Riverport Rhymes.

Mr. Andrew Jackson, aged sixty-five years, died here on the 23rd ultimo, at the residence of Mr. Washington Bradley. Funeral services were conducted by Rev. Mr. Forrester of Barnes Creek Springs. The interment was made in the churchyard here. Mr. Jackson was a member of the M. P. church.

Two new houses have been erected here recently, one on Sycamore avenue and the other on Sandy Plain. This shows that Riverport is a rapidly growing village. It now has about 125 inhabitants.

I will pen a few lines in regard to the transformation of Sutherland Chapel which took place last year, and the old church to-day ranks at the head of Barnes Creek circuit. It was built about forty-eight years ago and dedicated. Soon afterward it was thought to be too small, so the trustees resolved to build an addition. It was made larger and served every purpose it recently when the growing congregation made it necessary to enlarge again their place of worship.

The time was wasted, the material purchased, the carpenters engaged, and the work begun with an enthusiastic energy which resulted in newness of life to the church. Services for a time were abandoned, but now the work is nearly completed and religious worship will soon resume in a beautiful structure. Mr. Jas. Bradley is putting on the last coat of paint on the interior leaving behind him the church in a "good job."

Capt. W. J. Jackson went to Baltimore and bought the pulpit furniture which is of extra quality. A strong religious sentiment prevails in this vicinity.

Judge Holland is quite an expert angler, an act acquired during the summer months which the Judge usually spends each year at Ocean City where the best of fish and fishing is to be had. While indulging last week in this fine sport, which is by-the-way a distinctively theological pastime, the Judge felt a tremendous tug at the end of his line and mentally concluded that he had a shark in tow. He began to reel in his tackle and when he had succeeded in bringing his hook to the surface a superb sea trout about thirty-two inches long greeted his delighted vision. The fish was brought to the ice factory in Salisbury and from in the centre of a two-hundred pound block of ice.

A Local Explanation. At a dinner party given recently in Washington by Representative Robert Hill, of Illinois, Mr. Langley, the solicitor general of Nova Scotia, inquired of Congressmen, whether the Republic of New York, in what way the republicans in Congress had revised the existing tariff duties. The other guests present, among whom was Speaker Reed, ceased their conversation and awaited Mr. Florey's reply. "They have revised them," said Mr. Florey seriously, "in the same manner that the farmers in Dakota erect stone walls as a protection against cyclones. They build them four feet high and six feet thick, so that in case they are blown over they are higher than they were before. And so it is" he continued, while everybody about the table roared with laughter, "with the republicans revision of the tariff. They revise it in such a way that it's always higher when they get through than it was before they began."

Alabama's Capital Booming. For the cotton year ended Sunday night, Montgomery's receipts were 144,043 bales, the largest of any year in the history. The nearest rival was 1888, when the receipts were 143,544. The stock on hand is 935 bales. The receipts of new cotton in August were 7,020 bales also the largest for that month. Cotton received by rail on Sunday, August 31, is not counted, as it did not reach the warehouses until Monday morning. The volume of business of all kinds during the past twelve months is put at \$40,000,000 by conservative business men. Building for business and residence purposes are going in in all parts of the city. Manufacturing industries have largely increased in the past twelve months. One new railroad has been completed and is in active operation, and two more are being rapidly constructed. There is much complaint of rust in cotton, corn and grain crops. There is a satisfactory and prosperous outlook for the State and city.

ALARMING, DISFIGURING AND PAINFUL
Cured in five months by the
Cuticura Remedies.

For three years I was under medical treatment for a cancerous sore on my face, which was not only disagreeable, but disfiguring. In the month of November, 1896, I was informed, in St. Louis, Mo., that I had increased mass in size, and that I was in danger of losing my life, so that I became very much alarmed. I consulted a number of physicians, but they told me that I was opposed to having this cancerous growth removed by a friend to pain it. I was distressed (emotionally) and was unable to sleep any more morning; and at the same time I used CUTICURA SOAP, and took the CUTICURA CREAM every night. After five months I was cured three or four times per day. I was cured in five months by the treatment and I had proved a perfect cure. I lost my weight, but I was not worried about it. I did not acknowledge my cure, and I do voluntarily, with the hope that I may benefit others suffering in a similar manner.

New Home Treatment:
Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living

Our Advertisers Alive.

We invite our readers and the people of the peninsula generally, to a perusal of our advertising columns. In them they will learn where the best and cheapest of everything is for sale. To the farmer who is preparing for the fall seeding, the manufacturer of commercial manures is offering inducements. The provision and grocery man is holding out best quality and lowest prices; the dry-goods merchant is pleading fine fabrics and latest styles, and the clothing and hatter, best fits and noblesse. The list of advertisers is complete and they are all getting trade. Salisbury long ago put herself on record as the leading mart of the peninsula and year after year she firmly establishes the claim. Here the rich and poor alike can get their wants accommodated and at the most reasonable prices.

For More Days of Life for Gratian.

