DEVOTED TO THE INTERESTS OF PRINCESS ANNE AND SOMERSET COUNTY

THE MARYLANDER AND HERALD, Established 1882  
SOMERSET HERALD, 1882

PRINCESS ANNE, MARYLAND, AUGUST 10, 1920

Vol. XXIII No. 1

## LATERAL ROADS APPROPRIATION

The Sum Of \$19,725 Is Somerset's Portion From The State.

In anticipation of Somerset county's portion of the State road fund which is due this county in conjunction with a lateral road fund already levied by Somerset, the county commissioners have outlined the work which it is proposed to do. The total fund for this year will amount to nearly \$40,000, or, to be exact, \$39,450, one-half of this sum, or \$19,725, being Somerset's portion of the fund dedicated to lateral road building by the State Roads Commission, and a like sum having been levied by the county.

The county commissioners have decided to start three pieces of road with whatever money is received from State sources, together with whatever money is levied for lateral road building by the county. The first piece of road is from Princess Anne to Deal's Island, through a thickly settled section which includes St. Peter's, Daniel's Quarter, Rock Creek and Deal's Island. The second piece of road is from Marion to Tull's Corner, and third piece from King's Creek to Wellington. While the road loan law passed at the last session of the legislature which authorized the building by the state and counties jointly of lateral roads, places the selection of routes for improved roads in the hands of the State Roads Commission, the Commission has made it a policy to adopt the recommendations of the county commissioners in so far as it is possible. The State appropriation for lateral roads in Somerset county is for \$19,725 each year for a period of two years, the same amount to be levied by the county each year. With this joint sum of nearly \$40,000, the Somerset officials should be able to make considerable progress in permanent road building, despite the present high cost of labor and material.

## Drinking Glasses Must Be Cleaned

Responding to many complaints received recently that drinking glasses used in some lunchrooms, restaurants and at some soda fountains are not cleaned properly before being used again, in violation of a law passed in 1916, A. L. Sullivan, state food and drug commissioner, has begun an investigation. He is determined to prosecute all those not complying with the law.

Mr. Sullivan has examined already about 50 lunchrooms in the course of a tour of inspection started several days ago, but he has so far made no announcement of the conditions which came to his notice. All soda fountains in the city will have to undergo the same rigid inspection later.

According to the act which is invoked by Mr. Sullivan in his campaign against unclean drinking vessels, every glass must be sterilized after each time it is used. For this purpose an alkaline solution and boiling water are prescribed, in which the glasses must be allowed to remain for five minutes.

Since 1916, a large proportion of the soda fountains have abolished the drinking glass in favor of the waxed paper container, which the law authorized as an alternative. The remainder complied with the provisions of the act, but recently some among them have been reported to have been dipping the glasses into a bucket of water.

## Delmar To Open Fight On Profiteers

Mayor Thorington, of Delmar, is planning a co-operative retail store. He is endeavoring to induce 200 of the residents of the town to invest \$50 each in the plan in an effort to reduce living costs which are said to be especially excessive. The store will sell its merchandise at a very narrow margin of profit and will greatly undersell all other local merchants.

Delmar is a town of about 2800 people, 90 per cent. of whom are the families of railroad employees. These men are paid high wages, and reports say that the merchants of the place boost their prices at will to make them conform with the high wages received by their customers.

When it was announced that the railroad employees would receive checks for back pay on the 21 per cent. increase basis from May 1, and that these checks would be sent to the men about August 1, the price of meats jumped several cents a pound, house rents were boosted from \$2 to \$5 a month, ice cream jumped from 11 cents to 17 cents a plate, coco-cola advanced from 7 to 11 cents a drink and all other commodities took on similar advances.

It is the intention of Mayor Thorington to put a stop to this alleged practice of taking unfair advantage of the consumer by organizing and operating in Delmar a community store from which the people of the town will be able to procure their every need from their own town.

## OYSTERS TO BE TRANSPLANTED

Survey Of The Waters Of Somerset County Now Being Made

R. V. Truitt, of the Federal Bureau of Fisheries, is engaged in making a survey of the waters and the bottoms in Somerset county, with a view to ascertaining their adaptability for the full growth of oysters transplanted from "The Pumps" in the Upper Chesapeake Bay and from other points. The survey includes the gathering of data regarding the kind and quantities of food, climatic and other conditions. The recommendations to be gained by the survey will be handed over to the Conservation Commission, which is anxious to find grounds for transplanting bivalves. The bottoms off Dare's wharf, Calvert county, promised to be ideal, because of the success of the first experiment with transplanted oysters. Later, however, a disease appeared among them in their home and the venture fell far short of expectations.

Mr. Truitt is in sympathy with the commission in an effort to place the oyster industry of the Chesapeake Bay and its tributaries on a firm and more stable basis. In a recent report to the commission, he says:

"Oyster culture and intensive production is not only desirable but essential for the preservation and development of one of Maryland's most profitable industries. The fertile bottoms of the Chesapeake Bay and its tributaries, its ideal central location and unlimited possibilities afford advantages not found elsewhere. Wise laws ably administered have failed. Individual effort for the most part has come to naught, while the Conservation Commission is struggling, heavily handicapped, to place the state in the position that nature has fitted her to occupy, a leader in the production of the bivalve. Tangible efforts having failed, an era of research and education seems to be the only hope of salvation.

"The fact that a great number of natural oyster beds have survived the destruction wrought by the methods of our fishermen over a period of 75 years and have been able practically to restore themselves, time and again, seems sufficient reason to the oysterman for the continuation of a policy that has not only failed to enhance this natural asset, but one that has retarded it. With this highly reliable sea food and valuable industry of the New England states, because of unsurmountable difficulties, on the wane, if not in the course of joining the now extinct buffalo and messenger pigeon—once so abundant on our western prairie lands—Maryland is called upon to produce on a scale never before realized."

## Procure Hunting License Now

As the first open season on game is August 16th, State Game Warden E. Lee LeCompte has shipped to the clerks of courts of this State, 56,900 hunting licenses. The laws of this state require all persons who hunt on property other than that which is owned, tenanted or rented by them, to first procure a license to so hunt, shoot or kill any game which is protected by law, from the clerk of the Circuit Court of the counties or the clerk of Court of Common Pleas, Baltimore City. The cost of the licenses are as follows:

Non-resident of state, \$10.25; state-wide resident, \$5.10; county resident, \$1.10. The non-resident and state-wide licenses are legal in all the counties of Maryland. County resident license is legal in the county for which it is issued and can be purchased by residents of the county in which same is procured.

The Acts of 1920, which became effective June 1st, makes it unlawful for any person to hunt without a license and in addition to same an arm tag which is furnished free to licensee, must be worn on the left arm between elbow and shoulder. This tag has a small hole at each corner and can be pinned or sewed on the left sleeve of the hunting coat.

The law requires that persons hunting shall have their hunting license in possession and arm tag in open view on the left arm.

## 12,519,000 Bale Cotton Crop

The Department of Agriculture in a report last Tuesday places the condition of cotton as of July 25, last, at 74.1 per cent. of normal, against 70.7 on June 25, 1920, and 67.1 on July 25, 1919, 73.60 on July 25, 1918, and 76.6 the average for the past 10 years on July 25.

The condition of 74.1 on July 25, last, forecasts a yield per acre of about 170.4 pounds, and a total production of about 12,519,000 bales. Last year the production was 11,329,756 bales; two years ago, 12,040,532; three years ago, 11,302,376; four years ago, 11,449,930 and five years ago, 11,191,820 bales.

The final output for 1920 will probably be larger or smaller than the above amount, according as conditions hereafter are better or worse than average.

The excursion to Ocean City last Thursday was well patronized. It is said to be one of the largest ever run to the Maryland seashore resort.

## FATAL AUTOMOBILE ACCIDENT NEAR CENTREVILLE

Mrs. William B. Spiva Instantly Killed—Husband In Serious Condition In Easton Hospital

About 5 o'clock Monday afternoon of last week information reached Princess Anne of the automobile accident which had occurred an hour earlier near Wye Mills, Queen Anne county, and in which Mrs. Margaret Dixon Spiva, of Princess Anne, was instantly killed and her husband, Mr. William B. Spiva, cashier of the Bank of Somerset, was seriously injured.

Mr. and Mrs. Spiva left Princess Anne about 1 o'clock Monday afternoon motoring to Atlantic City, N. J., where they were to spend a week. They were on the State road between Wye Mills and Centreville, and were approaching the dirt road leading from Starr to Stevensville, which crosses the State road, when a Ford car, driven by Ernest Kemp, of Grange Corner, came out of the dirt road. This road is obscured on both sides by a cornfield and the cars were not in view of each other until the Kemp car had gotten on the State road.

It is understood that Mr. Kemp, upon seeing the Spiva car approaching, attempted to cross the State road. In an effort to speed up his car he flooded his engine with gasoline, causing it to stop in the middle of the State road. A salesman who reached the scene soon after the accident states that it appeared that when Mr. Spiva saw the Ford car standing in the middle of the State road he tried to get around the front of it; that in attempting to pass, the left front wheel of the Spiva car struck the right front wheel of the Kemp car, turning the Kemp car completely around and upsetting it; that in passing the Kemp car, the wheels on the right side of the Spiva car went down in the gutter alongside the road and that, while Mr. Spiva was attempting to get his car out of the gutter and upon the road again, something went wrong with the car, causing it to overturn. Mr. Spiva's car turned over two or three times. At first it was supposed that when Mr. Spiva saw that a collision could not be avoided he suddenly applied his brakes, which caused the car to overturn, but the other version of the accident is now generally accepted to be correct.

As soon as the accident occurred medical assistance was sent for and Dr. William H. Fisher, of Centreville, formerly of Princess Anne, reached the scene in a short time. He found that Mrs. Spiva was dead, but that Mr. Spiva was still alive. Dr. Fisher rendered first aid to the injured man and then rushed him, in a car, to the Emergency Hospital at Easton. It is believed that Mrs. Spiva was instantly killed. Her chest was badly crushed and her ribs were broken. The Kemp car had five occupants, but all escaped injury except Miss Riza Parr, of Kent Island, who had a bone in her left hand broken.

After reaching the Emergency Hospital a conference was held by Dr. Travers, surgeon at the hospital, with Dr. Henry M. Lankford, of Princess Anne. It was determined that a brain specialist should be called, and Dr. Walter E. Dandy and two assistants from the Hopkins Hospital arrived in Easton Tuesday evening and an operation was performed to relieve the pressure on the brain.

## Miss Tall To Head State Normal School

Miss Ida Lee Tall has been chosen by the State Board of Education to head the State Normal School.

She was formerly assistant superintendent of Baltimore county schools and was unanimously elected last Wednesday afternoon at a meeting of the State Board of Education.

The selection of Miss Tall is to fill the vacancy caused by the resignation of Dr. Henry S. West, who recently was elected superintendent of Baltimore schools.

Miss Tall is now at Columbia University, New York, where for a number of years she has taught in the summer school. She was supervisor in grammar grades in Baltimore county before becoming assistant superintendent, which position she resigned to become head of the Lincoln (New York) School of Teachers in 1918.

Miss Tall was born in Dorchester county, Md., and except for the two years at Lincoln School, her professional activities have been almost entirely in Maryland. She graduated from Western High School, Baltimore, in 1891; took normal extension courses at Johns Hopkins University, 1896 to 1900; University of Chicago summer sessions, 1907, and was given the degree of Bachelor of Science from the teachers' college at Columbia University in 1914.

Doubt is a periopse on the sea of matrimony.

News of the appalling accident came as a terrible shock to the people of Princess Anne and indeed to the whole county. Mr. and Mrs. Spiva had spent their entire life here and were particularly active in the business, civic and social life of the community. Mr. Spiva was at the Bank of Somerset Monday morning giving his customary attention to the banking business, and it was indeed incredible that within so short a time the hand of fate could have wrought such a terrible tragedy in the lives of these two most active and useful people. It was as if a real affliction had been laid upon the whole community and the only ray of hope was the later reports that, following his operation, Mr. Spiva had a chance of recovery. Since then he has continued to improve and it is the earnest hope of our people that within a short time his health will be fully and completely restored.

Following the accident the body of Mrs. Spiva was carried to Centreville where it was prepared for burial and was brought to her home here the next day. Funeral services were held Thursday afternoon at St. Andrew's Protestant Episcopal Church, and were conducted by Dr. Oliver H. Murphy. An impressive feature of the service was a special prayer offered for the recovery of Mr. Spiva.

Mrs. Spiva was 45 years of age and was the daughter of the late Thomas Dixon and Laura Brittingham Dixon. Her father was prominent in the business and political life of the county and in 1903 was elected Register of Wills. She was a granddaughter of the late William J. Brittingham, the first cashier of the Bank of Somerset, and for many years most prominent in the business life of the county. On the paternal side, she was a granddaughter of the late Virginia White Duer, whose first husband was the late Dr. George Dixon and who afterwards married the late Edward F. Duer, of Princess Anne.

The deceased was a communicant of St. Andrew's Protestant Episcopal Church and was very active in church work. She was particularly interested in the activities of the church Guild. Besides her husband, Mrs. Spiva's survivors by the following uncles and aunts: Miss Mary E. Brittingham and Judge Robert F. Duer, of Princess Anne; Mr. James F. Brittingham, of New York; Mrs. Emily Dixon and Miss Henrietta Brittingham, of Washington, D. C.; former Judges N. Walter Dixon and J. Roman Dixon, of Colorado; Mrs. R. A. McCormick, of Pimlico, Md.; Messrs. Henry L. Edward and Howard Duer, of Baltimore, and Mrs. Ella D. Pitts, of Philadelphia.

Among those who attended the funeral from out-of-town were Mrs. R. A. McCormick, of Pimlico, Md.; Mr. William Spillman, of Baltimore; Mrs. Ella D. Pitts and Mr. and Mrs. Thomas Pitts, of Philadelphia; Mrs. Emily Dixon, Mrs. John T. Doyle, Mrs. Roger Boyle and Mr. and Mrs. H. Lawrence Brittingham, of Washington, D. C.; Mr. James F. Brittingham, of New York; Mr. and Mrs. John W. Ennis, Miss Sadie Jones, Mrs. D. C. Armstrong and Miss Armstrong, of Foomoke City; Mrs. O. F. Horney, Mrs. Oliver T. Horney and Miss Riggan of Crisfield, Mr. Samuel A. Graham, of Salisbury, and Mr. and Mrs. James B. Hendrie, of Chester, Pa.

## William B. Spiva Improving

The latest report from Mr. William B. Spiva, cashier of the Bank of Somerset, who is a patient in the Emergency Hospital at Easton, Md., as the result of injuries sustained in an automobile accident near Centreville last week, is that he is steadily improving and is practically out of danger.

## County Produce Association Will Meet

A meeting of the County Produce Association has been called by the Sales Manager, Fred A. Culver, for Saturday afternoon, August 14th, at 3.30 p. m. sharp, at the Court House. The object of the meeting is to consider the marketing of canning house tomatoes. All members of the association and farmers interested in having the association handle their tomatoes, should arrange to be present at this meeting.

Charged by Federal agents with various violations of the prohibition law, Dr. Samuel A. Rosse, of Crisfield, was arrested by United States Deputy Marshal A. T. Hickman on Friday, June 30th, and lodged in the county jail at Princess Anne. Dr. Rosse was given a preliminary hearing before United States Commissioner Edward P. Wyatt on Wednesday last and was released under \$3,000 bond for his appearance at the next session of the United States Federal Court, which will convene in Baltimore within the next few weeks.

## IGNORE LAW FOR TITLING CARS

Less Than Half Of The Maryland Machines Recorded To Date

With less than half of the 120,000 automobiles in Maryland titled and more than two-thirds of the time allowed by law expired, Automobile Commissioner Baughman has renewed his warning to motorists to have their cars recorded at once. Colonel Baughman last Tuesday stated that 1,200 to 1,400 applications were being received daily, whereas 3,000 should be filed to have all the machines recorded before the time expires September 1st.

By increasing the number of graphotype machines in operation to 10 the titling department made possible the handling of 3,000 applications a day. The graphotype machines enable the clerks to stamp the owner's name, make of car, serial number, engine number, etc., on each document required, cutting to one-tenth the time required by typewriters.

"I am at loss to account for the delinquency of automobile owners in securing titles," said Colonel Baughman. "It can scarcely be due to ignorance of the law, as the matter has been given publicity enough in the newspapers."

"If this is one of the things considered unimportant enough to be put off until the proverbial last minute, those who hold this view are due for a sad awakening. During the last few days of this month our office probably will be swamped with applications and some of the applicants will have to wait, not being allowed to operate their machines in the meantime. They will be disgruntled, though that attitude will not be justified."

There will be some, Colonel Baughman thinks, who will not bother about title at all, and these, if they are not caught before, will be halted when they apply for their 1921 licenses.

## Five Counties Lose In Population

The drift from the rural communities and farms to the big cities is to be found in Maryland as elsewhere, according to some figures on population of Maryland counties made public last week by the Census Bureau at Washington. While practically every report on large cities in Maryland has shown an increase in population as compared with 1910, the five counties for which reports have been made show decreases.

The population of three counties on the Eastern Shore were given as follows: Caroline, 18,652, as compared with 19,216 in 1910, or a decrease of 564; Dorchester, 27,895, as compared with 28,669 in 1910, or a decrease of 774, and Queen Anne's, 16,001, as compared with 16,839 in 1910, or a decrease of 838. Howard county showed a population of 15,826, as compared with 16,106 in 1910, or a decrease of 280, and St. Mary's a population of 16,117, as compared with 17,030 in 1910, or a decrease of 918.

The population of Washington county this year is 59,694, as compared with 49,617 in 1910, but this increase for the most part was in the city of Hagerstown, where the population was 28,066, as compared with 16,507 in 1910.

## MARYLAND DISTRICT REVENUES

\$108,641,672 Paid To Uncle Sam In The Past Twelve Months

Internal revenue collections from the Maryland district, which includes the District of Columbia, for the fiscal year ending June 30, totaled \$108,641,672.45.

These figures were made public Monday of last week at the Internal Revenue office, Baltimore. They represent the proceeds from excise, income, stamp, taxes, etc.

The largest single revenue item was collected under the head of Transportation and Other Facilities. This includes transportation of freight and passengers by water and rail; seats, berths, staterooms; transportation of oil by pipe lines; telegraph and telephone and radio messages. The amount collected under these heads was \$14,918,819.58.

Based on a cent stamp tax on every 25 cents worth sold, Marylanders and Washingtonians purchased \$903,668 worth of perfume and cosmetics during the year.

On soda water and soft drinks sold at soda fountains, \$660,232.51 was paid in revenue, indicating that more than \$6,000,000 worth of "non-skid" drinks were consumed. The total revenue from non-alcoholic beverages was \$1,295,550. Motion picture shows and theatres contributed more than \$2,000,000, showing that more than \$20,000,000 was spent by the public in such amusements. Candy-lovers indulged to the tune of approximately \$3,000,000, as the 5 per cent. candy tax, amounting to \$399,239.11, indicates.

But the collection of taxes and compilation of statistics are not all that confronts the Internal Revenue officials. Their scope of knowledge must embrace natural history, lingerie and nearly everything else. They have had to decide, for example, whether a chicken is an animal. Article 2, Internal Tax Regulations No. 51, states that any preparation of diseases or pain in either the human or animal body, "was subject to taxation as medicine."

A manufacturer making preparations for the eradication of lice, cholera and other ills of poultry raised the question of whether the chicken was, strictly speaking, an animal. It was finally decided the regulation should include chickens.

Then there was the man who sells ice cream cones. He bought revenue tax stamps and affixed one to each cone he sold. The officials pointed out that he was obeying the law, but advised him to follow the methods in vogue.

## Counties Gain And Lose In Legislature

By the Federal census of Maryland counties Washington county gains and Dorchester county loses one member of the House of Delegates.

The State Constitution provides that every county having a population of 55,000 and upward shall be entitled to six delegates and no more. The census returns show that Washington county has a population of 59,694, as compared with 49,617 of ten years ago. The county, which lost an additional member at the last census taking, thus gains one member and is on equal terms with Baltimore and Allegany counties, each of which has six members. Under the terms of the Constitution these counties have reached the limit in their representation.

Dorchester county drops back to its former representation—three members—by the narrow margin of 15. The basis of population that calls for four members is a minimum of 23,000. The census figure for Dorchester is 27,985. The population of the county in 1910 was 28,669, prior to which year the county was represented in the House by three members.

The census returns for the several counties to date show a net gain of one in the House, making the total membership of that body 102. Harford's figures entitled that county to four members, the number prior to the census of 1910. Returns from counties whose population has not yet been announced by the Census Bureau may make further changes in representation. Membership in the Senate is not based on population, but is definitely fixed by the State Constitution.

## 54,000,000 Gallons Of Whiskey Still

Officially there are 54,000,000 gallons of whiskey in bonded warehouses in the United States, a dwindling of about 15,000,000 gallons since January 16th, when prohibition became effective, according to John F. Kramer, Federal prohibition commissioner.

He announced last Wednesday that no more permits would be granted to persons to deal in whiskey in large quantities. The quantity of liquor withdrawn indicates that it was not used for non-beverage purposes, as permitted by law, he said.

## ELDERLY CAN "COME BACK"

Physician Tells How He Succeeded in Throwing Off the Incubus of Advancing Years.

Dr. I. Leo Nascher tells how he made himself over into a young man, in an article in People's Magazine for May. "It is something any elderly person can do," he says. "Here is the simple proposition. A man ages many years in the course of a severe illness lasting several weeks. After a few weeks' vacation, he looks and feels many, but to a certain extent the cure was taken ill. Having in mind hundreds of cases in which this has proved true, it is logical to ask if we cannot rejuvenate the aged, make them grow young again, just as we made the prematurely aged invalid become young. And, through recent experiments, that can now be answered in the affirmative. I speak from personal experience.

"It is a fact that there is not a single one of the objective manifestations of senility, those that give the appearance of old age, which cannot be removed, suppressed, or hidden, or at least a youthful substitute found for it.

"To restore the spirit and buoyancy of youth is more difficult. This requires the will, not only the desire, but the determination and the energy to be young, to feel young and look young. Most old persons have the desire, some have the determination, but few have the energy to carry out the measures necessary for rejuvenation. In many cases the old man or woman who would like to do so is afraid of ridicule, of being called giddy and foolish if he or she suddenly appeared in youthful attire and adorned with the artifices of the beauty parlor. Yet under some special stimulus, usually the desire to attract some particular individual of the opposite sex, both men and women have gone beyond the limit of propriety to look younger than they are and feel younger than they look. And if they went about it the right way they usually succeeded.

"I tried it a couple of years ago, not to attract any particular individual, but to see if it could be done, and how it felt to grow young.

"In one year the change in my appearance and actions and feelings was so complete that persons who had not seen me since the earlier days, when I was aged, did not recognize me."

**Yields to March of Progress.**

One of the oldest banks in Wall street has finally yielded to the march of progress—and installed a telephone. It will only have one phone at first, for it is difficult to uproot prejudices of many years. They have never had a telephone because they believed that confidential business could not be conducted over a telephone and their atmosphere of the old bank, the oldest in the city, is that of a staid institution in some old town settled in Colonial times. Absolute quiet prevails. The employees retain the old-fashioned good manners. Instead of a lovely singing creature who tells the world the line is busy in thrilling soprano, the bank will select for their first telephone operator a person with a beard and a bass voice, able to endow his lightest utterances with a certain profundity.

**New and Valuable Resin.**

A new synthetic resin is stated to be a suitable substitute for many purposes for Damar and Kauri gums and common resin. It is produced from coal tar distillates, and has been named Cumar. It is soluble in coal tar solvents, vegetable oils, carbon bisulphide, carbon tetrachloride, ether and acetone. It is insoluble in alcohol, and this unusual property gives it a special value for varnishes. It finds use also in leather dressings, polishes, artificial leather, printing inks, water-proofing paper, linoleum, and as a binder for molded materials. Its color may vary from light yellow to dark-amber, and the melting points of the various grades range from 50 degrees to about 160 degrees centigrade. With many mineral and vegetable waxes it gives mixtures of remarkable properties.

**A New Outfit.**

The man next door to four-year-old Allen has a new car and little Allen is much given to accompanying him to the garage to keep him company while he tinkers with it. He sometimes seems to get as much pleasure out of it as does its actual owner. Only the other day something happened which threatened for a time to dim his enjoyment. The owner of the car came home with a jumper suit in which he appeared the next time he went out to work on his car.

The next time he started out to the garage he whistled for Allen but no boy came. Then he went over to Allen's house and hunted up the little fellow. "Come on out to the garage with me, son," he said.

Allen looked at him sorrowfully. "I can't," he said sadly. "I haven't any garage underwear like yours."

**Chinese Girls Fight the Boys.**

According to the Pekin Jipao the experiment of mixed education has not been a brilliant success in the capital as it resulted in a stand up fight between girl and boy students in the government university. It appears that during school hours some of the boys attempted to "cut out" the swains of some of the girls, and these, becoming jealous, tried to wreak vengeance. The government has dismissed all the participants in the scrap and has decided that the present moment is inopportune for mixed education and will drop the scheme.

**Nature's Adaptation.**  
British mine-rescue investigators have made the curious discovery that while the average man is stimulated by the oxygen of their apparatus, no effect on miners is apparent. It is suggested that long work in a close atmosphere has given the lungs such full use of the available oxygen that an excess has no influence.

If you feel that you are experiencing hard luck, think of the Oregon man who recently completed a comfortable rose cottage on the seashore, when the sad sea waves washed up a dead whale in front of his home, and now he's decided that it will be cheaper to move the cottage than the whale.—Boston Transcript.

**First Use of Water Colors.**  
Water colors were practically unknown in Europe until the eighteenth century, and they were used only as a vehicle in art. Fresco paintings were a natural outgrowth of their use. Water colors were employed by the artist in decorating many famous buildings. They took the place of oil colors.

**The Reason.**  
"Nervous exhaustion seems so prevalent just now."  
"Yes, since the automobile came in people are a lot more run down."

"It says here that the world is not revolving as fast as it did 10,000 years ago," said the Old Fogey, as he looked up from the magazine he was reading.  
"Maybe not," commented the Grouch. "But it goes around fast enough to satisfy a man who has a note to meet and no money to pay it."

