MISSION

Salisbury State University's mission is to cultivate and sustain a superior, student-centered learning community where students, faculty and staff are viewed as both teachers and learners, and where a commitment to excellence permeates all aspects of University life. We recruit exceptional and diverse faculty, staff, undergraduate and graduate students and support them as they work together to reach the University's goals. Serving Maryland and Mid-Atlantic region, we are concerned participants in responding.

Foreword

The publication of the 1997/98 **FACTBOOK** is a milestone event for the Office of Institutional Accountability and Research. This year's edition is available to the University community on the World Wide Web at <http://holloway.ssu.edu/~instres/>. The electronic version of the **FACTBOOK** is a facsimile of the traditional version, but has the added feature of hyperlinks so that users can click on particular pages in the Table of Contents and go to them directly. Additionally, users can quickly print pages they need from the on-line version. While a limited number of hard copy editions will be distributed, the office is encouraging all members of the campus community to take advantage of the highly accessible electronic version that is, in fact, at their fingertips.

The organization of both versions of the **FACTBOOK** continues to be the same as in the past with the introductory section profiling the University, describing the Eastern Shore context in which it is located and presenting a thumbnail sketch of its development from a two-year teacher preparation institution to a comprehensive regional university. This section presents a draft of Salisbury State University's revised **Mission Statement** which is being updated in conjunction with the University's strategic planning efforts. The section also outlines the University's governance structure. Sections on students provide information about the number and variety of students currently enrolled, their areas of study and their performance. Additional sections provide information about faculty and other personnel, and about instructional, financial and facilities support. A special concluding section organizes relevant information in terms of the requirements of academic program review.

Much of the information presented in the **FACTBOOK** is framed in terms of five-year (and in some cases ten-year) trends, making it possible for users to discern patterns of growth, change and development and to use this information in ways that advance their goals and the University mission. Where trend information is not available in this edition, it can be obtained by examining earlier editions of the **FACTBOOK** in the area of interest.

The **FACTBOOK** is a key publication of the Office of Institutional Accountability and Research and one through which the office seeks to help all members of the campus community engage in the information-based analysis and decision making vital to the University's quest for excellence. The information it contains has been carefully assembled from internal and external sources so that it is accurate and timely and can be used with confidence.

University Environment

Salisbury State University is located in Salisbury, Maryland, centrally located on the Eastern Shore of Maryland. The Eastern Shore of Maryland is that part of the Delmarva Peninsula in Maryland between the Chesapeake Bay on the west and the Atlantic Ocean on the east. The state of Delaware borders the region and a portion of the state of Virginia lies to the south.

First explored by Captain John Smith, the Shore retains much of its historical charm and natural beauty. Because of its miles of shoreline and many rivers, the Eastern Shore has become known for its recreational offerings. Tourism and both recreational and commercial fishing, although diminished in recent years, have been important sources of income. Agriculture has remained an important industry since settlers first landed in the early 1600's. The Atlantic beaches, relatively mild winter temperatures, and relaxed lifestyle attract both summer vacationers and permanent residents. As the population has increased and the economy diversified, more persons have become employed in manufacturing, wholesale and retail trade, and professional services. According to the Maryland Office of Planning the 1995 population of the Eastern Shore, consisting of nine Maryland counties, was 370,050. This figure represents an 24.8% increase from the 1980 census (296,620). The population is projected to increase another 6% by the year 2000 (to 391,900) and another 5% between 2000 and 2005.

Salisbury, which is the cultural and economic hub of the Eastern Shore, is its largest city with a metropolitan population of 60,000. Located at the crossroads of Routes 50 and 13 and along the Wicomico River, Salisbury is the county seat for Wicomico County and a major distribution point for supplies and materials to the rest of the area. Unknown to many, Salisbury is the busiest port in Maryland after Baltimore. Its Salisbury-Wicomico Airport is also the state's busiest after Baltimore-Washington International. Manufacturing and processing industries employ the largest number of residents, but both wholesale and retail firms and service industries are important components of the community's economy.

Salisbury is located 115 miles east of Washington, D.C., 125 miles south of Philadelphia, and 30 miles west of Ocean City, Maryland, which swells to a population of 300,000 during the summer months. The 1990 population of Wicomico County is 79,400, an increase of 23% from 1980. The population is expected to increase another 6% by the year 2000 (to 84,000) and another 5% between 2000 and 2005.

Along with its economic importance, Salisbury offers many social and cultural opportunities. Its newspapers, television and radio stations, movie theaters, stores, businesses and industries, museums, libraries, civic center, cultural programs, houses of worship, public and private schools, and community college and university all contribute to an on-going vitality and significance in the life of the peninsula, and Maryland.

Three institutions of higher education serve the Eastern Shore. Wor-Wic Community College, once a "college without walls," has moved to a spacious new campus on the eastern outskirts of Salisbury. The University of Maryland, Eastern Shore (UMES), is located 12 miles to the south in Princess Anne, Maryland, and is a regional sister institution within the University of Maryland System. Salisbury State and UMES have been working together to expand educational programming opportunities for students.

