

The MARYLAND GAZETTE. 107

[XXIst Year.]

THURSDAY, August 7, 1766.

[N^o. 1091.]

FROM THE LONDON CHRONICLE, of April 19, 1766.

A Copy of a Letter to the Right Rev. Thomas Lord Bishop of Kildare, from Thomas Butler, Esq; of Warminster, in Wilts, concerning a Remedy for the Stone and Gravel.

THE Benefit I received from the Daucus, or Wild Carrot, has been so great, that I thought it my Duty to Mankind to advertise its Virtues, and the Relief I received from it, in the Salisbury Journal, about three Years ago, which was crowned with such high Satisfaction, that I received Intelligence, that it had done great Cures on several People, who took it purely on the Recommendation of my Advertisement.

"I had laboured under that painful Disorder the Stone in the Kidney at least forty-six Years, when, about four Years since, or something more, it became so painful, that I was under an absolute Necessity of quitting my annual Journeys into Hants, and seek for Ease by any Means I could find it; but all in vain; it grew upon me so, that I could not sit at Table to eat my Meat, but in the greatest Pain; and finding, by Experience, I could have no more Ease in recumbent Posture, I was obliged to lie down wherever I came, either at home or abroad, and in that Posture I conversed with my Friends, and in that Position eat my Dinner daily, and, in short, I was still followed by such continual Pain, that I expected I had but a short Time to live.

"I had applied to Physicians, Apothecaries, Quacks, and Old Women, and conformable to Directions, I made use of Mr. Stephens's Medicine, and, nauseous as it was, I took about Four-score Draughts of it, together with a full Dose of the ill tasted Powder, that is a Part of the Recipe; but all in vain: I could find no Relief. In this miserable Condition I recollected I had an Herbal, in which were prescribed Remedies for many Disorders: I provisionally looked into it, and found the Wild Carrot strongly recommended by Mr. Boyle. I immediately (it being the 1st or 2d of August) sent a Person into the Fields to get me the Wild Carrot, which was accordingly done; I made it into a Tea, sweetening it with Lisbon Sugar, and drank about two ordinary Tea-pots full in a Day, each Pot containing a full Half-pint, the one for Breakfast, the other for Supper, eating with it as with other Tea, and in three Days Time the Pain began to grow weak and die away, and in 5 Days it quite left me, my Spirits revived, and I was restored (I bless GOD) to perfect Ease.

"I continued drinking this Tea till the 17th of December following, and then idly neglected it; the Disorder returned; I had a short Fit, which held me six Hours: I had again Recourse to my Wild Carrot, and in a few Days got the better of it; since which I have enjoyed great Ease: I cannot say that I never felt Pain in the Kidneys, but this I can aver for Truth, that it is never enough to make me cry Oh! and that I think I never enjoyed better Health than I have done for these four last Years. This is the Time of the Year (August) when I got it. I will only say (though I know not how to have done with this Subject, where almost a Miracle has been wrought in my Favour) that it is to be gathered in August, and dried well in some Room in the Shade, and then put aside in a close Bin for Use: You are only to use the Heads or Seeds of it. I take six or seven Heads, and put them into the Tea-pot, and then put boiling Water upon them, and, after it has stood as other common Tea, drink it, generally dividing it into two Draughts. I forbear all Sorts of Salt-Meats (at least ought to do so) and Strong-Beer I rigidly refrain from; I drink about two or three Glasses of Wine after Dinner, and as much good Table-Beer as I have an Inclination to; I never drink any Thing in a Morning before or after Tea; I drink nothing after Tea in an Evening. It is something forcing, but not violently, so it does not hurt in any kind. You will say, perhaps, I am prejudiced in its Favour, but of this I am confident, I have enjoyed more Ease these last 4 Years than I ever did from the Age of Fourteen, and I find myself in better Health to that Time.

I have not made any Bloody, or Coffee-ground Water, no not once since I took the Carrot-Tea, notwithstanding I made such, at Times, for more than twenty Years before. I am, &c.

THOMAS BUTLER."

A Letter from the Reverend the Dean of Kildare.

"S I R,
"On reading Mr. Butler's Letter, I, who had been much afflicted with the Stone, betook myself to the drinking the Wild Carrot Tea; this was in the Month of October last, and since I have drank it, I have not felt any severe Pain; I have sometimes, indeed, uneasy Feelings, but they are the Feelings rather of Weight than of Pain, and generally terminate in my parting with a great Deal of loose Gravel, much more than I was formerly used to part with. Whether this Medicine tends to the Dissolution of a Stone, already concreted, or serves only to prevent a further Concretion, I cannot say; but it is no small Happiness, that whatever its Manner of Operation may be, I have, ever since I drank it, been free from any violent Pain: How long I shall continue so, GOD only knows. I am, &c.

Bath, Dec. 24. PHILIP FLETCHER."

N A P L E S, April 15.

MOUNT Vesuvius broke out on Thursday last, with great Violence, on the opposite Side of its first Eruption; and a new Lava took its Course towards the Torre del Anunciata, between Portici and Pompeia. This Lava is really tremendous, the River of Fire being now at least four Miles in Length, and in some Places near two Miles in Breadth. It has already destroyed three Vineyards, and is continuing its Course slowly, over cultivated Lands, towards the Village of the Anunciata. The Lava, at its Source, and for the first Mile, is as rapid as the River Severn at the Passage near Bristol; but, by extending itself, cools and loses its Velocity, so as not to advance more than thirty Feet in an Hour.

April 22. The Eruption of Vesuvius is more violent than ever. Several Englishmen are come hither Post from Rome, to see the dreadful Spectacle, and to make their Observations thereon.

Warsaw, April 19. Two Circumstances continue to astonish the Public: The one is, that Count Branicki, grand General of the Crown, delays to come and pay Faith and Homage to the King in Person; the other is, that his Majesty hath not yet chosen a Princess to share in his Throne.

Paris, May 2. The Hereditary Prince of Brunswick-Wolfenbuttel is still at Versailles, where the Princes of the Blood and Noblemen of the Court are attentive to procure him every kind of Pleasure. When he was presented to the King, his Majesty received him with more Marks of Distinction than he ever gave to any other foreign Prince.

L O N D O N, May 20.

Letters from Paris inform us, that the Count de Lally was removed in the Night between the 4th and 5th of this Month from the Bastille to the Prison of Conciergerie (communicating with the Palace) where he refused to go to Bed, and about Seven in the Morning was conducted to the Grand Chamber, which was surrounded on all Sides by the Guards of the Parliament. As soon as he appeared before his Judges, they ordered him to deliver up his red Ribbon, &c. which he took off, seemingly in great Discomposure and Confusion; and being afterwards placed on the Stool to be interrogated, he clasped his Hands, and raised his Eyes towards Heaven, saying, *In this the Reward of Forty Years Service!* He underwent an Interrogation of near twelve Hours, during which he was successively confronted by the Marquis de Buffy, and the Count d'Ache; and at Nine the same E-

vening was remanded to the Bastille, under the Escort of several Companies of the Guet, and the Guards of the Parliament.