**"Vamped."**  
"If you will permit me to say so, you have just had a beautiful caller."  
"Yes, a book agent," replied the business man, with a faraway look in his eyes.  
"What was she selling?"  
"I couldn't tell you to save my life. All I know is that she smiled and I bought."

**A Lengthy Program.**  
"You have a pretty good library."  
"Yes," replied the patient man. "I have worked twenty years or so accumulating a lot of books and a place to put 'em. Now I'm going to start in and work another twenty years to provide for enough leisure to enable me to read 'em."

**Artful Candidate.**  
"But you can't run for two offices at the same time."  
"You don't understand politics," said the veteran campaigner. "I'm going to ballyhoo for one office while I'm pussyfooting for the other. In that way I can't lose."

**Made Him Doubt His Judgment.**  
Friend—What makes you think the new singer won't do? You said her voice was good.  
Manager—Well, I did think so at first, but I'm a little doubtful about it now—none of the other singers are jealous of her.

**'Too Good to Be True.**  
"My son," said the elderly sage, "beware the man who says he wants to make you rich."  
"But he may be sincere."  
"There's not that much sincerity in the world."

**A Good Memory.**  
"How does Scribner get the atmosphere for his stories of rural life?"  
"He goes up to an office he uses on the twentieth floor of a skyscraper and thinks about the time when he was a boy on the farm."

**Bitter.**  
"You are acquainted with the plaintiff?" asked the lawyer as a mere matter of form.  
"No, sir," replied the unhappy defendant. "I merely lived with that woman seven years as her husband."

**Strategy.**  
"Have you given the new housemaid any instructions?"  
"No; and why should I?"  
"Huh?"  
"If I tell her nothing she's bound to do something I want."

**Sentence Passed.**  
"What's the matter, old man? You look as if you'd been sentenced to hard labor for life."  
"I'm afraid I have been. Miss de Millyns has just refused me."

**A Business View.**  
She—So papa said yes. Does he favor a long or a short engagement?  
Jack Poore—That depends, he says, if he has to support me, the longer the engagement the better.

**Not Interested.**  
"The golfer must keep the eye strictly on the ball."  
"That must be why pretty girls don't go in much for golf."

**His Attitude.**  
"You wouldn't sell your vote to both sides, would you?"  
"No, but I don't mind letting both candidates promise me a job."

**Quite True.**  
"Pa, what is a peacemaker?"  
"He is a man, my child, whose chief success is in precipitating a fight."

## What's done as much as anything else to fill up the movie houses

**LOOK** at the crowds that step out of their cars in front of the movies every summer evening.

The movie managers would be renting half of their theatres for store space, if it weren't for the automobile.

II

It is typical of Americans that they took to the automobile as a matter of course—just as they have to the movies and to every other great invention of the last half century.

And the same thing has happened everytime. *Taking things as they come* is a fine way to foster waste and extravagance.

As regards tires, the comeback is about due. People are pretty near through pay-

ing for some there when

What a tire is *quality* number of miles or the privilege of getting a rebate in case the miles don't come up to the limit.

U. S. Tires are guaranteed as to quality—with no limitation of mileage.

And that holds just as good for the *small car tire* as for the biggest U. S. Tire we've got. There's *only one* standard of quality with U. S.—and the size of the car has *nothing whatever* to do with it.

IV

We represent U. S. Tires in this town. You'll find it worth while to talk to us before you buy any more tires.

Select your tires according to the roads they have to travel:

In sandy or hilly country, wherever the going is apt to be heavy—The U. S. Nobby.

For ordinary country roads—The U. S. Chain or Usco.

For front wheels—The U. S. Plain.

For best results everywhere—U. S. Royal Cords.

Things won't be right in this country  
while they build so many more garages  
than toolsheds.

It's a hard thing for a boy to aim his  
air rifle at a tree when there is an elec-  
tric light bulb within range.

With one person in 15 owning an au-  
tomobile, and one in 1500 operating a  
wheelbarrow, prices are bound to be  
high.

Many public officials feel that the  
public interest would be benefited if  
they were given the use of an automo-  
bile.

The husbands who turn over all their  
money to their wives have a good ex-  
cuse when some one asks them to bor-  
row \$10.

Some people in Somerset county who  
resent any infringement on their rights  
as American citizens, can't remember  
to register for voting.

A bookkeeper can't make as much  
money as a ditch digger, yet many peo-  
ple consider ability to wear a white  
collar as sufficient compensation.

It is only their intense feeling of pa-  
triotic loyalty that leads candidates to  
accept nominations for jobs that they  
have been pulling wires to get.

While the scarcity of labor makes it  
difficult to get lawns mowed yet there  
is some satisfaction in not having to  
kick a book agent out doors every other  
day.

Some motorist will run under a closed  
gate at a railroad crossing and yet their  
relatives expect the obituary editor to  
write them up as prominent citizens of  
high intelligence.

After travelling through some of the  
"detours" where roads are being re-  
paired, the motorist feels qualified to  
operate an armored tank through a bat-  
tlefield of shell holes and trenches.

The people who ask the editor how to  
remove spots from clothing are informed  
that a pair of scissors will usually do  
it. Also if you can't unlock your trunk  
you can always open it with an axe.

Anyway, when you buy of the home  
store you don't have to pay for the organ  
and orchestra concerts, the palm gar-  
dens and fountains, that the metropol-  
itan stores have to run in order to draw  
trade.

### LAST YEAR'S LAND BOOM

The average increase in farm land  
values in this country during the year  
1919 was greater than the total increase  
that took place in the fifty years from  
1850 to 1900. The consensus of expert  
opinion appears to be that last year's  
boom was no benefit either to farmers  
or the country. About two-thirds of  
the profit in the states where the ad-  
vance reached a feverish stage was  
gathered in by speculators in cities and  
towns.

It was rather natural that land prices  
should advance last year considering  
high prices for food products. But the  
top prices for farm help were not reach-  
ed until this year. Some people who  
bought farms on the top wave of land  
did not figure on the high peak of labor  
yet to come.

Department of Agriculture investiga-  
tions show that the average worth of  
tenants in 60 counties where last year's  
boom was active, was only 12 per cent.  
of the value of the average farm capi-  
tal. It is not going to encourage a  
tenant to buy a farm if you ask him  
eight times as much for the property as  
he can pay down himself.

Speculation has its uses to some ex-  
tent, since it enables a man who really  
needs to sell property, to get a reason-  
able price for it. But it leads people to  
devote their attention to trading when  
they ought to be producing. Many of  
the people who have made money out of  
land speculation are likely to settle down  
and do nothing, thus subtracting their  
efforts from the production of the coun-  
try.

Land speculation drives buyers into  
sections where land is relatively cheap  
and untouched by any craze. Also it  
discourages people from becoming farm  
owners and increases the amount of  
capital that must be tied up in food pro-  
duction. All these factors reduce agri-  
cultural output.

### LIFE AT THE SUMMER RESORTS

There is a lot of money in circulation  
and the summer resorts are probably  
doing the biggest business in their his-  
tory. The automobile crowd may groan  
at the high prices of the swell hotels.  
People of moderate means will often  
pay high for a brief contact with the  
idle rich, but they escape as soon as  
possible with what remnants of cash  
they may retain.

The natives in such resorts may not  
do much through the winter as the  
spenders of the vacation season are a  
sufficient harvest. At home you easily  
carry your suit case to the station, but  
it is a disgrace at the stylish resort to  
carry it from the desk to the elevator.  
So you must pay all along for your tem-  
porary fling as a swell.

To some people a summer resort is  
dull and boring unless it has all the  
sports and pastimes of city life, with an  
incessant round of movies and dance  
halls and trick and novelty shows.  
Crowds by tens and hundreds of thou-  
sands flock to these jazzy centers in  
the vain endeavor to occupy their fre-  
quently vacant minds. Everybody visits  
them to study human nature, but sen-  
sible people feel that a very little of that  
life goes a long way.

All over the country you find a third  
type of resort, where people of quiet  
tastes can rest from the grind of labor.  
They find in country life and scenic  
beauty a healing influence which quiets  
the tired nerves and tones up mental  
and physical ability.

There one meets the people who are  
doing the finest and most genuine work  
of the world, and who keep their nature  
sunny, clean and bracing amid all the  
false excitements of the times. A vaca-  
tion spent in such surroundings is a  
blessed experience and passes all too  
soon.

The man who lets his fruit waste in  
the country when prices for it are high  
in the towns is usually the same one  
who says it never pays to advertise.

### Cured Of Stomach Trouble And Constipation

Rachel Cribley, of Beaver Dam, Ohio,  
was sick for two years with stomach  
trouble and constipation, taking one  
medicine after another with only tem-  
porary relief. "My neighbor spoke so  
enthusiastically of Chamberlain's Tab-  
lets," she says, "that I procured a bot-  
tle of them at our drug store to try. A  
few days treatment convinced me that  
they were just what I needed. I con-  
tinued their use for several weeks and  
they cured me."

By virtue of two writs of fieri facias issued out  
of the Circuit Court for Somerset County, and to  
me directed, at the suit of Philip F. Bounds  
against Daniel Elzey Smith and Lucy Smith, his  
wife, I have entered upon the premises of the said  
Daniel Elzey Smith and Lucy Smith, hereinafter  
described, and having entered thereon I have

the right, title, interest and estate of the said  
Daniel Elzey Smith and Lucy Smith, in and to  
all that lot or parcel of land, with the improve-  
ments thereon, situate in Mt. Vernon Elec-  
tion District, Somerset County, Maryland, where  
the said Daniel Elzey Smith and Lucy Smith, his  
wife, reside, situate on Polk's Road in said dis-  
trict, adjoining the lands of Willie Nutter, Sidney  
Nutter, the Goslee property and John W. Lan-  
ford, containing TWO ACRES, more or less, and  
being the same land which was conveyed unto the  
said Lucy Smith by William T. Holland and wife  
by deed dated the 1st day of January, 1908, and  
recorded among the land records of said Somerset  
County in Liber S. F. D. No. 48, folio 22, etc., and  
I hereby give notice that on

Tuesday, August 24th, 1920

AT THE HOUR OF 2 O'CLOCK P. M.

at the Court House door in Princess Anne, Mary-  
land, I will sell all the right, title, interest and  
estate of the said Daniel Elzey Smith and Lucy  
Smith, his wife, in and to all the above described  
lot or parcel of land, together with the buildings  
and improvements thereon, to the highest bidder  
for cash to satisfy the said writs, interest, costs  
and charges.

The above described property will be sold sub-  
ject to the lien of a prior judgment in favor of  
Isaac J. Holland against the said Daniel E. and  
Lucy Smith, same being No. 42, Appointments,  
January term, 1914.

### SEED AND FOOD COSTS

One reason why food production is un-  
satisfactory and food costs the consumer  
high, is that so much of the seed plant-  
ed by the farmer is poor. The Iowa  
Experiment station in one year has ex-  
amined 3800 samples of seed sown for  
farmers. It found 19 per cent. of these  
seeds dead and 21 per cent. was too  
weak to be of any value.

It would seem as if every farmer  
would want to have his seed tested be-  
fore going to the expense of planting it.  
Probably the experiment stations of  
the country would not have facilities  
so that all the farmers could do it. If  
so, it would abundantly pay to have  
sufficient facilities added so that ade-  
quate tests could be made of all seed  
supplies.

A great deal of poor seed is worked  
off. The farmer gets higher prices  
when as a consequence food production  
falls off, so that the mass of the people  
are the worst sufferers.

### Boy Missing From Home

The newspapers of this State are be-  
ing asked to help to locate Manning A.  
Trea, 17, missing from his home in  
Ithaca, N. Y., since June 6. He is said  
to be a boy of good habits and it is  
thought probably he was lured away by  
advertisements of big wages paid boys.  
He is 5 feet 8 inches tall, dark, weighs  
about 135, plays clarinet and cornet well  
enough to take a position in a band or  
orchestra. His father, A. E. Trea, of  
Ithaca, N. Y., or his aunt, Mrs. A. T.  
Hoyt, of Moravia, N. Y., will be grate-  
ful for any information concerning him.

### Chamberlain's Colic And Diarrhoea Remedy

This is unquestionably one of the most  
successful medicines in use for bowel  
complaints. A few doses of it will cure  
an ordinary attack of diarrhoea. It has  
been used in nine epidemics of dysentery  
with perfect success. It can always be  
depended upon to give prompt relief in  
cases of colic and cholera morbus. When  
reduced with water and sweetened it is  
pleasant to take. Every family should  
keep this remedy at hand.

### POINTED SHOES

\* The toothpick shoe is still popular and  
some of the most extreme pointed toe  
styles are seen. But one of the largest  
stores in New York City reports that it  
has had to change its lines entirely on  
account of the increased demand for  
broad toed and low-heeled shoes, the  
result to a large extent of the Young  
Woman's Christian Association cam-  
paign for better feet.

People who wear the pointed affairs  
claim they are equally comfortable,  
since they are said to be just as wide,  
the pointed effect being created by ex-  
tending the shoe in front. If so, the  
elongation for a couple of inches beyond  
the foot is a monstrosity and must be  
an obstacle to good walking power and  
a natural gait. Perhaps the vain folks  
that wear them will yet find that they  
have developed the pointed shoe limp.

It's mighty hard for the highball  
crowd to come down to fishbells.

### Road Notice

The undersigned hereby give notice that they  
will petition the County Commissioners for Som-  
erset County at their first meeting after the 7TH

## Banking On Milk

The disastrous connection between the  
bull and the china shop should not pre-  
vent a growing friendship between the  
cow and the bank. As R. M. Cleveland,  
who has received nation-wide com-  
mendation for his articles on Dairying  
and Milk Products in

## The COUNTRY GENTLEMAN

says, "The modern banker, the coun-  
try over, is forming a new partnership,  
a mutual-benefit association with the  
dairy cow."

There was a time when  
the average banker al-  
most classed the cow  
among the farmer's li-  
abilities. Not so these  
days! Banks in practi-  
cally every community  
are glad to lend money  
to out scrub bulls—bul-  
shevike they call them—  
and build up a purebred  
dairy industry that brings  
the prosperity that makes  
banking pay. Whether or  
not you produce milk, you

will want to read Mr.  
Cleveland's splendid ar-  
ticle. And I'll be glad to  
send you the issue of THE  
COUNTRY GENTLEMAN  
that contains it, along  
with 51 other inspiring  
weekly issues—coming  
in all a full year of the  
famous Country Gentle-  
man farm service—for  
just a single dollar.  
You'll get your full value  
for your money—believe  
me!

**TEACHERS' EXAMINATION**  
An examination of applicants for second and third grade teachers' certificates will be held at the High School building at Princess Anne, on Monday and Tuesday August 16 and 17, 1920.

BEGINNING AT 9 A. M. EACH DAY  
This examination will be limited to the subjects required of applicants who write for their test certificates. The examination for raising grades of certificates will not be given until next June.

A. S. COOK, State Superintendent

**NOTICE TO TAXPAYERS**  
Notice is hereby given that the levy of the year 1920 for State and County Taxes has been made in Somerset county.

Pursuant to said levy the taxes are now in my hands for collection. A discount of three per cent. will be allowed on all county taxes paid on or before October 31st, 1920, and a discount of two per cent. if paid during November, 1920. No discount will be allowed on county taxes paid after November 30th, 1920.

The law allowing discounts on State taxes has been abolished, therefore no discount will be allowed on State taxes.

The law provides that both County and State taxes must be paid in order to obtain the discount. State taxes bear interest from October 1st, 1920, at the rate of six per centum per annum. County taxes bear interest from January 1st, 1921, at the rate of six per centum per annum and interest is charged for the full month from the first day of each month.

R. MARK WHITE, Treasurer and Collector of State and County Taxes.

**Exercise Intelligently.**  
 "Grow younger as you grow older by cultivating a love of good, healthful, honest sport," is sound advice. Walking, riding, rowing, playing golf, tennis or croquet or any other mild form of exercise in the open air keeps the muscles supple and prevents the joints from stiffening, fills the lungs with life-giving oxygen and keeps the blood from becoming sluggish or the liver torpid. In short, it is exercise and right thinking that keep the body "in time and up to concert pitch."—Orison Swett Marden in Chicago Daily News.

**Put Romance Before Truth.**  
 Inaccuracies in history and anecdotes with no foundation of fact may be blamed on some of the older historians. The men who first wrote of Colonial and Revolutionary times often tried to make their accounts romantic and picturesque by revising history to suit themselves, because they did not see that the real facts were more romantic than their embellishments could make them. Our histories, paintings, poetry and traditions are still influenced by their work.

**Pronounced Stinginess.**  
 I was visiting a friend in her new farm home. Her nearest neighbor was a millionaire's son, trying practical farming on a well-improved farm. He had a large peach orchard, small fruits and beautiful roses. He brought us two roses one day and two peaches the next day. Neighbor women offered to put up his berries on shares, but as he was afraid they would be getting the best of the bargain, he let the fruit dry up on the vines.—Exchange.

**Ancient Idea of Comets.**  
 Ancient peoples, puzzled by these awe-inspiring phenomena, proclaimed that "comets are composed of the sins of mortals, which, ascending to the sky, and so coming to the notice of God, are set on fire by his wrath." This interpretation of comets, though convenient for making people more religious, was not otherwise valuable. By 1650 A. D. a good deal was known about the laws governing them.

**John Smith Named New England.**  
 The name of New England was coined by Capt. John Smith of Pocahontas fame, one of the founders of the Virginia colony. In 1614 he explored and mapped the northern coast, then called North Virginia, and renamed it New England. The charter granted the Mayflower Pilgrims adopted the name used in Smith's map several years before.

**Migratory Fish.**  
 Certain fish of the South American tropics are known to leave the small ponds to seek larger and cooler stretches of water when the sun threatens to dry up their late habitations. They spend whole days and nights upon their march, and travel by hundreds through the moist undergrowth of the forests.

**Few Bricks Came From England.**  
 The late George Alfred Townsend established beyond controversy that, while there may have been a few isolated instances of cargoes of bricks from England, not one colonial house in fifty, for which such claim is made, included English bricks in its composition.—From a letter in the Baltimore Sun.

**Tennis a French Game.**  
 Tennis is a French game which in the twelfth century was played with ball and bat on horseback. Later the horses were dispensed with. The game was very popular in England in the sixteenth century when racket first came into general use. Before that the hand was used for batting.

**Finger-Prints in Babylon.**  
 A group of valuable historic tablets from the excavations of the city of Babylon, bearing dates as far back as three and a half centuries before the Christian era, was recently secured. Several of the pieces carry the distinct prints of the fingers which molded them over 2,000 years ago.

**The Fourth Dimension.**  
 The fourth dimension is merely a mathematical speculation. It is assumed to be the property of matter that should be to solids as solids are to planes. Mathematical investigations are made on the assumption of an indefinite number of dimensions.

**Open Bribery.**  
 Jane had just commenced school, and the teacher asked her a question in numbers which she was unable to answer. She walked up to the teacher and said in a low voice: "If you won't ask me that I'll give you some of my animal crackers."

**Could She Carry Them?**  
 While I was putting my hat and coat on my little boy asked me where I was going and I told him that I was going to get seats for the circus. He said, "Mamma, can you carry them?"—Exchange.

**Dressmaker Dresses Employees.**  
 Once a year one of the greatest of Parisian dressmakers lets each of the women in his employ choose a gown from his stock, and has it made up according to her directions.

# Get Goodyear Value In Tires for Small Cars

Don't be misled by very cheaply priced tires, for tire economy is not a matter of what tires cost originally but of what tire service costs in the end.

True Goodyear mileage and economy are built into Goodyear Tires, of the 30 x 3, 30 x 3½ and 31 x 4-inch sizes, in the world's largest tire factory devoted to these sizes.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking one of these sizes, you can equip it with Goodyear Tires at your nearest Service Station.

Go there for the exceptional value in these tires made possible by Goodyear's resources, experience and demonstrated expertness in tire manufacture.

### "Mapping" the Air.

The greatest discovery yet made in exploring the air is that the atmosphere consists of two layers, the lower extending from sea level up to 10,000 meters, in which there is a steady fall of temperature with elevation. This is called the troposphere. Above this there is no fall, and up to 20,000 meters a slight rise. The upper layer is known as the stratosphere. It is actually possible today for an airplane to rise from the ground to the bottom of the stratosphere, say about six miles, in one hour. If we want to explore somewhat higher, say 20 miles, we install light instruments on a sounding balloon.

### The Modern Mrs. Malaprop.

A Washington newspaper correspondent tells of a Mrs. Malaprop who once amused the capital with her mistakes. She went around asking people to sign a "red robin" (meaning a round robin); spoke of her trip through the "Valley of Gethsemane" when she meant the Yosemite; and said, "I've been in the mountains, and, do you know, I jumped from rock to rock just like a shamrock!"—From the Outlook.

### Hair For the Bald.

A French surgeon of the Pasteur Institute claims to have discovered a process by which he can graft hair to the scalp and so make the heads of the bald to blossom like the Seven Sutherland Sisters. He declares that he has already positively and permanently cured six bachelors of baldness through a slight surgical operation which is painless and leaves no ill effects.

### Greenland Source of Icebergs.

The source of practically all the icebergs of the arctic and sub-arctic regions is Greenland. Owing to the northward set of the West Greenland current the bergs of this side are carried first to the north and it is only at about the seventy-fourth or seventy-fifth parallel of latitude that they begin to make their way westward to come down on the American side.

### Had Many Sleeping Places.

The average man probably sleeps in 100 beds or so during a long lifetime. A veteran commercial traveler whose home is in New York, can afford to smile at this record, for, he says, "I calculate that I have slept in at least 8,000 beds during my forty-odd years on the road, and I have slept well in them all."

### Human Stepping Stones.

There are said to be many "Raleighs" in China. When a Chinese lady comes to a muddy place in the road she usually gets over it by employing a human stepping stone. Beckoning a boy she gives him a small coin, in return for which he drops on his hands and knees in the mud for her to step over.

### Beetles' Blood for Warts.

Dr. E. Escómel describes in *Anales de la Facultad de Medicina (Lima, Peru)* certain pseudo beetles the blood of which has from time immemorial been used by the natives for curing warts. Under it these growths turn white, as if cauterized by an acid.

### Remember the Small Things.

It is easy to talk glibly of serving humanity and to forget to pass the salt to the man who sits next us at table, to think of placing our lives at a world's disposal and neglect the small attentions which mean so much to our own home.—Henry Sloane Coffin.

### To Restore Faded Ink.

When the ink of old documents has faded and it is desired to restore it, this can be done by washing with any of the substances that blacken on mixing with iron—infusion of nutgalls, sodium-sulphide, or acetic ferro-cyanide of potassium, for instance.

### Why She Would Change Faith.

Mary Jane is a member of the Episcopal Sunday school. One Sunday when she came home she told her mother she thought she'd like to change churches, as their's was so hard on white stockings.

### How to Test Set Diamond.

A set diamond may be tested by placing wax on its back. The luster of a true gem will not be affected by this operation, while the spurious brilliancy of paste imitations will be totally destroyed by it.

### —sh! Keep It Dark!

At a recent bar examination a candidate defined law as follows: "Law is the means by which we acquire legal possession of property belonging to another."—Boston Transcript.

### Vain Acquisition.

"Some men gets a heap of education," remarked an old colored philosopher, "jest as some people gets a whole lot of bait without ketchin' any fish."—Boston Transcript.

### The Worthy Citizen.

He who possesses worth and intelligence, who is just, speaks the truth, and does what is his own business, him the world will hold dear.—Thamapada.

**Spencer Popular in America.**  
Herbert Spencer, the great philosopher, was more popular in America during his life than in England. When Spencer visited the United States, in 1882, his fame and influence were so securely established that one admirer offered to pay all the expenses incurred by the philosopher on his trip, and heads of railways offered him the most luxurious traveling facilities, while other friends vied with one another to make the tour comfortable, interesting and instructing.

**Atmosphere Above Earth's Surface.**  
The atmosphere is believed to extend much more than 100 miles above the earth's surface. Its density decreases rapidly for the first few miles of ascent, then much more gradually. From the phenomena of twilight, due to refraction of light, it may be demonstrated that the air extends up to a height of 45 miles; but other phenomena, such as the behavior of meteors and the aurora, show that rare air exists at a much greater height.

**No Chances at All for Joy.**  
Junior had spent several weeks one summer visiting a favorite aunt who lived in the suburbs, and he was reminiscent of those happy weeks when he again paid her a visit. However, she had moved, and now lives in a flat. When Junior came home he voiced his grievance to his father, saying: "There wasn't no room to move around in; why, they didn't even have any kids in that building to fight with!"

**Life's Real Meaning.**  
As the sun rises every soul is born again, and the new day gives us a chance to begin all over again. We can do and be what we will to do and be for the entire day. We can make it a red-letter day if we try hard enough. This is the way of growth. And if life does not mean growth, enlargement to us, then we have missed its higher meaning.—Orison Swett Marden in Chicago Daily News.

**Trees Valuable to Farmer.**  
The value of trees on a farm can hardly be overestimated. A principle laid down by wise observers is that 5 per cent of all areas of plains and prairie states should be put into trees. The forest waters the farm. This is a patent fact in all regions where irrigation is practiced; it is not less true in all the rest of the country.

**Always the Silver Lining.**  
We'll admit that the future of the so-called civilized world unfolds no radiant prospect to the vision of the student. Still, the sky can never become so black, but that a 60-pound watermelon will spray the frowning archway with rainbows and spangle the horizons with flashes of gold.—Houston Post.

**Curious Sea Charts.**  
A sea chart made of sticks and shells forms one of the curious exhibits to be seen in the South Sea Island hall of the American Museum of Natural History, New York. They were formerly used as guides by the skillful and daring navigators of the Marshall Islands.

**Quite Sure of It.**  
"Do you believe that the thoughts of a husband and wife become identical?" asked Bounder. "I do," answered Jaggsby. "For example, my wife is waiting for me now, and she knows just what she is going to say to me, and so do I."—Brooklyn Citizen.

**On the Way.**  
The time seems to be coming when those who indulge in luxury and show will be regarded with quite as much suspicion and contempt as was formerly directed toward those who haunted the doors of chicken coops after dark.—Utica Observer.