Governor Jackson has granted a reprieve until the tenth of October for John Shelly Jackson, who was to have been hanged yesterday for the murder of John Butts in Worcester county. The Governor several days ago refused to grant a commutation of death sentence in Hudson's case, but the friends of the condemned man will endeavor to present a stronger case before the day for the hanging with the hope that they will ultimately succeed in saving his life.

PAGE THE MAN.

The Congressional Convention at Ocean City makes the nomination on the 19th Ballot—Worcester does the Work.

The Congressional Convention, which adjourned at Centerville September 4th, convened at Ocean City last Thursday and nominated Col. Henry Page, of Somerset, on the 19th ballot, after holding three sessions. From the day the Centerville convention adjourned it was generally believed among those on the inside that Mr. Gibson's chances had materially waned. After the first ballot the Queen Anne's delegation dropped Weedon and voted solid for Gibson till the close, giving him eleven votes—Queen Anne's, four, Caroline three, and Talbot four. The Kent delegation, which had since the Centerville convention been reconstructed, taking on Mr. Udell, of the Kent New Hope H. Barroll, John D. Urie and Richard Hynson, Esq., all prominent young lawyers of Chestertown, withdrew the name of Hon. Jas. Alfred Pearce and presented that of Hon. H. W. Vickery, who, through the assistance of Wisconsin and Somerset, received on one ballot thirteen votes.

Mr. Toddlin, of this county, once received twelve votes without the assistance of Mr. Gibson's friends, thus giving Talbot an opportunity to make one man this side declined to do.

It was recognized at the outset that Wisconsin held the key to the situation, and delegates recognized the fact and felt the responsibility.

On the assembling of the convention at 7 o'clock p. m. the voting was resumed, Caroline, Queen Anne's and Talbot together voted for Gibson; Kent and Dorchester of the first ballot for Vickery, and Wisconsin for Page. The vote was the same on the second ballot except Dorchester's vote which was given to Page. As soon as Worcester, which is the largest alphabetical order, cast her vote for Page the vote of Wisconsin was changed to Page, which secured his nomination. Then went up an immense yell, everything was in confusion for fully fifteen minutes. As soon as anyone could be heard a member of the Talbot delegation attempted to change the county's vote to Toddlin but the chair announced that the result had been declared. Mr. Page was immediately sent for and brought into the room amid great applause. He thanked the convention for the honor conferred upon him and outlined in a limited way what his policy would be as their representative. He was followed by Mr. Miles, his friend and law partner, who had led the Page forces in the struggle. He thanked the counties that supported Page and said that his cup of joy was full. Mr. Hartley of Queen Anne's, Barroll of Kent, Hynson of Dorchester, and Haddaway of Talbot, also made addresses, pledging their counties to support the nominee.

NOTES OF THE DAY.

Excursion trains were run from Crisfield and Pocomoke over the N. Y. P. & N. and from Easton and points east over the B. & E. July 1200 people attended the convention. An old colored man from Vienna, who came over on the Eastern train, was seriously and probably fatally injured at this place. When the train arrived here he got off and stepped between the cars on the side track and was caught between the bumpers when the engine which brought the train up backed in on that track. He was taken up town and cared for by Dennis & Fulton, and returned on the 6 o'clock train.

Soon on Schedule Time.

The laying of the rails on the Baltimore & Eastern Shore railroad was completed at Seaford yesterday, and the forces are now busy in leveling and ballasting the road-bed in this county. It is expected that through trains from Ocean City to Baltimore will be running by the 15th inst. Mr. A. J. Benjamin, General Manager, is preparing a timetable to go in effect in a short time. When all the arrangements are completed two trains each way will run over the road, the eastern terminus being at Ocean City and the western terminus at Baltimore. The road puts the Eastern Shore in rapid communication with Baltimore, and enlarges the territory of Salisbury by affording means of transportation to the citizens of neighboring towns and communities who will come here to deal with our merchants.

In the construction of the new road, the contractors, Messrs. Godfrey & Howe have proven themselves men of integrity and principle who know the business of railroad making. They have spared neither labor nor money in making the roadbed, its bridges, etc., among the finest and most substantial in the country. Mr. Howe of the firm has been on the Eastern Shore ever since the road bed was begun and has personally superintended the work, looking after the most minute details with the precision and care that he bestowed on the more important matters.

—Mrs. Henrietta Hearn, the mother of Isaac N. Hearn Esq., died at her home in Whiteville, Del. last Tuesday at the advanced age of 82 years, leaving five children, Isaac N., of Phillips, this county, and Edward of Delaware, and two daughters. Her remains were interred in the family burying ground near Whiteville, Del., by the side of her husband, after funeral services by Elder Rittenhouse, of the Baptist church.

Wait! Wait!