The same Arret which condemned the Count de Lally, cleared the Count d'Ache, and suppressed the Memorials of the former as false and defamatory.

A Letter from Calais, dated May 14, says, "Monf. Lally, who commanded at Pondicherry in the late War, was beheaded last Friday at Paris. The Parliament had ordered the Execution between Eight and Nine at Night; but having some Reason to think he would destroy himself, the Execution was performed at Five; he was drawn in a Cart to the Place of Execution, where a Gag was put into his Mouth, to prevent his choking himself with his Tongue, which he attempted. His Friends had obtained Leave to bury him according to his Rank; but the Parliament were so incensed, that he was obscurely buried in a little Church in Paris. He was in the 66th Year of his Age."

Letters from Batavia, received in Holland, advise, that the 16th of October last was appointed by that Government, to be kept as a Day of Fasting and Humiliation, to avert the Judgment of the Almighty from that and other Dutch Colonies in the East-Indies, where they were apprehensive of being soon visited by the Plague; a great Number of Persons dying there very fast, supposed to be owing to the sulphurous Stench, and thick black Clouds, which have appeared ever since the Eruption of the Vulcano at Neira.

They write from Madrid, that the Embarkation of the Spanish Troops for Mexico has been set aside, at least for the present, on Account of the Disturbances which have broke out in different Parts of the Kingdom.

A few Days ago, as the Convicts were Passing along to the Water Side, in Order to be Shipped to America, with FIFES Playing before them, *Thro' the Wood Laddie, &c.* a Gentleman looking on, observed to another, that they were very JOYOUS: To which a Droll Fellow, one of the Convicts, replied, *Joyous! Aye, so we are Master, and if you will but go along with us, you will be QUITE TRANSPORTED.*

On the 7th Instant, the House of Commons of Ireland waited upon his Excellency the Lord Lieutenant with the following ADDRESS to his Majesty:

Most Gracious Sovereign,

"We your Majesty's most dutiful and loyal Subjects, the Commons of Ireland, in Parliament assembled, beg Leave to approach your Throne, and with all Humility to testify our ardent and inviolable Attachment to your sacred Person and Government; and to implore that your Majesty will suffer us to present to you the universal Prayers of your loyal People of Ireland, in Assistance of the Representations and Endeavours of the chief Governor of this Kingdom, towards inducing your Majesty, in your Royal Beneficence, to return to your faithful Subjects, the Bill transmitted to Great-Britain, for limiting the Duration of Parliament, this Session."

To which his Excellency was pleased to return the following Answer:

"I will immediately lay this Address before his Majesty."

The Hague Gazette of the 14th Instant informs us, that it was thought the Parliament of England would not break up till Advices should be received from America, of the Effects which the Repeal of the Stamp-Act had wrought in that Part of the World.

Edinburgh, May 7. The Lead-Shot Manufacture, which gave general Satisfaction some Years ago in this City, is now re-established, and carrying on with a Success superior to every Thing of its kind in Britain.

Bristol, May 10. We hear from Staverton in Devonshire, that Tuesday last was set apart to celebrate the Repeal of the Cyder-Act. On this Occasion, in a large Field, on an Eminence, the Gentlemen of the Parish roasted Whole a large fat Ox; 30 Bushels of Wheat in Bread, with near 30 Hogheads of Cyder, were provided for the Poor as well as Rich, on this general Occasion of Joy.

[N^o. 1091.]

FROM THE LONDON CHRONICLE, of April 19, 1766.

A Copy of a Letter to the Right Rev. Thomas Lord Bishop of Kildare, from Thomas Butler, Esq; of Warminster, in Wilts, concerning a REMEDY for the STONE and GRAVEL.

THE Benefit I received from the Daucus, or Wild Carrot, has been so great, that I thought it my Duty to Mankind to advertise its Virtues, and the Relief I received from it, in the Salisbury Journal, about three Years ago, which was crowned with such high Satisfaction, that I received Intelligence, that it had done great Cures on several People, who took it purely on the Recommendation of my Advertisement.

"I had laboured under that painful Disorder the Stone in the Kidney at least forty-six Years, when, about four Years since, or something more, it became so painful, that I was under an absolute Necessity of quitting my annual Journeys into Hants, and seek for Ease by any Means I could find it; but all in vain; it grew upon me so, that I could not sit at Table to eat my Meat, but in the greatest Pain; and finding, by Experience, I could have no more Ease in recumbent Posture, I was obliged to lie down wherever I came, either at home or abroad, and in that Posture I conversed with my Friends, and in that Position eat my Dinner daily, and, in short, I was still followed by such continual Pain, that I expected I had but a short Time to live.

"I had applied to Physicians, Apothecaries, Quacks, and Old Women, and conformable to Directions, I made use of Mr. Stephens's Medicine, and, nauseous as it was, I took about Four-score Draughts of it, together with a full Dose of the ill tasted Powder, that is a Part of the Recipe; but all in vain: I could find no Relief. In this miserable Condition I recollected I had an Herbal, in which were prescribed Remedies for many Disorders: I providentially looked into it, and found the Wild Carrot strongly recommended by Mr. Boyle. I immediately (it being the 1st or 2^d of August) sent a Person into the Fields to get me the Wild Carrot, which was accordingly done; I made it into a Tea, sweetening it with Lisbon Sugar, and drank about two ordinary Tea-pots full in a Day, each Pot containing a full Half-pint, the one for Breakfast, the other for Supper, eating with it as with other Tea, and in three Days Time the Pain began to grow weak and die away, and in 5 Days it quite left me, my Spirits revived, and I was restored (I bless GOD) to perfect Ease.

