From the PENNSYLVANIA JOURNAL, N^o. 1125.
Industry "exalteth a Nation, and the Hand of the diligent maketh rich."

AT a Time when our Mother Country is loading us with Taxes and reducing our Commerce within narrow Limits, it becomes the Duty of every lover of his Country, to look round and consider how, and by what Means we may be able to support ourselves: For as our Paper Money, the Medium by which we carry on Trade, will be totally sunk and destroyed in a few Years, and the late Act of Parliament absolutely prohibits us from making any more, there will be a real Necessity to have recourse to domestic Oeconomy, as the only Means of discharging the Debts we have already contracted; and as this will likewise prevent us from making more Debts; so will it also save us from the Necessity of parting with our Bullion in the destructive Way we have done for some time past. Nor can an internal Police, replete with so many obvious Advantages, as that of striving to live within ourselves, fail of being encouraged by the Patriot Spirits of Pennsylvania; particularly when we are told that the People of a neighbouring Government are setting us the Example, having in bodies declared against wearing or consuming any Thing but what is manufactured in America. And indeed when we consider how we are circumstanced, in respect to all the Necessaries of Life, and that the Produce and Manufactures of our own Country, when properly encouraged and promoted, are sufficient of themselves to support us, even in Elegance and Luxury, we shall have little Reason to continue any Trade that has hitherto brought Poverty and a Scourge upon us. The Trade we carry on with the West-India Planters may be inflamed as one that is clearly against us, and yet it is to those very Men, and their Interests, that we owe the many oppressive Calumnies we now feel; for by the Steps they have taken, not only the Profits of our Industry are subjected to their arbitrary Will and Pleasure, but in fact, they have brought us into a State of Vassalage. And while our Talents, our Constitutions and our Morals are debauched by their unwholesome, pernicious and inflaming Spirits, the salutary Manufactures of our own Country, such as Beer, Spirits of properly fermented Honey and Indian Corn, a Liquor distilled from Rye, Peaches, &c. together with many valuable Wines, which our Industry and Genius might lead us to make at a small Expence, are most lamentably neglected.

I shall just observe upon the whole, that America, tho' burthened with Duties and embarrassed in her Trade, yet has reason to rejoice that the tribulating Rod cannot affect her; for being possessed in herself of all the Elegances and Comforts of Life, she has it in her Power to educate her Sons in the Habits of Industry, Oeconomy and Temperance, the sure prefaces of all that is GREAT, VIRTUOUS and HAPPY.

* We have been credibly informed by some who have kept an exact account, that not less than 1,800,000 Dollars have been exported from this single Province, within these two Years, which may account for the present Scarcity of Money amongst us.

Extract from a late PUBLICATION.

EVEN in the most ancient Times, and before the Advantages of Commerce were well understood, those Nations which have since been reputed the wisest, were so sensible of the utility of the first Inventions in Agriculture, in manufacturing Cloths, and Metals, and in Navigation, that they not only respected, but deified, the Inventors: In what Respect then, ought we, who reap the Harvest, which those Seeds have produced, to hold those Worthies who first Planted them, or who watched and cultivated their Growth. When we consider what Effects have sprung from slight Beginnings, every Project or Attempt for new Improvements in Agriculture, Manufacture, and Commerce, deserves Attention, and the Inventors merit at least our Thanks. A Comparison between the present populous and flourishing State of England, and it's Condition in more early Times, can't but afford great Entertainment to a curious, and Pleasure to a grateful Mind. Even so late as the Century preceding the Reformation, England was thinly inhabited, and the Common People were Slaves or Beggars, or Thieves: They lived in Terror of one another, or of the oppressive Barons. There was but little Culture of the Soil, and very few Arts and Manufactures. The great Cities and Towns were little better than Villages. The common People lived in huts built of Mud, or Clay, without Chimnies, and even the Bed-Chambers in many of the best houses in Towns, and Country, had Clay Floors covered with Litter. If we go farther back, we shall find that the People of this (at present) flourishing Country, were no better than Savages inhabiting a great Forest.

Before the Reign of EDWARD III, the Materials of our Commerce, were only Wool, Leather, Tin, and Lead, which we sent unmanufactured to the Netherlands, and took in return their Drapery made of our own Wool, some Linen, and Wines. — In the Year 1205, the Word PARLIAMENT first used, and the Commons admitted, tho' not regularly represented. — In 1234, fresh Herring-Pasty a Royal Dish, and Straw used for the King's Bed. — In 1246 Wheat sold for Two Shillings per Quarter; and most of the Houses in London covered with Thatch. — In 1248 Wool Merchants settled in London. — In 1253, some fine Linen made in England. — In 1266, Cities and Boroughs first represented in Parliament. — In 1285 Murders, Robberies, and Burning of Houses, very frequent: In London Water Conduits completed. — In 1300 the Venetians alone had the Art of making Looking-Glasses. Some few Clocks used in Italy. In the Towns of France, Germany and England, they had scarce any but Thatch'd Houses; and tho' these Countries were over-run with Woods, they had no Chimnies to guard against the Cold; the whole Family used to sit in the middle of a smoaky Hall round a large Stove, the Funnel passing thro' the Ceiling. — In 1306 Money so scarce that One Shilling per Day defrayed the Expence of a Bishop in Prison, with a Chaplain and Two Servants. — In 1307 Bills of Exchange first in use. — In 1323 no English Ships Traded to the Mediterranean. — In 1327 Trades incorporated in London. — In 1331, EDWARD III, resolved to promote a Woollen Manufactory, and brought 70 Families of Walloons into England. — In 1337 Laws to encourage this Manufacture. — In 1339 Looms set up in Bristol. — In 1344 Gold first Coined in England. — In 1348, Norwich eminent in Worsted Manufacture. — In 1351 Foreign Weavers numerous in London. Groats and Half-groats the largest Silver Coin. — In 1352, no Trade to the Mediterranean. — In 1353, a little Village at Charing-Cross. Gauging Wine, &c. introduced. — In 1354 Exported to the value £. 294,134; Imported £. 58,970: Coarse Cloths exported. — In 1360, Leather Money Coined in France. — In 1363 sumptuary Laws passed in England. — In 1365 Boroughs in Lancashire so poor they could not afford to send Members to Parliament. — In 1368 the first Clock-Maker in England. — In 1375, the common Working People still in Slavery. — In 1379 London had many Woods and Coppes about it. — In 1386 a Company of Linen Weavers in London. — In 1390 Coarse Cloths made at Kendal. In the Fifteenth Century, such was the prevailing Ignorance, that Learning was looked upon as a sort of Heresy, and there were Bishops who did not know their Letters. In their Subscriptions to Synodal Acts, the following Words are to be found, namely, *As I can't Read myself, N. N. hath Subscribed for me; Or, (As my Lord Bishop can't Write himself, at his Request I have Subscribed.)* yet were there many Inventions, and Improvements.

ST. JAGO DE LA VEGA, in Jamaica, March 17.

ON Monday Evening last, about 10 o'Clock, as Mr. Francis Smart, at Passage Fort, was washing himself, he was suddenly seized by an Alligator, about 10 Feet long, which fastened upon his Thigh, and endeavoured to drag him into deep Water, but he, through a quick Preference of Mind, running his Hand down the Alligator's Throat, and fastening upon some of the Entrails, saved himself from being destroyed until Assistance was brought him, and he got into a Wherry; notwithstanding which, so voracious was this Creature become by tasting his Blood, that he endeavoured to seize him again in the Wherry, and even got his fore Feet upon the Side of the same; however, Mr. Smart, with some Assistance, escaped from him, but was very much hurt in his Thigh and Arm, but is now in a fine way of doing well.

as he calls it, or Watch, has succeeded as well on his Voyage to this Island, as it did to Jamaica; nay, I believe, nearer, as he brought it within a Minute. He hit the Island of Porto Santo exactly. And from the Certificate that Sir John Lindlay (the Captain of the Ship he came in) gave him, as well as the Correspondence of the Observations the two Gentlemen have made that were sent out by the Commissioners for the Longitude, it is judged that he will certainly be intitled to the whole Premium upon his Return to England."

By a Letter from Fort Bedford, dated the 15th Instant, there is Advice, that a Party of ours had been out after the Enemy, whom they came in Sight of, and fired at, but could not come up with; and that as the Indians were flying from our People, a white Boy, they had Prisoner, fell from his Horse, upon which they killed and scalped him, cut off his Head, and left it in the Road.

THURSDAY, July 12, 1764

[No. 1001.]

TALBOT County, July 1st, 1764.

Mr. GREEN,

As you were pleas'd, in your Paper of the 28th of June, to take some Notice of a malignant Fever, that had carried off a great many Negroes in Talbot County, and as that Disorder, tho' now subsided here, is frequently incident to all these Colonies, by Means of Servants or Slaves brought from on board of crowded Ships, perhaps the following Dissertation, on that dangerous and often fatal Maledy, may not be unacceptable to many of your Readers.

Its Symptoms are generally, a Chilliness at first, which in some, attended with a Sense of Heat and Cold by Turns, continues for Ten or Twelve Hours; a Sense of Tightness round, rather than acute Pain in, the Head; Sickness at Stomach, and Nausea; a Pain in the Back and Loins, and sometimes wandering Pains all over the muscular Flesh. The Pulse in this Period (which continues generally the first 24 Hours) I cannot precisely describe, having never seen any of them so early in the Distemper, but am told, that it is very irregular, sometimes slow and full, at other Times quick and low. During the whole Course of the Disorder, the Drought is seldom considerable. The second and following Days the Strength and Spirits sink, even when no Evacuation has been used, the Pulse becomes quick, small and thready, the Skin feels rather cooler than in Health, but the Patient complains of vast internal Heat, Langour, Weight and Oppression, upon the Praecordia; the Countenance appears stupid and dejected, the Eyes heavy and languid, and they complain of a Kind of Confusion in the Head (as they express it) which, tho' it deprives them of Rest and Sleep, yet seldom rises to a Delirium.

