Científico e Tecnológico, Brazil). This is publication 803 in the Biological Dynamics of Forest Fragments Project technical series.

Michigan Big Woods: We would like to thank the University of Michigan and Middlebury College students who have helped with all of the censuses of the Big Woods Plot. These censuses were supported by the Edwin S. George Reserve Fund, a USDA McIntyre-Stennis Grant, and the Middlebury College Millennium Fund.

Mo Singto: The 30.5-ha Mo Singto Forest Dynamics Plot is supported by Mahidol University, National Center for Genetic Engineering and Biotechnology, National Science and Technology Development Agency, and Thai Ministry of Natural Resources and Environment. Many thanks to plot Principal Investigators Anuttara Nathalang and Warren Y. Brockelman, and to countless field workers, research and data technicians, and staff.

Mpala: The 120-ha Mpala plot is a collaborative project of the National Museums of Kenya, the Kenya Wildlife Service, and the Mpala Wildlife Foundation, in partnership with the Forest Global Earth Observatory of the Smithsonian Tropical Research Institute. Funding for the first census was provided by the Forest Global Earth Observatory.

Mudumalai: Funding was received from the Ministry of Environment, Forest and Climate Change, Government of India and the Department of Biotechnology, Government of India.

Nanjenshan: The Nanjenshan plot has been supported by the Taiwan Forestry Bureau, Kenting National Park, the National Science Council of Taiwan, and the Forest Global Earth Observatory (ForestGEO) of the Smithsonian tropical Research Institute.

Ngardok: The Ngardok 4-ha plot is the first forest dynamics monitoring plot in Palau, establishing the Palau-Pacific Island Permanent Plot Network (PIPPNET). PIPPNET is a collaboration of the USDA Forest Service, Institute of Pacific Islands Forestry, Palau Forestry under the Ministry of Natural Resources, Environment and Tourism, and the Ngardok Nature Reserve of Melekeok State. Many thanks to the plot Principal Investigators Susan Cordell, Christian Giardina, and Amanda Uowolo, as well as countless field workers, data and research technicians, and staff.

Ngel Nyaki: The 20.28-ha Ngel Nyaki forest dynamics plot was initiated by the Nigerian Montane Forest Project (NMFP) under the directorship of Associate Professor Hazel Chapman from the University of Canterbury in New Zealand. The establishment of the plot was made possible by a significant donation received from Retired General T.Y. Danjuma, whose home is Taraba State. Support for the plot has been received from the Taraba State Forest Service, New Zealand Chester Zoo, The A.G. Leventis Foundation, and Nexen Nigeria. Many thanks to plot Principal Investigators David Kenfack, Hazel Chapman, and Iveren Abiem, as well as countless field workers, data and research technicians, and support staff.

Niobrara: The Niobrara Valley Preserve of the Nature Conservancy has been an important partner in the establishment of the Niobrara plot. Funding was provided by the University of Nebraska-Lincoln and Jacqueline Mars.

Nonggang: We appreciate the researchers from the Guangxi Institute of Botany, Chinese Academy of Sciences for their contributions to the establishment and census of the 15-ha Nonggang karst forest plot. They are Wusheng Xiang, Bin Wang, Tao Ding, Shuhua Lu, Fuzhao Huang, Wenheng Han, Lanjun He, Qingbai Lu, Dongxing Li, respectively. We also thank many volunteers in the field work from the College of Life Science, Guangxi Normal University. We acknowledge the support from the Administration Bureau of the Nonggang National Nature Reserve.

Ordway Swisher: The Ordway Swisher 23.04-ha Forest Dynamics Plot is supported by the University of Florida Institute of Food and Agricultural Sciences and the USDA National Institute of Food and Agriculture McIntire Stennis projects #1007080 and #1018790. We thank the Ordway Swisher Biological Station for logistical support and students and volunteers for data collection.

Palanan: Funding since 2010 has been provided by the Biodiversity Research Laboratory, Institute of Biology, University of the Philippines Diliman (BRL UP Biology), University of the Philippines Office of the Vice President for Academic Affairs under the Emerging Interdisciplinary Developing Research Program (EIDR), the University of the Philippines Diliman Office of the Vice Chancellor for Research and Development (UPD OVCRD), the Commission on Higher Education (CHED), the Department of Science and Technology Philippine Council for Agriculture, Aquatic Resources Research and Development (DOSTPCAARRD), the Energy Development Corporation (EDC), the Forest Foundation Philippines, the Diliman Science Research Foundation, and the Smithsonian Tropical Research Institute (STRI). Permits to work in the Northern Sierra Madre Natural Park were issued by its Protected Area Management Board

(PAMB) through the cooperation of Biodiversity Management Bureau's Department of Environment and National Resource (BMB-DENR), Local Government of Palanan, Isabela. The plot was established by the Isabela State University (Philippines), Conservation International, PLAN, and the Arnold Arboretum of Harvard University (USA).