**Queer Little Isle.**  
The smallest dependency of France is the Ile d'Hoedie, situated at the east of Bella Isle. Its population is 233. They do not speak French, but Celtic. They are provided with food at an inn managed by the women. The town has no streets.

**Counting Has a Limit in China.**  
Ten thousand is the largest number in the Chinese language. Therefore all large sums must be stated in multiples of this figure—the population of the country is four times 10,000 times 10,000, or 400 million.—Asia Magazine.

**Economy.**  
The pot of gold at the end of the rainbow—has anybody ever seen it? Will anybody ever return with it? Economy may mean the difference between living in a poor house and supporting one.

**New Use for Airplane Engine.**  
A London factory owner believes himself the first to use an airplane engine as an ordinary power unit. Only a small part of the rated horse power is used.

**Boxmaking Facilitated.**  
Nails are driven through two boards at once at an angle, and clinched into the second board by an English inventor's boxmaking machine.

"Pep"

When your Ford car or your Ford truck doesn't display its usual quantity or quality of "pep" and dash, it's time to have a repairman who understands the Ford mechanism give it the "once over"—then make the necessary adjustments or repairs. And return it to you full of its old time power, "pep," energy, pull and service. You'll notice the difference.

We employ only skilled Ford mechanics—men who know how Ford cars are made, and how they should be kept in order to give the most efficient and economical service. And our shop equipment boasts a great many specially designed tools and time-saving devices and machinery. In our stockroom is a complete assortment of repair parts—genuine Ford parts—that are exactly the same as their tough, sinewy originals in the Ford car.

For prompt repair work or adjustments, phone or drive to our garage. Don't risk chances, play fair with your Ford car. Keep it in the hands of its friends, the authorized Ford dealers. Insist on genuine Ford parts.

**"Picture Brides?"**  
The manner of "picture bride" marriages in California is this: A Japanese sends his picture to his relatives in Japan who select a suitable maiden and in turn forward her photograph to the waiting suitor in America. If satisfactory, the relatives on both sides meet, hold a banquet and the marriage is considered a fact. The wife then joins her husband in this country.

**When Man Weighs Nothing.**  
Prof. Edward V. Huntington of Harvard university showed by an elaborate mass of figures printed in Science that a man on a train moving along the equator westward at 18,700 miles an hour, or eastward at 16,700 miles an hour would weigh nothing, as measured by an observer on the train.

**Dreaming of Old Age.**  
To dream of old age is a sign of coming good news. To see an old man is a sign of love for the young dreamer, a sign of success for the mature person. To see an old woman in one's dream foretells an immediate pleasant surprise.—Chicago Herald and Examiner.

### PROCLAMATION

Proposing Amendments To The Constitution of the State, 1920

Whereas, at the January Session of the General Assembly of Maryland, held in the year 1920, two Acts were passed, to-wit: Chapter 319, proposing an amendment to Section 15 of Article III of the Constitution of the State, title "Legislative Department," regulating the compensation of Members of both Houses of the General Assembly; and Chapter 565, proposing an amendment to Section 37 of Article 4 of the Constitution of the State, title "Judiciary Department," regulating the pay of Clerks of Courts, and which said Chapters 319 and 565 are in the words and figures following:

**CHAPTER 319.**  
AN ACT to propose an amendment to Section 15 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," regulating the compensation of the members of both Houses of the General Assembly of Maryland, and to provide for the submission of said amendment to the qualified voters of the State of Maryland for adoption or rejection.

**SECTION 1.** Be it enacted by the General Assembly of Maryland, (three-fifths of all the members of each of the two Houses concurring), That the following section be, and the same is hereby proposed as an amendment to Section 15 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," the same if adopted by the legally qualified voters of the State, as herein provided, to become Section 15 of Article III, of the Constitution of the State of Maryland.

15. The General Assembly may convene its session so long as in its judgment the public interest may require for a period not longer than ninety days; and each member thereof shall receive a compensation of three hundred dollars per annum, and five dollars per diem for every day he shall attend the session, but not for such days as he may be absent on account of sickness or business or by leave of the House of which he is a member and he shall also receive such mileage as shall be allowed by law, not exceeding two cents per mile; and the presiding officer of each House shall receive an additional compensation of five dollars per annum. When the General Assembly shall be convened by proclamation of the Governor, the session shall not continue longer than thirty days, and in such case the compensation shall be the same as herein prescribed.

**SECTION 2.** And be it further enacted by the authority aforesaid, That said foregoing section hereby proposed as an amendment to the Constitution of the State of Maryland, shall, at the next general election for Members of Congress held in this State, be submitted to the legal and qualified voters of the State of Maryland, and the same shall be adopted or rejected by ballot, and upon each ballot there shall be printed the words "For Constitutional Amendment," and "Against the Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by said Fourteenth Article of the Constitution, and further proceedings had in accordance with said Article Fourteen.

Approved April 9, 1920.

**CHAPTER 565.**  
AN ACT to amend Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and to provide for the submission of said amendment to the qualified voters of this State for adoption or rejection.

**SECTION 1.** Be it enacted by the General Assembly of Maryland, (three-fifths of all members of each of the two Houses concurring), That the following section be, and the same is hereby proposed as an amendment to Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and if adopted by the legal and qualified voters thereof, said section shall supersede and stand in the place and in stead of Section 37 of said Article 4 of the Constitution of Maryland.

**SEC. 2.** There shall be a Clerk of each of the said Courts of Baltimore City, except the Supreme Bench, who shall be elected by the legal and qualified voters of said city at the election to be held in said city on the Tuesday next after the first Monday of November, in the year eighteen hundred and sixty-seven, and shall hold his office for six years from the time of his election, and until his successor is elected and qualified, and he shall be eligible thereto, subject to be removed for willful neglect of duty or other misdemeanor in office, on conviction in a Court of Law. The salary of each of the said Clerks shall be forty-five hundred dollars a year, payable only out of the fees and receipts collected by the Clerks of said city, and they shall be entitled to no other perquisites or compensation.

until the general election of Delegates to the General Assembly to be held next thereafter, when a Clerk of said Court shall be elected to serve for six years thereafter; and the provisions of this Article in relation to the appointment of Deputies by the Clerks of the Circuit Courts in the counties shall apply to the Clerks of the Courts in Baltimore City.

**SEC. 2.** And be it further enacted by the Authority aforesaid, That said foregoing section hereby proposed as an amendment to the Constitution shall, at the next election for members of Congress to be held on the Tuesday next after the first Monday in the month of November, nineteen hundred and twenty (1920), be submitted to the legal and qualified voters thereof for their adoption or rejection in pursuance of the provisions contained in Article 14 of the Constitution of this State; and at said election the vote on said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be written or printed the words "For Constitutional Amendment," and "Against Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by the said Article 14 of the said Constitution.

Approved April 9, 1920.

Now, therefore, I, Albert C. Ritchie, Governor of the State of Maryland, in pursuance of the direction contained in Section 1 of Article 14 of the Constitution of Maryland do hereby order and direct that this Proclamation containing a full, true and correct copy of the text of said Chapters 319 and 565 of the Acts of the General Assembly of Maryland of 1920, be published in at least two newspapers in each of the counties of the State where so many may be published and where not more than one may be published then in that newspaper, and in three newspapers published in the City of Baltimore, one of which shall be published in the German language, once a week for at least three months next preceding the general election to be held in the State of Maryland on Tuesday, the 2nd day of November, 1920, at which election the said proposed amendments to the Constitution shall be submitted in form and manner prescribed by the General Assembly, to the legal and qualified voters of the State for their adoption or rejection.

Given under my hand and the Great Seal of the State of Maryland, Done at the City of Annapolis, this 23rd day of July, nineteen hundred and twenty.

PHILIP B. PERLMAN,  
Secretary of State.

**Many Reasons for Insomnia.**  
Whenever sleep becomes coy and must be wooed it is a sign that something has gone amiss and must be remedied. To obtain sleep then becomes a search for a complex mental, emotional or physical thorn in the side. Loss of sleep may be due to some physical cause such as an overburdened intestine or stomach, an abscessed tooth root, thickened tonsil, a skin irritated or cold, or an infection in some hidden, walled-off area of the anatomy. Equally as often some unconscious memory of financial reverses or difficulties, domestic complications or some other work banishes sleep.

**Signs of Consumption.**  
What are the early symptoms? The patient may have neither cough nor expectoration. He feels tired in the afternoon, and wakes tired in the morning. His appetite is poor, and he begins to lose weight or to stop growing. He is easily exhausted after exercise. Anyone who notices these symptoms in himself should consult a doctor. In any family, rich or poor, in which one member is known to have consumption, all the others should be examined by specialists.

**New Zealand.**  
Discovery of the island of New Zealand is attributed to Tasman in 1642, but exploration did not take place until the time of Capt. James Cook, 150 years later, while colonization was delayed until 20 years before the American Civil War. Colonization resembled the settlement of the American colonies in that settlements were made in half a dozen places instead of being promoted from a central base, according to the usual British method.

**Spider's Silk.**  
Experiments are in progress in Madagascar as a result of which it is hoped that a fine silk may be produced from spiders' webs. According to recent reports, excellent progress has been made by those in charge of the tests. The thread produced by spiders is declared to be finer in quality, stronger, and more beautifully colored than that obtained from silk worms.

**Loss by Storing Pulpwood.**  
It has been found by observations made at a sulphate pulp mill that pulpwood kept in storage from two to three years yields, on the average, 23 per cent less pulp than wood used when it is green, says Popular Mechanics Magazine. Pulpwood stored even one year loses 14 per cent of its value in pulp production.

**After Studying the Sparrow.**  
We spend considerable time observing the English sparrows and studying their character and have about reached the conclusion that, even if that well meaning but misguided British cousin had had sense enough not to bring them over, they would have got here somehow anyway.—Ohio State Journal.

**Giving Her Fair Warning.**  
John had just been reprimanded by his mother for something he had done, when he went into the bedroom where his new little baby sister was lying in her crib. His mother overheard him say: "Sister, you ought to go back where you came from; you can't do anything you want to do here."

**Still Hope.**  
Betty was talking with her mother about her little brother, and her mother said: "Betty, isn't it funny, Stuart and daddy have blue eyes, while you and I have green eyes?" Betty, thinking deeply, finally said: "Never mind, mother, ours will get ripe some time."

**Torpid Liver**  
Black-Draught "has no equal for headache, sour stomach, torpid liver and feverish colds." declares Mrs. Annie Whitmore, of Gate City, Va. "It is easy to take and does not gripe, as a lot of medicines do," she adds. "It is good to take in a hot tea for colds, or can be taken in a dry powder. I can't say enough for Black-Draught and the sickness it has saved us."

**Thedford's BLACK-DRAUGHT**  
has been found a valuable liver medicine, in thousands of homes. "I do not use any other liver medicine," says Mrs. Mary O. Brown, of Europa, Miss. "It is splendid for sour stomach, a bad taste in the mouth or torpid liver. I keep it all the time, use it with the children and feel it has saved us many dollars in doctor bills and many days in bed."

**Insist on the genuine—Thedford's.**

Dr. Grayson said the President had showed marked improvement of late and that it was not necessary to put him in the care of another physician.

### TIME IS THE TEST

The Testimony Of Princess Anne People Stand The Test

The test of time is what tells the tale. The public soon finds out when misrepresentations are made, and merit alone will stand the test of time.

Princess Anne people appreciate merit, and many months ago local citizens publicly endorsed Doan's Kidney Pills; they do so still. Would a citizen make the statement which follows unless convinced that the article was just as represented? Below is testimony such as the sufferer from kidney ills is looking for.

Mrs. Carroll Hastings, Stone Road, Princess Anne, says: "For nearly seven years I had disordered kidneys and I was miserable and weak. I had a dragging-down pain in my back and my heart palpitated. Then again, I had sick headaches and dreadful pains in the small of my back. I was getting worse every day and I finally got Doan's Kidney Pills at Jones & Colborn's drug store. The first box cured me of backache and the other symptoms were greatly relieved."

**KEEPS DOAN'S ON HAND**  
Over nine years later, Mrs. Hastings said: "I always keep Doan's Kidney Pills on hand in case I should need them. I recommend them whenever I have an opportunity."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills, the same that Mrs. Hastings had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

## Treasurer's Sale

By virtue of the power and authority vested in me as County Treasurer for Somerset county by the provisions of Chapter 10 of the Acts of the General Assembly of Maryland of 1910, as amended by the Acts of 1918, I hereby give notice that on

**Tuesday, Aug. 31st, 1920**

at the hour of 1:30 o'clock p. m., at the Court House door in Princess Anne, Maryland, I will sell at public auction, for cash, all the lots or parcels of land hereinafter severally mentioned and described, to pay and satisfy the state and county taxes levied against the said hereinafter described lots or parcels of land for the year 1917, or charged to and due from the several persons to whom the same are assessed, which said taxes are now due and in arrears for said year, together with the interest and costs thereon and costs of sale.

No. 1—All that lot of land in Fairmount district, said county and state, with the improvements thereon, adjoining the lands of Edith Chelton, Ralph Laird, G. W. Revelle and George Selby, and assessed to Robert H. Maddox for said year.

No. 2—All that tract of land in East Princess Anne district, said county and state, adjoining the lands of J. S. Dennis, Anthony J. McBride and others, and assessed to Shilo Bowland for said year.

No. 3—All that lot of land in East Princess Anne district, said county and state, with the improvements thereon, containing nine acres, more or less, adjoining the lands of E. T. Mills, John Doane, W. T. Doane and S. F. Miles, and assessed to Nancy Doane's heirs for the years 1916 and 1917, and sold for taxes for said years.

No. 4—All that lot of land in East Princess Anne district, said county and state, containing 1 1/4 acres, more or less, with the improvements thereon, adjoining the lands of H. F. Lankford, Grayson Dennis' heirs and others, and assessed to William Fooks, colored, for said year.

## NEW FERRY LINE IN OPERATION

**Boat Connecting Eastern Shore And Baltimore Makes 16 Trips A Day**

The first trip on the new ferry line connecting Baltimore with the Eastern Shore was made last Wednesday morning. A large crowd assembled at the Bay Shore terminal to watch the ferry boat Eastern Shore steam from the slip and make a direct cut across the Chesapeake for the eastern terminal of the line.

Six large loaded auto trucks and three passenger cars and 35 passengers made the first trip. The ferry made two more trips that day. But for the present no prescribed sailing time has been set.

Two ferry boats of large carrying capacity will operate on the route making 16 trips every day. The boats will be the City of Baltimore and the Eastern Shore and will be able to carry on each trip 28 trucks of the large army type, 600 passengers and 15 motorcycles.

Large steel and concrete piers have been built at Bay Shore and Rock Hall for the accommodation of the boats and provision has been made for the docking of large tonnage on both sides of the piers.

It is understood that a bus line will run between Rock Hall and Ocean City.

## Public School Notes

At the session of the Board of Education last Tuesday a large amount of routine business was transacted.

A delegation asked for the re-opening of the Palmetto school, and this was agreed to, provided a teacher could be found who would be willing to surrender her position in case the average would fall below twelve.

A delegation from Marion asked for a fourth teacher for the Marion Central School and it is probable that the central school will be made a third group high school. It is also likely that the Deal's Island Central School will be made a third group high school. The superintendent was requested to have these two schools inspected by the State Department of Education.

A large delegation came from lower Mt. Vernon requesting the Board of Education to adhere to the determination of the old board as to the location of the central school for that place.

Mr. William L. Jones was appointed a committee to look after the repairs needed for the Rock Creek colored school, and Mr. Charles W. Long was appointed a committee to effect the remodeling of the Doan's colored school. Mr. E. B. Lankford was appointed a committee to investigate and complete repairs needed at the Jamestown school.

Scholarships were granted as follows: Blue Ridge College, Miss Adelaide Long, of Crisfield; Maryland State Normal School, Miss Emma L. Cox, Crisfield; Misses Juanita Reese and Dorothy Baltz, of Venton, and Miss Virginia White, of Princess Anne.

The resignation of Miss A. Ruth Caton, of the Princess Anne High School, was accepted.

Schools Nos. 1 and 3, on Smith's Island, were ordered to be repainted provided the patrons would execute the work.

The report of the Board of Education for Somerset county for the year ending July 31st, 1920, was presented by County Superintendent Dashiell and was approved.

## Y. M. C. A. Scholarships Granted

The committee of the Young Men's Christian Association for Somerset county, Messrs. W. O. Lankford, Jr., E. Walter Long and W. H. Dashiell, met on Monday of last week and granted scholarships by correspondence courses to the following ex-service men:

Franklin Lecates, salesmanship; Clarence Lano, salesmanship and advertising; Dallas Revelle, automobile mechanics; Joseph Goodman, salesmanship and advertising; W. Frank Dashiell, accounting; Harry V. Reid, automobile mechanics; E. Walter Long, complete commercial; W. O. Lankford, Jr., salesmanship and advertising.

The county allotment for these scholarships is \$671.00. Those applied for are valued at \$670.00. Average value of awards, \$83.75.

## Pocomoke Fair This Week

The Pocomoke Fair will begin today (Tuesday) and will continue for four days. The Dixie Land Shows which are booked for the fair are said to be without a doubt one of the largest amusement organizations touring the country. Secretary Crockett has reports from Cambridge that the shows are clean, amusing and entertaining, far above the standards of the usual fair shows. The attractions and exhibits will far exceed anything that has been seen on the grounds before and it is safe to say that the patrons will be given a show that will please them in every respect.

## Dry Candidates Formally Accept

Before an enthusiastic crowd of neighbors, admirers and party adherents that overflowed the athletic field at Miami Military Institute, Germantown, Ohio, last Wednesday night, Rev. Aaron S. Watkins, standard-bearer of the Prohibition party, and D. Leigh Colvin, his running mate, formally accepted their nominations, both asserting enforcement of prohibition laws, and especially the Volstead act, are vital issues of the campaign.

"To us the supreme question of the year is not equal suffrage, the League of Nations, labor, Mexico or Armenia, nor any of the minor questions on which all agree, but the entire extinction of the liquor traffic," said Rev. Watkins in his acceptance speech. "Notwithstanding that we have prohibition in the constitution, both political party conventions have refused to assume the responsibility for the maintenance of the Volstead enforcement law, without which the constitutional amendment is impotent," declared Mr. Colvin.

Mrs. Frances Beauchamp, of Lexington, Ky., delivered the speech notifying Mr. Colvin of his nomination.

## Lucius J. Kellam Dead

Mr. Lucius J. Kellam, one of the wealthiest, most prominent and popular citizens of lower Accomac county, died at his home at Belle Haven, Va., early Monday morning of last week, aged 58 years. Mr. Kellam had been in wretched health for some time and his death while sudden was not unexpected by those who knew his condition.

Funeral services were held at his late home Wednesday morning, conducted by Rev. W. C. Jamison. Interment was in Belle Haven cemetery. He is survived by his widow, who was Miss Carrie Polk, of Pocomoke City; two sons, Lucius Jr., and Emerson Polk Kellam; one sister, Mrs. Joseph Cannon, of Canada, and two brothers, Dr. Fred Kellam, of Richmond, and Mr. Abel Kellam, of Canada.

## Boys To Have Exhibit At State Fair

The officials of the Timonium Fair, to be held August 31st to September 6th, have agreed to pay the expenses of attending the fair of every club boy who will exhibit a registered pig or calf. Expressage will also be paid on all shipments of livestock.

Expenses will also be paid of a boys' dairy cattle judging team from each county. Twenty counties have signified their intention of having club exhibits at the fair.

Boys in this county having registered pigs under six months of age and desire to enter them in the State Fair should make arrangements at once with County Agent C. Z. Keller.

## Tomato Men Ask 50 Cents

The Peninsula Tomato Growers' Association, which represents 8,000 tomato growers in Maryland and Delaware, held a meeting at Hurluck last Thursday for the purpose of threshing out fully the tomato situation in Maryland, Delaware and New Jersey. It was the vote of the 300 delegates present that the price of tomatoes shall not be less than 50 cents a five-eighth bushel basket during the coming season.

The price is based on the cost of production and the fact that canners have already contracted some tomatoes at 50 cents.

## A BUMPER CORN CROP

**A 3,000,000,000 Bushel Corn Crop Is Predicted For This Year**

A 3,000,000,000 bushel corn crop, for the third time in the history of the country, was forecast last week by the Department of Agriculture on the basis of conditions existing August 1. Inasmuch as August is the critical month for the crop in the great corn belt of the Middle West, it is uncertain whether the promise of a crop almost equal to the enormous ones of 1912 and 1917 will be fulfilled. Improvement was reported during July in the important corn states, with the exception of Illinois, and as a result a crop forecast of 224,000,000 bushels larger than that predicted July 1 was issued.

Spring wheat was adversely affected during July, principally by rust, and the prediction forecast of the crop was reduced 29,000,000 bushels from a month ago, or to a total of 262,000,000 bushels. The preliminary estimate of winter wheat production was 15,000,000 bushels larger than forecast in July, making the combined crop of winter and spring wheat only 14,000,000 bushels smaller than estimated a month ago. The total of 795,000,000 bushels was predicted in the last report.

There was improvement in the potato crop, and indications are that the crop will exceed 400,000,000 bushels for the fourth time in the country's history.

The tobacco crop, which has been promising from the start, has shown additional improvement, and probabilities are that it will exceed the record crop in 1918 by about 200,000,000 pounds. Total production is forecast at 1,544,000,000 pounds.

The wheat crop in Maryland is estimated at 12,172,000 bushels, as compared with 10,665,000 bushels as estimated on July 1, and as compared with 11,330,000 bushels, which was the war-year average yield for the state.

## Roosevelt On Tour Of 15 States

Franklin D. Roosevelt, Democratic candidate for Vice-President, left last Thursday on a speaking tour that will take him through fifteen States, and as far West as the Pacific coast.

Three speeches are on Thursday's program, opening with brief addresses at Kenosha and Racine, Wisconsin, and closing with a night meeting at Milwaukee.

His itinerary of the remaining tour, as announced from New York, follows: August 13 (noon), Minneapolis, (night) St. Paul. August 14, some city in South Dakota, to be chosen later. August 16, somewhere in North Dakota, probably Bismark. August 17 and 18, in Montana, probably three speeches at Billings, Butte and Helena. August 19 (night), Spokane, Wash. August 20, Seattle and Tacoma. August 21, Portland, Ore. August 23, San Francisco. August 24, Sacramento. August 25, in Nevada, probably Reno and another city. August 26, Salt Lake City and Ogden. August 27, Cheyenne, Wyo. August 28, in Nebraska, probably Omaha. August 28 (night), or August 30, some place in Iowa. August 31, final speech of trip in Indianapolis.

## No Signs On State Highways

Attorney General Armstrong's opinion, holding that road signs displaying advertising matter cannot legally be erected on the State roads system, greeted the Roads Commission at its meeting Thursday morning. The question arose several weeks ago as the result of the offer of the American Gas Accumulator Company to erect free of cost to the State 2000 danger signals, provided that the company might use the bases of the signs for advertising purposes.

Chairman Mackall of the Roads Commission thought the idea a good one, but State Forester Bosley took exception to it on the ground that it would be in contravention of the law which makes it a misdemeanor to "paint, put or fix any advertising sign, notice or other writing or printed matter, other than notices posted in pursuance of law, on or to any stone, door, fence, stump, pole, building or other structure which is in or upon a public highway."

## New Owners For Somerset Farms

Last week the following sales of real estate were made through The Moore & Ford Farm Agency, of Princess Anne: W. T. Pilchard, of Pocomoke City, sold 80 acres, east of Princess Anne, to Charles Rounds and Trigg Peterman for \$8,800; Maurice Berre sold the farm known as the "Vernie Jones farm," on Wicomico creek, containing 170 acres, to Lewis Pusey for \$11,500; Sidney Miller sold the 70 acres lying between the stone road and the railroad to Mace Smith for \$15,000; J. E. Moore sold his home on Somerset Heights to William Kallmeyer for \$5,000; John Muir home with 2 lots on Somerset Heights to Annie Linne, of Minnesota, for \$2500.

## ROOSEVELT FORMALLY NOTIFIED

**Vice-Presidential Candidate Says League Is Way To Real Peace**

Franklin D. Roosevelt was formally notified of his nomination as the Democratic candidate for Vice-President Monday afternoon of last week at Hyde Park, N. Y.

The ceremony took place at Springwood, the Roosevelt estate, and was preceded by a buffet luncheon at which the notification committee and a few especially invited guests were present.

The speech of notification was made by Homer S. Cummings, former chairman of the Democratic National Committee.

Before a crowd of several thousand persons, who stood for nearly two hours under a sweltering August sun, Franklin D. Roosevelt gave an address formally accepting the Democratic nomination for vice-president. "A greater America," nationally and internationally, was the keynote of the speech of Roosevelt in accepting the nomination.

Realization of added greatness for America depends, Roosevelt said, in the speech, on the solving of two great problems by the next national administration—our relations with the world and the pressing need of organized progress at home.

He declared Governor Cox is pre-eminently qualified in spirit, training and experience to meet and solve these problems properly, "one who can lead this nation forward in an unhalting march of progress."

In world problems, Roosevelt declared, "we must either shut our eyes, build an impenetrable wall of armaments and live a hermit nation, or we must open our eyes and see that modern civilization has become so complex as to make it impossible to be in the world and not of it."

He appealed for "fairness and generosity in the campaign," declaring that inasmuch as partisanship was buried during the war it should not now be revived in ancient bitterness.

The Democrats, he says, offer a peace treaty, "which, to make it a real treaty for a real peace, must include the League of Nations."

## The Proposed Amendments

Governor Ritchie is advertising in the city and county papers the two constitutional amendments to be voted on this fall, one increasing the compensation of the Legislature and the other taking the \$3,000 limit from the salaries of clerks of the courts, making the limit of the salary to be paid from the fees of the office \$4,500 a year. The legislative term is retained at 90 days in the amendment to Article 3, but the pay is made \$300 per annum and \$5 a day for each day a Senator or Delegate is in attendance; mileage is not to exceed 20 cents a mile. The present pay is \$5 a day while the Legislature is in session, mileage 20 cents, and each presiding officer gets \$3 additional. The proposed change in the Constitution, therefore, makes the pay of a Delegate \$1050 for his term—two years' salary, \$600 and \$450 for his attendance at the 90-day term. Special sessions are practically unknown. Harrington called one during the war, and John Walter Smith one in the days of the census frauds of 1901. A State Senator will get \$2100. He will have a salary of \$1200 for the four years and will get \$900 for the 180 days of the two sessions.