Sometimes for an Hour or Two, they seem perfectly easy, their Pulse, Respiration and Heat, regular and moderate, and if ask'd, they will tell you they are much better; but in a little Time, the Scene is altered without any manifest Cause, all the Symptoms recurring with double Violence, such as vast Anxiety and Oppression about the Praecordia, intense Heat in the Bowels, a deep and labouring Respiration, interrupted with frequent Sighs; but these Exacerbations are most common towards Night, tho' not so regularly and constantly so, as to constitute the Fever a regular Remittent. A Yellowness of the Eyes and Tongue coming on about the Fifth or Sixth Day, has always been a fatal Symptom in those I have seen, and they seldom reach the Ninth Day alive: In general, these that outlive the Ninth Day, get over it; tho' I have heard of, some who have lingered a Fortnight or more, and died at last, but that was where no Assistance from Medicine was used. The Body is generally costive for the first Five or Six Days, unless any opening Medicine has been given, on the Use of which, or a loose Stool from a Clyster, the Patient generally finds great Relief. I have not seen any who have had a Subfultus Tendinum, or much Tremor in the Hands, but several, whose Tongues have trembled much upon being put out to look at; nor have I observed any petechial Spots, but these are hardly visible on Negroes, and I have never seen any white Person, who had the Disorder in so violent Degree as it is common among the Negroes, nor have I attended any white Person that died of it, except one Woman, whose Condition (being then in Childbed) might prevent the Eruption of these Spots, and her I did not see the Three last Days of her Illness.

This is a pretty exact Description of the Distemper, taken from too many who have fallen Sacrifices to its Malignity; and if compar'd with Dr. Pringle's Account of the Hospital Fever, or all Distempers, or with Fluxum's, of the malignant putrid Fever, it will be apparent, that they are nearly related, if not the same Distemper, allowing for the quicker Progress of the Distemper here, from the Heat of the Climate.

It is certainly more infectious, and more Fatal among Negroes, than among white People, for which several Reasons may be assign'd; as first,

the nasty, close, crowded Places they generally lie in; next, their natural Temperament, and Habit of Body, more subject to putrid Diseases than the Whites, which is obvious from the very rank noisome Smell of their Bodies, shewing their Humours to be nearer a State of Putrefaction, than those of the white People; and lastly, their gross putrescent Diet of Pork and Hog's Fat, uncorrected with Vinegar or spirituous Liquors. This Disorder (as I have been told) has several Times appeared in this Province, and at it's first breaking out, made terrible Havock among the Negroes, sometimes passing under the Name of the Yellow Fever, and at other Times, under the more general Denomination of a malignant One. Medical Writers do not seem to be agreed on their Notions of Malignity; some of them, particularly Dr. Sydenham, ascribe it to hot and spirituous Particles in the Blood and Humours; others (especially among the Ancients) to something inexplicable, et quasi TO THEION; but the Moderns, especially Pringle, seem to think it nothing else than an incipient Putrefaction in the Humours of the Body: And when we reflect that malignant Fevers, such as the Jail Disease, or Hospital Fever, and even the Plague itself, not only may, but often do in Fact, arise from the putrid Effluvia of Filth and Naisiness in Jails, or crowded Ships, of Sores, Mortifications, and other noisome Distempers in Hospitals, or the Corruption of dead Bodies in hot Climates, we cannot help concluding, that most (if not all) Kinds of Malignity, are owing to putrid Particles entering our Bodies, either with the Breath, or even thro' the Pores of the Skin, and mixing with our Blood and Humours, which they endeavour to assimilate to their own Nature, by tainting them with a putrescent Quality. And this Conjecture seems to be confirm'd, from the most approved and successful Methods of Cure used in malignant Fevers, and the various Symptoms attending them, which are all easily and naturally deducible from Putrefaction. But as a Disquisition into the Nature of malignant Symptoms, and their Connection with the general Cause here assign'd, would lengthen out this Essay, perhaps already too tedious for a Publication in a News-Paper, I shall confine myself now to the Method of Treatment, most agreeable to Reason, and the most salutary from Experience: And this consists of Two Parts, the Prophyladick and Therapeutick, or Preservative and Curative.

For the first, when any Slave is taken with the Symptoms of this Fever, let all the rest be kept as much as possible from him; let them be removed to some other House; if in the Summer, a Barn will do; the more airy and cool the better; let them have plenty of rough hard Cyder to drink at their Meals, and every Morning give each of them a Glass of Spirits well impregnated with Bitters, such as the Black Snake Root, Camosile Flowers, Gentian, Wormwood, and Rue, but above all the Peruvian Bark, universally allowed to be the strongest Antiseptic in all the Materia Medica. Let the Patient's Room be kept clean and well aired, and frequently strewed with fresh gathered Aromatick Herbs, and let Tar be kept soaking at the Door, and where Cyder is not to be had, let the Negroes drink tart Water for their common Drink. By this Method the Progress of the Disorder was stop'd in some Families where it had made it's Appearance, and even the Attendants on the Sick were preserv'd from Infection.

In the Cure of the Sick, begin with a gentle Vomit, administered as soon as the Person complains, and if that does not work downwards as well as upwards, let the Bowels be emptied, and kept open, either with repeated emollient Clysters, or gentle Catharticks, such as the Cream of Tartar and Manna, Glauber Salts, or Senna and Rhubarb, to be repeated occasionally thro' the whole Course of the Disorder; for a regular Crisis is not to be expected, and if any such does supervene it is generally by Stool. Let the Patient drink plenty of Sage or Balm Tea, with the Spiritus Nitri dulcis, or Tamarind Water. A diaphoretick Mixture, made with a Drachm of the pulvis Contrayerva; Camph; and an Ounce of the Spiritus Mindereri, to

Five Ounces of Sage Tea, to be taken by Two Spoonfuls at a Dose, during the Exacerbations of the Fever, and indeed every Two Hours throughout the Night, and some Preparation of the Bark in the Forenoons. I at first tried the Decoctum Peruvianum of Dr. Pringle, but thought it less effectual, and therefore changed it for the Powder of Bark alone, of which I have ordered Half a Drachm Three or Four Times in the Forenoon. And in this Fever, where there is a quick low Pulse, no Symptom of Inflammation, and little Drought or external Heat, I have neither seen, nor can apprehend, any Danger from the free Use of that noble Specifick; but am well convinced, from repeated Experience of it's strong antiseptic Qualities, that it is both the best Preservative, and the most certain Cure, in all putrid Diseases whatever, and therefore should not hesitate a Moment to give it the Preference to all other Medicines, for both Intentions, even in the Plague itself.

The Evacuant that I have most commonly used in the Beginning of these Fevers, has been the James's Powders, which I think preferable to any other that I know, because it operates mildly the first Dose or Two both upwards and downwards, and with the Assistance of the above diaphoretick Mixture, given in about Three Hours after the Powder, generally disposes the Patient to a moderate Sweat, which, if equal, universal, and attended with a moist Tongue, is always serviceable; but after the second Dose, it seldom purges, except the Dose be much increased, which I have never ventured to do, to above Two thirds of a Paper, but have, after the second, or at most the Third Dose of the Powder, kept the Body open with Clysters, or the milder Catharticks as above. The James's Powders, and other Evacuants, I have generally given in the Evening, and the Bark in the Forenoons. As the Patient's Strength and Spirits are generally much sunk, I have allowed them a little Wine in their Gruel, and Wine Whoy, when I wanted to promote a Sweat. Bleeding I have never used, nor think it needful, unless with a strong full Pulse, the Symptoms run very high at first, which is seldom the Case even in robust Habits. Blisters in the Beginning are pernicious, and in the State useless; but towards the Decline, when the Solids grow torpid, the Circulation languid, and the Spirits effete, they may be used with Advantage.

This is what has occurred to me in the Treatment of this Disorder, and that this Publication may be of some Service to those People, who are so unhappy as to be seized with the malignant Fever at Places distant from any Physician, is the sole Aim, and Wish of

Your humble Servant, BENEVOLUS.

LONDON, April 20.

THE Number of Bills which received the Royal Assent Yesterday, was sixty-nine. Both Houses were prorogued to the 21st of June, after a Speech from his Majesty, conceived in these most gracious Terms.

My Lords and Gentlemen,

I CANNOT put an End to this Session of Parliament, without returning you my Thanks for the prudent and salutary Measures which you have taken to extend the Commerce, and to secure the Happiness, of my Kingdoms.

The Assurances which I have received of the pacific Disposition of the several Powers with whom we were lately at War, and of their Resolution to adhere inviolably to the Terms of the late Treaty, promise the Continuance of Peace abroad; and the firm and temperate Exertion of your Authority, joined to the constitutional and public-spirited Conduct which you have manifested on every Occasion during the present Session, will, I trust, establish at Home due Obedience to the Laws, Reverence to the Legislature, and Domestic Union.

Gentlemen of the House of Commons,

I thank you for the Supplies which you have so cheerfully and unanimously granted. The simple

Vertical text on the left margin containing various notices and advertisements, including 'The Doceaded', 'Mr. GREEN', and 'Proprieth'.