"I continued drinking this Tea till the 17th of December following, and then idly neglected it; the Disorder returned; I had a short Fit, which held me six Hours: I had again Recourse to my Wild Carrot, and in a few Days got the better of it; since which I have enjoyed great Ease: I cannot say that I never felt Pain in the Kidneys, but this I can aver for Truth, that it is never enough to make me cry Oh! and that I think I never enjoyed better Health than I have done for these four last Years. This is the Time of the Year (August) when I got it. I will only say (though I know not how to have done with this Subject, where almost a Miracle has been wrought in my Favour) that it is to be gathered in August, and dried well in some Room in the Shade, and then put aside in a close Bin for Use: You are only to use the Heads or Seeds of it. I take six or seven Heads, and put them into the Tea-pot, and then put boiling Water upon them, and, after it has stood as other common Tea, drink it, generally dividing it into two Draughts. I forbear all Sorts of Salt-Meats (at least ought to do so) and Strong-Beer I rigidly restrain from; I drink about two or three Glasses of Wine after Dinner, and as much good Table-Beer as I have an Inclination to; I never drink any Thing in a Morning before or after Tea; I drink nothing after Tea in an Evening. It is something forcing, but not violently, so it does not hurt in any kind. You will say, perhaps, I am prejudiced in its Favour, but of this I am confident, I have enjoyed more Ease these last 4 Years than I ever did from the Age of Fourteen, and I find myself in better Health to that Time.

I have not made any Bloody, or Coffee-ground Water, no not once since I took the Carrot-Tea, notwithstanding I made such, at Times, for more than twenty Years before. I am, &c.

THOMAS BUTLER."

A Letter from the Reverend the Dean of Kildare.

"SIR,

"On reading Mr. Butler's Letter, I, who had been much afflicted with the Stone, betook myself to the drinking the Wild Carrot Tea; this was in the Month of October last, and since I have drank it, I have not felt any severe Pain; I have sometimes, indeed, uneasy Feelings, but they are the Feelings rather of Weight than of Pain, and generally terminate in my parting with a great Deal of loose Gravel, much more than I was formerly used to part with. Whether this Medicine tends to the Dissolution of a Stone, already concreted, or serves only to prevent a further Concretion, I cannot say; but it is no small Happiness, that whatever its Manner of Operation may be, I have, ever since I drank it, been free from any violent Pain: How long I shall continue so, GOD only knows. I am, &c.

PHILIP FLETCHER."

To make DAUCUS or DAUCUS ALE.

Take of the Daucus Seeds nine Ounces, Raisins of the Sun eighteen Ounces; put them into a Bag, and hang in a Vessel of six Gallons of good Ale; after it is worked, and when fine, after eight Days drink three Pints a Day.

N. B. The Wild Carrot is to be had in great Plenty, in this and the neighbouring Provinces, and may be gathered the End of July, or Beginning of August.

N A P L E S, April 15.

MOUNT Vesuvius broke out on Thursday last, with great Violence, on the opposite Side of its first Eruption; and a new Lava took its Course towards the Torre del Anunciata, between Portici and Pompeii. This Lava is really tremendous, the River of Fire being now at least four Miles in Length, and in some Places near two Miles in Breadth. It has already destroyed three Vineyards, and is continuing its Course slowly, over cultivated Lands, towards the Village of the Anunciata. The Lava, at its Source, and for the first Mile, is as rapid as the River Severn at the Passage near Bristol; but, by extending itself, cools and loses its Velocity, so as not to advance more than thirty Feet in an Hour.

April 22. The Eruption of Vesuvius is more violent than ever. Several Englishmen are come hither Post from Rome, to see the dreadful Spectacle, and to make their Observations thereon.

Warsaw, April 19. Two Circumstances continue to astonish the Public: The one is, that Count Branicki, grand General of the Crown, delays to come and pay Faith and Homage to the King in Person; the other is, that his Majesty hath not yet chosen a Princess to share in his Throne.

Paris, May 2. The Hereditary Prince of Brunswick-Wolfenbuttel is still at Versailles, where the Princes of the Blood and Noblemen of this Court are attentive to procure him every kind of Pleasure. When he was presented to the King, his Majesty received him with more Marks of Distinction than he ever gave to any other foreign Prince.

L O N D O N, May 20.

Letters from Paris inform us, that the Count de Lally was removed in the Night between the 4th and 5th of this Month from the Bastille to the Prison of Conciergerie (communicating with the Palace) where he refused to go to Bed, and about Seven in the Morning was conducted to the Grand Chamber, which was surrounded on all Sides by the Guards of the Parliament. As soon as he appeared before his Judges, they ordered him to depear before his red Ribbon, &c. which he took off, seemingly in great Discomposure and Confusion; and being afterwards placed on the Stool to be interrogated, he clasped his Hands, and raised his Eyes towards Heaven, saying, *Is this the Reward of Forty Years Service!* He underwent an Interrogation of near twelve Hours, during which he was successively confronted by the Marquis de Buffly, and the Count d'Ache; and at Nine the same E-

vening was remanded to the Bastille, under the Escort of several Companies of the Guard, and the Guards of the Parliament.

The same Arret which condemned the Count de Lally, cleared the Count d'Ache, and suppressed the Memorials of the former as false and defamatory.

A Letter from Calais, dated May 14, says, "Mons. Lally, who commanded at Pondicherry in the late War, was beheaded last Friday at Paris. The Parliament had ordered the Execution between Eight and Nine at Night; but having some Reason to think he would destroy himself, the Execution was performed at Five; he was drawn in a Cart to the Place of Execution, where a Gag was put into his Mouth, to prevent his choking himself with his Tongue, which he attempted. His Friends had obtained Leave to bury him according to his Rank; but the Parliament were so incensed, that he was obscurely buried in a little Church in Paris. He was in the 66th Year of his Age."

Letters from Batavia, received in Holland, advise, that the 16th of October last was appointed by that Government, to be kept as a Day of Fasting and Humiliation, to avert the Judgment of the Almighty from that and other Dutch Colonies in the East-Indies, where they were apprehensive of being soon visited by the Plague; a great Number of Persons dying there very fast, supposed to be owing to the sulphurous Stench, and thick black Clouds, which have appeared ever since the Eruption of the Vulcano at Neira.

They write from Madrid, that the Embarkation of the Spanish Troops for Mexico has been set aside, at least for the present, on Account of the Disturbances which have broke out in different Parts of the Kingdom.

A few Days ago, as the Convicts were passing along to the Water Side, in Order to be Shipped to America, with FIFES Playing before them, *Tbro' the Wood Laddie, &c.* a Gentleman looking on, observed to another, that they were very JOYOUS: To which a Droll Fellow, one of the Convicts, replied, *Joyous! Aye, so we are Master, and if you will but go along with us, you will be QUITE TRANSPORTED.*

On the 7th Instant, the House of Commons of Ireland waited upon his Excellency the Lord Lieutenant with the following ADDRESS to his Majesty:

Most Gracious Sovereign,
"We your Majesty's most dutiful and loyal Subjects, the Commons of Ireland, in Parliament assembled, beg Leave to approach your Throne, and with all Humility to testify our ardent and inviolable Attachment to your sacred Person and Government; and to implore that your Majesty will suffer us to present to you the universal Prayers of your loyal People of Ireland, in Assistance of the Representations and Endeavours of the chief Governor of this Kingdom, towards inducing your Majesty, in your Royal Beneficence, to return to your faithful Subjects, the Bill transmitted to Great-Britain, for limiting the Duration of Parliament, this Session."