Pasoh: The 50-ha forest plot at Pasoh FR is an ongoing project of the Malaysian Government, directed by the Forest Research Institute Malaysia through its Director-General, Dr Khali Aziz bin Hamzah. The project was initiated under the leadership of Drs. N. Manokaran, P. S. Ashton and S. P. Hubbell. The project is now a collaboration of the Forest Research Institute Malaysia and ForestGEO of the Smithsonian Tropical Research Institute. The late Dr. K. M. Kochummen, while on a fellowship at STRI, supervised the species identification and personally examined all trees over 10 cm DBH. Funds for the project are gratefully acknowledged from: the National Science Foundation, USA (BSR Grant No. INT-84-12201 to Harvard University through Drs. P. S. Ashton and S. Hubbell), Conservation, Food and Health Foundation, Inc., USA, the United Nations, through the Man and the Biosphere program (UNESCO-MAB grant Nos. 217.651.5, 217.652.5, 243.027.6, 213.164.4, and also UNESCO-ROSTSEA grant No. 243.170.6), the Center for Tropical Forest Science-Arnold Arboretum Asia
Program at Harvard University, USA, and the National Institute for Environmental Studies, Japan.

Rabi: The Rabi 25-ha plot is a collaborative project of the National Center for Scientific and Technical Research (CENAREST) in Gabon, the Center for Conservation and Sustainability (CCS) of the Smithsonian Conservation Biology Institute (SCBI) and the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute. Funding for the first census was provided by Shell Gabon (and now Assala Gabon), ForestGEO, and SCBI. Permission to conduct the field program in Gabon is provided by CENAREST. The plot is located in a conservation area of between a forest concession of the Compagnie des Bois du Gabon (CBG) and Assala oil company.

San Lorenzo: The 5.96-ha San Lorenzo forest dynamics plot is supported by the Smithsonian Tropical Research Institute. Thank you to the plot Principal Investigators Richard Condit, Rolando Pérez, and Salomón Aguilar, and many field workers, technicians, and STRI staff.

Santa Cruz: The UCSC Forest Ecology Research Plot was made possible by National Science Foundation grants to Gregory S. Gilbert (DEB-0515520, DEB-084259, and DEB-1655896), by the Pepper-Giberson Chair Fund, the University of California, and the hard work of hundreds of UCSC students.

Scotty Creek: The Scotty Creek plot establishment was supported by funds to JLB from the Canada Foundation for Innovation, Ontario Ministry of Research and Innovation, and Canadian Foundation for Climate and Atmospheric Sciences. We are grateful to Rajit Patankar and Cory Wallace for their leadership in plot establishment and the hard work of many field assistants.

Sinharaja: The authors gratefully acknowledge the permission given to work in Sinharaja World Heritage Site by the Forest Department of Sri Lanka, as well as the generous financial assistance given to set up the plot and for censuses by the Forest Global Earth Observatory (ForestGEO) of

the Smithsonian Tropical Research Institute. We gratefully acknowledge logistical support from Uva Wellassa University, University of Peradeniya and Yale University.

Smithsonian Conservation Biology Institute: Funding for the Smithsonian Conservation Biology Institute (SCBI) large forest dynamics plot was provided by the Smithsonian Institution (Forest Global Earth Observatory and the National Zoological Park), and the HSBC Climate Partnership. We especially thank the numerous technicians, interns, and volunteers of the Conservation Ecology Center at the SCBI who were essential in assisting with plot establishment and data collection. Support for the original exclosure fence installation was provided by the Friends of the National Zoo and Earthwatch Foundation.

Smithsonian Environmental Research Center: Smithsonian Environmental Research Center, Earthwatch Institute.

Speulderbos: The 27-ha Speulderbos forest dynamics plot is supported by Wageningen University. Many thanks to plot Principal Investigators Jan den Ouden and Patrick Jansen, as well as countless field workers, data and research technicians, and support staff.

Tiantongshan: The 20-ha Tiantongshan Forest Dynamics Plot is supported by East China Normal University. Thank you to Principal Investigator Wang Xihua, professor at East China Normal University, and to the research team Chen Xiaoyong, Yan Enrong, Yang Haibo, Shen Guochun, Yang Qiongsong, Zheng Zemei, Yao Fangfang, and many others.

Traunstein: The establishment of the plot (2005) has been supported by the Helmoltz Alliance "EDA "Remote Sensing and Earth System Dynamics" funded by the Helmholtz Assiociation of German Research Centres. The Traunstein forest megaplot was realized in a cooperation between Technical University Munic (Freising), Helmholtz Centre for Environmental Research - UFZ (Leipizg) and German Aeorospace Centre (DLR, Oberpaffenhofen).

Tyson Research Center: The Tyson Research Center Forest Dynamics Plot (TRCP) is supported by Washington University in St. Louis' Tyson Research Center. Funding was provided by the International Center for Advanced Renewable Energy and Sustainability (I-CARES) at Washington University in St. Louis, the National Science Foundation (DEB 1557094), and the Tyson Research Center. We thank the Tyson Research Center staff for providing logistical support, and the more than 100 high school students, undergraduate students, and researchers that have contributed to the project.