## Roosevelt's Speech Pleases Gov. Cox

Interest of Governor Cox in the notification ceremonies of his running mate, Franklin D. Roosevelt, was manifested in a statement issued Monday night of last week, at Dayton, Ohio, by the Democratic presidential candidate commenting on Mr. Roosevelt's personality and acceptance address.

"Mr. Roosevelt's speech is characteristic of the man," said Governor Cox. "It is a wholesome, sensible view of conditions, full of hope as to our future and radiant of the happiness of the individual. The Western country will like this splendid type of progressive statesman. Following the two years of gloom and carping captious criticism from the Republican leaders it will be a genuine refreshment in the great land Mr. Roosevelt now enters for the people to meet a representative of government whose soul is possessed of the philosophy of joy."

## Suspected Hog Cholera In Mt. Vernon

Several hogs were lost last week by Mr. F. L. Webster, of Mount Vernon. Cholera is suspected as the cause of the loss. Persons owning hogs in this community should keep a close watch on their hogs and have them inoculated at first signs of sickness among hogs in the community. All cases of sick hogs should be reported at once to County Agent Keller.

Talk is cheap. Still the less a man says the less he has to take back.

## GOVERNOR COX ON HIS FIRST TOUR

**Opening Of Campaign To Take Him From Coast To Coast**

Departure of Governor Cox last Wednesday from Dayton, Ohio, marked the opening of campaign "swings" scheduled to take him from coast to coast and into almost every State before November 1st.

The first of ten addresses arranged during this month was made Thursday by the Democratic Presidential candidate at Camp Perry, Ohio, in presenting the Governor's Cup as a trophy at the national rifle shoot. The Governor was not expected to open up on important campaign topics until after he had addressed the West Virginia Democratic Convention at Wheeling last Saturday.

Columbus, instead of Dayton, will be the future personal headquarters of Governor Cox, although he hopes also spend a few days there occasionally during the campaign.

Governor Cox, having made a complete exposition of his views on the League of Nations, plans for the immediate future to discuss taxation and other issues that interest the business men of the country.

Mr. Cox will revert to the League of Nations issue on his Western trip, which will begin in about three weeks, but in the industrial and business communities of the East, where the paramount thought is about labor and business, he intends to give specifications as to his own course in the event that he should be elected President.

While in Wheeling, W. Va., last Saturday he took occasion to discuss in detail his attitude toward labor, the general principles of which he outlined in his speech of acceptance. But the main theme of his speeches this week will be the relationship of Government to business.

The subject of taxation interests the Governor more than any other of our domestic questions, for he believes it a fundamental cause of the economic upheaval both in the cost of commodities and the cost of credits. The Governor has been engaged in large business operations and some of his intimate friends and supporters are the biggest of the Ohio business men. Indeed, one of the evidences of Cox strength in Ohio which had so much to do with his election three times as Governor was a diplomatic attitude in handling industrial disputes. As a peacemaker and conciliator, he has won the friendship of both sides, though those who knew him best say it is not merely due to his resourcefulness but to the fact that he inspires trust and confidence.

## G. O. P. Women Speakers

A list of the women speakers who will take the platform in the interest of the Republican Presidential campaign was announced at Chicago, Ill., last Wednesday by Mrs. Manley L. Fossee, of Minnesota, co-chairman with Senator Harry S. New, of Indiana, of the speakers' bureau of the Republican National Committee.

Among those named are the following: Mrs. Harriett Taylor Upton, of Ohio, vice-chairman of the executive committee of the Republican National Committee; Mrs. John G. South, of Kentucky, assistant secretary of the National Committee; Mrs. Fossee, of Minnesota; Mrs. Corinne Roosevelt Robinson, of New York; Mrs. Arthur Livmore, of New York, and Mrs. Medill McCormick, of Illinois, of the executive committee; Amelia Bingham, actress; Mary Roberts Rinehart, novelist; Mrs. Alexander Carlisle Pfeiffer, Massachusetts, actress; Mrs. Robert J. Burdette, widow of the humorist; Mrs. Raymond Robins, social service worker; Mrs. C. A. Severance, of St. Paul; Miss Adelaide Park, of Connecticut; Mrs. Margaret Hill McCarter, of Kansas; Mrs. Marshall Coolidge, of Minnesota; Mrs. Fletcher Dobyns, of Illinois, and Mrs. James Morrison, of Chicago. They will speak in various parts of the country, but the dates have not yet been announced. They will appear on the same platform with men speakers.

## Horse Show At Timonium

The display of farm teams and the horse show at the Timonium Fair to be held on Friday, September 3, will be a notable event. There will be four classes of farm teams—pair of horses, team of four horses, pair of mules, and team of four mules, the prizes aggregating \$260.

There are seven classes in the horse show, including ponies in harness and under saddle; combination riding and driving horses; horses four years old and under suitable to become hunters or cavalry mounts; green hunters, pairs of hunters, Corinthian riders. Over \$400 will be divided in the horse show, making a total of about \$700.

We are all in favor of sound money, if it makes the right kind of sound.

The cost of the licenses are as follows: Non-resident of state, \$10; state-wide resident, \$5.10; county resident, \$1.10.

### Deaths And Births

County Health Officer Dr. C. C. Ward, of Crisfield, gives the following information of the births and deaths in Somerset county for the month of July:

Births..... 30

Misses Marie and Ruby Carey, who have been spending the past three weeks in Baltimore with relatives, returned home last Friday.

tions—if the faith is kept with those who served and suffered.

"The country received with interest, to say the least, the announcement from Chicago, where the Republican national convention was assembled, that a platform plank, dealing with the subject of world peace, had been drawn, leaving out the Lodge reservations, and yet remaining agreeable to all interests, meaning thereby the Lodge reservationists, the mild reservationists and the group of Republican senators that openly opposed the League of Nations in any form.

"As the platform made no definite commitment of policy and was, in fact, so artfully phrased as to make almost any deduction possible, it passed through the convention with practical unanimity. Senator Johnson, however, whose position has been consistent and whose opposition to the league in any shape is well known, withheld his support of the convention's choice until the candidate had stated the meaning of the platform, and announced definitely the policy that would be his, if elected.

"Senator Harding makes this new pledge of policy in behalf of his party: 'I promise you formal and effective peace so quickly as a Republican congress can pass its declaration for a Republican executive to sign.'

"This means but one thing—a separate peace with Germany!

"This would be the most disheartening event in civilization since the Russians made their separate peace with Germany, and infinitely more unworthy on our part than it was on that of the Russians. They were threatened with starvation and revolution had swept their country. Our soldiers fought side

JAMES M. COX

by side with the Allies. So complete was the coalition of strength and purpose that General Foch was given supreme command, and every soldier in the allied cause, no matter what flag he followed, recognized him as his chief. We fought the war together, and now before the thing is through it is proposed to enter into a separate peace with Germany! In good faith we pledged our strength with our associates for the enforcement of terms upon offending powers, and now it is suggested that this be withdrawn. Suppose Germany, recognizing the first break in the Allies, proposes something we cannot accept. Does Senator Harding intend to send an army to Germany to press her to our terms? Certainly the allied army could not be expected to render aid. If, on the other hand, Germany should accept the chance we offered of breaking the bond it would be for the express purpose of insuring a German-American alliance, recognizing that the Allies—in fact, no nation in good standing—would have anything to do with either of us.

"This plan would not only be a piece of bungling diplomacy, but plain, unadulterated dishonesty, as well.

"No less an authority than Senator Lodge said, before the heat of recent controversy, that to make peace except in company with the Allies would 'brand us everlastingly with dishonor and bring ruin to us.'

"And then after peace is made with Germany, Senator Harding would, he says, 'hopelessly approach the nations of Europe and of the earth, proposing that understanding which makes us a willing participant in the consecration of nations to a new relationship.'

"In short, America, refusing to enter the League of Nations (now already established by twenty-nine nations) and bearing and deserving the contempt of the world, would submit an entirely new project. This act would either be regarded as arrant madness, or attempted international bossism.

"These are fateful times. Organized government has a definite duty all over the world. The house of civilization is to be put in order. The supreme issue of the century is before us and the nation that halts and delays is playing with fire. The finest impulses of humanity, rising above national lines, merely seek to make another horrible war impossible. Under the old order of international anarchy war came overnight, and the world was on fire before we knew it. It sickens our senses to think of another.

**Ratification First Duty.**

"The first duty of the new administration clearly will be the ratification of the treaty. The matter should be approached without thought of the bitterness of the past. The public verdict will have been rendered, and I am confident that the friends of world peace as it will be promoted by the league will have in numbers the constitutional requisite to favorable senatorial action. The cautious may say that our platform reference to reservations is vague and indefinite. Its meaning, in brief, is that we shall state our interpretation of the covenant as a matter of good faith to our asso-

## Marine Glue.

Marine glue is prepared by dissolving one part of India rubber in crude benzine and mixing with two parts of shellac, by the aid of heat. The waterproof character of this cement in connection with its elastic flexibility makes it a useful substance in many applications to house construction and to furniture. This glue is applied with ease when warm, and cools with promptness. It was originally intended to be used chiefly on board ship and is well known in Europe.

## Gruesome Paving.

Tombstones have been employed in Nottinghamshire, Derbyshire, Lincolnshire and Lancashire, England, for purposes of paving, and some years ago the inhabitants of the Vale of Belvoir raised a vehement protest against such stones being used as a pathway leading to the parish church. The local authorities, however, sought to justify the measure on the ground that there were plenty of old gravestones of hand, which, if used, might result in a saving of taxes.

## Novel Use for Ice.

An engineer has invented the following method for making hollow concrete blocks. Hitherto it has been difficult to make large cavities in concrete, but it can be done, the engineer points out, by embedding blocks of ice in the mass of concrete and introducing small outlets for the escape of the water after melting. This method also makes unnecessary the constant moistening usual in concrete work, as it is automatically supplied by the melting ice.

## Florida's Exceptional Climate.

Throughout Florida there is more rain in the summer than in the winter. The rainy season begins and ends a little earlier in the western part than in the eastern part of the state. The dryness of the winters is an important factor in making Florida an ideal winter resort. By far the greatest part of the summer rain comes in the daytime in the form of brief showers, which cool the air.

## His Reason.

Speaking of politics and elections, we knew a man once who announced that he would vote for a certain candidate for office. When asked for his reason, he replied that the candidate was his friend. And when they asked him if he had no other reasons he said no; he said he didn't need any other reason. We have liked this man ever since.

## Suspicious.

The head of the firm had secretly called in an expert accountant to check up the cashier. "Have you discovered any evidence of dishonesty?" asked the expert accountant. "Well, I've noticed that he carries a different umbrella every time it rains," explained the head of the firm.

## Beyond Temptation.

Junior, who is quite a mischief, was left in the kitchen alone while baby was being put to bed. A few minutes later he was discovered, with a toy in his little fist, up on top of the kitchen cabinet. When asked what he was doing, he said: "I'm putting this up where I can't get it."

## Proposing in Siam.

In Siam a declaration of marriage is very simple. It is considered a proposal merely to offer a lady a flower, or to take a light from a cigarette if she is holding it in her mouth, so that even the most timid of youths need not fear the ordeal.

## Velocity of Wind.

When wind travels at a speed of ninety miles an hour it becomes a hurricane, but it is on record that in tropical countries storms have been known during which the wind reached a velocity estimated at more than 600 miles an hour.

**Missouri Lady Suffered Until She Tried Cardui.—Says "Result Was Surprising."—Got Along Fine, Became Normal and Healthy.**

Springfield Mo.—"My back was so weak I could hardly stand up, and I would have bearing-down pains and was not well at any time," says Mrs. D. V. Williams, wife of a well-known farmer on Route 6, this place. "I kept getting headaches and having to go to bed," continues Mrs. Williams describing the troubles from which she obtained relief through the use of Cardui. "My husband, having heard of Cardui, proposed getting it for me. 'I saw after taking some Cardui... that I was improving. The result was surprising. I felt like a different person.'"

"Later I suffered from weakness and weak back, and felt all run-down. I did not rest well at night, I was so nervous and cross. My husband said he would get me some Cardui, which he did. It strengthened me. I was in good healthy condition. I cannot say too much for it."

Thousands of women have suffered as Mrs. Williams describes, until they found relief from the use of Cardui. Since it has helped so many, you should not hesitate to try Cardui if troubled with womanly ailments. For sale everywhere. E. 33

ciates and as a precaution against any misunderstanding in the future. The point is that after the people shall have spoken the league will be in the hands of its friends in the senate, and a safe index as to what they will do is supplied by what reservations they have proposed in the past. Some months ago, in a contributed article to the New York Times, I expressed my own opinion of the situation as it then was. I reproduce it here:

"There can be no doubt but that some senators have been conscientious in their desire to clarify the provisions of the treaty. Two things apparently have disturbed them: First, they wanted to make sure that the league was not to be an alliance, and that its basic purpose was peace and not controversy. Second, they wanted the other powers signing the instrument to understand our constitutional limitations: beyond which the treaty-making power cannot go. Dealing with these two questions in order, it has always seemed to me that the interpretation of the function of the league might have been stated in these words:

"In giving its assent to this treaty, the senate has in mind the fact that the League of Nations which it embodies was devised for the sole purpose of maintaining peace and comity among the nations of the earth and preventing the recurrence of such destructive conflicts as that through which the world has just passed. The co-operation of the United States with the League and its continuance as a member thereof, will naturally depend upon the adherence of the League to that fundamental purpose."

"Such a declaration would at least express the view of the United States and justify the course which our nation would unquestionably follow if the basic purpose of the League were at any time distorted. It would also appear to be a simpler matter to provide against any misunderstanding in the future and at the same time to meet the objections of those who believe that we might be inviting a controversy over our constitutional rights, by making a senatorial addition in words something like these:

"It will of course be understood that in carrying out the purpose of the League, the government of the United States must at all time act in strict harmony with the terms and intent of the United States Constitution which cannot in any way be altered by the treaty-making power."

## Helpful Additions Not Barred.

"Unquestioned friends of the League have made other proposals. Our platform clearly lays no bar against any additions that will be helpful, but it speaks in a firm resolution to stand against anything that disturbs the vital principle. We hear it said that interpretations are unnecessary. That may be true, but they will at least be reassuring to many of our citizens, who feel that in signing the treaty, there should be no mental reservations that are not expressed in plain words, as a matter of good faith to our associates. Such interpretations possess the further virtue of supplying a base upon which agreement can be reached, and agreement, without injury to the covenant, is now of pressing importance. It was the desire to get things started, that prompted some members of the senate to vote for the Lodge reservations. Those who conscientiously voted for them in the final roll calls realized, however, that they acted under duress, in that a politically bigoted minority was exercising the arbitrary power of its position to enforce drastic conditions. Happily the voters of the republic, under our system of government, can remedy that situation, and I have the faith that they will, at the election this fall. Then organized government will be enabled to combine impulse and facility in the making of better world conditions. The agencies of exchange will automatically adjust themselves to the opportunities of commercial freedom. New life and renewed hope will take hold of every nation. Mankind will press a resolute shoulder to the task of readjustment, and a new era will have dawned upon the earth.

## Federal Taxation.

"Federal taxation must be heavily reduced, and it will be done at once, if a Democratic administration is chosen in November. Without hampering essential national administrative departments, by the elimination of all others and strict economy everywhere, national taxes can be reduced in excess of two billion dollars yearly. Annoying consumption taxes, once willfully borne, now unjustified, should be repealed. The incomes from war-made fortunes, those of non-producers and those derived from industries that exist by unfair privilege may be able to carry their present load, but taxes on the earnings of the wage-earner, of the salaried and professional man, of the agricultural producer and of the small tradesman should be sharply modified. I believe that a better form of taxation than the so-called excess profits tax may be found and I suggest a small tax, probably one to one and one-half per cent on the total business of every going concern. It is to be understood that the term 'business' as used does not include income received by wage-earners, salaried men, agriculturists, and the small business man who should be exempt from this tax. The profiteer and some of the highly capitalized units have used the excess profits tax as a favorite excuse for loading on the consumer by means of highly inflated selling prices many times the amount actually paid the government. A necessary condition to the national contentment and sound business is a just proportion between fair profits to business and fair prices to the consumer.

So far no difficulty has been found in  
securing inspectors at women's bathing  
suits.

Candidate Harding says he is willing  
to take advice and up to date he has not  
reported any difficulty in securing it.

The delay in getting the new railroad  
fare schedules printed would be a lot  
easier to understand if the change had  
been downward.

The people who kick on railroad fares  
and the price of gasoline are reminded  
that you can keep a bicycle well oiled  
for a few cents annually.

With about five people trying to sell  
something for every one willing to get  
out and make or raise something, it is  
no wonder that prices are high.

The correspondent who writes to an  
exchange, asking if it is legitimate for  
a man to spit on the floor, would prob-  
ably object to a boy's putting his feet  
in the trough.

The fact that a man signs a petition  
to get a certain thing done does not  
prove that you will have the least diffi-  
culty in getting him to sign another  
against doing that same thing.

The towns that blossom out with  
smart advertising signs welcoming new  
visitors, but which nearly jolt the tour-  
ists through the tops of their cars on  
their rough roads, are not yet reported  
to have gained any valuable publicity.

## GOOD CEREAL CROPS

Many people suffer intensely from  
things that never happen. A lot of  
folks become very blue a few months  
ago because crop prospects were so poor.  
But somehow nature continues to send  
her sun and her rain in about even  
proportions each year. If she frowns  
in May she smiles in August. If  
a man will go his work honestly and  
faithfully he rarely frowns him.

The world, which has been sadly  
weakened and weakened by human  
failure, has been further calamity of  
human failure. There will be enough  
trouble and something can be sent  
to relieve the starving areas of Europe.

Prices of food cannot be low while the  
farmers pay \$3.00 to \$5.00 a day to get  
crops harvested. But there should be  
no advance in prices to promote new  
raises in other products. Every normal  
crop brings the world nearer normal  
conditions in other lines of production.

## ASSURING THE SUGAR SUPPLY

A sugar famine is not merely an an-  
noyance to the sweet-tooth crowd who  
demand rich desserts and who through  
the soda fountains, but it interferes  
with the customary process of food con-  
servation by canning. Many families  
will put up no fruits this fall owing to  
the sugar scarcity.

The United States government pro-  
moted a great effort to teach women  
and girls how to can fruits and vege-  
tables. Clubs were organized and propa-  
ganda was distributed to every home.  
Then when the women folks tried to  
carry out the instructions thus given,  
they suddenly found they couldn't do it.  
There was no sugar or it had gone up  
to a prohibitive price.

It was much like organizing a great  
army and then suddenly discovering that  
no one had thought to order any powder  
to put into the guns.

The politicians will do a lot of arguing  
to prove who was responsible. It is a  
fair question and one that should be de-  
bated, but the housewives are less in-  
terested in that matter. They want to  
know what is being done to make sure  
that such a shortage will never occur  
again.

The government should regard the  
provision of a sufficient sugar supply as  
one of the biggest jobs it has on hand.  
Perhaps the Cuban sugar growers will  
not come across with a fair price. All  
right, let them be told that the United  
States government will go the limit to  
make this country independent of Cuba.  
The best sugar industry as capable of  
development to the point that would make  
it a source of income for the country.

The government must have their sugar  
for both health and economy. Never  
more must a fruit crop be allowed to  
go to waste because there is not sugar  
to preserve it.

## Mr. Roosevelt Gives Us A Surprise

Republicans as well as Democrats will  
be pleasantly impressed by the manner,  
if not by the matter, of Franklin D.  
Roosevelt's formal speech in accepting  
his party's nomination for the Vice-  
Presidency. It is characterized not only  
by literary grace of expression, but by  
vigor, clearness and dignity, and, above  
all, by a refreshing and remarkable free-  
dom from the pettiness of partisan  
spirit. It is short enough to be read by  
everybody, and it is the kind of speech  
that will be remembered by all who read  
it. Whether he will be able to preserve  
this high level of patriotic statesmanship  
as the campaign grows warmer we do  
not know, but his first utterance strikes  
a note of sincerity and unaffected Ameri-  
canism that must make a strong appeal  
to all except the most bitterly prejudiced.

Mr. Roosevelt does not make his ac-  
ceptance the occasion for a declaration  
of war on the Republican party or of an  
indictment of Republican leaders. It is  
singular, among the party declara-  
tions of the day, for his political charity  
and for its simple, though fervent, faith  
in the American sense of right as well as  
in American common sense. He is the  
first Democratic leader of prominence,  
so far as we recall, who has had the  
frankness and honesty to concede to his  
political opponents an equal share with  
his own party in the common glory and  
achievements of the war.

"The war was  
won by Republicans as well as Democ-  
rats," and "it would therefore, not only  
serve little purpose, but would conform  
to our high standards, if any person  
should in the heat of political rivalry  
seek to manufacture political advantage  
out of a rationally conducted struggle."

Brave words and true, the bravest  
and truest that have yet been said on  
either side. Mr. Coolidge's speech was  
heralded as better than Mr. Harding's.  
Mr. Roosevelt's, in the opinion of many,  
surpasses those of all three of the other  
leading figures in the campaign. And it  
surpasses them not only in diction, but in  
directness and in an elevation of tone  
that carries with it conviction both of  
the speaker's sincerity and American-  
ism. The highest tribute that could be  
paid to it as expressive of these quali-  
ties would be to say that a stranger to  
our politics could scarcely determine  
whether the speaker was a Democrat  
or Republican. But he would be abso-  
lutely certain that this curious young  
man was not a partisan, and that his  
principal concern was for his country  
and not his party. The first essay of  
young Mr. Roosevelt strikes us as a  
campaign document of the first mag-  
nitude and as a potential vote-getter of  
great value with the open-minded.

And to his credit it must be said that  
he accomplishes this result without any  
ambiguity or the sacrifice of common sense  
to mushiness. He believes with all his  
heart and mind and soul in a league of  
nations not merely on idealistic grounds,  
but as a business and financial propo-  
sition essential to our national welfare  
and progress. He does not regard the  
League covenant as perfect, any more  
than our own original Constitution,  
which has been amended eighteen times,  
was perfect. But it is sound at heart  
and in purpose, and neither we nor the  
world can get along safely without it,  
in his judgment.

Mr. Roosevelt's speech will displease  
every big game and professional politi-  
cian in the country. But it is worthy  
apt to please the plain, nonpartisan  
people and to set them humbly to think-  
ing.—Baltimore Sun.

## Cured of Stomach Trouble And Constipation

Rachel Cribble, of Beaver Dam, Ohio,  
was sick for two years with stomach  
trouble and constipation, taking one  
medicine after another with only tem-  
porary relief. "My neighbor spoke so  
enthusiastically of Chamberlain's Tab-  
lets," she says, "that I procured a bottle  
of them at our drug store to try. A  
few days treatment convinced me that  
they were just what I needed. I con-  
tinued their use for several weeks and  
they cured me."

Deputy Game Warden Charles E.

last Friday from State Game Warden  
E. Lee LeCompte for distribution in  
Worcester county. Mr. Hill distributed them  
in the several districts, 10 birds  
to the district, and instructed the per-  
sons to whose care they were intrusted  
as to the manner of planting the birds,  
and desires to request of the people of  
the county not to kill them, but to al-

in a few years these very desirable  
game birds will be plentiful in this  
county.—Snow Hill Messenger.

## Chamberlain's Colic And Diarrhoea

### Remedy

This is unquestionably one of the most  
successful medicines in use for bowel  
complaints. A few doses of it will cure  
an ordinary attack of diarrhoea. It has  
been used in nine epidemics of dysentery  
with perfect success. It can always be  
depended upon to give prompt relief in  
cases of colic and cholera morbus. When  
reduced with water and sweetened it is  
pleasant to take. Every family should  
keep this remedy at hand.

## NOTICE

### TO TAXPAYERS

Notice is hereby given that the levy of the year  
1920 for State and County Taxes has been made in  
Somerset county.  
Persons who levy the taxes are now in my  
hands for collection. A discount of three per  
cent. will be allowed on all county taxes paid on  
or before October 1st, 1920, and a discount of  
one per cent. if paid during November, 1920. No dis-  
count will be allowed on county taxes paid after  
November 30th.

The law allowing discounts on State taxes has  
been abolished, therefore no discount will be al-  
lowed on State taxes.  
The law provides that both County and State  
taxes must be paid in order to obtain the discount.  
State taxes bear interest from October 1st, 1920,  
at the rate of six per centum per annum. County  
taxes bear interest from January 1st, 1921, at the  
rate of six per centum per annum, and interest is  
charged for the full month from the first day of  
each month.

R. MARK WHITE,  
Treasurer and Collector of  
State and County Taxes.

## THE HARDWARE QUESTION SOLVED

### Are You Short of Kitchen Utensils

Do you have to keep the folks  
waiting for their meals because you  
are shy on cooking utensils? You  
can't make few pans answer many  
purposes and at the same time get up  
a quick meal. You are foolish even to  
try it, considering how little it would  
cost to get everything you lack.

Our kitchen uten-  
sil stock is very com-  
plete. We have many  
little time and money  
saving devices which  
housewives can ap-  
preciate, besides all  
the usual necessities.

Come in and see us  
the first opportunity  
you can find, if it's  
merely to look around.  
Make a list of what  
you need—then get

We certainly feel very much pleased at the response our subscribers have made to our subscription notices and bills, paying for the paper up to 1920 and 1921. The plain white paper on which the Marylander and Herald is now printed costs, together with the postage, about \$1.20 a year, so we do not believe any one will fail to act promptly in sending their subscription if in arrears. Look at the pink label on your paper and if it is 1919 send or bring your subscription at once. The subscription price is now \$1.50 a year in advance. All subscribers who are in arrears will be removed from our list Aug. 31.

Miss Betty Barnet left Thursday in response to a telegram to accept employment with the National City Bank in New York City.