Following is the first of a series of articles by Mr. Jas. Elsey on methods for the improvement of poor land. Mr. Elsey's notable success in redeeming a barren farm near town, where sterile acres have in two years been made rich with garden fertility, has led to numerous inquiries concerning the manner of enriching Mr. Elsey says—As I have been requested by several persons to give to the public my mode or plan of improving poor land, I will now give plain No. 1, to those who wish to try it may have a chance to do so this September. Now if any farmer should chance to have a piece of poor land let him try the following plan. First, plow the land with chain or plow so as to have every straw covered. Then by the first of June sow one bushel of clover seed per acre. Oats or buckwheat will answer instead of turnip seed but I prefer the latter. This is for protection to the young clover plants in winter. Apply same amount of fertilizer with clover seed as with the rye and if 300 lbs. of some good fertilizer is used the second spring on the clover, all other circumstances are favorable, you will get enough clover hay to pay all expenses up to that date, mid-summer of second year. Next year you can have another hay crop or turn clover for corn or other crops. But I would not sow clover more than two years, especially on light land.

Now the great secret of getting a good set of clover is to have the land finely plowed and to have seed and straw sown annually because the land was not put in proper condition for their reception, and the consequence was, they failed to germinate.

Now I expect a great many farmers will criticize, and say that shells are of no value, or that rock is worthless, and so on. But the formula as given here has brought the improvement on my farm, the secret of which you have asked me to disclose. The plan is no more an experiment with me, it is a settled fact. Of course Tilghman's "B" and several good grades of fertilizers are rapid improvers of the soil. I get clover every time I sow it with the use of lime.

Now brother farmers I submit this article as No. 1, hoping it may be of benefit to some of you, and may say that I have several other plans which I will name Nos. 2, 3 and 4, etc., which will be made public if desired.

Remember plan No. 1 must be concluded with clover to make it profitable, in fact we cannot farm successfully without the liberal use of clover judiciously seeded.

Submitted as per request of several friends.

Our Library Again.

We would like to call attention to our circulating library once more.

It will be remembered that about one year ago Rev. Mervin J. Eckels, and Messrs. Walter C. Humphreys and Robt. P. Graham discussed its condition and offered suggestions for its reorganization.

Through the efforts of the above-named gentlemen, the library was reorganized and for a time it seemed that the library would again be able to serve the good purpose for which it was designed by the founders. A librarian was secured who opened regularly twice a week, the doors and kept a systematic record of the books taken out and returned. But for some reason this system fell into disuse and the library has since run without system.

Miss Dorcas Cannon, who has voluntarily consented to act as librarian for a few weeks, informs us that on examining the shelves and roll books, she finds that a large number of volumes, some of them valuable, are gone and no trace of their whereabouts is on record. These books must be in the possession of patrons in Salisbury, who should return them without delay. Meanwhile could not something be done to improve the keeping and management of the library? Properly managed, a good library is one of the most valuable institutions of a community.

One drawback to the success of our library is its location. People who were conveniently located on Main street instead of in the third story of the Court House, now never think of climbing two flights of stairs to procure a book.

Ref. Mr. Eckels was an advocate of the plan to remove the library to a room on Main street. Until a new arrangement can be devised for the management of our circulating library it will continue to retrograde in value and usefulness.

School Board Proceedings.

The School Board held a special session last Tuesday with Messrs. Laws and Darby present. Mr. Cannon being out of town.

In the absence of the president Mr. Laws occupied the chair. Trustees of school No. 7, Pittville district asked permission to have house repaired; referred to Mr. Laws. Trustees of colored school, Salisbury, asked permission to have house whitewashed and cleaned; permission granted; and matter put in hands of secretary to close contract for same.

Ref. Garnett was before the Board to ask that the Board establish a school at Jones's Church Tyaskin, the patrons, agreeing to furnish the hall free. The Board decided that they could do nothing with the case now, but they will continue to establish a new colored school near the head of Wetpinn.

Trustees of school No. 4, Parsons, made application for wood house and other out buildings, stating that they could have them built for \$250. Board gave permission to have the out building erected \$100 if it can be done for \$100.

Trustees school No. 6, Nutters were permitted to have house whitewashed and repaired.

Trustees were appointed for Trappe district as follows:

No. 3, W. H. Hooper, Henry Den-

John B. Pryor, No. 4, T. W. H. White, Geo. Kibbie, Samuel Jenkins,

No. 5, Geo. W. Cabbell, John W. Dashiell, J. Joseph Hearn, No. 7, (new district) E. A. Brewington, Herbert Boudin, Wm. White of C.

Trustees submitted synopsis of his annual report.

As your correspondent from this part of the county has either moved away or quit the business, I thought perhaps it would be as well to pen you a few lines so as to let the public know that we still live, and can be found at the same place even if we did not get the railroad.

Messrs. George K. Phillips & Co., proprietors of the marine railway, have had more work this season than usual, and have given employment to quite a large number of hands and the prospects are good for a continuance of the work for some time to come.

The factory of Messrs. John Robinson & Bro. has been shut down until the early part of the winter after having had a very busy season.

Alfred B. Windsor and Harry H. Robinson left last Monday for Baltimore to take a course at Sadler's, Bryant & Stratton's business college.

Eugene A. Robinson, student at Washington college, left here this week after having spent the summer with his parents. C. J. Gravenor and wife, who have been in Camden, N. J. spending the summer, have returned home for the winter. John Robinson of E. left here on Tuesday on a business trip to Wilmington and Philadelphia.