To which his Excellency was pleased to return the following Answer:

"I will immediately lay this Address before his Majesty."

The Hague Gazette of the 14th Instant informs us, that it was thought the Parliament of England would not break up till Advices should be received from America, of the Effects which the Repeal of the Stamp-Act had wrought in that Part of the World.

Edinburgh, May 7. The Lead-Shot Manufacture, which gave general Satisfaction some Years ago in this City, is now re-established, and carrying on with a Success superior to every Thing of its kind in Britain.

Bristol, May 10. We hear from Staverton in Devonshire, that Tuesday last was set apart to celebrate the Repeal of the Cyder-Act. On this Occasion, in a large Field, on an Eminence, the Gentlemen of the Parish roasted Whole a large fat Ox; 30 Bushels of Wheat in Bread, with near 30 Hogheads of Cyder, were provided for the Poor as well as Rich, on this general Occasion of Joy.

Q U E B E C, July 3.

Saturday the 28th ult. at 11 o'Clock in the Forenoon, his Excellency the Honourable Major-General JAMES MURRAY, Esq; Governor of this Province, embarked on board the Ship Little William, Capt. John Grant, for England: He was attended at the Beach by public Officers, several of the Religious Orders, Merchants and other Inhabitants. He was attended in Barges to the Ship by Col. Jones, who commands the 52^d Regiment and Garrison, Capt. Morris commanding the Detachment of the 27th Regiment in Garrison here, and the Officers of their Corps, by Col. Robertson, Barrack-master General of North-America, Mr. O'Brien, Lady Susan O'Brien, and other Ladies (under a Salute from the Cannon of the Grand Battery) who also attended his Excellency down the River, to near the Parish of St. Laurent, upon the Island of Orleans, where they took Leave, and left the Ship, and his Excellency proceeded on his Voyage, the Wind fair, and the Day fine. His Excellency has to accompany him on his Voyage, Francis Mackay, Esq; and his Lady, Lieutenant Rose, of the 52^d Regiment, Lieutenant Abbot, of the Royal Artillery, and Mr. Fotheringham.

The same Day, at 11 o'Clock at Night, arrived in this City from London, on board the Commerce, Captain Johnson, Mr. Briand, Bishop of Quebec, for the Roman Catholics, who manifested on this Occasion all their Affection for what concerns their Religion. On the Day following, at 5 o'Clock in the Morning, the Bells of all their Churches announced his Arrival to the whole City, which gave such general Satisfaction to the Canadians, that many of them were seen to shed Tears thro' Joy. It was really affecting to see them congratulate each other, wherever they met, and to hear them incessantly say to one another, *It is then true that we have a Bishop; GOD hath taken Pity of us: And to see them afterwards run in Crowds to the Parish Church to see this Bishop, whom they look upon as the Support of their Religion, and as a Pledge of the King's paternal Goodness to them.* In Fact, at the same Time that they publicly bless the Lord for having given them a Bishop, they loudly proclaim their Gratitude to his Majesty for having attended to their Request: It is likely that this Favour conferred on the Canadians by the King, will effectually attach them to the British Government. It is also very pleasing to them, to have received on this Occasion the Congratulations of several Persons of Note of our Nation, who indeed seemed to partake of their Joy. And we doubt not but that the Canadians, who appear to be very susceptible of Gratitude, will by those Means become more firmly united to us.

B O S T O N, July 21.

A Mineral Spring has lately been discovered at Stafford in Connecticut, which issues out from the Root of a Maple Tree, at the Bottom of a Mountain, on the Margin of the Rivulet Whitemantic; the Water of which is very Clear and exceeding Cold; some say it Tastes like Ink, others like

Epsum Salt, but most think it Tastes like Rust of Iron. It operates mostly by Urine, and generally upon the first Drinking makes Persons feel somewhat Sick, and some few it Vomits. Was this Spring under proper Regulations, and attended with some skilful Physician to give Directions about using the Water, 'tis thought it would be a public Blessing; but in its present Situation, where it helps one, it is said two are hurt by it; owing to an abuse of the Water, which is most imprudently used by great Numbers, who flock there by Hundreds in a Day, with all Disorders; and some are injudicious enough to drink two Gallons a Day, and when they bathe, to stay a long Time in the Water, which is prejudicial.—In Hectical and Consumptive Cases this Water is very hurtful; but in Rheumatic Cases, and contracted Limbs it has done some great Cures, of which the following Instance may be depended upon.—Thomas Simmons, Mariner, aged 34, had a fever settled in his Right Arm, which contracted his fingers so that he could not separate them; his Hand was stiff as a Bone, and so useless that he could not move a Straw or take up a Feather; he could feel no Pulse, and his Arm perished up to his Elbow: In this Condition he continued 17 Months, being pronounced incurable by some of the most eminent Physicians in New-York, Connecticut and Boston; but drinking about Three Pints of this Water a Day, and frequently bathing his Arm in it, warmed; his Pulse returned, his Fingers became flexible, and he so far recovered the Use and Strength of his Hand, that on the Ninth Day of his using the Water, he carried with his lame Hand a Skillet of Five Pound Weight 60 Rods; and on the Tenth Day he wrote his Name in a fair good Hand.

THOMAS & Wm. RINGGOLD.

NOTICE is hereby given to the preceding Subscribers for Lots of Ground, in a Plan laid out for a Town on *FELL'S POINT*, *Patapsco* River, to pay their several Arrearages, or they will be proceeded against in the Courts of Justice (tho' much against my Inclination) but, as several Persons have subscribed and entered into Articles for Lots on said Point (thereby depriving others) the Rents thereon lie unpaid, and other Matters not comply'd with, I must take that Method to put such in Mind of what is Justice relating to such Engagements, unless timely prevented.

And whereas some Persons, from penurious Views, have been invidiously industrious in spreading a Report, that the Title to the Lots of Ground on said Point (in *Edward Fell's*) was disputable, precarious and doubtful, in order to intimidate Strangers, and as much as in their Power prevent every one from taking or improving Lots on the Point; this is to give Notice to the Public, that the Subscriber will give Attendance on said Point, and will clear up the Title to every generous and un-biased Mind to be good. Other Means have been made use of to prevent the Settling of *Fell's Point*, as the Water bad (and better could not be expected) and the Point not healthy, &c. the former has been proved false to a Demonstration, and the latter the Inhabitants in the Course of last Summer can Answer to, how long they may be favour'd with better Health than their Neighbourhood, Time only can shew. There are several valuable Lots on the Point that have been heretofore subscribed for, which are now free from such Subscription, and will be Sold or Let to the first that offers, by a Power invested in the Executrix.