Provided you have made for the several Services recommended to you, and especially for maintaining my Fleet in a respectable State, will, I am confident, preserve to this Nation its proper Weight and Influence, and give Strength and Security to all my Dominions.

The wise Regulations which have been established to augment the publick Revenues, to unite the Interests of the most distant Possessions of my Crown, and to encourage and secure their Commerce with Great-Britain, calls for my hearty Approbation.

Your regard to public Credit, in discharging a part of the heavy Debt contracted and unprovided for during the late War, without imposing on this Kingdom the Burthen of any new Taxes, is particularly pleasing to me, from the tender Concern which I feel for my People.

My Lords and Gentlemen,

It is the proper Employment of this Season of Tranquillity, to consider of the most effectual Means for Perfecting those Works of Peace, and Plans of public Utility, which have been so wisely and happily begun.

I recommend these important Objects to your Consideration during the Recess. You may depend upon my constant Endeavours for the Success of these good Purposes; as I shall ever deem it my truest Glory, to employ that Power with which the Constitution hath entrusted me, in promoting your real Interests, and lasting Happiness.

Ward*; and it is said that *Robert Palk*, Esq; is appointed Governor in his room. *Mrs. Vandermar* and her Children are arrived in the *Plassey*. The *British King*, *Pigou*, and *Pitt*, *Jackson*, from *London*, are both arrived in the *East-Indies*.

By some private Accounts received from the *East-Indies* we hear, that after the *Nabob* had taken the English Prisoners to *Patna*, he put them into a Dungeon, and ordered two of them to be brought out, and put to Death in the most cruel Manner; which coming to the Knowledge of the rest, they resolved to defend themselves to the last Extremity; on which the *Nabob* had the Place set fire to, and they were all suffocated.

Sentence of a General Court-Martial, held at the *Horse-Guards*, on Saturday the 14th, and continued by several Adjournments to Wednesday the 18th of April, 1764, for the Trial of the *Hon. Major-General ROBERT MONCKTON*, late Commander in Chief of his Majesty's Forces at the Reduction of the Island of *Martinico*, on a Complaint preferred against him by *Collin Campbell*, Esq; heretofore Major Commandant of the 100th Regiment of Foot.

The Court is of Opinion, that the Charge and Complaint of *Collin Campbell*, Esq; against the *Major-General ROBERT MONCKTON*, is altogether unsupported by Evidence, and in some Points expressly contradicted by the Complainant's own Witnesses, and doth therefore most honourably acquit the said *Major-General MONCKTON* of the same, and every part thereof; and the Court is farther of Opinion, that the said Charge and Complaint is groundless, malicious, and scandalous in the highest Degree, and tending

not only to injure the said *Major-General MONCKTON* in his Character, but to hurt the Service in general, as it must greatly affect every Officer who may have the Honour of commanding a Body of his Majesty's Troops, when he reflects that his Character and Reputation are liable to be thus publicly attacked, by a Person who has been dismissed his Majesty's Service with Ignominy.

It is likewise the Opinion of this Court, that the Complainant, *Collin Campbell*, Esq; has by many Falsities, imposed upon his Majesty's Secretary at War, in order to obtain a Court-Martial.

Major-General MONCKTON, who so bravely distinguished himself at the taking of *Martinico*, it is said, will soon be created a Knight of the Bath, and a Lieutenant-General.

NEW-YORK, July 2.

Extract of a Letter from the *Little Falls*, dated June 18.

On Saturday last 18 Companies of the Militia, amounting to about 2000 Men, were reviewed at *Mr. Brant's*, about a Mile above *Fort Henrick*, by *Sir William Johnson*, who, after the Review, entertained them with a large Ox, and a Number of Sheep roasted whole, and gave them a Barrel of Rum to drink his Majesty's Health. There were a Number of Indians present, amongst whom were some of the Senecas; who, on their Return home, will tell their People, that the English are coming in vast Bodies towards the Frontiers; this will undoubtedly have a good Effect, in engaging them to keep firm and steady to their late Convention with *Sir William*, fearing that these People should march against them in case of a Revolt. Yesterday Evening *Sir William* set out for *Niagara*, accompanied by his Son-in-Law *Mr. Guy Johnson*, and *John Duncan*, Esq; of *Schenectady*, with 30 of the Chiefs and most noted Warriors of the lower Castles of the *Mohawks*, who insisted on accompanying *Sir William's* Person in particular in his Voyage. They sang the War Songs, and danced, taking *Sir William* by the Hand with the most convincing Proofs of their Attachment.

Among the Bills passed last Session of Parliament, are the following, viz.

A Bill to allow the Export of Rice from *Georgia* and *South-Carolina* to the *American Colonies*, on paying the same Duty as in *England*.

A Bill to encourage the Whale Fishery in the *Gulph* and *River of St. Lawrence*, and on the Coast of the *American Colonies*.

A Bill to prevent Paper Bills of Credit hereafter to be issued, from being declared to be a legal Tender of Payment in the *American Colonies*.

A Bill to grant a Bounty on the Import of Hemp and undressed Flax from the *American Colonies*.

A Bill for granting certain Duties on Goods in the *British Colonies*, for the Support of Government.

PHILADELPHIA, July 5.

By *Captain Claxton*, from *Turks Island*, we are informed, that on the First Day of June a French 74 Gun Ship, with a *Sloop*, *Ship*, and *Xebecque*, came there from *Cape Francois*; tossed off our People (about 200) that were making Salt, plundered and burnt their Cabins, and carried them, with the English Vessels (about 9 Sail) to the Cape, where they were kept one Night, and then ordered to go where they pleased; only not to return to *Turks Island*; that the French brought a Number of People with them, among which some *Indians*, said to be designed to build a Fort; and that they had erected a light-house there.—One of the Vessels, we hear, went immediately to *Jamaica*, to inform the *Admiral* of what had happened.—Our Vessels, as well as the People on the *Island*, were robbed of sundry Things by the French.

SCHEME of a LOTTERY, For the Use of Talbot County School.

THERE being a Necessity for making considerable Repairs to the Buildings of this School, and also some Addition thereto for the Master's Conveniency, and the Funds appropriated to it's Use being already charged with a heavy Debt: The Visitors, unprovided with any other Means, take Leave to propose the Method of Lottery, to raise the Sum of Three Hundred and Sixty Pounds, for answering the Purpose above-mentioned.

This School, thro' the Abilities and extraordinary Assiduity of the present Master, has for many Years, even under great Disadvantages, been look'd upon as perhaps the best and most frequented in the Province: And should this Scheme succeed, and the Buildings be render'd more commodious, by having the School-Room enlarged, and the upper Chambers well fitted for the Reception of Boarders, it might soon become still more extensively useful than it has hitherto been.

INSTRUCTION, or right Education, is universally confessed to be one of the greatest Advantages in Life. It is the best and truest Improvement of our rational Faculties; and those useful Arts and Sciences, by which the Condition of Mankind has been rendered more happy and commodious, are, in a great Measure, owing to it. It purges off the Dross of Slavery and Superstition, and bears a friendly Aspect on Liberty, and the social Interests of Mankind.

SOLICITOUS to secure this noble Advantage, and actuated, entirely, by Sentiments of Tenderness and Regard for the rising Generation, the Visitors flatter themselves that every Lover of his Country, and Friend of Mankind, will warmly promote a Lottery so laudable in it's Intention, and countenance, with his Favour and Indulgence, THIS NURSERY of SCHOOL-LEARNING.

THE SCHEME:

Table with 4 columns: Prizes, Dollars, Dollars, Dollars. It lists various prize amounts such as 500, 300, 150, 100, 75, 50, 20, 10, 8, 6, and 3000, along with their respective counts and descriptions like 'First drawn Blank' and 'Last Ditto'.

706 Prizes, 894 Blanks.

1600 Tickets at 4 Dollars each, 6400 15 per Cent £. 360

THIS Scheme is apparently more promising to the Adventurer, than any hitherto offered; there being not many more Blanks than Prizes, and the Deduction only 15 per Cent: And as the Visitors have been much encouraged to propose this Lottery, they have Reason to hope it will speedily be drawn.

The Reverend John Gordon, Messieurs Jacob Hindman, Matthew Tilghman, Jonathan Nicols, and Henry Hollyday, Visitors; Mr. James Lloyd Chamberlaine, and Mr. William Nicols; who are appointed MANAGERS, will give Bond and be on Oath for the faithful Execution of this Trust.

The Drawing to begin as soon as the Tickets are sold, at Talbot Court-House, in the Presence of a Majority of the Managers, and such of the Adventurers as chuse to attend, of which the Public shall have timely Notice in the Maryland Gazette, and a List of the Prizes shall also be published immediately after the Drawing.

All Prizes not demanded within Six Months after Publication, will be deemed a generous Benevolence to the School, and applied accordingly.

Tickets may be had of any of the Managers. All Kinds of Money now in Circulation will be received for Tickets, and paid in Discharge of the Prizes.

ANNAPOLIS: Printed by Jonas Green and William Bind, in Charles-Street. All Persons may be supplied with this GAZETTE at 12s. and 6d. per Year. ADVERTISEMENTS of a moderate Length are inserted for 5s. the First Week, and 1s. each Time, after: And Long Ones in Proportion.

An Act to prevent PAPER BILLS OF CREDIT, hereafter to be issued in any of his Majesty's Colonies or Plantations in America, from being declared to be a legal Tender in Payments of Money; and to prevent the legal Tender of such Bills as are now subsisting, from being prolonged beyond the Periods limited for calling in and sinking the same.