Reopening of M. P. Church.

The congregation of the Methodist Protestant Church, Rev. C. S. Arnett, pastor, who have been worshipping in their chapel during the summer, will reopen their sanctuary Sunday, 28th, with suitable services. The improvements made have been of a general character, and both the interior and exterior of the structure have been much beautified. The outside has received a new coating of paint. A finish of oak has been given to the main auditorium and the chapel has a new finish of cherry. Garret place pulp furniture has been purchased as well as new cocon matting. Electric lights have been substituted for the oil lamps formerly in use. New stained glass windows will arrive in a few days.

The service in the forenoon on the 28th, will begin at 11 o'clock. The sermon will be preached by Rev. D. L. Greenfield, pastor of Lafayette avenue church, Baltimore. Rev. Wm. M. Strayer, President of the Maryland Annual Conference will preach at night.

The improvements on the edifice will cost \$1,000.

Building & Loan Meeting.

The stockholders' meeting of the Building & Loan Association was held in the Court house last Monday night for the purpose of voting upon the amendment submitted two weeks previous. The amendment submitted limited the amount of stock held by one person to \$10,000 while at present it is limited to \$4,000. At the meeting it was thought best to make some change in the amendment before adopting it. The amendment as altered, to be submitted at a meeting to be held in the Court house on the 29th, provides that stock may be taken to the extent of \$10,000 for the purpose of borrowing upon, but only \$4,000 can be taken, to hold as unsecured stock. The object of this provision is to prevent a few parties at any time from getting a controlling interest of the stock.

Several hundred excursionists came to Salisbury last Saturday on the N. Y. P. & N. railroad from Eastville and other points. They left considerable money with our merchants in exchange for goods.

OUR POLICE COURT.

Justice Trader Spends a Day in Fixing Fines upon the Fighters.

Last Saturday and Sunday the black sheep of Salisbury stampered and Baliff Shockley, their shepherd, was kept busy in capturing them and placing them in the separate fold on Lake Humphreys. Police Justice Trader did the feeding on Monday. Shorn of their exuberance the belligerents have calmed down and the dust has cleared away. The following cases were tried on Monday:

State vs. John James Tyler, colored, charged with assault and battery on Daniel Burns, fined \$2 and costs, in all \$3.55; fine and costs paid and party released.

State vs. James Taylor, charged with being drunk and disorderly; pleaded guilty and fined \$1 and costs, in all \$2.75. Paid and released.

State vs. Lee Majors, colored, charged with assault and battery on Isaac Jones, colored. Held to await the action of the grand jury.

State vs. Lee Parrott, colored, charged with resisting officer in the discharge of his duties, fined \$5 and costs, amounting to \$12.95; committed to jail until paid.

State vs. Charles Brewington, colored, charged with being drunk and disorderly, fined \$5 and costs, in all \$12.95; committed to jail in default of payment.

State vs. "Shovey" Brewington, colored, another fighter charged with resisting officer in the discharge of his duties, fined \$5 and costs, in all \$12.95; committed to jail until paid.

Tuesday morning Ellen and Rhoda Hayman, colored, charged with assaulting Martha Wooten at Windsor & Son's clothing factory, were fined by the Justice \$1 and costs which they pay.

Wm. Strutz, a resident of Worcester got into difficulty at the N. Y. P. & N. depot Monday afternoon, and was jailed. Tuesday the Justice put \$4.85 fines and costs on him. He paid it and was dismissed.

Letter from Sharpshooters.

Miss Lizzie M. Twiford, one of Wicomico's progressive teachers, returned home a few days ago from Cooperstown, N. Y., where she spent her vacation.

Wm. Wheatley, who moved here not long since from Chester county has a chest, once the property of the notorious Patty Cannon, which was sold among her effects early after her arrest, in the early part of the nineteenth century. The chest has an inscription on the front part of it in large gilt letters, giving the date of the birth and death of some of Patty's immediate ancestors.

The handsome new residence recently erected by Chas. W. Solbr, and now on the corner at the M. P. parsonage are about all the noticeable improvements on Main street except a little paint here and there, and what is true of this street is true of many parts of town. The building and improvement work seems to have subsided. But there never was as large a demand for houses as there is this season, which may lead to more building soon.

The demand for houses is due to the increasing work at the marine railway here. This has been a very active year here, not only at the railway but at the berry crate factory and the salt lode.

One new county road has been granted in this district, starting at the Delaware line near the residence of the late Canon Knowles and passing through the south eastern part of the district, through what is known as "San Domingo," the dwelling place of our dusky neighbors, intersecting the county road leading from here to Riverston, at the residence of S. B. Cooper. Another road in this district is now in contemplation, to start near the residence of T. J. Bradley, at the terminus of a Delaware county road, and to run nearly in a direct line till it intersects the county road leading to B. C. Springs, in the vicinity of L. H. Cooper's residence, thus giving a good route to a trucking and prosperous farming region of this district and Barren Creek, and adjoining Delaware to connect with the B. & E. S. railroad at Barren Creek. Farmers should have good roads to haul their produce on and the county commissioners should consider this project favorably.