History of the University

In 1922, the Maryland State Legislature established a commission to determine a location for a two-year normal school on the Eastern Shore of Maryland. A site at Salisbury was selected by the commission and the institution was opened in September, 1925.

The school offered a two-year course for the preparation of elementary school teachers until 1931 when the program was expanded to three years. In 1934, the course of studies was again expanded to four years and in 1935, by action of the Legislature, the University was authorized to grant the bachelor of science degree and to change its name to the State Teachers College at Salisbury.

In 1947, expansion of the teacher preparation program occurred to include the junior high school level. In 1960, the program was expanded to include teacher preparation for the senior high school level and the establishment of a four-year program in the arts and sciences, with majors in several academic fields, leading to the bachelor of arts and the bachelor of science degrees. In 1962, the State Board of Trustees approved a graduate program leading to the master of education degree.

By legislative action, the five state teachers colleges in Maryland became state colleges in 1963, with the word "teachers" deleted from the name, and a new board of trustees was established known as the Board of Trustees of the State Colleges. Under the jurisdiction of this governing board, the major emphasis was placed on the development of the University's undergraduate program, with majors in the arts and sciences as well as professional preparation leading to teacher certification.

Since 1963, the University has expanded rapidly and presently offers 29 undergraduate majors including professional programs in business administration, social work, medical technology, and nursing, in addition to curricula in education and the arts and sciences. In 1971, a program leading to the master of arts degree in history was approved; in 1974, a master of arts degree in psychology was established. Most recently, graduate programs leading to a master's of business administration and a master's in nursing were added in 1982.

Through legislation effective July 1, 1988, Salisbury State along with five other institutions formerly governed by the Board of Trustees of the State Universities and Colleges, became a part of the University of Maryland System. On the same date, the name of the institution was officially changed from Salisbury State College to Salisbury State University, through separate legislative action.

Salisbury State University is the largest higher education institution on the Eastern Shore of Maryland with a fall 1997 enrollment of 5035 F.T.E. (Full-Time Equivalent) students. As an integral part of the public system of higher education in the state, the university is supported, in part, by appropriations authorized by the State Legislature.

The University Mission Statement*

Salisbury State University is a comprehensive institution of higher learning offering a traditional, liberal arts curriculum and a variety of pre-professional and professional programs on both the graduate and undergraduate levels. The following Mission Statement approved by the faculty and the administration in 1984 expresses the ideals which underlie the service of the University to its students and to the regional and state community of which it is a part.

1. The faculty and administration of Salisbury State University accept the responsibility to foster in our students an ability to obtain, understand and accurately assess information and ideas, to think reasonably and independently, and to speak and write intelligently and effectively.
2. In order to give focus and direction to the students' course of study, the University is committed to introducing students to a system of ideas about the nature of humanity, the universe, and the world created by art and thought. To this end, the University offers as the cornerstone of learning an integrated curriculum which examines the salient ideas in the humanities, social sciences, natural sciences and mathematics. This curriculum serves students both as the foundation for specialized study and as the source for a set of convictions which can guide the conduct of their lives.
3. Furthermore, the University assumes that what we teach and how we teach ought to foster in our students a disposition for responsible conduct. As such, we are committed to encouraging attitudes of integrity and fairness, respect for others, dedication to the pursuit of truth, and the willingness to uphold and to challenge one's own convictions. It is expected that these attitudes will instill in our students a desire to do things well, to sustain rather than disparage high principles, and to participate as informed, committed citizens in the public forum.
4. The University also assumes the responsibility to prepare students to work confidently and effectively in their chosen careers; to this end we provide practicable counseling and a number of professional and technical degree programs. Career preparation is not the exclusive province of such programs, however; certain attributes—the power to think clearly, judge soundly, and communicate effectively, the ability to interact with people in a productive and considerate way, and the capacity to adapt and learn in new and unfamiliar situations—must be learned in all courses. And, most important, we attempt to instill in our graduates a spirit of dedication to their vocations and a sense of service to society.
5. The University is also committed to graduate study beyond the baccalaureate level. To help graduate students enrich and extend their knowledge and competence in their respective fields of study, the University encourages them to embrace an ethos dedicated to the continuing acquisition of knowledge and the pursuit of the intellectual ideal. We expect those engaged in graduate study to commit themselves to excellence through the consistent exercise of coherent thought, sound judgement and effective communication.
6. The University recognizes that the students have needs and interests that go beyond the scope of academic life, and we therefore provide additional services and sponsor extra-curricular and co-curricular activities which are consistent with the goals and purposes of the institution. Services that support the physical and mental health of the students, and activities such as student government, athletics and cultural events that enhance their lives, are sponsored by the University as necessary components of the education of the whole person.
7. Finally, we recognize the important contribution that the University and our faculty make to the local region, and therefore provide to the surrounding community when and where feasible, the cultural, social and professional resources of the University.