WHEREAS great Quantities of Paper Bills of Credit have been created and issued in his Majesty's Colonies or Plantations in America, by virtue of Acts, Orders, Resolutions, or Votes of Assembly, making and declaring such Bills of Credit to be legal Tender in Payments of Money: And whereas such Bills of Credit have greatly depreciated in their Value, by Means whereof Debts have been discharged with a much less Value than was contracted for, to the great Discouragement and Prejudice of the Trade and Commerce of his Majesty's Subjects, by occasioning Confusion in Dealings, and lessening Credit in the said Colonies or Plantations: For Remedy whereof, May it please Your most Excellent Majesty, that it may be enacted, And be it enacted by the King's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, That from and after the First Day of September, One Thousand Seven Hundred and Sixty-four, no Act, Order, Resolution, or Vote of Assembly, in any of his Majesty's Colonies or Plantations in America, shall be made, for creating or issuing any Paper Bills, or Bills of Credit of any kind or denomination whatsoever, declaring such Paper Bills, or Bills of Credit, to be legal Tender in Payment of any Bargains, Contracts, Debts, Dues or Demands whatsoever; and every Clause or Provision which shall hereafter be inserted in any Act, Order, Resolution, or Vote of Assembly, contrary to this Act, shall be null and void.

And whereas the great Quantities of Paper Bills, or Bills of Credit, which are now actually in Circulation and Currency in several Colonies or Plantations in America, emitted in Pursuance of Acts of Assembly, declaring such Bills a legal Tender, make it highly expedient that the Conditions and Terms, upon which such Bills have been emitted, should not be varied or prolonged so as to continue the legal Tender thereof beyond the Terms respectively fixed by such Acts for calling in and discharging such Bills; be it therefore enacted by the Authority aforesaid, That every Act, Order, Resolution, or Vote of Assembly, in any of the said Colonies or Plantations, which shall be made to prolong the legal Tender of any Paper Bills, or Bills of Credit, which are now subsisting and current in any of the said Colonies or Plantations in America, beyond the Time fixed for the calling in, sinking, and discharging of such Paper Bills, or Bills of Credit, shall be null and void.

And be it further enacted by the Authority aforesaid, That if any Governor or Commander in Chief, or Member of the Council, for the time being, in all or any of the said Colonies or Plantations, shall, from and after the said first Day of September, One Thousand Seven Hundred and Sixty-four, give his Assent to any Act or Order of Assembly, contrary to the true Intent and Meaning of this Act, every such Governor or Commander in Chief, or Member of the Council, shall, for every such Offence, forfeit and pay the Sum of One Thousand Pounds, and shall be immediately dismissed from his Government, and for ever after rendered incapable of any public Office or Place of Trust.

Provided always, That nothing in this Act shall extend to alter or repeal an Act passed in the twenty-fourth Year of the Reign of his late Majesty King George the Second, intituled, An Act to regulate and restrain Paper Bills of Credit in his Majesty's Colonies or Plantations of Rhode-Island and Providence Plantations, Connecticut, the Massachusetts Bay, and New Hampshire, in America, and to prevent the same being legal Tenders in Payments of Money.

Provided also, That nothing herein contained shall extend to be construed to extend; to make any of the Bills now subsisting in any of the said Colonies a legal Tender.

LONDON, May 2. WE hear a certain General Officer, who was lately turned out of his Regiment, and who is adored by the Army for his Bravery, Humanity and Integrity, has begged of all his Friends not to express the least Mourner or Dissatisfaction on his Account, as he is content with having served his Country in his Profession, and in Parliament, without enjoying the smallest Gratuity.—A rare Example of Moderation, Virtue and Disinterestedness. May it be imitated!

It was on the same Day that the Parliament was prorogued, that Mr. (late General) Conway, received his Letter of Dismission. It has been said, that this Gentleman, upon one Question, voted with the Minority in Parliament.

The following Letter was sent by the Corporation of Thetford to General Conway:

To Lieutenant General CONWAY, The Mayor, Aldermen, and Corporation of Thetford, desire to return you our most unfeigned and grateful Thanks, for your late spirited, conscientious, and unbiased Conduct in Parliament; particularly on that most important Question to the Liberties of us all, the Seizure of private Papers by the Warrant of a Secretary of State; a Question which remaining undecided, must make every Englishman tremble; and which, till declared to be illegal, leaves the glorious Revolution imperfect.

Your Behaviour, Sir, on that Occasion was worthy of the unblemished Integrity, which you have always manifested. Superior to Parties or Opinions, you have demonstrated your civil Courage to be equal to your Military; you have fought the Battles of your Country against domestic and foreign Enemies.

We know your Services; and we have heard that they were particularly recommended to Favour by that great Judge of martial Merit, Prince Ferdinand. Those Honours, Sir, cannot be taken from you. Some Sorts of Rewards may be carried you by selfish and designing Ministers, who may know that you scorn to support unconstitutional Measures; but your Country (and may it continue!) this free Country, in whose Cause you have fought from the noblest and most disinterested Motives, will join in conferring the best of Rewards—its Applause. There are Seasons, when it would be a Disgrace not to be disgraced. Continue to act as you have done; and may every Borough in the Kingdom be as worthily represented as the Corporation of Thetford. Dated at our Guildhall, this 28th of April, 1764.

Mr. Conway's Answer. To the Mayor, Coroner, and Corporation of the Borough of Thetford, in Norfolk. London, April 30, 1764. Gentlemen,

I BEG you to accept my most grateful Acknowledgment of the singular Honour conferred upon me by your Letter of the 28th Instant, to which I am sensible I can have no Claim, but that of having acted from the Dictates of my own Honour and Conviction, and of that firm and faithful Attachment to his Majesty's Person and Interest, with which I have endeavoured to do my Duty during a Course of many Years Service in my Profession. To that alone I must owe any Degree of Approbation my small Merit could obtain from those great Princes under whom I have had the Honour to serve. And if any Part of my Behaviour in a civil or military Capacity can have entitled me to your Applause, you may be assured, Gentlemen, that as it was my real Ambition to deserve the Favour of my Constituents, so it shall be my constant Object to maintain it, by a strict Adherence to that Conduct and those Principles which you recommend.

I have the Honour to be, With the highest Gratitude and Respect, Gentlemen, Your most obedient, And most devoted Servant, H. S. CONWAY.

The Grafton and Lenox Men of War, now coming home from the East-Indies, have on board a very considerable Quantity of Diamonds, besides Specie, belonging to the rich Gallion taken at the Manillas, which is likewise coming home along with them.

Many Gentlemen well versed in the commercial Affairs of North-America, are of Opinion, that the establishing a Currency of Gold and Silver, through the several Colonies of America, will in the End be extremely beneficial, yet at first setting out, to call in the Paper Money so long used, will be attended with Difficulties almost insuperable, both to the Merchant and Planter, as well as occasion a considerable Difference in the present Course of Exchange.

It is said the Civil List is settled at 800,000 l. and the Saving by altering the Method of Feeding will be appropriated thereto.

Yesterday was brought to the Bank from Portsmouth, in two Waggon, guarded by a Party of Sailors, about 3 Tons of Money, among which was a considerable Quantity of Gold, brought home in the Deptford Man of War from the Havannah. The above Ship brings Advice, that the English Affairs in that Island will not be so soon settled as was expected.

It is reported, that no less than seven General Officers are dismissed from their Employments, on Account, as it is said, of their having displeas'd some great Men, by their late Conduct during the sitting of a respectable Assembly.

It is said that Madam Pompadour has died possessed of upwards of Three Millions Sterling, one Half of which, by the Law of France, will go to her Husband, who is yet living. [Her remains very High Honour for Living.]

Some Letters from Paris say, that three were found in a strong Box belonging to Madam de Pompadour, since her Death, above 50,000 Louis d'Or, in Specie, and a Cabinet of Jewels of immense Value.

May 23. Yesterday Morning, about 10 o'Clock, the important Cause depending between Mr. Beardmore and the

King's Messengers, came on before the Right Honourable the Lord Chief Justice Pratt, at Guildhall; in the Course of which it appeared, that Mr. Beardmore had been taken into Custody on the 12th of November, for a supposed Connection with the MONITOR, and confined till the 17th, two Days of which he was not suffered the Use of either Pen or Paper, nor permitted to converse with any of his Friends, but in the Presence of the Messenger; nay, it was mentioned, that when Application was made by the then Lord Mayor of London to bail him, the proper Officer who was to examine him, neglected it on this confident and reasonable Account, that the MONITOR were much too voluminous to be inspected.

Mr. Jonathan Scott, the former Publisher of the MONITOR, in order to prove the Justice of Mr. Beardmore's Commitment, presented a Paper to the Court, setting forth that this Gentleman, together with the Rev. Mr. Entic, Dr. Shebeane, and Others, were the Authors; that the two latter had a Salary of 100 l. a Year for their Writings; and that he himself (Mr. Scott) was allowed the Profits of the Sale for his Trouble, after the necessary Expences attending the Publication were discharged.