Delmar Notes.

Misses Rose and Mattie Collins from New Salisbury are visiting Mrs. G. W. Peard.

Wm. L. Sirmion was nominated in the Sussex Democratic Convention Tuesday representative to the legislature.

W. S. Marvel is making change in his property on Railroad avenue by putting a cabinet shop in front and smith shop in the rear.

Rev. D. W. Jones who has been supplying the Baptist church during the summer will spend his last Sunday with the church before adopting it. The amendment as altered, to be submitted at a meeting to be held in the Court house on the 29th, provides that stock may be taken to the extent of \$10,000 for the purpose of borrowing upon, but only \$4,000 can be taken, to hold as unsecured stock. Our Railroad Depot.

A handsome passenger depot is in course of erection at the Baltimore & Eastern Shore railroad station in Salisbury. The building will be 20x50 feet, two stories, with projecting eaves and ornamental with fancy bracket work. On the first floor are to be the ticket and gentlemen's waiting rooms and the ticket office. The waiting rooms will each be 20x20, and the ticket office 10x20. A two-story bay window will ornament the front of the building. The second floor will be arranged for the general offices of the company and telegraph office. A platform 280 feet long and 12 feet wide will extend along the front of the building. The freight station is also being built a few hundred feet away. It will be a single story house 16x32 feet. Mr. J. W. Graham of Easton, is the contractor. He has done all such work along the line. The station at B. C. Springs will be built in a few weeks. It will be a single story, 16x32 feet.

In this connection we would like to say a word concerning the miserable shed-like building which passes for a station house at the depot of the N. Y. P. & N. railroad in Salisbury. So important a place as Salisbury, is entitled to a good, convenient station house where passengers can wait comfortably, and on boarding the train or alighting, do so without being obliged to climb over boxes and barrels on a high crowded platform. The capacity of the building is entirely inadequate to the business of the office, and despite the efforts of the agent to keep things in order at times the whole building, platform, waiting rooms, and all, are crowded with an indiscriminate mass of humanity and freight. This is particularly the case in the fruit shipping season.

A Permanent Cure.

For years I was troubled with the most malignant type of Chronic Blood Trouble. After trying various other remedies, without getting any benefit, I was induced by Joe Schell, a barber, who has since moved to St. Louis, and who was cured by Swift's Specific of a Constitutional Blood Trouble, to take S. S. S. A few bottles cured me permanently. I also consider S. S. S. the best tonic I ever saw. While taking it my weight increased and my health improved in every way. I have recommended S. S. S. to several friends, and in every case they were satisfied with the results.

Some People.

Some people do the devil a good deal of good by professing to be Christians.

Some people would be worth a good deal more to the Lord if they didn't talk so much in this meeting.

Some people could pray more effectively if they would pray more liberally.

Some people would like to be religious if they didn't have to give up their sins to do it.

Beauty Without Pain.

"What makes my skin so dark and muddy?"

"My cheeks were once so smooth and ruddy."

"I use the best cosmetics made."

"Is what a lovely maiden!"

"That's not the cure, my charming Miss!"

The doctor said—"remember this: If you use your skin soap from taint, discard the powder and the paint."

"The proper thing for all such ills is this," remarked the man with pills: "Enrich the blood and make it pure—in this you'll find the only cure."

Dr. Pierce's Golden Medical Discovery will do this without fail. It has no equal. All druggists.

New Publications.

The Islands in the Delaware, at Philadelphia, are the subject of the photograph that forms the frontispiece to the September number of Strawberry & Clothier's Monthly.

Their significance at this time is due to the fact that they are about to be removed by the Government, to improve the harbor at Philadelphia. The fiction in the present issue comprises three clever short stories, the first of which, "A Dinky Party at One's," is suitably illustrated. As proper in a magazine of this kind, much space is devoted to fashion matters, relating to styles for ladies, misses, and children; all made more intelligent by illustrations.

Why It is Popular.

Because it has proven its absolute merit over and over again, because it has an unequalled record of cures, because its business is conducted in a thoroughly honest manner, and because it combines economy and strength, being the only medicine of which "100 Doses One Dollar" is true—these strong points have made Hood's Sarsaparilla the most successful medicine of the day.

To Dam the Mississippi.

A dam, to develop 20,000 indicated horse power, is to be constructed across the Missouri River, near Helena, Mont. It will be a timber crib structure 47 ft. high and 800 ft. long, forming an artificial ponding reservoir with an area of 429 miles. The water will be taken from above the dam to the turbines by a tunnel 15 ft. by 17 ft. cross section driven through a rock promontory. The total cost is estimated at \$100,000. The power developed is to be transmitted electrically to Helena, thirteen miles distant.

Life Insurance.

Is an act of profound foresight, which earns the respect of the best of mankind, and increases the credit of the assured. It is also a fact, that insured lives are more prolonged than those of the uninsured; nor need we doubt that the risk of death is smaller to him who, on a bed of illness, remembers that his family is provided for, than to him who contemplates the future. *Reader!* are you insured?

Golden Days at Wanamaker's.

