Overview of Maryland Physician Fees

Chapter 1. Overview of Maryland Physician Fees

Chart Book Organization

The data in this chart book are presented in three sections:

- **Evaluation and Management Physician Fees:** This section includes data on the Medicaid reimbursement rate for evaluation and management (E&M) procedures as a percentage of the Medicare reimbursement rate for the Baltimore region.
- **Surgical Physician Fees:** This section includes data on the Medicaid reimbursement rate for surgical procedures as a percentage of the Medicare reimbursement rate for the Baltimore region.
- **Medical Physician Fees:** This section includes data on the Medicaid reimbursement rate for medical procedures as a percentage of the Medicare reimbursement rate for the Baltimore region.

Data Source

The information in this chart book was derived from matching the Maryland Department of Health's fiscal year (FY) 2022 Physician Fee Schedule with Medicare calendar year (CY) 2021 and neighboring states' fee schedules. In the source notes throughout this chart book, we refer to this as "Hilltop analyses of states' fee schedules."

Utilization of services in each category was determined using claims and encounter data from Maryland's Medicaid Information System. To select the codes for analysis, procedure codes were ordered by utilization within each specialty. The twelve codes with the highest utilization were included in this analysis. If the top twelve codes constituted higher than 90% of the total utilization for a specialty, then the codes comprising 90% of the utilization were used, with a minimum of five codes per specialty included. Anesthesia procedures were not included in this comparison as the Medicare and Medicaid calculation for these codes differ.

Maryland's neighboring states have their own Medicaid fee schedules. For this chart book, we collected data on the Medicaid physician fees of Washington, DC; Delaware; Pennsylvania; Virginia; and West Virginia. We obtained the current physician fee schedules from the states' websites and compiled data on each state's Medicaid fees.

Chapter 1. Overview of Maryland Physician Fees continued

Maryland Medicaid Physician Fees

This chart book compares the FY 2022 Medicaid reimbursement rates of Maryland and its surrounding states with Maryland's Medicare fee schedule for CY 2021 for the Baltimore region. The surrounding states included in this study are Washington, DC; Delaware; Pennsylvania; Virginia; and West Virginia.

Physician fees include three components: physician's work, practice expense (e.g., costs of maintaining an office), and malpractice insurance expense. The practice expense component constitutes, on average, approximately 40% of the total physician fee. When physicians render services in facilities, such as hospitals and long-term care facilities, they do not incur a practice expense. Therefore, facility fees are typically lower than non-facility fees.

Maryland, Delaware, and West Virginia have separate facility and non-facility fees. However, Pennsylvania does not separate facility and non-facility fees; therefore, their fees are compared with Medicare non-facility fees. Hence, for Pennsylvania, the percentages of Medicare fees reported underestimate the percentages of Medicare fees for procedures performed in facilities. Virginia and Washington, DC have separate facility and non-facility fees for some procedures, but they did not report facility fees for some of the procedures that are included. Therefore, this chart book only compares Medicaid non-facility fees of Virginia and Washington, DC with the corresponding Medicare non-facility fees for the Baltimore region.

Please note that in the following charts, facility is abbreviated as FA and non-facility is abbreviated as NF. In addition, all percentages are rounded to the nearest whole. As a result, states with the same percentage may actually have different rankings; states with the same ranking are indicated as "tied" in the text.