Such being the Ground Work of the Charge and Defence, the Examination of Witnesses, and the Pleadings on both Sides, continued till about a Quarter after Four, when it appearing incontestably evident, that Mr. Beardmore had suffered very considerably, in being confined for so long a Space at the Beginning of Term, when he had a Number of important Causes to conduct; and his principal Clerk, who transacted the Business in his Absence, being also taken up by the same Warrant with himself, and in the Custody of another Messenger, the Lord Chief Justice proceeded with his usual Candour and Good Sense to give the Charge, in which he observed, that the Seizure of Mr. Beardmore's Person and Papers was illegal; and that the Secretaries of State should always be particularly careful to hear with their Ears open, and see with their own Eyes: He recommended Moderation, however, in the Damages, as the Messengers were only Servants, and, consequently, could not be considered as intentionally culpable.—The Jury then withdrew, and returned in about 30 Minutes, with a Verdict of 1000 l. in Favour of Mr. Beardmore, highly to the Satisfaction of the Court, and the Wishes of the Spectators, who testified their Approbation with the loudest Bursts of Applause. The Council for the Plaintiff were Mr. Serjeant Glynn, the Recorder of London, Mr. Stowe, Mr. Dunning, and Mr. Gardner; and for the Defendants, the Attorney, and Solicitor General, Serjeants Nares and Davis, and Mr. Wallis.

The Trial between Lord Halifax and Mr. Beardmore will come on next Michaelmas Term.

Letter from Banda-Naira, one of the Molucca Islands, situated at 4 Degrees, 30 Minutes South Latitude, and about 39 Miles from Ambony, dated September 12, 1763.

The first of this Month, at 5 in the Afternoon, we had the most terrible Shocks of an Earthquake that have been felt here for Half a Century past. The first Shock lasted for more than four Minutes, and was so violent, that no Body could stand upon their Feet. All the Inhabitants ran out of their Houses, but were no sooner got into the Street, than they fell to the Ground almost Motionless. The same Evening, and the following Night, we had sixteen Shocks more, but not so violent as the first. At the first Shock the Sea fell suddenly 3 Fathoms, and in less than 3 Minutes swelled with inexpressible Rapidity, and overflowed a great deal of Land.

The Castle is split in several Places. There are so many Cracks in Houses of the Governor and Sub-governor, the Powder Magazine, the Board of Trade and War-Office, the City Gates, the Armourers Office, &c. that all these Edifices are untenable. The new Church, which was not yet finished, is cracked on every Side. Above 3-4ths of this Island, on the North Side, are nothing now but Heaps of Ruins, and without foreign Help the Island cannot recover from this Disaster in less than 25 Years. Belgia Castle is split in several Pieces. Incredible Destruction has been made in the hilly Country of Louthair, and in the Island of Poul-Aly, and the Angles of Revenge Castle are almost entirely ruined. The Vulcano Papenberg cast up Stones of a prodigious Size, which destroyed Abundance of Spice Plantations. The Shock was as violent at Nigra towards the Sea, but the Damage was not so considerable. The Earthquake was less violent in the Isles of Pirang and Roosengain, Mount Oconong-Apy crumbled down in several Places, and is much sunk.

Though our present Condition is very dismal, yet no more than seven Persons have perished in this Disaster. The Houses are not tenable, so that most of the People live in Tents; but as the Earth still quakes, and we hear a Noise under Ground like the firing of Cannon at a Distance, we fear there will be occasion to give a 2d Supplement to this Account.

The Island of Banda is very subject to Earthquakes. Valentier, in the third Volume of his Description of India, gives an Account of the dreadful Shocks that Island felt in 1629, 1630, 1683, 1690, and 1696, on which occasions Mount Oconong-Apy emitted terrible Flames, and cast up huge Stones.

May 8. It was reported on Saturday, that an eminent Dutch Merchant had failed at Amsterdam, to the Value of 200,000 l. Sterling, on account of some Losses sustained in the East-Indies.

By a Letter just received from Lisbon we learn, that an English Vessel from the Havannah, with 50,000 Dollars on board, having put into the Western Islands, is there detained, on Pretence of Smuggling with the Portuguese; which it seems is Seizure of Ship and Cargo.

May 23. Yesterday, while several Bags of Dollars were putting into a Wherry out of a Ship just come from North-America, in order to be carried on Shore, one of the Bags,

containing Nine Hundred and Dollars, by some Accident slipped overboard, and fell into the River. The Druggers are very busy in searching for it; but their Endeavours hitherto have not met with Success.

At the late Meeting at Newmarket, a Gentleman of great Fortune, in one Day lost Ten Thousand Guineas; in two Days more, this Sum was trebled; and on the fourth he judiciously set out for Town, resolving to tempt his Stars no more for that Time; as they were so unfavorable an Aspect.

We hear that a noble Personage won last Week at Newmarket, no less than 40,000 l.

The Spirit of Gaming is now so prevalent amongst the lower Class of People, that a Butcher in Clare-market lost 1000 l. last Week at Newmarket.

Bets are daily making on the Nobleman's riding from London to Edinburgh in 12 Hours, any Time in one Month. The Distance is 402 measured Miles, and the Time allowed 720 Minutes, which is one Minute and near 42 Seconds to a Mile. The Gentlemen of the Turf observe, that the famous Childers, one of the finest Horses ever in England, and who made 27 Feet a Stroke, could not hold out above four Miles at that Rate, which was computed about 30 Miles an Hour; and at present it is computed, the Generality of the best Race-horses in England make only seven Yards, or 21 Feet a Stroke; and considering the Disadvantage of Uphill, Causeways, through the different Towns and Villages betwixt London and Edinburgh, the Undertaking is one of the greatest of the Kind ever known, although it is admitted there may be a Possibility of performing it.

BOSTON, June 28.

We hear from Portsmouth, New-Hampshire, that on Wednesday last an Mr. Shirley of Chester, and another Man were travelling about a Mile from that Place, a Flash of Lightning instantly struck him and Horse dead upon the Spot, and much wounded the other Person; his Cloaths smelt very much of Sulphur, and his Face turned purple, some Papers in his Pocket were scorched, and the Edges of two Dollars melted; his Hair was also burnt off his Head. What is remarkable, the Clap which followed the Flash was not very loud, scarcely heard a Mile from the Accident.

July 2. We are well assured, that the Gentlemen of New-York have contracted with the Manufacturers of this and Connecticut Government, for Fifty Thousand Yards of Woollen Cloths; being determined no longer to wear the British Manufactures of any Kind, which may be had in America.

NEW-LONDON, June 29.

On the 20th Instant was finished the raising Mr. Thomas Lessingwell's Bridge, at Norwich-Landing, standing over Shtucket River; it being the most curious and complete Piece of Architecture, of the Kind, ever erected in America. It is 124 Feet in Length, and 23 Feet from the Water, and the Water 30 Feet deep; having nothing underneath between the Butments to support it, but is entirely supported by the Geometry work above, and is supposed to be strong enough to bear 30 Tons weight. The Work was perform'd by Mr. John Bliss, of Norwich, said to be one of the most curious Mechanicks this Age has produced. It is remarkable the raising this Bridge was completed in about two Days, (it having taken 23 Days to raise the former Bridge) and not a Person hurt, nor the least Accident happening, not even the loss of a Tool.

NEW-YORK, July 9.

One of the Sloops that was carried into Cape-Francois, in Company with Capt. Claxton, by a French Man of War, as mentioned under the Philadelphia Head, arrived here last Monday, and confirms the Account he brought; but we are since credibly informed, that an English Frigate, having Occasion to call at Turk's Island, and observing the French erecting some Works there, ordered them to desist; but they not chusing to comply, the English Commander landed Part of his Crew, killed 23 Frenchmen, and took several Prisoners.

ANNAPOLIS, July 19.

For about Ten or Eleven Days past, we have had a great deal of Wet Weather, and several Thunder Gusts, which has done much Damage to the Harvest on both Shores, many Thousands of Bushels having thereby been entirely Destroyed.

On Wednesday last Week, the Lightning struck the Dwelling-House of Mr. Joseph Cowman at West-River, split one of the Chimnies, tore the Wainscoting of the Room in which the Family were sitting, and killed a Dog lying at a small Distance from them; but did no other Damage.

The same Day the Lightning split a Tree near this Town.

Last Thursday Died in Virginia, Thomas Faber, last Post-Rider between this and Alexandria: He went up to Winchester on some Business, and meeting with a Rattle-Snake he cut it in two with a Hauger; but shortly after handling the Head Part, and viewing the Mouth, it bit him in the middle Finger, which prov'd his Death.

containing Nine Hundred milled Dollars, by some Accident slipped overboard, and fell into the River. The Druggers are very busy in searching for it; but their Endeavours hitherto have not met with Success.

At the late Meeting at Newmarket, a Gentleman of great Fortune, in one Day lost Ten Thousand Guineas; in two Days more, this Sum was trebled; and on the fourth he judiciously set out for Town, resolving to tempt his Stars no more for that Time; as they were so unfavourable an Aspect.

We hear that a noble Personage won last Week at Newmarket, no less than 40,000 l.

The Spirit of Gaming is now so prevalent amongst the lower Clafs of People, that a Butcher in Clare-market lost 1000 l. last Week at Newmarket.

Betts are daily making on the Nobleman's riding from London to Edinburgh in 12 Hours, any Time in one Month. The Distance is 403 measured Miles, and the Time allowed 720 Minutes, which is one Minute and near 48 Seconds to a Mile. The Gentlemen of the Turf observe, that the famous Childers, one of the finest Horses ever in England, and who made 27 Feet a Stroke, could not hold out above four Miles at that Rate, which was computed about 50 Miles an Hour; and at present it is computed, the Generality of the best Race-horses in England make only seven Yards, or 21 Feet a Stroke; and considering the Disadvantage of Uphill, Causeways, through the different Towns and Villages betwixt London and Edinburgh, the Undertaking is one of the greatest of the Kind ever known, although it is admitted there may be a Possibility of performing it.