The Golden Days will begin on Tuesday September 16.

The Millinery Reception will take place on Wednesday and Thursday, September 24 and 25.

The Dress and Cloak Reception will coincide with the Millinery.

Bountiful harvests make the rich days of the earlier Autumn the Golden Days of the year.

Additional interest centres

Wanamaker's.

at this period with the advent of such new merchandise as the needs of the season and the active researches of merchants bring together, from points near and far, in this and other lands.

It is, therefore, quite proper that our September season for this year should be called Golden Days.

The Store is to be made very attractive by bringing in to close company with the new goods the sentiment of the season. Myth, fable, and ancient custom—the fruits of field, orchard, and garden—flowers wild and cultivated and various decorative devices have been brought into close harmony with silks, pottery and hangings for your gratification when you come visit us.

And you must come during the Golden Days. You'll find the store dressed in the coming color—yellow. With in the centre door, Chestnut street, you find a long grape arbor, with leaves dark and green, and overhead the rich clusters of grapes; next beyond an apple tree, bearing golden fruit, and where the centre aisle and transept cross, the Roman goddess Ceres presides over horns of plenty.

As you pass through the store, decorations everywhere tell you the Autumnal story of bountiful nature; and you'll wonder how the ponderous pumpkin, the stalwart stalks of corn, the rich, full sheaves of grain, the marvelous vegetables, the great clusters of fruit were collected for the Golden Days. They tell of many a farmer's heart has been bound up in these things, and many a farmer's pocket-book has been the fuller for the prize.

The color of the store is golden. The thought comes from the golden corn, the golden wheat, the golden fruit, the golden squashes and pumpkins. What a touch it has to the golden merchandise, polished brass and stuffs for dresses and house decorations!

The arts of agriculture find wonderful illustration in the Basement, near the Thirteenth and Market streets corner. In the first century of the Christian era rude reaping machines were made in Italy. Queer things, pushed by an ox. We have tried to reproduce one of these things and have placed beside it a modern reaper of the best sort. In the contrast you may see the progress of nineteenth centuries.

This occasion would be quite deficient without the old English Harvest Home. That finds a place in one of the Furniture Galleries on the third floor. Stairways and elevators to take you up—no end of them. It is a sort of Cyclopaedia, with just a hint or two of the way the Harvest Home was kept in merry England.

In the next gallery is a beautiful exhibition of some new conceits in decorative Furniture.

Timely Books always, no matter what the season or occasion. And less to pay for them, as a rule, than in any other bookstore in America.

DEMOCRATIC TICKET.

FOR REPRESENTATIVE IN CONGRESS FROM THE FIRST CONGRESSIONAL DISTRICT:

COL. HENRY PAGE,

OF SOMERSET COUNTY.

—The *Griffid Leader*, in commenting upon the virtues of Hon. Geo. M. Russell, the republican nominee for Congress, in this first district. His chances for Heaven are better than his politics, as his piety is superior to his politics.

The *Leader* further says:

This is surely an excellent recommendation coming as it does from a political opponent (no political friend could have said more) and it must be the truth. To say that a man's piety is superior to his party, is to give an excellent reason why that man should be placed in positions of honor, profit and trust.

Although Mr. Russell is a good fellow and much beloved by his friends, both republicans and democrats, there are doubts about his piety, in the opinion of a clerical friend, at least, who resides in Salisbury, who, after reading the *Leader's* article, insinuated to an advertiser man that if his good friend Russell aspired to a seat in the galaxy headed by St. Peter he would have to mend his ways before he carried a single district, even.

—The amount of valuable matter which annually does not find its intended and proper destination, but does find the Dead Letter office, is surprising when we consider the efficiency of the Postal service of the United States. Postmaster Moore of the Salisbury, Md. office, has sent an advertiser man an official circular this week from which we collect the following interesting facts:

Over six million pieces of mail matter are sent annually to the dead letter office by reason of incorrect, illegible, or deficient address, insufficient postage, insecure inclosing, whereby matter mailed becomes separated from the envelope or wrapper, or the failure to be called for or delivered to the person addressed. This is a daily average of over twenty thousand pieces.

Of the undelivered and undelivered letters and packages received at the Dead Letter office the past fiscal year,

Twenty-eight thousand contained money amounting in all to \$45,642.00.

Four thousand had enclosures of postal notes in small sums under \$5, aggregating \$5,300.

Twenty-seven thousand were found to contain drafts, checks, notes, commercial paper, etc., in the sum of \$1,471,871.00, while forty-eight thousand contained paid and canceled obligations, receipts, evidencing payments of money, debt, mortgages, general miscellaneous papers, etc., etc.

Forty-two thousand contained photographs, one thousand contained letters forbidden to be transmitted through the mails, and eleven thousand upon being opened were found to contain lottery tickets, which, under the terms of the law, are declared unlawful.

One hundred and sixty-two thousand contained postage stamps, and were inclosures to secure return answers to the correspondence which they accompanied, or were the remittances in payments of small balances, or accompanying orders for small purchases of merchandise, subscriptions, etc.