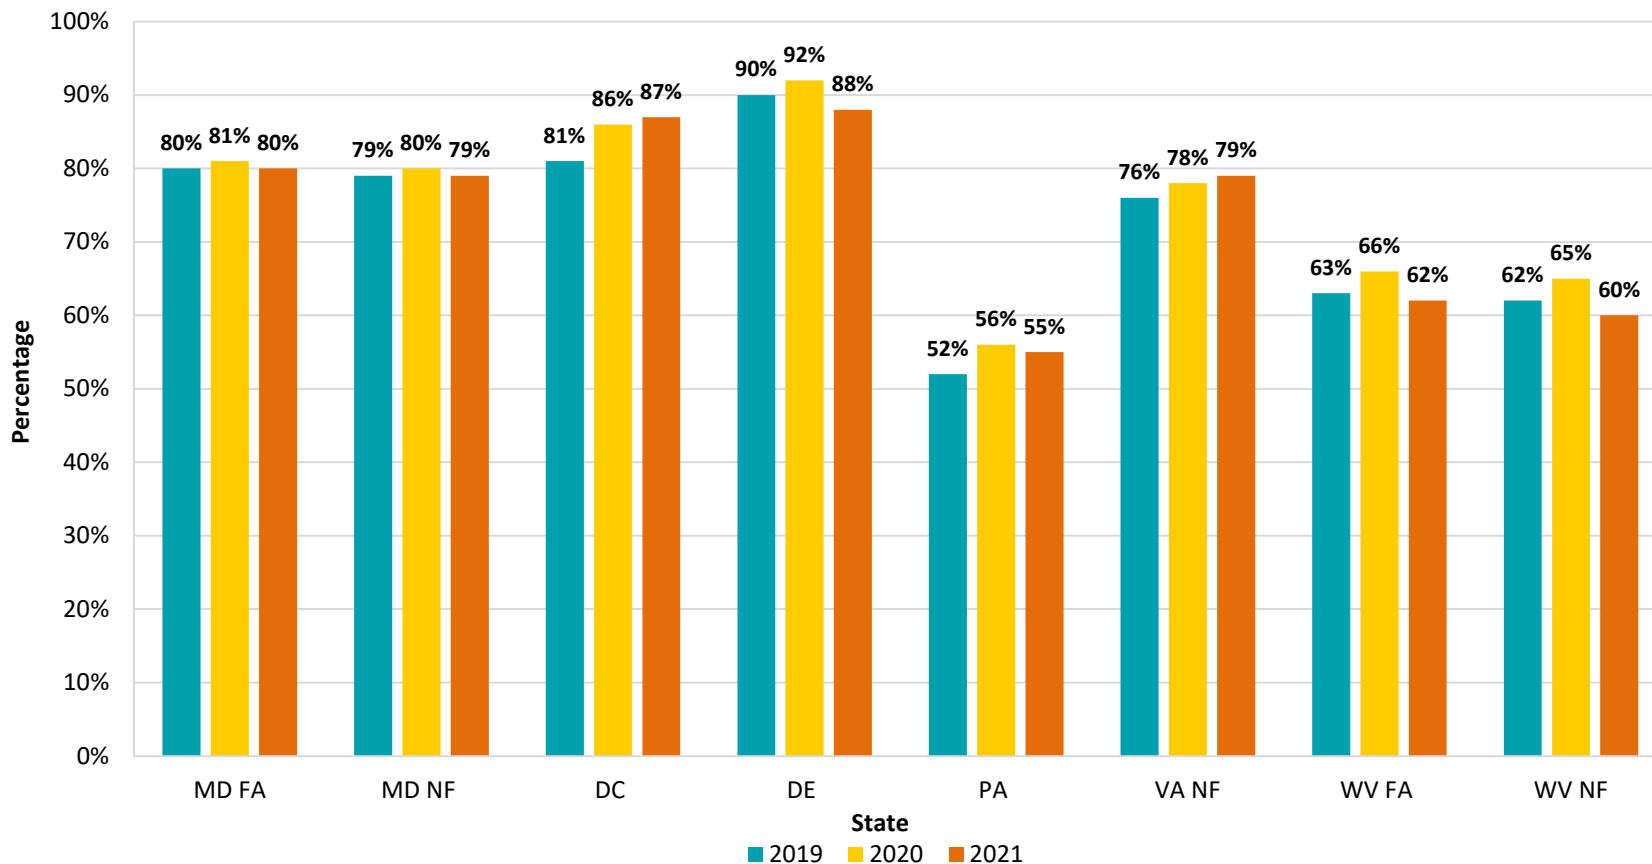

Key Findings

Figure 1 shows the three-year trend of the overall weighted average percentages of Medicare for Maryland and the surrounding states. Maryland remained constant at around 80% of Medicare between 2019 and 2021.

Delaware's rates are consistently highest as compared to neighboring states for most specialties. Pennsylvania ranks near the bottom for most specialties but reimburses at the highest rates as compared to neighboring states for seven specialties, including gynecology and obstetrics, eye surgery, and respiratory system. Virginia non-facility rates for psychiatry and otorhinolaryngology rank highest among the states.