BOSTON, June 28.

We hear from Portsmouth, New-Hampshire, that on Wednesday last as one Mr. Shirley of Chester, and another Man were travelling about a Mile from that Place, a Flash of Lightning instantly struck him and Horse dead upon the Spot, and much wounded the other Person; his Cloaths smelt very much of Sulphur, and his Face turned purple, some Papers in his Pocket were scorched, and the Edges of two Dollars melted; his Hair was also burnt off his Head. What is remarkable, the Clap which followed the Flash was not very loud, scarcely heard a Mile from the Accident.

July 2. We are well assured, that the Gentlemen of New-York have contracted with the Manufacturers of this and Connecticut Government, for Fifty Thousand Yards of Woollen Cloths; being determined no longer to wear the British Manufactures of any Kind, which may be had in America.

NEW-LONDON, June 29.

On the 20th Instant was finished the-raising Mr. Thomas Leffingwell's Bridge, at Norwich-Landing, standing over Shetucket River; it being the most curious and complete Piece of Architecture, of the Kind, ever erected in America. It is 124 Feet in Length, and 28 Feet from the Water, and the Water 30 Feet deep; having nothing underneath between the Butments to support it, but is entirely supported by the Geometry work above, and is supposed to be strong enough to bear 50 Tons weight. The Work was perform'd by Mr. John Bliss, of Norwich, said to be one of the most curious Mechanicks this Age has produced. It is remarkable the raising this Bridge was completed in about two Days, (it having taken 28 Days to raise the former Bridge) and not a Person hurt, nor the least Accident happening, not even the loss of a Tool.

NEW-YORK, July 9.

One of the Sloops that was carried into Cape-Francois, in Company with Capt. Claxton, by a French Man of War, as mentioned under the Philadelphia Head, arrived here last Monday, and confirms the Account he brought; but we are since credibly informed, That an English Frigate, having Occasion to call at Turk's Island, and observing the French erecting some Works there, ordered them to desist; but they not chusing to comply, the English Commander landed Part of his Crew, killed 28 Frenchmen, and took several Prisoners.

ANNAPOLIS, July 19.

For about Ten or Eleven Days past, we have had a great deal of Wet Weather, and several Thunder Gusts, which has done much Damage to the Harvest on both Shores, many Thousands of Bushels having thereby been entirely Destroyed.

On Wednesday last Week, the Lightning struck the Dwelling-House of Mr. Joseph Cowman at West-River, split one of the Chimnies, tore the Wainscoting of the Room in which the Family were sitting, and killed a Dog lying at a small Distance from them; but did no other Damage.

The same Day the Lightning split a Tree near this Town.

Last Thursday Died in Virginia, Thomas Faber, last Post-Rider between This and Alexandria: He went up to Winchester on some Business, and meeting with a Rattle-Snake he cut it in two with a Hanger; but shortly after handling the Head Part, and viewing the Mouth, it bit him in the middle Finger, which prov'd his Death.

Wanted on Charter, to Load with Tobacco,

61 A VESSEL that will carry about 220 Hogheads. Any Person whom this may suit, is desired to apply to the Printers, who will more particularly inform; as to Terms, &c. Mr. A. MacRae

LONDON, May 5.

THE Citizens of Cork have placed a fine white Marble Statue of Mr. Pitt, as big as Life, in a Niche of their Exchange, with the following Inscriptions:

"In Honour of Mr. PITT, late Secretary and Minister of State to their Majesties King GEORGE II. and III. of Great-Britain, who, in a few Years of his able and upright Administration, restored the Honour of the British Arms, together with the Safety, Influence, and Glory of his King and Country, this Statue is erected by the Citizens of Cork, Anno 1764." This is on the Plate. On another is the following: "Siste Viator upicunque terrarum oriundus. Vera Icon GULIELMI PITT cujus si nomen audies, nihil hic de Fama desideres.

The Venus, Robertson, from New-York to Newry, is towed into Scilly with her Bottom up.

The North-Briton for To-day (which was published Yesterday Afternoon) it is thought will make a great Noise throughout the Kingdom, it containing some remarkable spirited Observations on an alarming Encroachment on the Liberty of the PRESS in a late Act which has hitherto very unaccountably escaped the Notice of the People.

Letters from Madrid by the Dutch Mail, which arrived this Day, inform us, that the Ministry have under Consideration, a Plan for making all the Ports in the West-Indies free Ports.—Montesquieu seems to think that this would be of Advantage to the Crown. See Spirit of Laws, XXI, 19.

Part of a Letter from Paris, dated April 17.

"A short Time before Madam Pompadour's Death, being sensible of her approaching End, she wrote to her Husband, and begged to see and to be reconciled to him: But he wrote back for Answer, that he forgave her, but could not prevail on himself to come to a Court where he had once been forbid. She then spent great part of her Time in settling her worldly Affairs, and has left great Legacies; among which are 10,000 l. Sterling to the Carthusians, where her Body is to be interred; a large Sum to the Poor of the Parish; and another to portion out young Maidens. She has also left Annuities for Life to all her Servants. The King visited her every Day till within two Days of her Death, when having received the Extreme Unction, and gone through all the Ceremonies of the Church, she declined seeing his Majesty, and desired to have the few remaining Hours to recollect herself. Two Hours before her Death, she desired two Ladies, who constantly attended on her, to leave her, and go to one of her own Houses, as they would probably thereby prevent the Mortification of being sent away on her Death; this they declined, but she again urged it, and told them, that she had ordered one of her Coaches to take them thither, and that they would find, on her Decease, that she had not been unmindful of them; which proved to be true, as she has left them handsome Annuities for their Lives. She was in the 43d Year of her Age."

His Majesty's Ship Dolphin, and Tamar Sloop of War, are now sheathing with Copper; the former at Woolwich, which it is said will be finished about Monday next; and the other, at Deptford, will not be finished quite so soon; the Hon. Capt. John Byron (Brother to Lord Byron) has the Command of the Dolphin, and Capt. Moutat that of the Tamar; they are to proceed in Company, but their Destination is not made public.

It is conjectured that the above two Ships of War are to proceed to the East-Indies; and that Capt. Byron will assume the Command of his Majesty's Fleet stationed in that Part of the World, as Commodore and Commander in Chief.

On the other Hand, it is said, that they will proceed to North-America, with proper Artists on board, to take a general Survey of the Coasts, Gulphs, Rivers, and every other Thing that may relate to a perfect Knowledge of that vast Region, and its Navigation, in Imitation of Le Neptune Francois.

On Tuesday and Wednesday part of Lord Clive's Baggage and naval Stores, were shipped at the Custom-house Key for India.

May 8. It is said Lord Clive will set out in a few Days for his Seat in Shropshire, in order to settle his domestic Affairs there before his Departure for Bengal.

We hear that upwards of 150 young Gentlemen are preparing to embark as Volunteers under Lord Clive in the East-Indies, having first given Security, that they are not to be concerned, directly or indirectly, with any Sort of Trade during their Residence in those Parts.

The Loss sustained by the Dutch in the East-Indies, is now esteemed superior even to that of the English in those Parts.

It is still reported that a great Number of General Officers are to be dismissed, and that the Army will be new modelled.

Extract of a Letter from an English Gentleman on his Travels; dated Rome, April 14, 1764.

"The Kingdom of Naples and this State have been in the utmost Distress, for many Weeks past, on account of a most extraordinary Scarcity of Corn. At Naples they are in some Measure relieved; but we are still here in a doubtful State, and Numbers of Poor perish daily for Want, not in this Capital, but in the adjacent Towns and Villages."

May 10. It is said, that a certain Hon. Personage, lately appointed to a most considerable Command in India, among several other wise Measures he is pursuing, wrote circular Letters to several old and brave Officers, who have formerly served under him, to know if they are willing to embark again; by which it seems he is determined to leave no Means unused that may any Ways contribute to the Success of this important Command; and there is no doubt but his Popularity will induce them readily to re-enter the Service.

It is said, Twenty-one Commissions in the India Service, have within these few Days, been filled up by a great Personage, one of whose Claims is, it seems, to appoint himself all military Officers under his Command.

The Carion, a new Ship, in the Government's Service, is now taking in her Stores at Gravesend, and will sail in a few Days for North America, in order to take a complete Survey of the British Dominions on that Continent; several able Draughtsmen are to embark in the said Ship. They are to begin with an accurate Inspection of the Coasts of Newfoundland, the Gulph of St. Lawrence, the Shores of Labrador and Hudson's Bay, and proceed gradually to our next Southerly Settlements. In the Course of the Undertaking some new Attempts will be made towards settling the true Longitude of the most remarkable Places along the Continent.

BOSTON, July 9.

By a Vessel arrived at Piscataqua from Halifax, we hear there are 6 Men of War at the last mentioned Place, and that some of them were soon to sail on a Cruise, for the Protection of Trade.

Last Wednesday Evening we had here as severe a Storm of Thunder and Lightning as has been known for many Years past: It began about Half after 7 o'Clock, and lasted till Half after 12. The Wind began at S. the Cloud first arose in the S. W. and went round to the Northward and Eastward, but the Wind shifting from S. W. to N. and N. N. E. brought the whole Body of the Cloud right over us, when the Heavens appeared in one continued Blaze; the Lightning was observed by many on most of the Electrical Points in this Town, which appeared in different Forms from different Points, for on some it seemed like a Number of Rays in the Form of a Cone reversed, and on others like small Globes of Fire sparkling and discharging themselves in the Air.—It struck a Spar at the North Part of the Town, in which were a Number of large Spikes, and shivered it from the Top to within about three Feet of the Bottom, and then went through the Door and Window of a House (which were opened) to a Window Hook whose Point hung directly opposite to the Spar, at the Distance of about 30 Feet, and from thence down the Side of the House, ripping off the Clayboards to the Sides of the Cellar Door, which it split in Pieces, and from thence to the Ground. There were several Persons in the Room, and a little Girl was thrown against the

Wall, but through the Goodness of Divine Providence none were hurt.—There are no Points erected within Half a Mile of the House, excepting on the Steeple of Dr. Cutler's Church, and there the conducting Wire is broke off about Half way down.