Others were letters and packages addressed to foreign countries, some containing books, pamphlets, etc.

Misdirection, incorrect, illegible, and deficient address are given as leading causes which occasion the failure of mail matter to reach its proper destination, and affect alike that which is so addressed to either city, town, or village.

Under the complete working of our present postal system with proper care in addressing and sealing any mailable matter the sender can generally rest assured of its delivery in due time. More care and intelligence on the part of those using the mails of the country would deprive the Dead Letter office of much of its present importance.

The World's Fair.

Hon. Geo. M. Upshur, of Snow Hill, returned from Chicago last Monday, where as a commissioner to the World's Fair, he attended a meeting held in that city last week when the preliminary details were settled.

Mr. Upshur thinks the real work of the exposition will now begin in earnest. He is enthusiastic over the outlook and says the show will be the greatest the world has ever seen. Ten million dollars will be spent on buildings and three million on the ornamentation of the site.

It is Mr. Upshur's opinion that Chicago is one of the handsomest cities in the United States, that its people are the most enterprising in the country, and that the most comes will place Chicago in the lead of American cities.

P. T. Barnum is developing a strong taste for literary work, and he is busy nearly every day writing a series of articles to be published in the forthcoming numbers of *The Ladies' Home Journal*. The great showman is said to write very easily and fluently, his manuscript showing but few corrections.

Visit of a Former Resident.

Mr. S. K. Dashiell, a native of this county, which was at the time of his birth a part of Somerset, has written to the *Howard County Progress* as follows concerning the impression made upon him by a renewal of old associations.

Mr. Dashiell is a prosperous citizen of Howard county now, where he recently served as school examiner with much credit to himself.

Mr. Dashiell, a few days absence from Howard gave me the opportunity of recalling the scenes of my youth, and comparing the present with the past in Wisconsin county, this state, then Somerset county. The first place I specially observed was Warren Creek Springs, through which the B. & E. S. railroad passes, and it will add greatly to the business and prosperity of the place. The hotel there is being put in thorough repair, enlarged and improved. The water from the "springs" is continually flowing through pipes, and when I was a boy, it was used for medicinal purposes, and was well known; and the hotel was often filled with boarders, and the merry dance was enjoyed—all of which will be revived by the use of the railroad which will have a depot in the village, and I feel sure hundreds will visit the "springs" for health and relaxation from business in the cities of the state. The stores, churches, and schools have the promise of improvement caused by the success of the railroad so much needed there. I met a general member of a former General Assembly from the "springs," Hon. Thos. B. Taylor, who inquired after me, and I inquired after him, and I felt as if I had met an old friend, and I felt as if I could not have recalled him had I been blindfolded, and asked to find my old home there.

The entrance to the city, which was a wonderful indeed, situated principally between the two branches of the Wisconsin river, I was surprised at the river being navigable for steamers and vessels.

A FURTHER LETTER.

F. G. Barry, editor of the *Richfield* (N. Y.) News has received a letter from General Francis E. Springer, dated Pablo Beach, Fla. Aug. 30, in which he says:

"The information you have received through Mr. Herry has some foundation of truth in it. For nine weeks I was compelled to remain in the house from afflictions other than the cancer on my face. I had chills, rheumatism and minor ailments. From these I am now relieved. But I am left in a very feeble and nervous condition, and my physique consists of nothing but skin and bones. I am a miserable wreck of my former self, and the cancer has eaten away large portions of my cheek and nose, and has so impaired my vision that I cannot distinguish one friend from another and the pains from the wound and from constant neuralgia in my head have rendered my life almost unendurable. The sole hope that is left me is that death may soon relieve me of my suffering."

There are now nearly 300,000 "King's Daughters" in the land, and Mrs. Margaret Bottoms, an energetic New York woman, is their President, and she is the founder of the Order. With October 1st, Mrs. Bottoms takes up the editorial pen, and becomes one of the editors of *The Ladies' Home Journal*, in which periodical she will hereafter write and edit the most reliable and authoritative articles through this channel it is Mrs. Bottoms' intention that her "Daughters" and herself shall come closer together in feeling and sympathy.

After all, the best way to know the real merits of Hood's Sarsaparilla, is to try it yourself. Be sure to get Hood's.

Attend the Delaware State Fair, everybody will be there. Bring your friends and send in your exhibits.

The Weather and the Crops.

The United States weather bureau in its weekly bulletin says: Harvesting has been completed in Dakota, but has been delayed in Minnesota, by excessive rains. Killing frosts have occurred in Nebraska and Iowa, with slight damage to crops. Corn is considered safe in Indiana and Illinois, where wheat-seeding and corn-planting are progressing. The temperature and sunshine have been below the average in Kansas and Missouri, and warm weather is needed in Virginia, where the tobacco crop is being planted. The cotton crop has been retarded by excessive rains and Texas, picking is progressing in Louisiana, where rice is being harvested. Cane is flourishing and a few cases of grinding are reported. The conditions have not been favorable for cotton in Mississippi, where the outlook is no better than at the last report. In Alabama the weather has generally been favorable for gathering crops. In Virginia corn and tobacco are reported as good in both quantity and quality. In the Carolinas the cotton has been injured by rain the last rotting and sprouting. In North Carolina the tobacco is nearly housed. In New England the week has been unfavorable for harvesting. Beans are sprouting and tobacco is not curing. In New York farm crops have been delayed by excessive rains, which have in a progressive manner all crops. In Pennsylvania the rain has delayed fall seeding and tobacco curing and has caused increasing rot in potatoes. Potatoes are also reported rotting in northern portions of New Jersey.