Lieutenant Collier was here with his airplane part of Friday, Saturday and Sunday and delighted the adventurous for the sum of \$10.

Mr. Columbus Lankford began last week to remodel the dwelling house on Main street recently purchased by his mother, Mrs. Elizabeth Lankford, from Miss Mary Brittingham. A second story is being built on the back building, a two-story wing will be added to the south side of the main building and the porch will be extended across the entire front. This will greatly improve the appearance as well as add much to the comfort and convenience of the interior of the building.

## IN MEMORIAM

SMITH—In sad but loving remembrance of my dear father, John Sidney Smith, who departed this life 1 year ago August 18th, 1919.

One sad year with all its changes Since death strangely bade us part: But oh, dear father, all its changes, Cannot take you from my heart.

Farewell, dear father, a sad farewell: My heart is sad and lonely.

My grief too deep to tell; But time will come when we will meet, And all to you I'll tell.

By his daughter, Mrs. FRED. A. CULVER.

SMITH—In sad but loving remembrance of my dear husband and our father, John Sidney Smith, who departed this life 1 year ago Aug. 18th, 1919.

Sleep on dear husband and sweet be thy rest. We needed you, but God knew best. God's will be done. He doeth well.

But how we miss you no tongue can tell. You are resting in peace, dear father.

One sad year has past away; You are gone, but not forgotten, As we think of you each day.

In the cemetery, softly sleeping, Far away from care and pain; May he rest in Jesus' keeping, For we hope to meet again.

By his WIFE AND CHILDREN.

stances of war. For years, large contributions have been made to the Republican campaign fund for no purpose except to buy a governmental underhold and to make illegal profits as the result of preference. Such largesses are today a greater menace to our contentment and our institutions than the countless temporary profiteers who are making a mockery of honest business, but who can live and fatten only in time of disturbed prices. If I am called to service as president means will be found, if they do not already exist, for compelling these exceptions to the great mass of square dealing American business men, to use the same yardstick of honesty that governs most of us in our dealings with our fellowmen, or in language that they may understand, to suffer the penalty of criminal law.

"It has been my observation that the man who learns our language, yields to a controlling public opinion and respects our laws; besides, in proportion as his devotion to American life develops his interest in the impulsive processes of revolution diminishes. We must be patient in the work of assimilation and studiously avoid oppressive measures in the face of mere evidence of misunderstanding. The necessity for the drastic laws of war days is not present now, and we should return at the earliest opportunity, to the statutory provisions passed in time of peace for the general welfare. There is no condition now that warrants any infringement on the right of free speech and assembly nor on the liberty of the press. The greatest measure of individual freedom consistent with the safety of our institutions should be given. Excessive regulation causes manifestations that compel restraint.

#### Law Enforcement.

"The legislative branch of government is subjected to the rule of the majority. The public official who fails to enforce the law, is an enemy both to the Constitution and to the American principle of majority rule. It would seem quite unnecessary for any candidate for the Presidency to say that he does not intend to violate his oath of office. Anyone who is false to that oath is more unworthy than the law violator himself.

"Morals cannot easily be produced by statute. The writ of injunction should not be abused. Intended as a safeguard to person and property, it could easily by abuse cease to be the protective device it was intended to be.

"We should not, by law, abridge a man's right either to labor or to quit his employment. However, neither labor nor capital should at any time or in any circumstances, take action that would put in jeopardy the public welfare.

"We need a definite and precise statement of policy as to what business men and workmen may do and may not do by way of combination and collective action. The law is now so nebulous that it almost turns upon the economic predilections of the judge or jury. This does not make for confidence in the courts nor respect for the laws, nor for a healthy activity in production and distribution. There surely will be found ways by which co-operation may be encouraged without the destruction of enterprise. The rules of business should be made more certain so that on a stable basis men may move with confidence.

"Government, however, should provide the means in the treatment of its employees, to keep in touch with conditions and to rectify wrong. It is needless to say that in order to be consistent, facts should at all times justify the pre-supposition that the government employees are properly compensated.

"The child life of the nation should be conserved; if labor in immature years is permitted by one generation, it is practicing unfairness to the next.

#### Adequate Farm Profits.

"Farming will not inspire individual effort unless profits, all things considered, are equal to those in other activities. An additional check to depleted ranks in the fields would be the establishment of modern state rural school codes. The federal government should maintain active sponsorship of this. Rural parents would be lacking in the element which makes civilization enduring if they did not desire for their children educational opportunities comparable to those in the cities. The price the consumer pays for foodstuffs is no indication of what the producer receives. There are too many turnovers between the two. The farmer raises his crop and the price which he receives is determined by supply and demand. His products in beef and pork and produce, pass into cold storage and ordinarily when they reach the consumer the law of supply and demand does not obtain. The preservation of foodstuffs by cold storage is a boon to humanity, and it should be encouraged. However, the time has come for its vigilant regulation and inasmuch as it becomes a part of interstate commerce, the responsibility is with the federal government. Supplies are gathered in from the farm in times of plenty. They can easily be fed out to the consumer in such manner as to keep the demand in excess of that part of the supply which is released from storage. This is an unfair practice and should be stopped. Besides, there should be a time limit beyond which perishable foodstuffs should not be stored.

"Our objective should be a decreased tenantry. With the period of occupancy uncertain, the renter strips land of its fertile elements, and each year diminishes our national assets. Under the operation of the federal reserve and the farm loan acts, encourage-

#### Railroads and Waterways.

"Any discussion of the question of food supply leads very quickly to the closely related matter of transportation. There is no one thing which brings us so intermittently to critical conditions than the insufficiency of our transportation facilities. Both the railroads and the public are to blame. There has been no material addition to the total mileage in the last ten years, and the increase in terminals has been much less than required. At the beginning of the war the rolling stock was sadly reduced and inadequate. The public had not given in pay for service sufficient revenues on which credit could be allowed by the banks. Moral assistance was withheld because of railroad policies that did not bring approval. Many of these corporations had made themselves a part of political activities, local, state and national. Then there were more or less sporadic instances of stock watering operations, and the exploitation of utility properties for personal gain.

"Abuses were not general, but they were sufficient to bring the entire railroad systems of the country in disrepute. The good suffered with the evil. When the transportation lines were taken over by the government, they were barely able to limp through the task of the day. Unity in operation, the elimination of the long haul, and the merging of every mile of track and terminal and every car and engine into a co-ordinated plan of operation, enabled the government to transport troops and supplies, at the same time affording, under great stress, a satisfactory outlet for our industries. It should be remembered in this connection that except for the motor truck which supplemented transportation by rail, and except for the great pipe lines which conveyed oil for commercial purposes, we should not, in all probability have been able to throw our deciding strength into the balance and win the war. Any attempt to discredit the federal operation of railroads during the years of grave emergency is unfair. In the case of those who know the facts it is insincere. Too much cannot be said in praise of those who directed this work, nor of the men who physically operated the lines under the discouraging conditions of poor equipment. But all of this is water over the wheel. The problem of the railroads is still with us. The government and the public should render every co-operation in the utmost good faith, to give thorough test to private ownership. The railroads have had their lesson. Government regulation is accepted now as not only a safeguard to the public, but as a conserving process to the utility. Financial credit is necessary to physical rehabilitation and it should be sufficient for the periods of maximum demand. We should not lose sight, however, of the vast possibilities of supplementary service by water. The Great Lakes and St. Lawrence navigation project, particularly, should claim the interest of the government.

#### Federal Reserve System.

"It is almost unnecessary to speak of the Federal Reserve system in connection with the winning of the war, as, next to the consecration of our manhood and womanhood itself, the greatest factor was the marshalling into one unit through the Federal Reserve banks of the stupendous wealth of America. To those of vision who look out beyond our shores into that commercial domain where we are so justly entitled to enter in a time of peace, latent power of the Federal Reserve system can be seen promoting in every quarter of the globe an ever-widening flow of American commerce. We will soon have a merchant marine fleet of 11,000,000 tons aggregate, every ship flying the American flag and carrying in American bottoms the products of mill and mine and factory and farm. This would seem to be a guarantee of continued prosperity. Our facilities for exchange and credit, however, in foreign parts, should be enlarged and under the federal reserve system, banks should be established in important trading centers.

#### Reduction of Armament.

"I am convinced after considerable study of the subject that the expense of the government can, without loss of efficiency, be reduced to a maximum of four billion dollars, including sinking fund and interest on the national debt. When we enter the League of Nations, we should at the same time diminish our cost for armament. To continue expenditures in either the war or the navy departments on a vast scale, once our membership in the League is assured, would seem to be a very definite refutation of the advantages of the world plan which we believe it possesses. An appealing fundamental in the League method, is the reduction of armaments. We cannot afford to do it, until other nations do likewise. If we do not enter the League, hundreds of millions of dollars must be spent for armaments. If we go in, and I believe the people will insist on it, then we can count on economies.

"The Republican leaders who have taken charge of their party and nominated its candidate, are no more possessed of the spirit of the hour than they were in 1912 when they precipitated a revolution within the rank and file of a great organization. If further proof were needed, the action of the present Congress supplies it. Not a constructive law can be cited. Money and time were wasted in seeking to make a military triumph an odious

chapter in history—and yet it is not significant that after two years of sleuthful inquiry, there was nothing revealed in that vast enterprise, carrying billions of dollars in expense, upon which they could base even a whisper of dishonesty?

"The Mexican situation, trying to our patience for years, begins to show signs of improvement. Not the least of the things that have contributed to it, is a realization by the people of that country, that we have neither the lust for their domain, nor disposition to disturb their sovereign rights. Peace smiles upon the border and incentive to individual effort seems to be making a national aspiration.

#### Disabled Soldiers.

"I feel deeply that the rehabilitation of the disabled soldiers of the recent war is one of the most vital issues before the people and I, as a candidate, pledge myself and my party to those young Americans to do all in my power to secure for them without unnecessary delay, the immediate training which is so necessary to fit them to compete in their struggle to overcome that physical handicap incurred while in the service of their government. I believe also that the Federal Board of Vocational Rehabilitation as far as possible should employ disabled soldiers themselves to supervise the rehabilitation of disabled soldiers, because of their known sympathy and understanding. The board itself and all agencies under it should be burdened with the care of securing for the disabled soldier who has finished his training, adequate employment.

"The women of America, in emotion and constructive service, measured up during the war to every requirement, and emergency exacted much of them. They demonstrated not only willingness, but capacity. They helped win the war, and they are entitled to the privilege of voting as a matter of right and because they will be helpful in maintaining wholesome and patriotic policy. It requires but one more state to ratify the national amendment and thus bring a long-delayed justice. I have the same earnest hope as our platform expresses that some one of the remaining states will promptly take favorable action.

#### Education.

"There must be an awakened interest in education. The assumption that things are all right is an error. The plain fact reveals two startling things, one, a growing declination in the ranks of teachers and the other, the existence of five and one-half millions illiterates. The army of instructors has been more or less demoralized through financial temptation from other activities which pay much better. We owe too much to the next generation to be remiss in this matter.

"There will be no attempt in this campaign to compete by dollars with our opposition. So many people have been in the money gathering business for the reactionary cause that the millions already in hand are more or less a matter of general information. All that we ask is that both parties deal in the utmost good faith with the electorate and tell the plain truth as to the amounts received, the contributors, and the items of disbursements.

"The sort of readjustment which will appeal to our self-respect and ultimately to our general prosperity, is the honest readjustment. Any unfair adjustment simply delays the ultimate process and we should remember the lesson of history that one extreme usually leads to another. We desire industrial peace. We want our people to have an abiding confidence in government, but no readjustment made under reactionary auspices will carry with it the confidence of the country.

"The inconveniences incident to the war have been disquieting; the failure of the Republican Congress to repeal annoying taxes has added to our troubles. The natural impulse is to forget the past, to develop new interests, to create a refreshed and refreshing atmosphere in life. We want to forget war and be free from the troubling thought of its possibility in the future. We want a change from the old world of yesterday where international intrigue made people mere pawns on the chess-board of war. We want a change from the old industrial world where the man who toiled was assured 'a full dinner pail' as his only lot and portion. But how are we to make the change? Which way shall we go? We stand at the forks of the road and must choose which to follow. One leads to a higher citizenship, a freer expression of the individual and a fuller life for all. The other leads to reaction, the rule of the few over the many and the restriction of the average man's chances to grow upward. Cunning devices backed by unlimited prodigal expenditures will be used to confuse and to lure. But I have an abiding faith that the pitfalls will be avoided and the right road chosen.

#### G. O. P. Vision Reactionary.

"The leaders opposed to Democracy promise to put the country 'back to normal.' This can only mean the so-called normal of former reactionary administrations, the outstanding feature of which was a pittance for farm produce and a small wage for a long day of labor. My vision does not turn backward to the 'normal' desired by the senatorial oligarchy, but to a future in which all shall have a normal opportunity to cultivate a higher stature amidst better environment than that of the past. Our view is toward the sunrise of tomorrow with its progress and its eternal promise of better things. The opposition stands in the skyline of the setting sun, looking backward, to the old days of reaction.

"I accept the nomination of our party, obedient to the Divine Sovereign of all peoples, and hopeful that by trust in Him the way will be shown for helpful service."

## PROCLAMATION

Proposing Amendments To the Constitution of the State, 1920

Whereas, at the January Session of the General Assembly of Maryland, held in the year 1920, two Acts were passed, to-wit: Chapter 319 proposing an amendment to Section 15 of Article III of the Constitution of the State, title "Legislative Department," regulating the compensation of Members of both Houses of the General Assembly; and Chapter 565 proposing an amendment to Section 37 of Article 4 of the Constitution of the State, title "Judiciary Department," regulating the pay of Clerks of Courts, and which said Chapters 319 and 565 are in the words and figures following:

#### CHAPTER 319.

AN ACT to propose an amendment to Section 15 of Article III of the Constitution of the State of Maryland, title "Legislative Department," regulating the compensation of the members of both Houses of the General Assembly of Maryland, and to provide for the submission of said amendment to the qualified voters of the State of Maryland for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all members of each of the two Houses concurring), That the following be and the same is hereby proposed as an amendment to Section 15 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," the same if adopted by the legally qualified voters of the State, as herein provided, to become Section 15 of Article III, of the Constitution of the State of Maryland.

15. The General Assembly may continue its session so long as in its judgment the public interest may require for a period not longer than ninety days; and each member thereof shall receive a compensation of three hundred dollars per annum and five dollars per diem for every day he shall attend the session, but not for such days as he may be absent, unless absent on account of sickness or by leave of the House of which he is a member and he shall also receive such mileage as may be allowed by law, not exceeding twenty cents per mile; and the presiding officer of each House shall receive an additional compensation of five dollars per diem. When the General Assembly shall be convened by proclamation of the Governor, the session shall not continue longer than thirty days, and in such case the compensation shall be the same as herein prescribed.

SECTION 2. And be it further enacted by the authority aforesaid, That said amendment to the Constitution of the State of Maryland shall, at the next general election of Members of Congress in this State, be submitted to the legal and qualified voters of the State, for their adoption or rejection. In pursuance of the direction of said Article XIV of the Constitution of the State of Maryland, and at said general election the vote on the said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be printed the words "For the Constitutional Amendment," and "Against the Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by said Article Fourteen of the Constitution, and further proceedings had in accordance with said Article Fourteen.

Approved April 9, 1920.

#### CHAPTER 565.

AN ACT to amend Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and to provide for the submission of said amendment to the qualified voters of this State for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all members of each of the two Houses concurring), That the following section be, and the same is, hereby proposed as an amendment to Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and if adopted by the legal and qualified voters thereof, as herein provided, said section shall supersede and amend the section in effect of Section 37 of said Article 4 of the Constitution of Maryland.

SEC. 37. There shall be a Clerk of each of the said Courts of Baltimore City, except the Supreme Bench, who shall be elected by the legal and qualified voters of said city at the election to be held in said city on the Tuesday next after the first day of November, in the year eighteen hundred and sixty-seven, and shall hold his office for six years from the time of his election, and until his successor is elected and qualified, and he shall, thereto, subject to be removed for willful neglect of duty or other misdemeanor in office, on conviction in a Court of Law. The salary of each of said Clerks shall be forty-five hundred dollars a year, payable only out of the fees and receipts collected by the Clerk of said city, and they shall be entitled to no other perquisites or compensation. In case of a vacancy in the office of Clerk of any of said Courts, the Judges of said Supreme Bench of Baltimore City shall have power to fill such vacancy until the general election of Delegates to the General Assembly to be held next thereafter, when a Clerk of said Court shall be elected to serve for six years thereafter; and the provisions of this Article in relation to the appointment of Deputies by the Clerks of the Circuit Courts in the counties shall apply to the Clerks of the Courts in Baltimore City.

SEC. 2. And be it further enacted by the Authority aforesaid, That said amendment to the Constitution shall, at the next election for members of Congress to be held on the Tuesday next after the first Monday in the month of November, nineteen hundred and twenty (1920), be submitted to the legal and qualified voters thereof for their adoption or rejection, in pursuance of the direction contained in Article 14 of the Constitution of this State; and at said election the vote on said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be written or printed the words "For Constitutional Amendment," and "Against Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by the said Article 14 of the said Constitution.

Approved April 9, 1920.

Now, therefore, I, Albert C. Ritchie, Governor of the State of Maryland, in pursuance of the direction contained in Section 1 of Article 14 of the Constitution of Maryland do hereby order and direct that this Proclamation containing a full, true and correct copy of the text of said Chapters 319 and 565 of the Acts of the General Assembly of Maryland of 1920, be published in at least two newspapers in each of the counties of the State where so many may be published and where not more than one may be published then in that newspaper, and in three newspapers published in the City of Baltimore, one of which shall be published in the German language, once a week for at least three months next preceding the general election to be held in the State of Maryland on Tuesday, the 2nd day of November, 1920, at which election the said proposed amendments to the Constitution shall be submitted in form and manner prescribed by the General Assembly, to the legal and qualified voters of the State for their adoption or rejection.

Given under my hand and the Great Seal of the State of Maryland, Done at the City of Annapolis, this 23rd day of July, nineteen hundred and twenty.

ALBERT C. RITCHIE,  
By the Governor: PHILIP B. PEBLMAN,  
Secretary of State.

## HOME TOWN HELPS

### FINLAND BOASTS MODEL CITY

Helsingfors Could Give Lessons in Cleanliness to the Majority of Towns in America.

Helsingfors, Finland, might give lessons in the municipal amenities to almost any American city, although it is tucked away in the North, in a bare little land of rock and lakes and birch trees, in the latitude of the southern end of Greenland, writes Arthur Ruhl in the Outlook.

I do not happen to know of any American city so consistently clean and well built. They post no bills in Helsingfors. They tie them around posts with strings, and when they have served their purpose they disappear, strings and all. Every morning there is a market on the broad quay at the end of the esplanade; fish, flowers, meat and vegetables—even Oregon apples, which contrive, in spite of distance and almost prohibitive rates of exchange, to cross the sixtieth parallel. A few minutes after noon you would never know a market had been there. Stalls fold up, rubbish disappears, street cleaners turn on the hose, and presently the quay is as clean as a tennis court.

The Helsingfors gas tanks are not the dismal contraptions that disgrace most of our water fronts. The tank itself may be the same, but they build a neat brick house for it—a sort of monumental roundhouse, with stone wreaths around the top by way of frieze, quite in place among buildings intended for polite uses, and not without some suggestion of the Castle of St. Angelo in Rome.

### IMPROVING THE HOME YARD

Low-Growing Shrubs at Walk Intersections and Corners of the Lot Should Be Provided.

A well-planted home yard with shade trees, flowering shrubs and perennial flowers surely is more valuable and more enjoyable than a barren, unsightly yard of weeds, ashes, tin cans and rubbish. Perhaps the principal reason why we find so many poorly improved home yards is because a lack of knowledge along these lines is everywhere apparent.

A well-planted home yard should provide for the following ornamental features: The yard should be joined to the street by the planting of low-growing shrubs at the walk intersections and at the corners of the lot along the sidewalk.

These should all be low-growing shrubs such as Thunberg berries, snowberries, Japan quince, rosa rugosa and golden bell. These when planted in groups, from three to five feet apart, will give an informal treatment, and where every home along the street is planted in this way, the entire street is given a boulevard appearance.

If a formal effect is desired along the sidewalk, the treatment calls for the planting of a hedge. For this purpose the holly privet, white mulberry, Thunberg barberry or honeysuckle marshalli should be used.

#### Productive Ornamentation.

Any back yard at all can be made both attractive and productive.

Grapes make a good porch trellis when space is not available for an arbor. A high fence or back porch may be used as trellis for blackberry plants. In a decorative border a few clumps of the brilliant red giant rhubarb will not look out of place. As for hedges which will be both decorative and highly productive, no plants of a useful variety will be more satisfactory than raspberries, gooseberries and currants. They are hardy, will take little care and will supply fruit for each season.

#### Plant Memorial Trees.

Planting of memorial trees is becoming a popular custom throughout the country, many cities and communities setting them out along streets and roads. A notable example of this is to be found at Tampa, Fla., where the Rotary club is spending \$7,000 in planting trees along a "Road of Remembrance," while at Chattanooga, Tenn., the National League for Women's service is lining the Dixie highway out of that city with memorial trees. The South is setting a fine example before the rest of the country in this work.

#### Sickly Community Handicapped.

You frequently hear a man say: "I am not in business for my health." Well, he should be, for if he loses his health on account of his business, the money generally goes with it.

Good health, that is, bodily health and vigor, lies at the bottom of economic prosperity. A sickly community cannot carry forward commercial enterprises and make them big financial successes.

#### Unique Reason for Theft.

A. S. Barron, a rancher near San Mateo, Cal., recently lost three bales of hay, and a neighbor of his, Henry Bissig, lost a 300-pound calf. Barron found this notice nailed on his barn door: "We stole three bales of hay from your ranch and, finding we had no use for it, we stole a calf from Bissig to eat it."

#### TIME IS THE TEST

**The Testimony Of Princess Anne People Stand The Test**

The test of time is what tells the tale. The public soon finds out when misrepresentations are made, and merit alone will stand the test of time.

Princess Anne people appreciate merit, and many months ago local citizens publicly endorsed Doan's Kidney Pills; they do so still. Would a citizen make the statement which follows unless convinced that the article was just as represented? Below is testimony such as the sufferer from kidney ills is looking for.

Mrs. Carroll Hastings, Stone Road, Princess Anne, says: "For nearly seven years I had disordered kidneys and I was miserable and weak. I had a dragging-down pain in my back and my heart palpitated. Then again, I had sick headaches and dreadful pains in the small of my back. I was getting worse every day and I finally got Doan's Kidney Pills at Jones & Colborn's drug store. The first box cured me of back-ache and the other symptoms were greatly relieved."

**KEEPS DOAN'S ON HAND**  
Over nine years later, Mrs. Hastings said: "I always keep Doan's Kidney Pills on hand in case I should need them. I recommend them whenever I have an opportunity."

#### Hospital Equipment For Dutch Malaysia

Despatch of the first shipment of hospital equipment to Dutch Malaysia for use in the eleven mission hospitals to be built throughout the islands by the Board of Foreign Missions of the Methodist Episcopal Church in collaboration with the Dutch Colonial Government, is announced by Mr. John L. Alcock, Chairman of the Washington Area Council. The present supplies include furniture for the operating room, surgical instruments and accessories, and general medical goods, intended to complete the equipment of the Mission Hospital of Tjisaroes, Java, which has been in operation for some time and handled over a thousand patients last year. The shipment was aboard the S. S. Tjicombang, from San Francisco to Batavia, in care of Dr. R. G. Perkins, physician-in-charge of the hospital at Tjisaroes, who has been in this country purchasing them.

"The Dutch Government has adopted a most cordial attitude toward American mission hospitals," said Mr. Alcock. "It is facing a problem in public health among the natives which is unrivaled in any other part of the world. On the island of Java alone there are 35,000,000 people, mostly natives in the very lowest stages of civilization, crowded upon the land at nearly 1,000 to the square mile.

"When the Methodist Centenary was completed, the hospital program for Malaysia received the hearty support of the Dutch Colonial officials. Through their efforts these hospitals are to receive large government subsidies both for construction and maintenance. The entire number will be built and equipped as soon as physicians and nurses can be found to take charge of them. The Board of Foreign Missions of the Methodist Church is making every effort to obtain them."

#### ENTRANCE EXAMINATIONS

#### State Scholarships in Engineering Courses

Entrance Examinations for the Department of Engineering, as well as for the College of Arts and Sciences, will be held in the Civil Engineering Building, Homewood, Monday to Thursday, September 13th to 16th, 1920, beginning at 9 a. m. each day.

Applications for Scholarships in the Department of Engineering, established under the provisions of the Laws of Maryland, Chapter 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, a competitive examination must be taken Friday, September 17th, 1920, beginning at 9 a. m. Appointments will be made soon thereafter.

Each Legislative District of Baltimore City and each county of the State, with the exception of Harford, Talbot and Worcester counties, will be entitled to one or more scholarships for the year 1920-1921, in addition to the ones already been assigned. In the counties mentioned above, all the available scholarships have been awarded.

Under the provisions of the Act of Assembly, the County and City Scholarships in the Department of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted to them. The scholarships entitle the holders to free tuition, free use of text-books, and exemption from all regular fees. One of the scholarships in each county and in each Legislative District of the city carries also the sum of \$200.

Scholarships may be awarded to graduates of Loyola College, St. John's College, Washington College, Western Maryland College, Maryland Agricultural College, Mt. St. Mary's College, Rock Hill College.

Two scholarships may be awarded "At Large".

Applicants should address The Registrar, The Johns Hopkins University, for blank forms of application and for catalogues giving information as to examinations, award of scholarships, and courses of instruction. The next session begins Tuesday, September 28th, 1920. 8-17

SALISBURY, MARYLAND

Tuesday, Wednesday,  
Thursday and Friday,

# Aug. 24, 25, 26, 27

# 4 Days and Nights 4

The Fair Association has arranged for the biggest Fair ever held on this Peninsula. They have secured the services of one of the greatest aviators in America. He will carry passengers for sight-seeing over our town and surrounding country, also will give a wing-walking stunt daily as well as parachute drops. Just think of a man walking the wings of an Airplane thousands of feet in the air and then jumping from the machine and taking his life in his own hands, depending upon a parachute to save him from death. Remember, anyone wishing to go up in the Airplane and take the jump in a parachute will have the privilege to do so, and the Association offers a prize of \$50.00 for the feat.