For Terms apply to JOHN BOND, for ANNE FELL, Executrix of *Edward Fell*.

(FROM THE LONDON CHRONICLE.)

The History of John Bull's Children.

SIR Humohry Polesworth, who formerly gave the World a true and faithful Account of John Bull, and of his Mother, and his Sister, and Wives, and his Servants, now write the History of his Children, and how they were got, and how they were educated, and what befel them. Courteous Reader, if thou hast any Curiosity to know these Things, read the following Chapters and learn.

Chap. I. Of Seven natural Children, which John Bull had in his younger Days by Doll Secretary, his Mother's Maid; namely, three Boys, John, jun. or Master Jacky, Yorky, and Jerry; and four Girls, Penelope, Mary, Virgey, and Caroline: How the old Lady would suffer no Bastards in her Family; and how the poor Infants were turned adrift on the Fish Ponds as soon as born; how they landed on the Western Shore, and were there nursed by a wild Bear all under the green Wood Tree.

Chap. II. How John disowned them, and left them to get over the Childrens Disorders the best Way they could, without paying a Farthing for Nurses, or Apothecary's Bills; and how, as soon as they had cut their Eye Teeth, and were able to walk alone, John claimed them for his own.

Chap. III. How Master Jacky turned Fisherman and Ship-Carpenter; Yorky and Jerry drove a great Trade; Miss Penny dealt in Flour, called the Maid of the Mill, and never curtesy'd to any Body; How Mary and Virgey set up a Snuff-Shop, and Caroline turned Dry-Salter, and sold Indigo; how they all flourish'd exceedingly, and laid out every Penny they earned in their Father's Warehouse.

Chap. IV. Of two Children more, which John had afterwards in lawful Wedlock, viz. a Boy which he called Georgey, after his great Patron, and a Girl, which he call'd Peg, after his Sister Margaret; how he crammed them with Sugar-Plumbs, and how they remained sickly, rickety Brats at this Day.

Chap. V. How young Master Baboon, old Lewis's only Son, fell in Love with Miss Virgey; and how he came behind with Intent to ravish her; how she squealed and alarmed her Dad.

Chap. VI. How John called for his Stick and his Barge, and crossed the Pond to fave his Daughter's Virtue; how young Lewis gave him a confounded Rap on his Fingers, and drove him back, and then at his Daughter again.

Chap. VII. How her Brother Jack came to her Assistance, and threw young Lewis on his Back; how old Lewis Baboon flew to help his Son, and carried Lord Strutt along with him; how John Ball returned and mustered all his Children at his Back, and to it they went.

Chap. VIII. How they had a long Tussle; how John's Children saved their old Dad from a broken Head, and helped to seize young Lewis and tie him; how the old Folks agreed to leave young Lewis in Custody, and drink Friends themselves; and how John made his Children pay a Share of the Reckoning without giving them any of the Drink.

Chap. IX. How John in his Cups bragged of his Exploits, and said he had done all himself, and his Children nothing; how he made Choice of fair George, the Gentle Shepherd, for his House Steward, because he could tell, without the Book, that two and three made Five, and the Multiplication Table by Heart.

Chap. X. The whole Stewardship of fair George; how he neglected to protest Lewis Baboon's Note of Hand on the Day of Payment, released Lord Strutt from a Mortgage on his Manor of Eastland; how he took an Aversion to Cyder, and would allow none to be drank in his Family; how he rummaged every Man's Chest for Pen, Ink, and Paper, and obliged those he catch'd Writing to stand a-top of the Table, with a Wooden Neckcloth under their Chin, while he counted sixty times sixty; and how this is called the Gentle Shepherd's Benefit of Clergy unto this Day.

Chap. XI. How Fair George took an antipathy to John's Children, because he said they put nothing into the Box at Christmas; and when they came to pay their Shop Accounts, they brought in their Money at the back Door; how he advised John to brand them on the far Buttock, as they do Stray Cattle, that he might know them to be his own.

Chap. XII. How John's Children rode restiff, and swore they would not have the broad R stamp on their B-ck-sides; how John, in heating the Irons, burnt his own Fingers most d-----ly; how all his Neighbours laughed, and fair George could not find him a Plaster.

Chap. XIII. How John, in a Passion, kick'd fair George down Stairs, and rung up other Servants; how they advised him to consult his Wife; and how Mrs. Bull bid him let his Children alone; that though born in Sin, they were his own Flesh and Blood, and needed no Stamp to shew it; how John took her Advice, and let the Irons cool again; and how some suspected if John's Fingers had not smarted, he would not have complied so soon.

Chap. XIV. A Dialogue on Education, between Fair George and Lame Will; how Will proved it to be both cruel and impolitic to pinch Children till they Cry, and then pinch them for Crying; and how George answered and said nothing.

Chap. XV. How John, by means of his new Servants, became beloved of his Children, and respected by his Neighbours; how he obliged Lewis Baboon to beat down the Wall of Ecclestone Castle, because it overlooked his Pond, and harboured Sea-Gulls to Gobble up his Fish; how he made him also pay up his Note of Hand; and how Lord Strutt—

But, Mr. Printer, I have given you enough to judge of the general Plan of this History. Pray let me have your Opinion as to the Publication. My Notion at present is, to send it abroad in Sixpenny Numbers, and engage the Country Carriers to take it down; it may pass for Political an Hundred Miles from Town.

From a late London Paper.

ALL the Articles of News lately published, that seem improbable, are not mere Inventions. Some of them I can assure you on the Faith of a Traveller, are serious Truths. And here give me Leave to instance the various numberless Accounts the News-writers have given us (with so much honest Zeal for the Welfare of poor Old-England!) of the establishing Manufactures in the Colonies to the Prejudice of those of this Kingdom. It is objected by superficial Readers, who yet pretend to some Knowledge of those Countries, that such Establishments are not only improbable but impossible; for that their Sheep have but little Wool, not in the Whole sufficient for a Pair of Stockings a Year to each Inhabitant; and that, from the universal Dearness of Labour among them, the working of Iron and other Materials, except in some few coarse Instances, is impracticable to any Advantage. Dear Sir, do not let us suffer ourselves to be amused with such groundless Objections. The very TAILS of the American Sheep are so laden with Wool, that each has a Cart or Waggon on four little Wheels to support and keep it from trailing on the Ground. Would they Caulk their Ships? Would they fill their Beds? Would they even Litter their Horses with Wool, if it was not both plenty and cheap? And what signifies Dearness of Labour, where an English Shilling passes for Five-and-twenty? Their engaging Three Hundred Silk Throwsters here in one Week for New-York was treated as a Pable, because, forsooth, they have no Silk there to throw. Those who made this Objection perhaps did not know, that at the same Time the Agents from the King of Spain were at Quebec contracting for 1000 Pieces of Cannon to be made there for the Fortifications of Mexico, with 25,000 Axes for their industrious Logwood Cutters; and at New-York engaging an annual Supply of warm Floor-Carpets for their West-India Houses; other Agents