Education and Society.

Too often the first thought of a mother over the cradle of a little child, especially if it be a girl, is how to fatten and trim her little body, and how to make her so that she may float upon the serene sea of social success. The schemes, the devices, and worries of young mothers in New York to achieve this end, the complications in which they involve themselves and the energy which they expend to control or to interfere with the affairs of a school in matters of which they have no knowledge or skill, would be amusing were it not so pitiful. While many talk of anxiety and interest for the education of their children, it is this meretricious and alone which many parents are seeking. The teacher receives them with the knowledge that her best work will never be appreciated. From "Private School for Girls" by Mrs. Sylvanus Reed, in *October Scribner*.

The best Advertising.

The most efficient advertising in behalf of Hood's Sarsaparilla is that which comes from the medicine itself. That is, those who are cured by it speak to friends suffering similarly, who in turn derive benefit and are led to try this successful medicine. Thus the circle of its popularity is rapidly widening from its original source, and more and more are becoming enthusiastic in behalf of Hood's Sarsaparilla, and it actually demonstrates its absolute merit. All that is asked of Hood's Sarsaparilla is that it be given a fair trial. If you need a good blood purifier, or building up medicine, try Hood's Sarsaparilla.

A most interesting story of the conception and growth of *The Ladies' Home Journal* of Philadelphia, with portraits and sketches of its proprietor and editor, has been prepared by that magazine in pamphlet form, and will be sent free to any who will write for a copy.

\$500 Offered for an incurable case of catarrh by the proprietors of Dr. Sage's Remedy. 50 cents by druggists.

Peculiar

Many peculiar points make Hood's Sarsaparilla superior to all other medicines. Peculiar in combination, ingredients, and preparation of ingredients. Hood's Sarsaparilla possesses the full curative value of the best known remedies.

Peculiar in its effect. It cures the blood, and cures the system. It is the only medicine which can truly be said to "cleanse the blood."

His remains were brought to this city last Wednesday, and after funeral services at St. Peter's church, by Rev. Wm. Munford, they were interred in Parsons' cemetery. Mr. Bush leaves two daughters, both married. The eldest is married to a gentleman by the name of Gillies, a prominent English official of Hong Kong. The other daughter is now attending school at Weisbaden, Germany.

John H. Handy Disbarred.

John H. Handy, Esq., the well-known lawyer of Baltimore, has been disbarred from practice before any of the courts of the Supreme Bench of Baltimore. "All is Well at Allen."

Our Allen Correspondent writes us as follows:

In the language of the immortal bard of Aëdon, all is well that ends well. We of Allen were for Page first, last, and all the time, and are highly rejoiced that the star of the colored emerged from the dust and the smoke of the battle with a halo of triumph encircling and illuminating a cloudless sky. The political horizon, it was quite apparent, was assuming rather a murky aspect, but with the imminent orb of Col. Page at the zenith the clouds of discontent and confusion will disappear as chaff before the wind. All who could vote for a man of unquestionable integrity, moral spotlessness, and rare ability, will experience pleasure in voting for Col. Henry Page. Hurrah for Col. Henry Page! We need such men with in reach of the wheel, and will support such men with an undivided heart and an enthusiasm that knows not how to cool. True worth and ability, and sterling qualities are happily united in the person of Col. Henry Page, we believe, and onehundred and whole-souled votes, at least, we promise him.

Now and Then.

For the Advertiser.

Not long since there was asked in the Advertiser questions in regard to our public roads, but no answers have appeared to them. Let what are the purposes of public roads? Doubtless for travel, transportation, or interchange of commodities, answering on land the same purpose as waterway, by water.

And every person who does not oppose in any manner the right of others there—every man, woman and child, by day, by night, at every hour, without annoyance, molestation injury, hindrance, or danger. Every one has a right to perfect immunity from persons, from all live stock or domestic animals of every description, no matter whether the source of such annoyance etc. be above, below, or on any side, right or left, inside or outside. We see then how the very design of a public pass-way is continually violated almost unconsciously by a community. Stock is turned into the highway, horses, hogs, sheep, cattle, cats, dogs and poultry. Carts, timber, cordwood, rails, fence rails, trap logs, bushes, etc. are left in the public roads somewhere. Now why is this? There are laws enough to prevent it. There is knowledge, common sense and courtesy enough among our people to end it, and all it goes on.

We see the laws of the public road set at naught in some manner every day—it is only by some mother grunter with her brood of squealers turned out of her pen just to take an airing. Where are our supervisors? Where are our commissioners? Must our county be taxed by some dire lawsuit before this state of things will cease.