PROVIDENCE, July 7.

His Majesty's Schooner Magdalene, Captain Dougdale, arrived at Boston a few Days ago; since which five Vessels from the Eastward have been taken Possession of by her, &c.

NEW-YORK, July 16.

On Thursday Evening arrived the Sloop Success, Capt. Francis Johnson, in 23 Days from Pensacola, by whom we learn, that there has been no Loss of any of our People, by the Indians, in those Parts, since the Arrival of Major Loftus, in going up the Mississippi, on the 21st of March. So that the Report lately circulated here, that many of our People have been cut off by the Indians at Pensacola, must have taken its Rise from the above Affair, or be entirely false.

The People there, are in Hopes that New Orleans will be given up to the Spaniards, with whom they expect to carry on a profitable Trade; at present their Trade is dull, being chiefly confined to the Indians, and obstructed by two Men of War on that Station, the Princess of 40 Guns, Capt. Lucas, and another, who have seized 3 or 4 Vessels going up the Mississippi, and prevented a Spanish Vessel from Trading, which lately put in there in Distress, having it is said 60,000 Dollars on board, which they would have laid out in the Purchase of Goods.

It is not long since we acquainted our Readers of the setting off of Sir William Johnson, to go to Niagara, in order to complete a firm Peace with the Senecas and Western Indians: His Excellency has since arrived safe at Oswego; from whence on the 3d of July, he set out for Niagara. The same Day Col. Bradstreet also set out with 1196 Regulars and Provincials. There were 608 Indians, of which 300 were Cahnawagas, and 180 more were to join at Niagara.

PHILADELPHIA, July 19.

Extract of a Letter from Oswego, June 19, 1764.

"I have the Pleasure of informing you, that all the New-Jersey Forces arrived safe here.—Our Advices from Niagara, of the 31st of May, are, that a few Days before three Chippawa Indians came in there, and said, they were impowered to make Peace for four Nations, and that seven other Nations, from about Lake Huron, Michigan, &c. were willing to make Peace likewise. Upon which the Mohawks asked them where these Nations were, and why they did not come with them; told them they wanted to see them; that they must all meet Sir William Johnson at Niagara, and make Peace with him there, and then they would take them under their Blankets to their Bosoms; but that if they refused to come, they would kill them all. Whereupon two of the Three went off immediately to acquaint the Nations with what the Mohawks had said, and the Third remained at Niagara till they should return.—By the last Accounts from Detroit all was very quiet there."

In Letters from Niagara, of the 25th ult. it is mentioned that all was still quiet at Detroit: That upwards of 4000 Barrels of Provisions were on the Carrying-Place, viz. at Fort Slosser, Navy Island, &c. and that as there were a great many Carriages employed on the Carrying-Place, it was not doubted but the Bulk of the Provisions would soon get across.

The 608 Indians, which went with Colonel Bradstreet from Oswego to Niagara, were as follows, viz. Mohawks, Cahnawagas, Onondagas, Senecas, Cayugas, Tuscaroras, Onegetches, Nanticokes, Ossiningoes, Stockbridge, and Ottowas.

A Letter from Niagara, dated June 27, mentions two of our Soldiers being fired at by two Delawareans, one of whom was killed and scalped, but the other got off: And that then two of our new Vessels were got into Lake Erie, and a Third was expected to be ready that Week.

Since our last Person arrived in Town, who left Pittsburgh the 27th of last Month, when all was well there, and met with no Interruption on the Road.

LONDON, May 5.

THE Citizens of Cork have placed a fine white Marble Statue of Mr. Pitt, as big as Life, in a Nich of their Exchange, with the following Inscriptions:

"In Honour of Mr. PITT, late Secretary and Minister of State to their Majesties King GEORGE II. and III. of Great-Britain, who, in a few Years of his able and upright Administration, restored the Honour of the British Arms, together with the Safety, Influence, and Glory of his King and Country, this Statue is erected by the Citizens of Cork, Anno 1764." This is on the Plate. On another is the following: "Siste Viator upicunque terrarum oriundus. Vera Icon GULIELMI PITT cujus si nomen audies, nihil hic de Fama desideres.

The Venus, Robertson, from New-York to Newry, is towed into Scilly with her Bottom up.

The North-Briton for To-day (which was published Yesterday Afternoon) it is thought will make a great Noise throughout the Kingdom, it containing some remarkable spirited Observations on an alarming Encroachment on the Liberty of the PRESS in a late Act which has hitherto very unaccountably escaped the Notice of the People.

Letters from Madrid by the Dutch Mail, which arrived this Day, inform us, that the Ministry have under Consideration, a Plan for making all the Ports in the West-Indies free Ports.—Montesquieu seems to think that this would be of Advantage to the Crown. See Spirit of Laws, XXI, 19.

Part of a Letter from Paris, dated April 17.

"A short Time before Madam Pompadour's Death, being sensible of her approaching End, she wrote to her Husband, and begged to see and to be reconciled to him: But he wrote back for Answer, that he forgave her, but could not prevail on himself to come to a Court where he had once been forbid. She then spent great part of her Time in settling her worldly Affairs, and has left great Legacies; among which are 10,000 l. Sterling to the Carthusians, where her Body is to be interred; a large Sum to the Poor of the Parish; and another to portion out young Maidens. She has also left Annuities for Life to all her Servants. The King visited her every Day till within two Days of her Death, when having received the Extreme Unction, and gone through all the Ceremonies of the Church, she declined seeing his Majesty, and desired to have the few remaining Hours to recollect herself. Two Hours before her Death, she desired two Ladies, who constantly attended on her, to leave her, and go to one of her own Houses, as they would probably thereby prevent the Mortification of being sent away on her Death; this they declined, but she again urged it, and told them, that she had ordered one of her Coaches to take them thither, and that they would find, on her Decease, that she had not been unmindful of them; which proved to be true, as she has left them handsome Annuities for their Lives. She was in the 43d Year of her Age."

His Majesty's Ship Dolphin, and Tamar Sloop of War, are now sheathing with Copper; the former at Woolwich, which it is said will be finished about Monday next; and the other, at Deptford, will not be finished quite so soon; the Hon. Capt. John Byron (Brother to Lord Byron) has the Command of the Dolphin, and Capt. Moutat that of the Tamar; they are to proceed in Company, but their Destination is not made public.

It is conjectured that the above two Ships of War are to proceed to the East-Indies; and that Capt. Byron will assume the Command of his Majesty's Fleet stationed in that Part of the World, as Commodore and Commander in Chief.

On the other Hand, it is said, that they will proceed to North-America, with proper Artists on board, to take a general Survey of the Coasts, with the Capes, Head Lands, Promontories, Gulphs, Rivers, and every other Thing that may relate to a perfect Knowledge of that vast Region, and its Navigation, in Imitation of Le Neptune Francois.

On Tuesday and Wednesday part of Lord Clive's Baggage and naval Stores, were shipped at the Custom-house Key for India.

May 8. It is said Lord Clive will set out in a few Days for his Seat in Shropshire, in order to settle his domestic Affairs there before his Departure for Bengal.

We hear that upwards of 150 young Gentlemen are preparing to embark as Volunteers under Lord Clive in the East-Indies, having first given Security, that they are not to be concerned, directly or indirectly, with any Sort of Trade during their Residence in those Parts.

The Loss sustained by the Dutch in the East-Indies, is now esteemed superior even to that of the English in those Parts.

It is still reported that a great Number of General Officers are to be dismissed, and that the Army will be new modelled.

Extract of a Letter from an English Gentleman on his Travels; dated Rome, April 14, 1764.

"The Kingdom of Naples and this State have been in the utmost Distress, for many Weeks past, on account of a most extraordinary Scarcity of Corn. At Naples they are in some Measure relieved; but we are still here in a doubtful State, and Numbers of Poor perish daily for Want, not in this Capital, but in the adjacent Towns and Villages."

May 10. It is said, that a certain Hon. Personage, lately appointed to a most considerable Command in India, among several other wise Measures he is pursuing, wrote circular Letters to several old and brave Officers, who have formerly served under him, to know if they are willing to embark again; by which it seems he is determined to leave no Means unused that may any Ways contribute to the Success of this important Command; and there is no doubt but his Popularity will induce them readily to re-enter the Service.

It is said, Twenty-one Commissions in the India Service, have within these few Days, been filled up by a great Personage, one of whose Claims is, it seems, to appoint himself all military Officers under his Command.

The Carion, a new Ship, in the Government's Service, is now taking in her Stores at Gravesend, and will sail in a few Days for North America, in order to take a complete Survey of the British Dominions on that Continent; several able Draughtsmen are to embark in the said Ship. They are to begin with an accurate Inspection of the Coasts of Newfoundland, the Gulph of St. Lawrence, the Shores of Labrador and Hudson's Bay, and proceed gradually to our next Southerly Settlements. In the Course of the Undertaking some new Attempts will be made towards settling the true Longitude of the most remarkable Places along the Continent.