from the Emperor of China were at Boston in New-England treating about the Exchange of raw Silk for Wool, to be carried on in Chinese Jonks thro' the Straits of Magellan. And yet all this is as certainly true as the Account, said to be from Quebec, in the Papers of last Week, that the Inhabitants of Canada are making Preparations for a Cod and Whale Fishery this Summer in the Upper Lakes. Ignorant People may object that the Upper Lakes are fresh, and that Cod and Whale are Salt-Water Fish: But let them know, Sir, that Cod, like other Fish, when attacked by their Enemies, fly into any Water they think they can be safest; that Whales, when they have a Mind to eat Cod, pursue them wherever they fly; and that the grand Leap of the Whale in that Chace up the Falls of Niagara is esteemed by all who have seen it, as one of the finest Spectacles in Nature!— Really, Sir, the World is grown too incredulous: Pendulum-like, it is ever twinging from one Extrem to another. Formerly every Thing printed was believed, because it was in 'print: Now Things seem to be disbelieved, for just the very same Reason. Wise Men wonder at the present Growth of Infidelity! They should have considered, when they taught People to doubt the Authority of News-Papers, and the Truth of Predictions in Almanacks, that the next Step might be a Disbelief in the well-vouch'd Accounts of Ghosts and Witches, and doubts even of the Truth of the A—n Creed.

THE King has sent Orders to the Marquis d'Ensenada to retire from Court. Yesterday two Regiments of Horse arrived here with 8 Pieces of Cannon, and near 10,000 Troops are on Guard round this Capital; notwithstanding which, Libels of a most atrocious Nature are daily dispersed and posted up. Every Corner resounds with Threats of Riots and Insurrections. The Populace have even attempted to set Fire to the Castle of the Duke of Acros, in the Neighbourhood of Alicant, and to raise a Disturbance in the Palace of St. Ildefonso. Two Officers, on their Return from Carthagens, whither they had been to escort the Marquis de Squilace, found the People every where in Commotion, and crying out, Long live the King! Destruction to Squilace.

We learn from Barcelona that Papers had been posted up there, setting forth that a Revolt would take Place the 20th Instant, at 3 o'Clock in the Afternoon, unless the Price of certain Commodities were lowered. The History of John Bull's Children.

SIR Humphry Poleworth, who formerly gave the World a true and faithful Account of John Bull, and of his Mother, and his Sister, and Wives, and his Servants, now writes the History of his Children, and how they were got, and how they were educated, and what befel them. Courteous Reader, if thou hast any Curiosity to know these Things, read the following Chapters and learn.

Chap. I. Of Seven natural Children, which John Bull had in his younger Days by Doll Secretary, his Mother's Maid; namely, three Boys, John, jun. or Master Jacky, Yorcky, and Jerry; and four Girls, Penelope, Mary, Virgey, and Caroline: How the old Lady would suffer no Bastards in her Family; and how the poor Infants were turned adrift on the Fish Ponds as soon as born; and how they landed on the Western Shore, and were there nursed by a wild Bear all under the green Wood Tree.

Chap. II. How John disowned them, and left them to get over the Childrens Disorders the best Way they could, without paying a Farthing for Nurses, or Apothecary's Bills; and how, as soon as they had cut their Eye Teeth, and were able to walk alone, John claimed them for his own.

Chap. III. How Master Jacky turned Fisherman and Ship-Carpenter; Yorcky and Jerry drove a great Trade; Miss Penny dealt in Flour, called the Maid of the Mill, and never curtesy'd to any Body; How Mary and Virgey set up a Snuff-Shop, and Caroline turned Dry-salter, and sold Indigo; how they all flourish'd exceedingly, and laid out every Penny they earned in their Father's Warehouse.

Chap. IV. Of two Children more, which John had afterwards in lawful Wedlock, viz. a Boy which he called Georgey, after his great Patron, and a Girl, which he called Peg, after his Sister Margaret; how he crammed them with Sugar-Plumbs, and how they remained sickly, ricketty Brats at this Day.

Chap. V. How young Master Baboon, old Lewis's only Son, fell in Love with Miss Virgey; and how he came behind with Intent to ravish her; how she squealed and alarmed her Dad.

Chap. VI. How John called for his Stick and his Barge, and crossed the Pond to save his Daughter's Virtue; how young Lewis gave him a confounded Rap on his Fingers, and drove him back, and then at his Daughter again.

Chap. VII. How her Brother Jack came to her Assistance, and threw young Lewis on his Back; how old Lewis Baboon flew to help his Son, and carried Lord Strutt along with him; how John Bull returned, and mustered all his Children at his Back, and to it they went.

Chap. VIII. How they had a long Tuffle; how John's Children saved their old Dad from a broken Head, and helped to seize young Lewis and tie him; how the old Folks agreed to leave young Lewis in Custody, and drink Friends themselves; and how John made his Children pay a Share of the Reckoning without giving them any of the Drink.

Chap. IX. How John in his Cups bragged of his Exploits, and said he had done all himself, and his Children nothing; how he made Choice of fair George, the Gentle Shepherd, for his House Steward, because he could tell, without the Book, that two and three made Five, and the Multiplication Table by Heart.

Chap. X. The whole Stewardship of fair George; how he neglected to protest Lewis Baboon's Note of Hand on the Day of Payment, released Lord Strutt from a Mortgage on his Manor of Eastland; how he took an Averfion to Cyder, and would allow none to be drank in his Family; how he rummaged every Man's Chest for Pen, Ink, and Paper, and obliged those he catch'd Writing to stand a-top of the Table, with a Wooden Neckcloth under their Chin, while he counted sixty times sixty; and how this is called the Gentle Shepherd's Benefit of Clergy unto this Day.

Chap. XI. How fair George took an antipathy to John's Children, because he said they put nothing into the Box at Christmas; and when they came to pay their Shop Accounts, they brought in their Money at the back Door; how he advised John to brand them on the far Buttock, as they do Stray Cattle, that he might know them to be his own.