University of Maryland, Baltimore County: The two UMBC 6.25-ha forest dynamics plots are supported by University of Maryland, Baltimore County. Thank you to plot Principal Investigators Mathew Baker and Erle C. Ellis, as well as many field workers, research and data technicians, and support staff.

Utah Forest Dynamics Plot: The Utah Forest Dynamics Plot is a collaborative project of Utah State University and the Utah Agricultural Experiment Station. We thank Cedar Breaks National Monument for providing logistical support, and the students, volunteers and staff individually listed at http://ufdp.org for data collection.

Wabikon: The Wabikon Lake Forest Dynamics Plot, located in the Chequamegon-Nicolet National Forest of northern Wisconsin, is part of the Smithsonian Institution's ForestGEO network. Tree censuses at the site have been supported by the 1923 Fund, the Smithsonian Tropical Research Institute, and the Cofrin Center for Biodiversity at the University of Wisconsin-Green Bay. More than 50 scientists and student assistants contributed to the first two plot censuses. We are particularly grateful for the leadership of Gary Fewless, Steve Dhein, Kathryn Corio, Juniper Sundance, Cindy Burtley, Curt Rollman, Mike Stiefvater, Kim McKeefry, and U.S. Forest Service collaborators Linda Parker and Steve Janke.

Wanang: The 50-ha Wanang Forest Dynamics Plot is a collaborative project of the New Guinea Binatang Research Center, the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute, the Forest Research Institute of Papua New Guinea, the Czech Academy of Sciences, and the University of Minnesota. It has received financial support from the US National Science Foundation (DEB-0816749), the Czech Science Foundation (20-17282S), the Swire & Sons Ltd., Darwin Initiative for the Survival of Species (DIR25S1\100123), and the Christensen Foundation. We acknowledge the government of Papua New Guinea and the customary landowners of Wanang for supporting and maintaining the plot.

Wind River: The Wind River Forest Dynamics Plot is a collaborative project of Utah State University and the Utah Agricultural Experiment Station. Funding has been provided by the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute, Utah State University, the National Science Foundation (1542681), and the Utah Agricultural Experiment Station. We acknowledge the Gifford Pinchot National Forest and the Wind River Field Station for providing logistical support, and the students, volunteers and staff individually listed at http://wfdp.org for data collection. The Wind River Forest Dynamics Plot was made possible by a grant from Jennifer Walston Johnson to the Smithsonian ForestGEO.

Wytham Woods: The 18-ha Long-Term Forest Monitoring Plot is a collaborative project between the University of Oxford, the Centre for Ecology and Hydrology, and the Smithsonian Institution (ForestGEO) through the HSBC Climate Partnership.

Xishuangbanna: This research was supported by the National Science Foundation of China (31570380, 31300358), the Natural Science Foundation of Yunnan Province (2015FB185), the Southeast Asia Biodiversity Research Institute, Chinese Academy of Sciences (2016CASSEABRIQG002).

Yasuní: We gratefully acknowledge the professional help of numerous biologists and field collaborators of the Yasuní forest dynamics plot, particularly Álvaro Pérez, Pablo Alvia and Milton Zambrano, who provided invaluable expertise on plant taxonomy. Consuelo Hernández organized the data and improved its quality. Pontificia Universidad Católica del Ecuador (PUCE) and STRI co-financed the first two censuses of the plot. The third census was financed with funds of the Government of Ecuador and PUCE. Seed traps and seedling plots are monitored for over 10 years thanks to STRI and two awards from the NSF program LTREB (DBI 0614525 and 1122634). STRI also sponsored the Carbon Dynamics Initiative. This study was endorsed by the Ministerio

de Ambiente del Ecuador permits MAE: No 004-2012-IC-FLO-MAE-DPO, 09-FLOMA-DPO-PNY and 06-2011-FAU-DPAP.

Yosemite: The Yosemite Forest Dynamics Plot is a collaborative project of Utah State University, the University of Montana, and Washington State University. Funding was provided by the Forest Global Earth Observatory (ForestGEO) of the Smithsonian Tropical Research Institute, Utah State University, the National Park Service and the Joint Fire Science Program (16-1-04-2). We thank Yosemite National Park for providing logistical support, and the students, volunteers, and staff individually listed at http://yfdp.org for data collection. The Yosemite Forest Dynamics Plot was made possible by a grant from Jennifer Walston Johnson to the Smithsonian ForestGEO.

Žofin: We acknowledge the Department of Forest Ecology of the Silva Tarouca Research Institute and all the Blue Cat Research Team for maintaining the long-term monitoring of the Žofín Forest Dynamics Plot. Funding was provided by Czech Science Foundation (20-17282S) and the Czech Ministry of Education, Youth and Sports (LTAUSA 18200). The Žofín Forest Dynamics Plot was made possible by the support of the Smithsonian Institution (ForestGEO).