BOSTON, July 9.

By a Vessel arrived at Piscataqua from Halifax, we hear there are 6 Men of War at the last mentioned Place, and that some of them were soon to sail on a Cruise, for the Protection of Trade.

Last Wednesday Evening we had here as severe a Storm of Thunder and Lightning as has been known for many Years past: It began about Half after 7 o'Clock, and lasted till Half after 12. The Wind began at S. the Cloud first arose in the S. W. and went round to the Northward and Eastward, but the Wind shifting from S. W. to N. and N. E. brought the whole Body of the Cloud right over us, when the Heavens appeared in one continued Blaze; the Lightning was observed by many on most of the Electrical Points in this Town, which appeared in different Forms from different Points, for on some it seemed like a Number of Rays in the Form of a Cone reversed, and on others like small Globes of Fire sparkling and discharging themselves in the Air.—It struck a Spar at the North Part of the Town, in which were a Number of large Spikes, and shivered it from the Top to within about three Feet of the Bottom, and then went through the Door and Window of a House (which were opened) to a Window Hook whose Point hung directly opposite to the Spar, at the Distance of about 30 Feet, and from thence down the Side of the House, ripping off the Clapboards to the Sides of the Cellar Door, which it split in Pieces, and from thence to the Ground. There were several Persons in the Room, and a little Girl was thrown against the

Wall, but through the Goodness of Divine Providence none were hurt.—There are no Points erected within Half a Mile of the House, excepting on the Steeple of Dr. Cutler's Church, and there the conducting Wire is broke off about Half way down.

PROVIDENCE, July 7.

His Majesty's Schooner Magdalene, Captain Dougdale, arrived at Boston a few Days ago; since which five Vessels from the Eastward have been taken Possession of by her, &c.

NEW-YORK, July 16.

On Thursday Evening arrived the Sloop Success, Capt. Francis Johnson, in 23 Days from Pensacola, by whom we learn, that there has been no Loss of any of our People, by the Indians, in those Parts, since the Arrival of Major Loftus, in going up the Mississippi, on the 21st of March. So that the Report lately circulated here, that many of our People have been cut off by the Indians at Pensacola, must have taken its Rise from the above Affair, or be entirely false.

The People there, are in Hopes that New Orleans will be given up to the Spaniards, with whom they expect to carry on a profitable Trade; at present their Trade is dull, being chiefly confined to the Indians, and obstructed by two Men of War on that Station; the Princess of 40 Guns, Capt. Lucas, and another, who have seized 3 or 4 Vessels going up the Mississippi, and prevented a Spanish Vessel from Trading, which lately put in there in Distress, having it is said 60,000 Dollars on board, which they would have laid out in the Purchase of Goods.

It is not long since we acquainted our Readers of the setting off of Sir William Johnson, to go to Niagara, in order to complete a firm Peace with the Senecas and Western Indians: His Excellency has since arrived safe at Oswego; from whence on the 3d of July, he set out for Niagara. The same Day Col. Bradstreet also set out with 1106 Regulars and Provincials. There were 608 Indians, of which 300 were Cahnawagas, and 180 more were to join at Niagara.

PHILADELPHIA, July 19.

Extract of a Letter from Oswego, June 19, 1764.

"I have the Pleasure of informing you, that all the New-Jersey Forces arrived safe here.—Our Advices from Niagara, of the 31st of May, are, that a few Days before three Chippawa Indians came in there, and said, they were impowered to make Peace for four Nations, and that seven other Nations, from about Lake Huron, Mithigan, &c. were willing to make Peace likewise. Upon which the Mohawks asked them where these Nations were, and why they did not come with them; told them they wanted to see them; that they must all meet Sir William Johnson at Niagara, and make Peace with him there, and then they would take them under their Blankets to their Bosoms; but that if they refused to come, they would kill them all. Whereupon two of the Three went off immediately to acquaint the Nations with what the Mohawks had said, and the Third remained at Niagara till they should return.—By the last Accounts from Detroit all was very quiet there."

In Letters from Niagara, of the 25th ult. it is mentioned that all was still quiet at Detroit: That upwards of 4000 Barrels of Provisions were on the Carrying-Place, viz. at Fort Slosser, Navy Island, &c. and that as there were a great many Carriages employed on the Carrying-Place, it was not doubted but the Bulk of the Provisions would soon get across.

The 608 Indians, which went with Colonel Bradstreet from Oswego to Niagara, were as follows, viz. Mohawks, Cahnawagas, Onidas, Onondagoes, Senecas, Cayugas, Tuscaroras, Oswegetches, Nanticokes, Ossingoes, Stockbridge, and Ottowas.

A Letter from Niagara, dated June 27, mentions two of our Soldiers being fired at by two Delawareans, one of whom was killed and scalped, but the other got off: And that then two of our new Vessels were got into Lake Erie, and a Third was expected to be ready that Week.

Since our last Person arrived in Town, who left Pittsburgh the 27th of last Month, when all was well there, and met with no Interruption on the Road.

166 By Captain Drefon from Lisbon we have Advice, that on the Thirty-first of May the Custom-House there was burnt down, with Goods to the Value of Seven or Eight Hundred Thousand Pounds Sterling in it, which threw the City into the utmost Confusion, put an intire Stop to Trade, and would be severely felt, many of the Merchants, it was said, having lost their All by it.—It was not known how the Fire began.

Capt. Drefon, in Latitude 24, Longitude 40°, spoke with a Ship from Gibraltar for this Place. And a few Days ago he met with three Bermuda Vessels, going to Bermuda, who, with three others, were drove from Turks-Island by the French, about twelve or fourteen Days ago.

The PUBLIC is desired to beware of Counterfeit TWENTY SHILLING Bills of this Province, which have very lately appeared among us.—They are a good Imitation of the true Bills, and may pass readily with those that are not well acquainted with our Paper Money.—They are printed in Italic Letter, as the genuine Ones are; dated May 1, 1760, and have, as Signers to them Charles Jones, Joseph Stretch and Charles Thompson.—The Paper they are printed on is double, but much thinner and whiter than that of the true Bills.—They are not done from regular Types; and tho' they look well at first Sight, yet, upon looking narrowly into them, a great many Imperfections will be quickly found, the Letters being very ill proportioned, and the Lines standing mostly crooked.—In the Signing Charles Thompson's Name is made Charles Thonnon.

ANNAPOLIS, July 26.

By a late Act of Parliament for the Encouragement of the Raising of Hemp in America, a Bounty is Granted of Eight Pounds Sterling for every Ton carried to Great-Britain, for the first Seven Years after the 24th of June this present Year; a Duty of Six Pounds Sterling for every Ton for the next Seven Years; and a Duty of Four Pounds Sterling per Ton, for the next Seven Years, which will terminate the 24th of June, 1785.

The Substance of an Act of Parliament for the better regulating the Post-Office, &c. to be in our next.

ANNAPOLIS, July 24, 1764.

ALL Persons Indebted to the Estate of Mr. Robert Swan, deceased, are desired to come and discharge the same, and those who have open Accounts with him, or Demands against his Estate of any Nature whatever, are requested to come and have their Accounts settled, and present their Demands, so that we may be enabled to know the State of the said Swan's Affairs. Longer Indulgence to those Indebted cannot be expected or granted, as their Debts are already of too long a standing; and as Executors to the Deceased, we must be under the Necessity of bringing Suits against them who delay making Payment.

A Course of EXPERIMENTS in that instructive and entertaining Branch of natural Philosophy, call'd

ELECTRICITY,

To be accompanied with LECTURES on the Nature and Property of the Electric Fire;

By WILLIAM JOHNSON.

THE Course consists of Two Lectures:— In the first of which is explained, the Nature and Properties of Electricity, considered abstractedly, in a Number of new and entertaining Experiments; proving, that it is an Element diffused thro' all Places in and near this Earth, not immediately occupied by other Matter: That it is different from common Fire and Light: That our Bodies contain enough of it, at all Times, to set an House on Fire: That it is a simple, homogeneous, subtle Fluid, lodged in the Vacuities of all Bodies, and passing thro' so dense a Body as Metal, with great Facility: That there is no Repulsion between electrified Bodies; but that Attraction is the only Law of its Motion, &c. &c. &c.

In the Second Lecture, — This Fire is shewn to be real Lightning, and in that View, considered (as it really is) as one of the most awful Powers of Nature. Most of the Effects of Lightning are imitated by the Electric Fire; such as its darting thro' the Air in a crooked Direction, shewn by a Flash of real Lightning, darting from a Cloud in a painted Thunder-Storm: An Animal kill'd by it instantaneously: Metal melted by it in the twinkling of an Eye: An Experiment shewing that Lightning when it strikes a House or Ship, may be prevented from doing the least Damage; and the Efficacy of the Method of Security here proposed, demonstrated from such indubitable Proofs, from Experience, as has not been heretofore exhibited to the World. Many curious Experiments, naturally representing the various Phenomena of Thunder-Storms, accounting for their Causes, and explaining their Effects. The endeavouring to guard against Lightning, in the Manner proposed, shewn not to be chargeable with Presumption, nor inconsistent with any of the Principles of natural or revealed Religion; but on the contrary, that we have the greatest Reason to bless God for so useful a Discovery.

As the Knowledge of Nature tends to enlarge the human Mind, and give us more noble and exalted Ideas of the GOD OF NATURE, it is hoped that this Course will prove, to many, an agreeable Entertainment.

The Works of the LORD are great, and sought out of all them that have Pleasure therein. PSAL. cxi. 2.