Chap. XII. How John's Children rode restiff, and swore they would not have the broad R stamp on their B-ck-sides; how John, in heating the Irons, burnt his own Fingers most d-----ly; how all his Neighbours laughed, and fair George could not find him a Plaster.

Chap. XIII. How John, in a Passion, kick'd fair George down Stairs, and rung up other Servants; how they advised him to consult his Wife; and how Mrs. Bull bid him let his Children alone; that though born in Sin, they were his own Flesh and Blood, and needed no Stamp to shew it; how John took her Advice, and let the Irons cool again; and how some suspected if John's Fingers had not smarted, he would not have complied so soon.

Chap. XIV. A Dialogue on Education, between fair George and Lame Will; how Will proved it to be both cruel and impolitic to pinch Children till they Cry, and then pinch them for Crying; and how George answered and said nothing.

Chap. XV. How John, by means of his new Servants, became beloved of his Children, and respected by his Neighbours; how he obliged Lewis Baboon to beat down the Wall of Ecclefdown Castle, because it overlooked his Pond, and harboured Sea-Gulls to Gobble up his Fish; how he made him also pay up his Note of Hand; and how Lord Strutt—

But, Mr. Printer, I have given you enough to judge of the general Plan of this History. Pray let me have your Opinion as to the Publication. My Notion at present is, to send it abroad in Sixpenny Numbers, and engage the Country Carriers to take it down; it may pass for Political an Hundred Miles from Town.

From a late London Paper.

ALL the Articles of News lately published, that seem improbable, are not mere Inventions. Some of them I can assure you on the Faith of a Traveller, are serious Truths. And here give me Leave to instance the various numberless Accounts the News-writers have given us (with so much honest Zeal for the Welfare of poor Old-England!) of the establishing Manufactures in the Colonies to the Prejudice of those of this Kingdom. It is objected by superficial Readers, who yet pretend to some Knowledge of those Countries, that such Establishments are not only improbable but impossible; for that their Sheep have but little Wool, not in the Whole sufficient for a Pair of Stockings a Year to each Inhabitant; and that, from the universal Dearness of Labour among them, the working of Iron and other Materials, except in some few coarse Instances, is impracticable to any Advantage. Dear Sir, do not let us suffer ourselves to be amused with such groundless Objections. The very TAILS of the American Sheep are so laden with Wool, that each has a Cart or Waggon on four little Wheels to support and keep it from trailing on the Ground. Would they Caulk their Ships? Would they fill their Beds? Would they even Litter their Horses with Wool, if it was not both plenty and cheap? And what signifies Dearness of Labour, where an English Shilling passes for Five-and-twenty? Their engaging Three Hundred Silk Throwsters here in one Week for New-York was treated as a Fable, because, forsooth, they have no Silk there to throw. Those who made this Objection perhaps did not know, that at the same Time the Agents from the King of Spain were at Quebec contracting for 1000 Pieces of Cannon to be made there for the Fortifications of Mexico, with 25,000 Axes for their industrious Logwood Cutters; and at New-York engaging an annual Supply of warm Floor-Carpets for their West-India Houses; other Agents

from the Emperor of China were at Boston in New-England treating about the Exchange of raw Silk for Wool, to be carried on in Chinese Jonks thro' the Straits of Magellan. And yet all this is as certainly true as the Account, said to be from Quebec, in the Papers of last Week, that the Inhabitants of Canada are making Preparations for a Cod and Whale Fishery this Summer in the Upper Lakes. Ignorant People may object that the Upper Lakes are fresh, and that Cod and Whale are Salt-Water Fish: But let them know, Sir, that Cod, like other Fish, when attacked by their Enemies, fly into any Water they think they can be safest; that Whales, when they have a Mind to eat Cod, pursue them wherever they fly; and that the grand Leap of the Whale in that Chace up the Falls of Niagara is esteemed by all who have seen it, as one of the finest Spectacles in Nature!— Really, Sir, the World is grown too incredulous: Pendulum-like, it is ever swinging from one Extrem to another. Formerly every Thing printed was believed, because it was in 'print: Now Things seem to be disbelieved, for just the very same Reason. Wise Men wonder at the present Growth of Infidelity! They should have considered, when they taught People to doubt the Authority of News-Papers, and the Truth of Predictions in Almanacks, that the next Step might be a Disbelief in the well-vouch'd Accounts of Ghosts and Witches, and doubts even of the Truth of the A—n Creed.

L O N D O N, May 17.

Yesterday the Right Hon. Earl of Egmont kiffed his Majesty's Hand on being appointed Secretary of State, in the Room of his Grace the Duke of Grafton, who has resigned.

Extrait of a Letter from Banda, the Capital of the Molacca Islands, June 10, 1765, being a further Account of the Eruption of the Volcanos in the Island.

"The Quantity of Cinders cast up from the Mountain, with the burning Lava, which ran down its Sides to the Distance of upwards of Two Thirds of it, destroying all the Houses and Trees in its Passage, which fell with a horrible Noise, filled every Soul with Terror on the 29th. To these were added, the perpetual Rumbings heard in the Body of the Mountain, and the sulphurous Vapours issuing from all Parts, which rendered the Air quite insupportable. Report magnifying these Objects, added to our Consternation. Tho' it had not appeared that any Stones had been found above half way down the Mountain, yet it was pretended that several had been picked up in different Parts of the Isle. Indeed a Dutch Soldier, on the 1st presented the Governor with a Piece of very hot Matter, which he had found near the Fort. On examining this Piece, it was found to consist of pure Sulphur. The Stench of the Sulphur had been frequently very strong in the Island, but never continued long. The Fire also of the lower Volcano lasted only 24 Hours, the Collection of Stones thrown out, having extinguished it, and converted it into a thick Smoak, till the 3d of this Month. But this Circumstance occasioned the greater Alarms, because the Vapours thickened at the two Upper Volcanos, and the Explosion of burning Matter became much more frequent and much more terrible than ever. The Ground to the extent of the Valley was inaccessible on Account of the Heat. The Trees, late so beautiful, were partly burnt and partly overturned, for above half way down the Mountain; and the Stones which fell from the Top being stopped by the Trees that had been overturned, set them on Fire, which caused a very terrible Conflagration. It was in this Situation which threatened further Calamities, that the Government ordered the Inhabitants to provide themselves with Water. The Officers appointed to extinguish such Fires as might happen, received, in particular, the most precise Orders on that Head. These made the deeper Impression on People's Minds, as a Quantity of burning Matter had fallen in the Negory, and several Pieces of Sulphur, yet quite hot, had been picked up, on the 3d, near the Clove Magazine.

"The 4th, 5th, 6th, and 7th, no favourable Change was seen. On the contrary every Body thought they perceived the Volcanos grow wider, the Flames thicken, and the Eruption of burning Matter increase.