## RACES

The management will give the regular races for light-harness horses, and in addition have arranged for two Running Races each day of the genuine thoroughbred running horses. They will be the same class running races as the Baltimore race tracks give and will be something new for this Peninsula. This will be the first opportunity for many of our citizens to see the running races which is considered to be the greatest sport in America.

## Free Acts

There will be three troupes of acrobats, high trapeze performers as well as tumbling acts. The Tasmanian Troupe, consisting of seven people, principally girls, is included. This feature alone is well worth the price of admission each day. The midway will contain at least ten (10) good shows with four (4) riding devices furnished by one of the greatest carnival shows in America, Ben Krause, Manager.

Already a number of farmers, housewives and stockraisers have made entries for exhibits, yet the Association is arranging to take care of more, and ask the public to send in their entries not later than Thursday, August 19th, at 6 o'clock, as the books will be closed at that time. Prizes have increased on almost all exhibits for 1920.

## HOME WEDDING NEAR EDEN

**Miss Minnie Elinora Pollitt Married To Mr. Rufus Omar Jones**

On Monday evening, August 16th, at 8.30 o'clock, a pretty wedding was solemnized at the home of Mr. and Mrs. Josiah W. Pollitt, of near Eden, when their daughter, Miss Minnie Elinora, was married to Mr. Rufus Omar Jones, of White Haven. Rev. John W. Wooten, of Fruitland, officiated.

The bride wore an attractive white satin gown, trimmed with tulle and a white tulle veil which was caught with orange blossoms. She carried a bunch of white bride's roses. The maid of honor was Miss Valberg Gulliksen, of San Francisco, Cal. She wore a pink georgette gown trimmed with pink satin and carried a bunch of pink roses. The best man was Mr. Herman Murrell, a cousin of the groom. Miss Jane Banks, daughter of Mr. and Mrs. Gordon Banks, of Salisbury, was flower girl, while the ring bearer was Master George Brumley, son of Mr. and Mrs. George Brumley, of Gainesville, Florida. Preceding the ceremony Mrs. Jesse M. Pollitt, of Allen, sang "Until." Miss Ethel Malone, of Washington, D. C., played Mendelssohn's wedding march.

More than fifty relatives and close friends of the bride and groom were present and witnessed the ceremony which was held under a large arch on the lawn. After the reception a wedding collation was served in the dining room which had been especially decorated for the occasion.

The bridal couple left later in the evening for a brief honeymoon in the mountains of Virginia and will be at their new home, 750 Rock Creek Church Road, Washington, D. C., after September 1st.

## Mr. Spiva At Johns Hopkins Hospital

Mr. William B. Spiva, cashier of the Bank of Somerset, at Princess Anne, who was rendered unconscious in an automobile accident near Wye Mills, Queen Anne's county, on August 2nd, in which his wife was killed, was taken to Johns Hopkins Hospital Tuesday of last week. Mr. Spiva, who was taken to the Eastern Hospital after the accident, has never regained consciousness, although his general physical condition is good. He was taken to Baltimore in the hope that Hopkins men may be able to put him on the road to recovery. He was accompanied from Easton by Dr. H. M. Lankford and Mr. C. C. Gelder, of Princess Anne.

The latest news from the Johns Hopkins Hospital, Baltimore, where Mr. Spiva is a patient, is that his mind is slowly but surely returning to its normal condition. This information is hailed with delight by his many friends and business associates here.

## Ringneck Pheasants For Somerset

Mr. E. Lee LeCompte, State Game Warden, sent to the county recently one hundred Chinese ringneck pheasants, which were distributed by his direction in lots of eight or ten in ten different sections of the county.

These birds are said to multiply quite rapidly if undisturbed and Mr. LeCompte begs the farmers and hunters to protect them to the fullest extent for a couple of years; by which time they will have gotten a firm foothold. They propagate much in the same way as quail, but will not mix with them. Their broods are fifteen to eighteen at a hatching, they mate in the spring, and their young are very destructive to all sorts of insects.

Hunters are especially requested not to disturb these birds this fall, either by shooting or permitting their dogs to follow them when in flight, so that they may become accustomed to their new locations and mode of getting a living.

## Poultry Experts In Town

Mrs. Lena Jenkins and Miss Anna Bell will be in Princess Anne for some time making a survey of the poultry raised in this vicinity.

These ladies have made a special study of poultry problems, such as the care of baby chicks, the feeding of moulting hens, the selection of birds for high egg production and other fundamental poultry problems. While here they expect to call on every poultry raiser and take up these important problems.

## Married At Marion

A pretty wedding was solemnized at the home of Mr. and Mrs. Wm. S. Miles, near Marion, last Thursday morning, when their son, Mr. Frederick W. Miles, was married to Miss Mary Rita Deane, of Parkside, N. J. The ceremony was performed by Rev. E. L. Bunce, formerly of Marion, but now located in Pocomoke City. Mr. Miles is a well-known commission merchant in New York, where he and his bride will reside after a brief visit to his parents in Somerset.

## Lieut. Lankford Again Promoted

Upon the recommendation of a board of supply officers of the Navy, appointed by the Secretary of the Navy, to pass upon the records of officers whose records have been creditable during the war with Germany, under an act of Congress, approved June 8th, 1920, the temporary appointment of Lieutenant B. Louis Lankford, Supply Company, United States Navy, has been made permanent.

Lieutenant Lankford is a native of Somerset county. He is a son of the late Capt. B. F. Lankford. He has been in the navy for about twenty years. He held the rank of Chief Pay Clerk at the beginning of the war, was afterwards commissioned ensign, lieutenant (junior grade) and lieutenant, supply corps, under temporary appointment, during the war. He was the assistant to the disbursing officer at the Navy Yard, Philadelphia, Pa., from April 12th, 1917, to May 10th, 1920, when he was ordered to the Naval Academy, Annapolis, Md., and assigned to duty as supply and disbursing officer of the ships stationed at that port, where he is now on duty.

## New Rates On Boat Lines

The increase in passenger and freight rates recently granted to the railroads by the Interstate Commerce Commission, which becomes effective August 26th, also will be put into effect on that date by the steamboat lines of the Baltimore, Chesapeake and Atlantic Railway Company and the Maryland, Delaware and Virginia Railway Company, according to an announcement made last Thursday by R. H. Souleby, general passenger and freight agent of these lines.

The new rates for the boat lines, which will go into effect next Thursday, will be the same as those pertaining to the rail service. An advance of 20 per cent. in passenger rates and 40 per cent. in freight rates will become operative at that time.

## Farmers To Grow Alfalfa

A number of farmers are considering sowing alfalfa the latter part of this month.

The land should be prepared at this time and limed heavily if the land needs lime. A fine seed bed should be prepared and three to four hundred pounds of acid phosphate should be applied to the ground at the time of seeding.

Farmers can obtain inoculation for one bushel from the government free and special prices have been obtained for commercial inoculation. Farmers desiring inoculation for alfalfa should get in touch with County Agent C. Z. Keller.

Miss Frances Henry, of Cambridge, is visiting at the home of Mr. George W. Brown.

## RECTOR FOR SOMERSET PARISH

**Rev. Dr. Archbold Will Come To Princess Anne From Canada**

At a meeting of the vestry of Somerset Parish held Monday night of last week a call was extended to the Rev. Walter Archbold, D. D., to become rector of the parish. Mr. Archbold has accepted the call and he and his family are expected to arrive in Princess Anne the latter part of next month. The Rev. Archbold is expected to officiate in St. Andrew's Church on Sunday, October 3rd. Dr. Archbold comes from Lakefield, Ontario, Canada.

Dr. Archbold was born and received his early education in England. As a young man he went to Canada and graduated in theology at Trinity University, Toronto. He was ordained in the priesthood at St. Alban's Cathedral, Toronto, in 1901. He became assistant rector at St. Paul's, Flatbush, Brooklyn, N. Y., in 1906, and while there was also chaplain at the Metropolitan Hospital and Workhouse at Blackwell's Island. In 1909 he was appointed vicar of Hastings-upon-Hudson, New York diocese. In 1916 he became assistant rector of Worcester parish, with his residence at Ocean City, Md., where he laid the foundation for St. Paul's-by-the-Sea, becoming an independent parish. In 1919 he was chosen dean of Trinity Cathedral, Easton, but was unable to accept the call at that time.

In 1913 he received the degree of doctor of divinity at St. John's College, Annapolis.

Dr. Archbold was married while in Canada twenty-four years ago, and has lost three children. He has but one daughter living, she being nearly 10 years old. The doctor has paid special attention to work among men and boys. He has been in constant demand to lecture on such subjects and is deeply interested in all such organizations as the Men's Brotherhood Movement, Boy Scouts and kindred works. It might be said of this call that just three years ago Dr. Archbold was a guest of Col. Henry J. Waters, at Princess Anne, at a meeting of the Southern Convocation of the Diocese, while he was at Ocean City, and that he received the unanimous call to the rectorship of Somerset Parish on exactly the same date, namely, August 16th.

## Construction Of Lateral Roads

Announcement was made last week by the State Roads Commission that 16 of the counties had selected roads to be built under the lateral road plan. This system was adopted by the last General Assembly. To induce construction on lateral branches, the state will match dollar for dollar expended by the counties. The commission has approved selections that will result in the building of approximately 80 miles of lateral roads and this work will be begun as soon as possible. Among the county roads that will be benefited are:

Somerset county—End of state road to Pocomoke, 0.5 mile.

Worcester county—du Pont Boulevard connection at Berlin, 3.6 miles; Snow Hill to Stockton, 2 miles; Pocomoke to Stockton, 2 miles.

Wicomico county—State road from Willards to Powellville, 2 miles; Quantico to Royal Oak, 4 miles.

The average attendance of pupils was 3,915—white 2,364 and colored 1,551. The cost of schools for the year was \$98,927.93.

## SUFFRAGE AMENDMENT RATIFIED

**Tennessee The Thirty-Sixth State To Give Vote To Women**

Ratification of the Federal Suffrage Amendment was completed last Wednesday with favorable action by the Tennessee House.

The vote was 49 to 47. The Senate ratified the amendment the Friday previous by 25 to 4. Tennessee was the thirty-sixth State to ratify and make the Nineteenth Amendment effective throughout the Nation. The constitutional change thus will become effective in time for the 17,000,000 women of the country to vote in the Presidential election in November.

Ratification of the suffrage amendment to the Constitution ends a struggle which began in this country before the Colonies declared their independence. It will eventually enfranchise 25,000,000 women.

Woman suffrage first raised its voice in Maryland in 1847, when one Mistress Margaret Brent demanded a place in the Legislature of the colony as a property holder of wide extent. In the days of the Revolution Abigail Adams wrote her husband, John Adams, at the Continental Congress which was framing the laws of the infant nation that "if in the new laws—particular care and attention are not paid to the ladies, we are determined to foment a rebellion and will not hold ourselves bound to obey any laws in which we have no voice."

Organized work for woman suffrage began in the United States with the Woman's Rights Convention in Seneca Falls, N. Y., in 1848, which was called by Lucretia Mott and Elizabeth Cady Stanton, early leaders of Massachusetts and New York, in response to the indignation aroused by the refusal to permit women to take part in the anti-slavery convention of 1840. From the date of that convention the suffrage movement began the fight that lasted seventy years and ended with victory. Another convention followed in 1852 at Syracuse, N. Y., at which delegates from Canada were present. It was there Susan B. Anthony assumed leadership of the cause to which she devoted her life.

In 1869 the National Woman Suffrage Association, with Miss Anthony and Mrs. Stanton at its head, was formed in New York. In the same year the American Woman Suffrage Association was organized in Cleveland, with Lucy Stone and Julia Ward Howe as its leaders.

The Nineteenth Amendment, which bears her name, was drafted by Miss Anthony in 1875 and was first introduced in Congress in 1878 by Senator A. A. Sargent, of California. It is in the same language that the new principle of the national law reads:

"Article —, Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

"Section 2. Congress shall have power, by appropriate legislation, to enforce the provisions of this article."

The amendment holds the record of being before the country longer than any other successful amendment to the Constitution. It was introduced as the Sixteenth Amendment and has been successively the seventeenth, eighteenth and nineteenth and has been before every session of Congress since its first appearance.

State after State gradually enfranchised its women citizens. Beginning with Wyoming in 1893, by 1915 sixteen States had given women the right to vote, and fourteen States had Presidential suffrage previous to ratification of the amendment.

Full suffrage is enjoyed today by the women of twenty-one foreign countries, including the new States of Czechoslovakia and Poland and the ancient nations of England, Germany and the Scandinavian countries.

## Negro Nominee For U. S. Senate

A committee of representative negroes, indignant at the refusal of Republican leaders to recognize them in patronage, met Monday night of last week at Trinity Baptist Church, Druid Hill avenue and McMechen street, Baltimore, and nominated W. Ashbie Hawkins, colored, attorney and leader among negroes, as a candidate for the United States Senate.

Attorney Hawkins will compete in the election next November as an independent Republican, opposing O. E. Weller, Republican, and John Walter Smith, Democrat. The 40 or 50 negroes who unanimously voted for his selection as standard-bearer of the negro race, declared they represent an overwhelming proportion of the negro vote in that city.

Under provisions of the State election law it will be necessary for the committee to secure the signature of 500 voters to the petition for Attorney Hawkins' nomination. The petition must be filed with the Secretary of State. No difficulty in securing that number of signatures will be experienced, the committee declared.

## BAPTISTS BEGINNING TO BUILD

**Pastor I. S. Hankins' Statement Of Progress Of Work**

Since our organization we have been hoping and planning for our new church building. To be without a church building has been a handicap. However, the spirit shown us by the Presbyterians in letting us use their chapel, and also the commissioners and judge of Somerset in granting us the use of the Court House, has been greatly appreciated, not only by us, but by Baptists of Maryland.

At last our hopes, long deferred, began to be realized. Work on foundation, excavating and getting ready for cement work was begun last week.

Some folks questioned, at first, the need of a Baptist Church in Princess Anne. In a community like this, made up of citizens from almost every State of our country, there have been, are, and will be Baptists who naturally want a church of their choice. Some Baptists waited long for such a church. Some who sought homes near Princess Anne did not locate here, largely because there was no Baptist Church. A party who has just purchased one of the high-priced farms near Princess Anne was much more pleased and satisfied when told that a Baptist Church was being built in this town. I have received several letters of inquiry as to Baptist Church proximity. Best, most desirable citizens are careful about moving their families into new communities. Their church and good schools have great consideration. A denomination like our, being one of the largest in the United States, for above reason, ought to have a good church in this county seat.

Another church is another force for righteousness in community uplift and an added honor and force in the cause of Christ—His kingdom on earth. Each denomination has contributed its own distinct emphasis to religion, social and religious life. Baptists' emphasis has been likewise helpful.

Since our organization times have been unfavorable for building. Having no building, and having waited so long, we are compelled to build. These days of high prices, for us, a small membership, with limited means, is no small undertaking. Having a nice location, near the heart of Princess Anne, we wanted to build, if possible, a church that will be a credit to our community, as well as to ourselves. We could have built a temporary, cheaper building sometime ago, but we wanted to build the best we could, a permanent structure, and be done with it for years to come. With the encouragement of our denomination and Princess Anne friends we have taken courage to build the best possible permanent church building, not only with our present needs in view, but the standing of the community and future generations' needs.

The plan we have adopted is one well suited for modern departmental, Bible school, young people's and church work. To build such a church would be an impossibility for us to accomplish alone, but with the generous help of our denomination and Princess Anne friends we hope to erect this better building.

The encouragement given in a substantial way, on the part of many citizens, is very gratefully received. Many have given us logs which we, in order to reduce the high cost of material, will cut and have sawed into lumber. In our endeavor to erect the best we can, within reasonable limits, we will greatly need and appreciate the interest and any help given us by our well wishers.

As pastor, I wish to thank all who have aided us thus far and for the good will shown. I wish also to thank the good people of Oak Grove school house community for their patronage at our recent festival, the proceeds of which I have turned over to the church building fund.

## See Big Photoplay September 1st

"The Eyes of the World," the photoplay from Harold Bell Wright's truly great novel, to be shown at the Auditorium, Princess Anne, on Wednesday, September 1st, is a big and intensely interesting production.

The photoplay follows the author's story with exactitude and the characters on the screen are the characters from the pages of the novel to the life. It is unnecessary to say anything about the plot—let it suffice that it concerns a group of the most interesting characters ever presented.

It took eight months to film "The Eyes of the World" and the photoplay shows it in the careful working out of the smallest detail.

The picture is one of the best ever shown in this town. Its story is big and vital, but yet full of the human interest of every-day occurrences among every-day people.

Can the ballot box ever assume the importance of the powder box?

# LAND OF SHOCKS LEVY FOR 1920

## Tahiti Should Be Accustomed to Earthquakes.

Average of Two a Day for the Last Two Months is the Record, According to Dispatches — Society Islands All Volcanic.

Two earthquakes a day has been the average for the last few months in Tahiti, newspaper dispatches state. This rocking island is described by H. W. Smith in a bulletin of the National Geographic society, as follows: "Tahiti, of the Society Islands, is one of the most important of the French possessions in the Pacific, with steamship connection to San Francisco and New Zealand.

"The Society Islands are of volcanic origin, arising from the low bed of the ocean, which has depths near the islands of 1,500 to 2,000 fathoms, while the highest peak, in the center of the island of Tahiti, reached an altitude of 7,900 feet. On a clear morning the view as the ship approaches the harbor of Papeete is most beautiful, showing deep valleys penetrating from the coast to the mountain peaks of the interior.

"Near Papeete the beautiful Fatuina valley may be visited in an afternoon. For a good part of the way a carriage road leads up the valley, offering changing vistas.

"Why, indeed, should the Tahitian tell there are great leaves of the wild 'taro' growing by the roadside; the young leaves are delicious boiled, and the curious stranger will find many other new delicacies of the table—the alligator pear, the baked papaya, the Mantia crab, the raw fish, as good as the best oyster, served with Tahitian sauce, and on rare occasions a salad made from the heart of the coconut tree.

"In Tahiti, as well as in most of the South Sea Islands, great numbers of coconuts are grown, and, after being dried for copra, are shipped in large quantities to Europe. We were much interested in the different methods of gathering the nuts in various islands. In Tahiti the natives climb the trees with the help of a strip of green, fibrous bark torn off the stem of a hibiscus tree. After knotting the two ends together, the climber slips his feet half through the circle, and, standing with his legs apart, so as to stretch the thing tight, ascends the tree in a series of leaps, with a foot on each side of the trunk.

"A practiced climber will thus mount trees of a very considerable height with a celerity and ease which do not suggest the long practice actually required. On making a trial myself, I found it difficult to climb even as much as a foot from the ground.

"In its fresh, green state the coconut provides a most refreshing drink, but as it grows older the 'milk' hardens and forms the white inner rind with which we are all familiar. This is the celebrated copra and is, commercially put to many different uses. In Tahiti it is used for sauces and for coconut oil. One sauce, which was served with fish at a very enjoyable picnic, although compounded of scraped nut and sea water, was palatable."

### Ready for Gabriel.

A negro doughboy who had hit Paris on A. W. O. L. and supplied himself generously with the vin sisters, mingled with stronger waters, woke suddenly in a still befuddled condition in the great urban cemetery of Pere la Chaise, whither his uncertain steps had taken him. To make it worse, there was an air raid going on.

The brother looked around him out of half closed eyes. On every side stretched long rows of white monuments. Silens shrilled from the city streets. Dazzling beams of white light stabbed the heavens. There could be but one conclusion.

Hastily searching his pockets, he drew forth his remaining possessions—a bottle of vin blanc, a pack of greasy cards, a much worn pair of ivory—and hurried them from him. "Gif gone away I'm me, evidence," he muttered. "Now come on, Mister Gabriel, Ise ready." — American Legion Weekly.

### An Extended Tour.

Just before the St. Mihiel show the Germans blew up an ammunition dump near a company of Yanks. It was reported that there was a large quantity of gas shells in the dump, and as soon as the explosions began the Americans immediately made themselves scarce with great rapidity.

When the danger had passed all started drifting back with the exception of one man who did not appear till the next day.

"Well, where you been?" demanded the top kick, eyeing him coldly.

"Sergeant," replied the other earnestly, "I don't know where I been but I give you my word I been all day gettin' back—American Legion Weekly."

### Making Him Useful.

Mrs. Harrigan—An' does yer husband ever get loaded these Volsted days?

Mrs. Harrigan—He does that.

Mrs. Harrigan—And what do you do?

Mrs. Harrigan—I go right to work moppin' the floors.

Mrs. Harrigan—But don't ye notice him at all?

Mrs. Harrigan—I do that. I use him for my own—American Legion Weekly.

# A Fair Exchange of Ideas Will Benefit You

And there is no better place to get the best ideas about everything than at the Great Salisbury Fair, for the best the country has will be on exhibit.

For information and details about building and building materials, visit our booth. You can obtain there the combined ideas of experts in home-making and in manufacturing materials for building of every description. Know what the best is before you buy. Before you build.

Perhaps you do not intend to build at this time; but some day you will. Now is your opportunity to learn what is going on in the building world. When you do decide to build, remember that we can furnish you with everything needed for building.

In other ways a visit to our booth will be well worth your while. In the little cypress bungalow and farm demonstration, you will find a complete home—a home that any one would love to possess. Ask for the details of its construction and get the free booklets and house plans from our representative.

Admire this attractive home, but don't envy it—BUILD ONE.

## WHAT YOU WANT

when you buy building materials is something that exactly suits your needs. That means service. Courtesy in all transactions, sympathy in seeing things from your point of view, and eager willingness to help you obtain just exactly what you want, are a few of the characteristics of ADKINS SERVICE. To make the service more complete, our architectural department will give you any help possible without charge.

Naturally the larger and better equipped the plant, the better the service it can render that is why you will get such satisfaction in dealing with us. Our stock and equipment allow us to supply "everything needed for building" and this saves trouble by combining with one firm all your transactions.

Ask the Man at the Booth what Adkins Service means

## HERE'S \$10.00 FOR YOU

If you hold the lucky number. Every adult visitor to our booth daily during the Fair will be given a mailing card ticket which will entitle the holder to a chance on a \$10 cash prize to be given away after the last race. Exception is made only of the employees and their families of E. S. Adkins & Company.

The holder must be present at the drawing after the last race to get the prize. If you leave before the drawing takes place, the prize will be given to the holder of the number drawn who is present.

This is a daily event. It has no string or conditions attached to it. The tickets are good for the day of issue only.

Come to our booth right after the Last Race

An actual photographic reproduction of one of the largest and best equipped plants in the State of Maryland. When you place an order with us, it means that this huge establishment is placed at your disposal—thereby assuring you that your orders will be taken care of efficiently, promptly and satisfactorily.

**Has Never Seen Their Equal**

"I have used Chamberlain's Tablets for stomach trouble, biliousness and constipation off and on for the past ten years. I have never seen their equal yet. They strengthened my digestion, relieved me of headaches and had a mild pleasant action on my bowels. I take pleasure in recommending them," writes H. D. F. Farmer, Cradersville, Ohio.

## LITTLE MOTHER

By EDNA BOUTWELL.

The old-fashioned clock chimed 6. As if it were a signal, the Winsome Lady opened the door, and peered down the dusky hall, her eyes filled with welcome for the little figure hastily approaching.

"Oh, I'm so glad you came," whispered the Winsome Lady, drawing the tiny figure within the room and closing the door.

The frail hands caressingly stroked the brown hair. For a moment there was silence, then the Littlest Mother spoke:

"You are a dear girl, Ruth, and I love you. I'm sorry you're going. But it's better, as you weren't made for settlement work. Are you going to marry the Doctor Man?"

The girl raised her head quickly. "Marry him?" she scoffed. "I'd sooner die!"

"You say things so beautifully. But talk to me," begged the Winsome Lady, as she resumed her former position. "I think you need a love story. It sometimes proves a cure for a certain sickness. I'll tell you my own love story."

"Yours!" smiled the girl, her brown eyes filled with a tender light.

"It was long ago," began the Littlest Mother, bending her white head, "when I was a girl. I lived in Ireland, by the sea. I loved and was loved by Tammam Wynne. One lovely moonlight night as we strolled hand in hand up the side of a woodland hill, I told Tammam that I was sure there were fairies about."

"Fairies—little men!" mocked he, "there are no such things!"

"We heard a peal of shrill laughter, but could see no one. Then Tammam turned boyishly to me and said: 'Wait for me, Ellen, wait for me!' With this he was gone. I waited for a long time and then, being childishly afraid, I went after him." Here the speaker's voice broke, but she continued gravely as if grown weary with the telling: "At the top of the hill I found Tammam—dead. Dead, with a smile on his face, and in his hands—a tiny silver button! The fairies had punished him and left their sign."

The girl's eyes were luminous with unshed tears. "But you don't believe that—do you?" queried the girl as they both arose.

"Of course! Everyone believed it! But it's children I've always wanted. At night I dream of them, with their little hands that they hold out to me. I went to night school for long years—to be a teacher; but I came here, out of pity. I think today is my birthday, and I've saved enough to buy a ticket to Ireland. I don't feel like cleaning—in fact I don't feel very well—" She hesitated as the door opened and revealed the handsome, debonaire doctor.

"I heard the story," he announced, flushing, "and, Ruth, forgive me! I'm not in the service, because I belong to the secret service."

"Oh, my dear," and the girl kissed him. "Why didn't you tell me? I thought you were a slacker!"

And the Littlest Mother, being worldly-wise, slipped quietly out into the crowded street.

Suddenly she heard her name called. She turned and confronted a big Irish policeman known as Tim Reilly. By the arm he held a girl with painted lips and wide, frightened eyes.

In his rich brogue he narrated to the tiny lady, how the "sick un," as the girl was famed, had been caught stealing again.

"An' it's me as will give 'er her doos," he grinned.

"Let me whisper in your ear, Tim," commanded the Littlest Mother, as if she did not mind the curious throng.