Maryland Medicaid rates for E&M, musculoskeletal system, nervous system, psychiatry, and otorhinolaryngology specialties are all above 90% of Medicare rates. Maryland ranks near the bottom for special dermatology procedures, and rates are 52% of Medicare for non-facility and 49% of Medicare for facility. For all other specialties, Maryland rates are reimbursed at between 49% and 94% of the Medicare rate.

Figure 1. Overall Average Percentages of Medicare Fees, CY 2019 – CY 2021

Source: Hilltop analyses of states' fee schedules

Figure 1 presents the weighted average percentages of Medicare fees for all specialties from CY 2019 to CY 2021. Each average was calculated by adding all the weighted averages for all specialties each year and dividing by the total number of specialties. Delaware implemented separate facility and non-facility fees in 2019, so this figure presents the average of these for 2019 through 2021.

Chapter 2.

Evaluation and Management Procedure Fees

Chapter 2. Evaluation and Management Procedure Fees

The E&M procedure codes are designed to classify services provided by physicians for determining the type and severity of patient conditions, as well as managing care.

The ten E&M codes make up 42% of the total claims and encounters included in this analysis. See Table 1 in the appendix for more information on these E&M codes.

Maryland compensates these codes at a high rate: 93% of Medicare. The next nearest state—Delaware—compensates these codes at 87% of Medicare. See Figure 2.

Maryland Medicaid rates for E&M, musculoskeletal system, nervous system, psychiatry, and otorhinolaryngology specialties are all above 90% of Medicare rates. Maryland ranks near the bottom for special dermatology procedures: rates are 52% of Medicare for non-facility and 49% of Medicare for facility. For all other specialties, Maryland rates are reimbursed at between 49% and 94% of the Medicare rate.

Figure 2. Evaluation and Management Weighted Average (%) of Medicare Fees

For E&M procedures, the state fees rank in the following order, from highest to lowest:

- Maryland facility and non-facility (tied)
- Delaware non-facility
- Delaware facility
- Washington, DC
- West Virginia facility
- Virginia non-facility and West Virginia non-facility (tied)
- Pennsylvania

Surgical Procedure Fee Data

Chapter 3. Surgical Procedure Fee Data

In this analysis, surgical procedures include pre-operative, intra-operative and post-operative procedures, as well as radiology and laboratory procedures. The surgical specialties are as follows:

- Integumentary and General Surgery
- Musculoskeletal
- Respiratory
- Cardiovascular System Surgery
- Hemic, Lymphatic, and Mediastinum
- Digestive System
- Urinary and Male Genital
- Obstetrics and Gynecology
- Endocrine System
- Neurosurgery
- Eye Surgery
- Ear Surgery
- Radiology
- Laboratory

Surgical procedures included 29% of the total claims and encounters in this analysis, although almost 80% of surgical claims and encounters were laboratory claims and encounters.

Maryland ranked about average for most of the subsets of surgical procedures, though Maryland ranked first for musculoskeletal procedures.

Chapter 4.

Medical Procedure Fee Data

Chapter 4. Medical Procedure Fee Data

This chapter on medical procedures is the most diverse and covers everything from acupuncture to vaccination. The medical procedure specialties are as follows:

- Psychiatry
- Dialysis
- Gastroenterology
- Ophthalmology and Vision Care
- ENT (Otorhinolaryngology)
- Cardiovascular System - Medical
- Noninvasive Vascular Diagnostic Studies
- Pulmonary
- Allergy and Immunology
- Neurology and Neuromuscular
- Central Nervous System Assessment Tests
- Chemotherapy Administration
- Special Dermatological
- Physical Medicine and Rehabilitation
- Osteopathy, Chiropractic, and Other Medicine

Medical procedures made up 29% of the total claims and encounters in this analysis.

Maryland ranked about average for most of the subsets of medical procedures. Maryland had the highest fees for cardiovascular medicine procedures and the second highest for psychiatry. However, Maryland had lower fees than all other states besides Pennsylvania for dermatology.