"On the 15th nothing yet to quiet us; the subterraneous Noise with the Quantity of burning Matter, thickness of the Flames, violence of the Reports, &c. all increased.

"On the 4th of the present Month, every Thing in the same melancholy Situation. The subterraneous Noise still equally terrible, and the fiery Matter issuing from the Mouth of the Volcanos in the same Quantity, and with the same Velocity.

"This sorrowful Event depresses us the more, as we were scarce recovered from the Consternation, which the Shock of an Earthquake on the 12th of September, 1763, had spread over the Isle."

ANNAPOLIS, August 14.

Sunday last was found Dead near Newington Rope-walk, the Body of Robert Cook, Rope-maker, who had been to London-Town, and is supposed to have come by his Death by Drinking on his Way back, while he was very Hot, too much cold Water at the Spaw.

Yesterday the Bounty on the Four best Pieces of Linen, made in this County, and produced to the County Court, agreeable to the late Act of this Province for Encouragement of Industry, was given to Mr. John Cromwell: It is said the finest Piece was fit for a Prince to wear. The different Prizes were 1100lb, 1000lb, 900lb, and 800lb of Tobacco.

THOSE Gentlemen who have been kind enough to favour Mr. RIVINGTON with the Disposal of his Lottery Tickets, are desired to return directly all those which remain unsold, to Thomas Anderton, his Agent in ANNAPOLIS. For on this the Time of Drawing greatly depends.

Finding myself thus slighted by my Wife, and insulted by her Friends, I hereby declare to the Public, that from the Date hereof, I will not pay any Debts of her Contracting; and do by these Presents forbid any Person to Trust her on my Account: As Witness my Hand. JOHN EVITTS.

THE little Regard which has been paid to the Subscriber's Advertisement heretofore published, requesting all Persons, without Exception, who were indebted for Dealings in his Store before Mr. Clarke's Death, or on any other Account, to pay off, or otherwise finally settle their respective Balances, induces him ONCE MORE to acquaint them, that his determin'd Resolution is, soon to depart hence for England, and that every Person neglecting to pay off, or by delay refusing to settle their Accounts to his Satisfaction, may depend, very shortly, upon being Sued without Distinction, as it is his Intention, absolutely to settle every Matter respecting his Property before his Departure, the Time of which will not admit of any further Requisition, so that this must be deemed a legal Demand, preceding Actions being commenced without further Notice by,

NOTICE is hereby given to the preceding Subscribers for Lots of Ground, in a Plan laid out for a Town on FELL'S POINT, Patapsco River, to pay their several Arrearages, or they will be proceeded against in the Courts of Justice (tho' much against my Inclination) but, as several Persons have subscribed and entered into Articles for Lots on said Point (thereby depriving others) the Rents thereon lie unpaid, and other Matters not comply'd with, I must take that Method to put such in Mind of what is Justice relating to such Engagements, unless timely prevented.

And whereas some Persons, from penurious Views, have been insidiously industrious in spreading a Report, that the Title to the Lots of Ground on said Point (in Edward Fell) was disputable, precarious and doubtful; in order to intimidate Strangers, and as much as in their Power prevent every one from taking or improving Lots on the Point; this is to give Notice to the Public, that the Subscriber will give Attendance on said Point, and will clear up the Title to every generous and unbiased Mind to be good. Other Means have been made use of to prevent the Settling of Fell's Point, as the Water bad (and better could not be expected) and the Point not healthy, &c. the former has been proved false to a Demonstration, and the latter the Inhabitants in the Course of last Summer can Answer to, how long they may be favour'd with better Health than their Neighbours, Time only can shew. There are several valuable Lots on the Point that have been heretofore subscribed for, which are now free from such Subscription, and will be Sold or Let to the first that offers, by a Power invested in the Executrix.

For Terms apply to JOHN BOND, for ANNE FELL, Executrix of Edward Fell.

THE MARYLAND LOTTERY.

IT is thought proper that the Public should be acquainted with the Quality of the Land (lying in Kent County) which make a Part of the Prizes. It is chiefly uncultivated, abounds with great Plenty of Stave, Plank, white and red Oak, and Ship Timber.

There is also a great deal of low flat Land, capable of producing Hemp, and making excellent Meadows; a large Range of flat Land for Cattle, Hogs and other Wood Stock; the Woods producing great Quantities of Acorn Mafts; it lies convenient for the Head of Chester and Sassafras Rivers, and Duck-Creek.

Upon the Whole this Estate is capable of producing very great Profit to Persons who give the least Attention to the Improvement of Land. Kent is the Garden of the Continent, nay, there is not a County in the Dominion of Great-Britain superior to it.

The Scheme consists of Eight Thousand Tickets at Two Dollars each, all are Prizes, which will be delivered to the Adventurers at New-York, Philadelphia, Boston, and the Place of Drawing, Annapolis.

A few Tickets still remain unfold, occasioned by the late total Stop to Business and other Discouragements too obvious to be related, but now, the whole Empire is rejoicing on the Triumph of a most righteous Administration over the Enemies of America, the Proprietor hopes this Design will engage the Attention of the Public, and that the Sale of the Tickets will soon be compleated, as the Time for Drawing is at Hand.

The Scheme at large, and the Tickets are to be had of the Proprietor, James Rivington, at Annapolis.

* * * The TICKETS are rolling up.

FIVE POUNDS REWARD.

RAN away from the Subscriber, in October 1762, a Mulatto Woman, about 30 Years of Age, named Violet, she was born in New-Jersey, is of a middle Stature, very active, and it's said she pretends to be a Free Woman; she has since been seen in Company with one James Lock, on Susquehanna, and was afterwards, in 1764, taken up and committed to the Jail of Frederick-Town, in Maryland, on Suspicion of her being run away, from whence she is said to have made her Escape; she then acknowledged that she had belonged to the Subscriber, but that she being imposed upon by being sold a Slave for Life, run away, which is only an Invention of hers, for she was born a Slave, and as such, was sold to the Subscriber, by the Executors of her former Master, of Freehold, in the County of Monmouth, and Province, aforesaid, deceased, for the Sum of Ninety Pounds, Proclamation Money: She is now supposed to be some where in Maryland, Virginia, or North-Carolina; she is Cunning and Artful, and very probably may have chang'd her Name, and will make her Escape if taken, unless great Care is taken to secure her.

Whoever shall take her up, and secure her in any of the Prisons in Maryland, Virginia, or North-Carolina, or elsewhere, so that she can be brought Home, or sold there, shall have the above Reward, paid by JONAS GREEN, at Annapolis, or the Subscriber.