"Sure an' I will," shouted Tim, straightening up; "ye air a saint. Take her if ye can find good in the looks of her."

The wee lady's eyes twinkled like stars as she drew the girl into a doorway, while Tim dispersed the crowd.

"Take this," she said, giving the girl a roll of bills, "and try to be a better girl."

The girl looked shrewdly after the disappearing figure. "God—what a fool!" she sneered, and fled.

The Littlest Mother reached her cheerless room at last, and sank wearily down in a chair facing the distant sunset.

Below the window stood a wanderer, his violin tucked lovingly beneath his chin. Seeing the weary figure, he started to play a haunting melody.

The weary look fled, and the Littlest Mother, chancing to raise her eyes, gave a cry of rapture. For there, hung on the faded wall, was a picture of the Madonna and Child—the birthday gift of her friends.

"Tammam," whispered the Littlest Mother, "see the baby—and look—the mother smiles at me."

She stretched out eager, trembling hands toward the picture and almost unconsciously repeated these sweet old words she loved so well:

"Do you think what the end of a perfect day can mean to a tired heart—"

Well, this is the end of a perfect day.

Near the end of a journey, too—"

Her voice broke as the wanderer ceased his playing, and she bowed her head on her hands, murmuring: "I've waited long, Tammam—I'm coming—I'm coming!"

And the dying sunset touched with a lingering caress the bent head, and the glory of it filled the room.

## Small Cars—and the Declining Cost of Tire Mileage

You are aware, of course, that during the last ten years, Goodyear has been able steadily to increase the amount of mileage built into its tires.

Do you realize, also, that this increase has been accomplished without extra cost to the user—that Goodyear Tires are priced no higher today than in 1910?

In no tire in the Goodyear line is the declining cost of mileage more evident than in the present 30x3, 30x3½ and 31x4-inch size Goodyear Tires made especially for small cars.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking these sizes, go to your nearest Service Station for Goodyear Tires—get the exceptional worth and endurance that Goodyear builds into them.

### Environment

We are very much what others think us. The reception our observations meet with gives us courage to proceed or damps our efforts. A man is a wit and a philosopher in one place who dares not open his mouth and is considered a blockhead in another. ## PROCLAMATION

Proposing Amendments To The Constitution of the State, 1920

Whereas, at the January Session of the General Assembly of Maryland, held in the year 1919, two Acts were passed, to-wit: Chapter 319 proposing an amendment to Section 15 of Article III of the Constitution of the State, title "Legislative Department," regulating the compensation of Members of both Houses of the General Assembly; and Chapter 565 proposing an amendment to Section 37 of Article 4 of the Constitution of the State, title "Judiciary Department," regulating the pay of Clerks of Courts, and which said Chapters 319 and 565 are in the words and figures following:

### CHAPTER 319.

AN ACT to propose an amendment to Section 15 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," regulating the compensation of the members of both Houses of the General Assembly of Maryland, and to provide for the submission of said amendment to the qualified voters of the State of Maryland for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all the members of each of the two houses concurring), That the following be and the same is hereby proposed as an amendment to Section 15 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," the same if adopted by the legally qualified voters of the State, as herein provided, to become Section 15 of Article III, of the Constitution of the State of Maryland.

15. The General Assembly may continue its session so long as in its judgment the public interest may require for a period not longer than ninety days; and each member thereof shall receive compensation of three hundred dollars per annum and five dollars per diem for every day he shall attend the session, but no such days as he may be absent, unless absent on account of sickness or by leave of the House of which he is a member and he shall also receive such mileage as may be allowed by law, not exceeding twenty cents per mile; and the presiding officer of each House shall receive an additional compensation of five dollars per diem. When the General Assembly shall be convened by proclamation of the Governor, the session shall not continue longer than thirty days, and in such case the compensation shall be the same as herein prescribed.

SECTION 2. And be it further enacted by the authority aforesaid, That said foregoing section hereby proposed as an amendment to the Constitution of the State of Maryland shall, at the next general election for Members of Congress held in this State, be submitted to the legal qualified voters of the State, for their adoption or rejection. In pursuance of the directions contained in Article XIV of the Constitution of the State of Maryland, and at the said general election the vote on the said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be printed the words "For the Constitutional Amendment," and "Against the Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by said Fourteenth Article of the Constitution, and further proceedings had in accordance with said Article Fourteen.

Approved April 9, 1920.

### CHAPTER 565.

AN ACT to amend Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and to provide for the submission of said amendment to the qualified voters of this State for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all members of each of the two houses concurring), That the following section be, and the same is hereby proposed as an amendment to Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and if adopted by the legal qualified voters thereof, as herein provided, said section shall supersede and stand in the place and in stead of Section 37 of said Article 4 of the Constitution of Maryland.

SEC. 37. There shall be a Clerk of each of the said Courts of Baltimore City, except the Supreme Bench, who shall be elected by the legal and qualified voters of said city at the election to be held in said city on the Tuesday next after the first Monday of November, in the year eighteen hundred and sixty-seven, and shall hold his office for six years from the time of his election, and until his successor is elected and qualified, and he shall be re-elected thereto, subject to be removed for willful neglect of duty or other misfeasance in office, on conviction in a Court of Law. The salary of each of the said Clerks shall be forty-five hundred dollars a year, payable only out of the funds and receipts collected by the Clerks of said city, and they shall be entitled to no other perquisites or compensation. In case of a vacancy in the office of Clerk of any of the said Courts, the Judges of said Supreme Bench of Baltimore City shall have power to fill such vacancy until the general election of Delegates to the General Assembly to be held next thereafter, when a Clerk of said Court shall be elected to serve for six years thereafter; and the provisions of this Article in relation to the appointment of Deputies by the Clerks of the Circuit Courts in the counties shall apply to the Clerks of the Courts in Baltimore City.

SEC. 2. And be it further enacted by the Authority aforesaid, That the said foregoing section hereby proposed as an amendment to the Constitution shall, at the next election for members of Congress to be held on the Tuesday next after the first Monday in the month of November, nineteen hundred and twenty (1920), be submitted to the legal and qualified voters thereof for their adoption or rejection, in pursuance of the direction contained in Article 14 of the Constitution of this State, and at the said election the vote on the said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be written or printed the words "For the Constitutional Amendment," and "Against Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by the said Article 14 of the said Constitution.

Approved April 9, 1920.

Now, therefore, I, Albert C. Ritchie, Governor of the State of Maryland, in pursuance of the direction contained in Section 1 of Article 14 of the Constitution of Maryland do hereby order and direct that this Proclamation containing a full, true and correct copy of the text of said Chapters 319 and 565 of the Acts of the General Assembly of Maryland of 1920, be published in the official newspapers in each of the counties of the State where so many may be published and where not more than one may be published in each newspaper, and in three newspapers published in the City of Baltimore, one of which shall be published in the German language, once a week for at least three months next preceding the general election to be held in the State of Maryland on Tuesday, the 2nd day of November, 1920, at which election the said proposed amendments to the Constitution shall be submitted in form and manner prescribed by the General Assembly, to the legal and qualified voters of the State for their adoption or rejection.

Given under my hand and the Great Seal of the State of Maryland, Done at the City of Annapolis, this 23rd day of July, nineteen hundred and twenty.

ALBERT C. RITCHIE,

By the Governor:  
PHILIP B. PERLMAN,  
Secretary of State.

### FOR BEAUTIFICATION OF ROAD

Praiseworthy Idea Is That of Planting Trees in Streets of the Various Cities.

Now comes Charles Lathrop Pack, president of the American Forestry association, who urges the beautification of roads. Mr. Pack suggests that we cease building monuments for at least ten years, until the proper perspective can be given the situation, and that all the roads of the country, old and new, be planted in honor of the men and women who entered war work. He also suggests that counties work out plans for the placing of groves, so that we may in time have a national extended memorial.

The suggestion has been taken up in many parts of the country. A unique instance is the work of the people of Minneapolis, who are planning as far ahead as 1951. Trees are being trained there for 50 years hence, the American elm, of the vase type, being used. A fund of \$50,000 has been set aside for the care of these trees. Mr. C. M. Loring is the chief of the park system of Minneapolis, and this sum is his contribution to the memorial. The trees will be planted 60 feet apart.

Other cities are also alive to what can be done in this work. Washington plans to have a driveway between Potomac and Rock Creek parks, and memorial tree planting is under discussion there. In Cincinnati, a boulevard starting in the downtown section may be improved in this manner.

### ATTRACTIVE MAIL BOX

That his roadside mail box might harmonize with the stucco ranch house, this cattle man covered base, pedestal, and box with concrete. The roof of the box is painted green.—From Popular Mechanics Magazine.

### Concerning the Garden.

The delights of a garden don't need classifying, but some of the difficulties do. The first is to find the right place in which to make the garden. It should be in a locality where the sun will shine on it for at least five hours each bright day. It should not be where the soil is so thin and the rocks so near the surface that the garden will burn out during the summer. It should not be under or near large trees; the trees will not only keep the sun off, but will draw all the moisture and plantfood from the soil. Nor must the garden be in a spot that gets flooded.

### Co-ordination of Work.

Through the association of commerce the city of Milwaukee is planning to centralize all of the city's activities among the foreign born. The plan calls for a general committee, whose representatives are drawn from the various civic, social, and patriotic bodies and for an executive committee of five members to be appointed from the general committee. The co-operation of a member from each of these bodies will obviate all duplication of work and will mean a large increase in the ground covered in the coming year.

### Her Heartlessness.

"I hear tell that Gabe Gawkey is figuring on getting a divorce from his wife," said a neighbor. "What's the matter with her, anyhow?" "She's plumb heartless," replied Gap Johnson of Rumpus Ridge, Ark. "He talked about taking some spring medicine and she up and told him that the best kind to suit his case was a buck-saw and ax. That there infernal lady ain't got no more feelings than a snapping turtle!"—Kansas City Times.

### Community's Benefactor.

The man who owns an attractive home, large or small, is a real benefactor to the community. He is particularly fortunate if he can build the house himself. Then he can say with satisfaction: "When I am gone at least I shall have left a monument in the shape of this house. The town is more attractive than it would have been if I had not built my home here."

### When Love Grew Cold.

My most embarrassing moment happened when I was twelve years old. I was in love. It was on a winter morning, and my mother was sending me to the store, when the boy I loved passed by. I went out of the house as fast as I could, but I slipped and fell down the stairs. It was so funny he laughed out loud at me. I never looked at that boy again.—Exchange.

### Old Japan Disappearing.

Japan is so fast adapting and adopting not only western customs and manners, but western architecture, as well, but the traveler, who wishes to see anything Japanese must get out of the cities and off the beaten track. Standing on the Ginza, Tokio's main thoroughfare, the stranger will be amazed at the variety of fashions that will pass along before him. A gentleman in evening dress is followed by another who wears a frock coat and bowler hat, and by still another robed in native haori and hakama, canopied by a top hat, and sporting an expensive cane or umbrella. Behind these strolls along a man in overalls, followed by one in a yet more mongrel costume—a suit of white cotton underwear, over which is a cotton kimono and no shirt. All this is immensely comical, but the Japanese take it as a matter of course. The Japanese women, however, are free from these Eurasian indiscretions in dress and habit, preserving as yet their graceful native costumes.

### Italian "City of Crime."

The only town in the world which can boast of possessing more criminals than law-abiding folk is the Italian city of Ardena, which is known as the City of Crime. For several hundred years nearly every criminal who has escaped prison or done time in Italy has emigrated to Ardena, and today practically every inhabitant of the place is a criminal or the child of a criminal.

## Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. "The only medicine I have needed has been something to aid digestion and clean the liver," writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is

### EXPLORE RED RIVER VALLEY

Scientific Expedition to Make Search for the Bones of Reptiles of Prehistoric Era.

Another expedition to look for the bones of great prehistoric reptiles in the Red River valley of Alberta is on its way. This time it is under the direction of Dr. W. A. Parks of the University of Toronto, and the Royal Ontario museum. For a number of years these expeditions have been an annual summer journey for three months.

Two years ago the almost perfect specimen of the kritosaurus incurvimanus, which has just been finally chipped free from the rock and presented to the museum, was found, making a distinct addition to the records of science, and giving to Toronto the only specimen of this species yet discovered. Three incomplete skeletons of the kritosaurus and a great horned head of a brontosaurus, 4 feet 6 inches in length, were found by the professor, but have not yet been carved from the rock. It is the hope of Prof. Parks to collect ultimately for the Royal Ontario museum one of the finest exhibits of dinosaurs in existence.

The locality and the method of finding the specimens are described by Prof. Parks. "The river cut right through the flat prairie to a depth of 400 feet, forming a whole lot of broken buttes, and it is among these that the bones are discovered. One of the difficulties in obtaining complete specimens is that the bones cannot be obtained until they are partly exposed by the action of natural deroding causes. Sometimes you are disappointed then, for after exploring you may find only a single bone. You dig down as close as you can and pack the rock in plaster paris for shipment."

The Red River valley 3,000,000 years ago was near the coast of a great inland sea that stretched from the Gulf of Mexico to the Arctic ocean. "The sand along the shallow, brackish shores of this great body of water formed a splendid preservative for those huge reptiles which inhabited the world at that time. Our kritosaurus was found in what we call the Bell formation of the upper Cretaceous system," explained Prof. Parks.

### Hats Worth Small Fortunes.

Hats were designed primarily by the ancient peoples for protection, and through the evolution of the centuries new generations have failed to improve upon the ancient types that exist in various climates to prevent exposure either to extreme heat or cold. The sub-arctic people from the frozen tundras wear a snugly-fitting bennet with earlaps. In India the turban is worn to protect the head against excessive heat, says Asia Magazine. These turbans are made from cloth, 20 to 40 feet long, and wound about the head in endless variety, according to rank and taste. The natives of the Philippines and the South Sea islands wear large sun hats, usually made of palm leaves. In China, in addition to the large, peaked coiffe hat, one finds a hat which is emblematic of rank. The social position of a Manchu woman can always be determined by the ornaments on her bonnet, often consisting of precious jewels. Some of these hats cost as much as \$10,000. In various climates and countries natives utilize ornaments that secure from birds and game to make their hats more attractive.

#### Peace League Has Eye On Election

The Maryland Branch of the League to Enforce Peace will hold a meeting early in September to determine upon its action in view of the coming Presidential election.

Henry W. Williams, chairman, wrote to Mr. Taft, President of the League to Enforce Peace, some time since, urging a meeting of the Executive Committee of the National League for the purpose of taking such action, and he has just heard from Mr. Taft to the effect that such meeting will probably be held shortly.

It is most important in the view of friends of the League of Nations that both candidates should commit themselves to the ratification of the Covenant of the League of Nations, with reservations, and it is believed that a compact action by the League to Enforce Peace and by the various branches might add much to the accomplishment of this end.

The meeting of the Maryland branch will probably be held shortly after the meeting of the National Committee in New York unless a meeting of such Committee is unduly delayed.

#### JUDGE FOR YOURSELF

Which is Better—Try an Experiment or Profit By a Princess Anne Citizen's Experience

Something new is an experiment. Must be proved to be as represented. The statement of a manufacturer is not convincing proof of merit. But the endorsement of friends is. Now supposing you had a bad back, a lame, weak or aching one. Would you experiment on it? You will read of many so-called cures. Endorsed by strangers from far-away places.

It's different when the endorsement comes from home.

May I prove local testimony.

Read this Princess Anne case:

Ernest M. Hayman, 402 Main street, says: "Some years ago I was in a bad way from disordered kidneys. Backache caused me considerable annoyance. When I passed the kidney secretions, they burned and scalded and were highly colored. I was obliged to pass the kidney secretions several times during the night and I was very miserable. Doan's Kidney Pills were recommended by Smith & Co., druggists. After using one box I was cured of the trouble. Since then I have said a good word for Doan's Kidney Pills whenever I have had the chance."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills, the same that Mr. Hayman had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

#### ENTRANCE EXAMINATIONS

State Scholarships in Engineering Courses

Entrance Examinations for the Department of Engineering, as well as for the College of Arts and Sciences, will be held in the Civil Engineering Building, Homewood, Monday to Thursday, September 18th to 16th, 1920, beginning at 9 a. m. each day.

Applications for Scholarships in the Department of Engineering, established under the provisions of the Laws of Maryland, Chapter 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, a competitive examination must be taken Friday, September 17th, 1920, beginning at 9 a. m. Appointments will be made soon thereafter.

Each Legislative District of Baltimore City and each county of the State, with the exception of Harford, Talbot and Worcester counties, will be entitled to one or more scholarships for the year 1920-1921, in addition to those which have already been assigned. In the counties mentioned above, all the available scholarships have been awarded.

Under the provisions of the Act of Assembly, the County and City Scholarships in the Department of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted to them. The scholarships entitle the holders to free tuition, free use of text-books, and exemption from all regular fees. One of the scholarships in each county and in each Legislative District of the city carries also the sum of \$200.

Scholarships may be awarded to graduates of Loyola College, St. John's College, Washington College, Western Maryland College, Maryland Agricultural College, Mt. St. Mary's College, Rock Hill College.

Two scholarships may be awarded "At Large".

Applicants should address The Registrar, The Johns Hopkins University, for blank forms of application and for catalogues giving information as to examinations, award of scholarships, and courses of instruction. The next session begins Tuesday, September 28th, 1920. 8-17

SALISBURY, MARYLAND

Tuesday, Wednesday,  
Thursday and Friday,

# Aug. 24, 25, 26, 27

# 4 Days and Nights 4

The Fair Association has arranged for the biggest Fair ever held on this Peninsula. They have secured the services of one of the greatest aviators in America. He will carry passengers for sight-seeing over our town and surrounding country, also will give a wing-walking stunt daily as well as parachute drops. Just think of a man walking the wings of an Airplane thousands of feet in the air and then jumping from the machine and taking his life in his own hands, depending upon a parachute to save him from death. Remember, anyone wishing to go up in the Airplane and take the jump in a parachute will have the privilege to do so, and the Association offers a prize of \$50.00 for the feat.

## RACES

The management will give the regular races for light-harness horses, and in addition have arranged for two Running Races each day of the genuine thoroughbred running horses. They will be the same class running races as the Baltimore race tracks give and will be something new for this Peninsula. This will be the first opportunity for many of our citizens to see the running races which is considered to be the greatest sport in America.

## Free Acts

There will be three troupes of acrobats, high trapeze performers as well as tumbling acts. The Tasmanian Troupe, consisting of seven people, principally girls, is included. This feature alone is well worth the price of admission each day. The midway will contain at least ten (10) good shows with four (4) riding devices furnished by one of the greatest carnival shows in America, Ben Krause, Manager.

Already a number of farmers, housewives and stockraisers have made entries for exhibits, yet the Association is arranging to take care of more, and ask the public to send in their entries not later than Thursday, August 19th, at 6 o'clock, as the books will be closed at that time. Prizes have increased on almost all exhibits for 1920.

## YOUR RED CROSS

The American Red Cross, by its Congressional charter, is officially designated:

To furnish volunteer aid to the sick and wounded of armies in time of war, in accordance with the conventions of Geneva.

To act in matters of voluntary relief and as a medium of communication between the American people and their Army and Navy.

To continue and carry on a system of national and international relief in time of peace and to apply the same in mitigating the sufferings caused by pestilence, famine, fire, floods and other great calamities.

To devise and carry on measures for preventing these causes of suffering.

## FIRST AID TRAINING TO MEN AND WOMEN

American Red Cross is Teaching Hundreds of Thousands Life-Saving Methods.

The purpose of instruction in First Aid to the injured offered by the American Red Cross is to train men and women to administer First Aid treatment promptly and intelligently when emergencies demand it. First Aid treatment is not intended to take the place of a physician's service. A surgeon should always be summoned as a precautionary measure where there is an injury of any consequence, but when one cannot be secured a few minutes' delay may mean a fatality. In such a case a person trained in First Aid is invaluable not only to the individual, but through him to the community in which he lives.

There is perhaps no way of ascertaining the number of deaths or serious disabilities which result from lack of proper safeguards or prompt emergency treatment. It is safe to assert they number thousands daily. There can be no doubt that the application of First Aid methods to each case would immeasurably lighten the country's toll of suffering and death.

The dissemination of First Aid training and information has already produced a far-reaching and beneficial influence in the prevention of accidents on railroads, in mines and in great industrial concerns.

The benefit of a widespread knowledge of First Aid in the event of a great disaster, such as a train wreck, an explosion, an earthquake, etc., is obvious. Laymen who have had First Aid training can render efficient assistance. Many lives may depend upon such emergency care.

Red Cross First Aid work includes (1) the formation and conduct, through Red Cross chapters, of classes for instruction in accident prevention and First Aid to the injured among men and women in all communities and in every industry; (2) the introduction of courses of instruction in high schools and colleges.

The Red Cross is prepared to supply First Aid books and equipment at reasonable prices.

Every person in this country able to do so should, in his own interest, receive Red Cross First Aid instruction. Information about the course and instruction classes may be had at the nearest chapter headquarters.

### RED CROSS EXTENDS RELIEF TO POLAND

More than \$5,000,000 has been spent by the American Red Cross in aiding the stricken people of Poland. The organization has nursed the sick, fed the starving, clothed the naked, sheltered the homeless, schooled the children and cared for the orphans there. It has conducted a relentless fight against typhus, cholera and other terrible diseases. So today millions of men and women in that resurrected nation speak in grateful appreciation of "The Greatest Mother in the World."

Nearly 200 American Red Cross workers are now engaged in relief activities in Poland. Four large relief bases are in operation and eleven mobile units are in the field. During the last twelve months this organization was largely instrumental in the re-establishment of a million refugees at a cost for general relief of more than \$1,000,000. Last winter one-half million war orphans were aided materially, and since then a series of large orphanages have been established to give them permanent care.

But for American Red Cross aid, officials of Poland declared recently, millions of people in that country would have perished of disease, exposure or starvation the last eighteen months. And the work there must be kept up for another year.

### PE-RU-NA

This Lady TELLS Her FRIENDS

Mrs. Mary Fricke, 507 Bornman St., Belleville, Ill., is just one of the many thousands of ladies throughout the country who, after an agony of years, have at last found health, strength and vigor in PE-RU-NA.

Her own words tell of her suffering and recovery better than we can do it: "I suffered with my stomach, had awful cramps and headaches so I often could not lay on a pillow. Saw your book, tried PE-RU-NA and got good results from the first bottle. To be sure of a cure I took twelve bottles. I have recommended PE-RU-NA to my friends and all are well pleased with results. I will not be one day without PE-RU-NA. Have not had a doctor since I started with PE-RU-NA, which was about fifteen years ago. I am now sixty-three years old, hale, hearty and well. Can do as much work as my daughters. I feel strong and healthy and weigh near two hundred pounds. Before, I weighed as little as one hundred. I hope lots of people use PE-RU-NA and get the results I did." An experience like that of Mrs. Fricke is an inspiration to every sick and suffering woman.

If you have catarrh, whether it be of the nose, throat, stomach, bowels, or other organs, PE-RU-NA is the remedy. It is not new; it is not an experiment. PE-RU-NA has been tried. PE-RU-NA has been used by thousands who once were sick and are now well. To prevent coughs, colds, grip and influenza and to hasten recovery there is nothing better.

PE-RU-NA will improve the appetite and digestion, purify the blood, soothe the irritated mucous linings, eradicate the waste material and corruption from the system. It will tone up the nerves, give you health, strength, vigor and the joy of living. Do what Mrs. Mary Fricke and thousands more have done—try PE-RU-NA. You will be glad, happy, thankful.

## CARDUI HELPED REGAIN STRENGTH

Alabama Lady Was Sick For Three Years, Suffering Pain, Nervous and Depressed—Read Her Own Story of Recovery.

Paint Rock, Ala.—Mrs. C. M. Stegall, of near here, recently related the following interesting account of her recovery: "I was in a weakened condition. I was sick three years in bed, suffering a great deal of pain, weak, nervous, depressed. I was so weak, I couldn't walk across the floor; just had to lay and my little ones do the work. I was almost dead. I tried everything I heard of, and a number of doctors. Still I didn't get any relief. I couldn't eat, and slept poorly. I believe if I hadn't heard of and taken Cardui I would have died. I bought six bottles, after a neighbor told me what it did for her.

"I began to eat and sleep, began to gain my strength and am now well and strong. I haven't had any trouble since... I sure can testify to the good that Cardui did me. I don't think there is a better tonic made and I believe it saved my life."

For over 40 years, thousands of women have used Cardui successfully, in the treatment of many womanly ailments.

If you suffer as these women did, take Cardui. It may help you, too. At all druggists. E 85

## PRETTY INSECTS COST MILLIONS

Butterfly Does Immense Damage to Alfalfa Fields of Different Western States.

### STRIP LEAVES FROM PLANTS

Chickens, Turkeys and Many Birds Destroy Worms During Feeding Stage—Bollworm Devours Both Worms and Pupae.

(Prepared by the United States Department of Agriculture.)

"What a beautiful creature!" exclaimed a farm visitor, indicating a gorgeous yellow butterfly which had alighted upon a nearby shrub and now raised and lowered his black-edged wings in slow, graceful palpitations. The insect appeared to be the very spirit of the hot summer day; his colors were the colors and shades of brilliant sunshine and the deepest, blackest shadow, set in a delightful contrast; and its will was the will of the breeze that stirred the broad alfalfa meadows beyond the garden, where host and guest had retired to enjoy the shade.

#### Appreciation Dampened.

"Beautiful—yes," responded the rancher, "but my appreciation is somewhat dampened by the knowledge that the pretty creature costs the alfalfa growers of Arizona and California about \$1,000,000 a year. What this butterfly costs in other states—Kansas, Oklahoma, Texas and others—I'm unable to say, but it must be an immense sum. Rather a high price to pay for beauty, isn't it? We could endow a good many art galleries with that sum; we could beautify our schools and hang Rembrandts in every classroom, if there were enough of them to go around. We could bring thousands of the city children out into the fresh air and sunshine, if we had the price of that yellow fellow and his mate."

"How does he accomplish all this?" asked the interested listener. "It's a harsh indictment to lay against a creature so apparently lacking in malice. Tell me about him; where does he come from; how does he live, and what are his peculiarities?"

The rancher rose, stepped through the hedge, and came back with a handful of alfalfa, freshly pulled from the nearby field.

"You can find out all you wish to know from Farmers' Bulletin 1094, just published by the United States department of agriculture, but I think we have his life history and a catalogue of his crimes in this bunch of herbage."

"Here's the egg," he continued, indicating a tiny, brownish, elongated object upon the upper side of an alfalfa leaf. "That's the first stage, and is interesting only because the female butterfly lays from 200 to 500 of them in her lifetime. It has been estimated that if all the eggs of a single female butterfly hatched—and there were no losses in the progeny, or in their eggs or young—this first butterfly would be grandmother to 3,000,000,000 insects before the end of the summer."

"Fortunately for us an insect parasite destroys a good many of the eggs."

Alfalfa Caterpillar—Female in Adult or Butterfly Stage.

Here's a ruined egg—it's black, you see, instead of brown; the parasite has been there.

#### Million-Dollar Damage.

"Next is the larva, or worm stage; and it is this form that the alfalfa caterpillar does the million-dollar damage. A number of these worms will strip most of the leaves from a crop in a very short time. Here is a small worm evidently just hatched, and here on this bud is a larger one. Note the green color of its body and the white stripe down each side. He is nearly an inch long and has made his growth by gorging upon the tender leaves and terminal buds of my alfalfa. Wherever there is an unusually large number of these worms, they will eat the stems, too, but their favorite food is the tender portion of the plant."

"While in this stage, the larva is victim of many conditions and is preyed upon by many creatures. A fly lays its eggs upon the worm. These hatch into grubs which penetrate and kill their host. Chickens, turkeys and many birds destroy the worm during the feeding stage."

"Moisture and a hot, heavy atmosphere will induce the spread of a disease among the worms. See, here are worms just afflicted with the disease—note the lighter color of their skins and their sluggish movements. In a few hours they'll die and decompose into a black decaying mass. You can understand why alfalfa hay loses its feeding value if it is heavily impreg-

nated with these corpses—the animals don't like the flavor.

"But the conditions that foster this disease are valuable in controlling the pest. Upon irrigated farms, water may be turned into the field to provide moisture which, with the heat, will start the plague and kill the worms."

"From this stage the worm enters the pupa period. He spins no cocoon, as many caterpillars do, but hangs himself, head up, among the stems and swings in a little loop of silk, like a steeple-jack—see this chap!"

"You've heard of the bollworm—so injurious to corn and cotton? He comes to our aid in the fight against the alfalfa caterpillar, and, by one of those queer natural compensations, does us a favor by devouring both worms and pupae. Odd, isn't it?"

"Lay Eggs All Summer. "Unless the worm is destroyed, the butterfly you have admired emerges from the pupa in a few days and begins to lay eggs to establish a new cycle. This goes on all summer."

"Control is accomplished by cutting alfalfa close and clean. We clear out our fence corners and ditches, and cooperate with our neighbors in clearing their land. This leaves no shelter for the caterpillar to live in from one alfalfa crop to the next, and the few which do survive find food mighty scarce, and many perish of starvation."

"Disking with a harrow over the meadows after a crop has been moved destroys many of the insects in the egg, worm or pupa stage. Besides killing

A Parasite of the Alfalfa Caterpillar.

the insects which are preparing to ravage the next crop, the diskings process, as every one knows, is a mighty good thing for the alfalfa.

"We also use a brush drag well weighted and run it over the alfalfa meadows after the diskings is done. The drag gets into the hollows and crevices where the harrow has not touched and crushes the insect in whatever stage it finds him. Even if the first cut has been ruined by the pest, these methods of irrigation and cultivation will insure the reduction of the caterpillar in time to save the next cutting from his attacks."

"These methods are recommended by the department of agriculture, and we hope to prevent most of the annual loss caused by the activities of yonder butterfly."

### BEST PRACTICE WITH CLOVER

Crop Should Be Cut When Seed Is in Dough—Chaff Makes Good Bedding for Stock.

The clover should be cut when the seed is in the dough, and when well cured raked up early in the morning and put under cover. It is the practice with some growers to let the clover after it is cut remain in the swath for several weeks; there is a loss of seed if the weather should be wet. The better method is after the clover is well cured to haul to barn or barrack and have the seed hulled out when the weather is cold and dry. The clover chaff makes excellent bedding for stock. It is a good practice to top-dress the grain with the chaff.

### INFESTATION OF HESSIAN FLY

As Result of Many Wheat Growers Planting Too Early Last Fall Outbreak Is Likely.

A shortage of farm labor and unfavorable weather conditions at planting time combined to influence many wheat growers in planting their grain too early last fall. This has resulted in a heavy infestation of Hessian fly in about all of the early planted wheat of last fall.

Unless winter wheat growers can be induced to unite in a concerted movement to observe the approved methods of combating the Hessian fly during the summer and fall of 1920, it seems that a disastrous general outbreak of the pest very probably will occur in 1921.

### SPLENDID GARDEN RESULTS

Attractive Place Where All Space Is Devoted to Cultivated Crops During Entire Season.

It is simply wonderful what a common farm garden of rich soil will grow in one season if all of the soil is kept busy all the time. Where all the space is run to cultivated crops through the growing season the garden is an attractive place, and no part of it becomes hard and baked in dry weather, as where patches are neglected after the first short crops have been harvested.

### VEGETABLES NEED NITROGEN

Large Amounts Required by Cabbage, Collards, Lettuce, Etc., Grown for Foliage.

Vegetables that are grown for their foliage, as cabbage, collards, lettuce, spinach, etc., need large amounts of nitrogen. Vegetables that produce large quantities of seed, but little foliage, need mostly phosphorus. An example is the tomato.

Get-Rich-Quick promoters succeed in getting a lot of money out of Get-Poor-Quick people.

Men's heads are said to be growing larger. You have no question about it after hearing a lot of them talk.

Higher railroad fares furnish one more excellent reason why the people of Princess Anne should trade at home.

Everybody is predicting lower prices on what they have to buy and higher prices on the things they have to sell.

Indians smoke pipe of peace with Governor Cox, but apparently the braves had to get along without any firewater.

Possibly some of the women who have been fighting all their lives for the right of suffrage will forget to register when the time comes.

Many motorists feel that pedestrians should carry lights and sound a horn at every street intersection and when rounding curves.

While a lot of the women writers are discussing politics, a lot of the men editors are having much to say about women's clothes.

Auto industry in danger from lack of credit. Can it be that those soulless bankers refuse to lend money to a man with a third-hand car as security?

Five thousand immigrants a day pouring into Ellis Island, so here's hoping some of them are hired girls willing to do something more than ornament the back porch.

The women throughout the country will now be privileged to vote in the coming election. Those who have been eager for the "right" will need no urging to avail themselves of the opportunity. But those who have not been eager, including both those who have been indifferent and those who have been positive in their opposition, must now regard the exercise of the franchise as their duty. Neglect of electoral duties is one of the political perils of the country. The stay-at-home male vote has been responsible for many an election blunder or disaster, and the broader the suffrage, the greater is the potential of danger in negligence. The long-fought struggle of the women has apparently achieved its victory. The right to vote has been won, but with it has come the responsibility which every eligible woman should recognize and accept.

## THE SUGAR SPECULATORS

Sugar dealers are not so happy as they were a few weeks ago. They are learning what happens when you force the price of an article up to an exorbitant level. The law of supply and demand, like the mills of the gods, grinds slow but it grinds exceedingly fine. It is working now and it is bringing here from all over the world an ample supply of sugar. Also beet sugar production has been stimulated and a large crop is forthcoming.

Now sugar dealers are begging the government to protect them from the collapse of the speculative structure that has been built up out of the earnings of the people. They will not get much sympathy. There would be no tears shed if a lot of the people who have been getting rich should now form the acquaintance of the bankruptcy court.

The people who have made the big profits on such a deal are not usually the ones who suffer when the smash comes. The dealers who are now complaining may have made no great gains, while others who got into the game early have pocketed their swag and cleaned up. Probably the biggest gains were made by Cuban speculators who long ago got cash for their crop at a most extortionate rate.

The retail trade has been whipsawed in this game and is likely to lose money on its sugar transactions. But the people who have played the most cautious game will have come out the best.

Some who have stocked up heavily have failed to foresee the results of exorbitant prices on any staple and must pay the penalty. Now if the law of supply and demand can only work with equal remoteness in the matter of news print, the two greatest price abuses of this period will have been relieved.

## PUNCTUALITY

John Dronberg, employed by the Bethlehem Shipbuilding Company at its Fore River works, recently celebrated the 19th anniversary of his employment by that company. During that period he has never been late in reporting to his work. He has been away from his bench but five times.

These are times when many people lack sense of discipline. They get to work when they feel like it, they wash up on their employer's time and if they want to quit they do so without giving notice. Probably these fellows look on a man like Mr. Dronberg as very old-fashioned.

Still one can imagine that the gentleman has a much more comfortable home and a better paying job than the fellows who work when they feel like it.

## THE GET-RICH-QUICK PERIL

From all over the country come complaints of the operations of Get-Rich-Quick promoters. They mail their seductive literature to innumerable "sucker lists." Their salesmen are everywhere persuading the inexperienced with oily tongues. Many newspapers publish their enticing advertisements without any question. The craze to buy fake securities and take gambling chances is proceeding on a big scale.

It is a drain on the wealth of the nation. Hair-brained speculators and smart crooks are gathering in a large share of the wealth of the country on their gambling schemes.

Meanwhile the honest industries of the country, on which the people depend for employment, can't borrow money enough at a decent rate of interest so that they can keep running on full time. A number of States have adopted drastic legislation commonly called "blue sky laws." But there is a question if the separate States can deal adequately with this problem. If promoters are forbidden to operate in Maryland, gullible people in this commonwealth will be enticed by advertisements in newspapers that come in from the outside.

It is time for a nation-wide drive against Get-Rich-Quick promoters. If the United States constitution won't permit adequate legislation, that constitution should be amended to admit such action.

The promotion of these schemes is a comparatively new development, since formerly most people inexperienced in investing would put their money in their home banks where it was well taken care of. Now a lot of them have got the Get-Rich-Quick idea. Unless there is a successful drive to prevent their exploitation a vast amount of good money needed to develop the country will be thrown away.

## After Coal Profiteers

Attorney General Palmer last week instructed state's attorneys to investigate alleged combinations and conspiracies among dealers to increase coal prices. Information obtained by federal agents was said to show that dealers, through repeated resales, had raised prices though avoiding direct profiteering.

Immediate prosecutions were directed should investigation reveal conspiracies among dealers. The Attorney General ordered the attorneys to pay attention also to trade practice and "defective or wasteful devices," through which the dealers might be able to raise the price to the consumer.

## Cured of Stomach Trouble And Constipation

Rachel Cribley, of Beaver Dam, Ohio, was sick for two years with stomach trouble and constipation, taking one medicine after another with only temporary relief. "My neighbor spoke so enthusiastically of Chamberlain's Tablets," she says, "that I procured a bottle of them at our drug store to try. A few days treatment convinced me that they were just what I needed. I continued their use for several weeks and they cured me."

## A Maryland Problem.

It is no easy task to discover anything that can be done to keep young men of Maryland on the farms, to convince them that town, village or city life will not be more pleasant and more profitable for them. Arguments to this end have sorely failed, as the census figures for several Maryland counties prove beyond shadow of doubt. These counties have lost considerable population in the past decade, but that population has not gone out of the state but principally to the cities within Maryland borders. None of the counties that have in them cities of fairly good size lose population. There may be a decrease in the rural parts of these counties, but there will be an increase in the urban population, so that the total county population will show a healthy increment.

The chief victims of such losses are counties in which there are no cities of any considerable size. The boy who has made up his mind to leave the farm does not take kindly to the idea of moving to a country village. He wants a city, and if his native county cannot offer him one, he goes farther until he finds one that suits him. Most of such men come to Baltimore, where they can now get big wages and plenty of work.

Nor is the boy the only one who leaves the farm. The girl finds that she can enjoy many amusements in a city that she cannot find on the farm, and if she wants employment plenty of it is offered to her at wages that will enable her to live fairly well. The attractions for both the boy and the girl are too strong for them to resist, and off they go.

What can be done about it? That's the question, and volumes have been written on it without any solution. All the machinery the genius of man can invent will not make farm work easy. There may be a way found to make such work more attractive and more profitable to the young man. Then he may consent to remain and Maryland's censuses may make a better showing of rural population.—Baltimore American.

## Chamberlain's Colic And Diarrhoea Remedy

This is unquestionably one of the most successful medicines in use for bowel complaints. A few doses of it will cure an ordinary attack of diarrhoea. It has been used in nine epidemics of dysentery with perfect success. It can always be depended upon to give prompt relief in cases of colic and cholera morbus. When reduced with water and sweetened it is pleasant to take. Every family should keep this remedy at hand.

## Order of Publication

Bertie Taylor Mitchell vs. Thomas T. Mitchell.  
No. 3413 Chancery. In the Circuit Court for Somerset County, Maryland.

The object of this suit is to procure a decree divorcing the plaintiff a vinculo matrimonii from the said defendant.

The bill states that the plaintiff and defendant were married in the town of Salisbury, State of Maryland, on or about the eleventh day of February, nineteen hundred and eleven; that they resided together in said town of Salisbury, and in the town of Crisfield, Maryland, until about the twelfth day of May, nineteen hundred and seventeen; that through the conduct of the plaintiff toward her said husband, the said defendant, has always been kind, affectionate and above reproach, the said defendant has without any cause or reason abandoned and deserted her and has declared his intention to live with her no longer, and that such abandonment has continued uninterrupted for at least three years and is deliberate and final and the separation of the parties beyond any reasonable expectation of reconciliation; that two children have been born to said parties from said marriage, who remained in the custody of the plaintiff for a while after said separation, but are now in the care and custody of the said defendant's mother.

It is thereupon, this 19th day of August, nineteen hundred and twenty, by the Circuit Court for Somerset county, in Equity, ordered that the plaintiff, by causing a copy of this order to be inserted in some newspaper published in said Somerset county, once in each of four successive weeks before the 20th day of September next, giving notice to the said Thomas T. Mitchell, residing in Wicomico county, in said State of Maryland, and for whom two successive subpoenas have been issued and been returned non est, of the object and substance of this bill warning him to be and appear in this Court in person or by solicitor on or before the 9th day of October next, to show cause, if any he has, why a decree ought not to be passed as prayed.

**What Women Must Do To Vote**

When the women register they will be compelled to answer many intimate questions about themselves, just as the men have been doing. They must tell, under oath:

Their residence and whether more than one family lives in the same house.

Their party affiliation if they wish to vote in the primaries.

Their age.

Their nativity—place of birth.

Their color.

The time they have lived in their precinct, Legislative district and State.

If they have been naturalized or were born in this country.

The date of their naturalization and the court where it took place.

And after each name is a blank space for remarks to be made by the judges whenever they see fit to do so.

**Marriage Licenses**

The following is a list of marriage licenses issued by the Clerk of the Circuit Court for Somerset county:

**MARYLAND'S NEW DRAINAGE LAW**

**State Status Similar To Somerset's Local Ditch Law**

For the past two years there has been on the statute books a law under the operation of which co-operative drainage projects have been carried out in Somerset county whereby thousands of acres of swamp land have been reclaimed. In many instances these waste lands are now good farm lands, while in other cases the sole objective was the improvement of community sanitation.

The law was a local law for Somerset county. Under a similar law passed by the last legislature and now on the statute books residents of any section of the State may avail themselves of the co-operative system of community drainage as practiced in Somerset county.

The new law, state-wide in its application, in substance provides that whenever the owner or owners of any swamp or low grounds shall deem it fit to have them drained, if the owners of the land cannot agree, they or any of them may petition the local county commissioners for the appointment of a commission to locate or lay out a ditch or ditches or drains for the purpose.

The commission so appointed under the law must be composed of three or more "judicious and impartial freeholders" to be taken from the vicinity of the land to be drained.

It is further provided that the Ditch Commissioners so appointed shall call to their assistance a surveyor or engineer and they together must estimate probable costs, damages to property owners, and determine the proportion of such costs which each property owner or person benefited must pay.

The law provides further that if it be impossible for the Drain Commissioners to reach an agreement with the owners of any land or property through which it is proposed to construct a ditch, right of way may be condemned as provided for in the Annotated Code of Maryland, title "Eminent Domain."

It will be seen readily that all persons through whose lands such ditches may be cut, and those whose lands are adjacent and drain into same will be benefited and must therefore contribute to the cost of making the ditch; the Ditch Commissioners being empowered to determine the proportion of cost to each property holder in respect to the advantages received.

The law makes further provision that the Drainage Commissioners shall call a meeting of the taxable property owners for the purpose of electing a board of two or more, managers and a treasurer. It shall be among the duties of the Board of Managers to see that the ditch is cleared out and kept in repair and to make a levy upon the taxables to pay their pro rata share of the cost of proper maintenance.

It will be seen that this law provides for a co-operative drainage project among a few farmers without the necessity of issuing bonds and defrays the cost upon the parties directly concerned in exact proportion to the benefits which each derive.

This law—or a very similar one—has been in operation in Somerset county for the past two years and has met with popular favor. Its wider application should result in the reclamation of thousands of acres of land without undue expense.

## JUNIOR RED CROSS WORKING AT HOME

Production of Sound American  
Citizenship the First Aim,  
Says Dr. Farrand.

On the badge of every member of the Junior Red Cross are the words "I Serve." That tells the story of the school children's branch of the American Red Cross and its efforts to bring happiness to children throughout the world.

Realizing that the time never was so propitious as right now for teaching the highest ideals of citizenship, the entire present program of the Junior Red Cross has been framed under the very inclusive phrase, "Training for Citizenship Through Service" for others. Since the Junior Red Cross is the agency through which the American Red Cross reaches the schoolboys and the schoolgirls, all its activities are designed to come within the regular school program, and without creating new courses or increasing the number of studies to lend its aid in vitalizing the work of the schools.

"The thing that is needed," says Dr. Livingston Farrand, Chairman of the American Red Cross Central Committee, "is not a perpetuation of the Junior Red Cross, but the training and breeding of sound American citizenship inspired by the true, fundamental ideals of sound democracy. One of the great conceptions in making the Red Cross a contributor to better citizenship in our American democracy is the realization that after all the sole hope of any nation is with the children of the country."

The plan of organization of the Junior Red Cross makes the school—public, parochial and private—the unit, not the individual pupils. Mutual service, helpful community work such as clean-up campaigns, care of the sick, promotion of health regulations, participation in civic and patriotic movements—all these creative agencies designed to translate into life and action the regular school program are parts of the machinery which the Junior Red Cross places at the disposal of the school authorities.

Graded study courses giving practical methods of civic training, supplemented by pamphlets and helpful suggestions, are supplied to the local schools by the Junior Red Cross. An elaborate plan for promoting an interchange of correspondence between children in different sections of the United States as well as with children in foreign lands is being devised and will take a prominent place in the established classroom program.

In promoting the general cause of child welfare, Red Cross courses in home hygiene and care of the sick, first aid, and dieting may be established in all Junior Red Cross Auxiliaries.

The ideals and the objective of the Junior Red Cross are embodied in the pledge of service which the pupil takes when he signs the membership roll and pins on his coat the Junior's badge. The pledge which binds together service and citizenship reads:

"We will seek in all ways to live up to the ideals of the Junior Red Cross and devote ourselves to its service."

"We will strive never to bring discredit to this, our country, by any unworthy act."

"We will reverence and obey our country's laws and do our best to inspire a like reverence and obedience in those about us."

"We will endeavor in all these ways, as good citizens, to transmit America greater, better and more beautiful than she was transmitted to us."

At the foundation of this school program of the Junior Red Cross is a great love for America's children.

### RED CROSS ACTIVE IN DISASTER RELIEF

When disaster hits a community—fire, flood, earthquake, explosion, bad wreck or tornado—the American Red Cross can be depended upon to follow right at its heels with help for the stricken people. Red Cross relief is almost immediately forthcoming—food, clothing, shelter and funds; doctors, nurses and special workers with long experience in handling similar trouble elsewhere.

During the last year, ending June 30, there was an average of four disasters a month in the United States. One hundred and fifty communities in twenty-seven states suffered. The largest and most destructive of these were the tidal wave at Corpus Christi, Texas, and tornadoes in Mississippi, Louisiana, Alabama, Georgia, Ohio, Indiana and Illinois.

In these events of horror 850 persons were killed, 1,500 were injured, 18,000 were made homeless, about 30,000 families needed help, the property loss was nearly \$100,000,000 and almost \$1,000,000 in relief funds, not including emergency supplies was expended.

To the sufferers from all disasters during the year, the American Red Cross sent \$120,000 worth of supplies, 110 Red Cross nurses and seven special relief trains. To meet the needs of the stricken, the organization set up ten relief stations, operated thirty food canteens and as many emergency hospitals. One hundred and twenty-five Red Cross chapters gave disaster relief service.

If disaster ever strikes this town or county, the citizens can be absolutely sure the Red Cross will be right on hand to help them in every way.

Anilin Poisoning From Hair Dyes.

A case of chronic anilin poisoning, manifesting all of the typical symptoms, namely, vertigo, gastritis, diplopia, asthenia and exfoliated dermatitis, is reported by Thompson. The cause of the poisoning was a French hair dye called "Goutte Agouti." The type of anilin was paraphenylenediamine, 2 per cent; hydrogen peroxide, 70 per cent, and alcohol, 28 per cent. Thompson points out that the menace of anilin hair dyes has not yet sufficiently been emphasized to be appreciated generally by the medical profession. The fact that personal susceptibility varies as much as in the case of poisoning, for example, from Rhus toxicodendron, only makes it more difficult always to recognize such cases. It is well to be suspicious of artificial Tinted hair and all the darker shades up to jet black.

#### Signals of Royal Travel.

When King George travels the locomotive drawing his train carries by day three disks bearing the royal arms, while by night it carries four lights—two white, a green and a purple.

What "Mark Twain" Means.  
"Mark twain" is a river term used by the leadman in indicating soundings. "Mark twain" means that the water is about two fathoms deep. A story is told that while Samuel L. Clemens, whose nom de plume was Mark Twain, was a pilot he was asked a friend who was taking soundings what pen name he should assume. Just then the friend called out "Mark twain," and Mr. Clemens took that name. He used it regularly in signing his stories while he was a reporter on the Virginia City Enterprise.

#### "Tragic Century."

The sixteenth century is called the "tragic century" on account of the great number of deaths occurring in it. The whole world was swept by plagues throughout the hundred years. Pestilence nearly depopulated China, and raged throughout Germany, Holland, Italy, Spain, England, France and Russia. The "sweating sickness," which broke out in England in 1506, caused the death of nearly one-half the population of the large cities of that country. The century was also noted for its many wars.

#### Record Piece of Jade.

The largest piece of jade known is a block of this stone which is seven feet long, four feet wide and weighs three tons. It came from South Island, New Zealand, and forms the base for a statue of a Maori chieftain on exhibition in the Museum of Natural History, New York city.

#### How to Petrify Wood.

Take gem salt, rock alum, white vinegar, chalk and pebbles powder, of each an equal quantity. Mix well together. If, after the ebullition is over, you throw into this liquid any wood or porous substance it will turn the substance into stone in four or five days.

# Goodyear Mileage—and Tires for Small Cars

A well built tire yields much more mileage for each dollar of cost than a tire purposely made to be offered at a sensationally low price; buy the tire, not the price.

Built to deliver exceptional mileage at exceedingly low cost, Goodyear Tires, of the 30x3-, 30x3½- and 31x4-inch sizes, save inconvenience, disappointment and money.

Their value results from the application of Goodyear experience, expertness and care to their manufacture in the world's largest tire factory devoted to these sizes.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking these sizes, go to your nearest Service Station for Goodyear Tires—for the real worth and endurance that Goodyear builds into them.

## PROCLAMATION

Proposing Amendments To The  
Constitution of the State, 1920

Whereas, at the January Session of the General Assembly of Maryland, held in the year 1920, two Acts were passed, to-wit: Chapter 319 proposing an amendment to Section 16 of Article III of the Constitution of the State, title "Legislative Department," regulating the compensation of Members of both Houses of the General Assembly; and Chapter 555 proposing an amendment to Section 37 of Article 4 of the Constitution of the State, title "Judiciary Department," regulating the pay of Clerks of Courts, and which said Chapters 319 and 555 are in the words and figures following:

### CHAPTER 319.

AN ACT to propose an amendment to Section 16 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," regulating the compensation of the members of both Houses of the General Assembly of Maryland, and to provide for the submission of said amendment to the qualified voters of the State of Maryland for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all the members of each of the two Houses concurring), That the following be and the same is hereby proposed as an amendment to Section 16 of Article III, of the Constitution of the State of Maryland, title "Legislative Department," regulating the compensation of the members of the General Assembly, as herein provided, to become Section 16 of Article III, of the Constitution of the State of Maryland:

15. The General Assembly may continue its session so long as in its judgment the public interest may require for a period not longer than ninety days; and each member thereof shall receive a compensation of three hundred dollars per annum and five dollars per diem for every day he shall attend the session, but not exceeding twenty cents per mile; and the presiding officer of each House shall receive an additional compensation of five dollars per diem. When the General Assembly shall be convened by proclamation of the Governor, the session shall not continue longer than thirty days, and in such case the compensation shall be the same as herein prescribed.

SECTION 2. And be it further enacted by the authority aforesaid, That said foregoing section hereby proposed as an amendment to the Constitution of the State of Maryland shall, at the next general election for Members of Congress held in this State, be submitted to the legal and qualified voters of the State, for their adoption or rejection, in pursuance of the directions contained in Article XIV of the Constitution of the State of Maryland, and at said general election the vote on said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be printed the words "For the Constitutional Amendment," and "Against the Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by said Fourteenth Article of the Constitution of the State of Maryland, and in accordance with said Article Fourteen.

Approved April 9, 1920.

### CHAPTER 555.

AN ACT to amend Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and to provide for the submission of said amendment to the qualified voters of this State for adoption or rejection.

SECTION 1. Be it enacted by the General Assembly of Maryland, (three-fifths of all the members of each of the two Houses concurring), That the following section be, and the same is, hereby proposed as an amendment to Section 37 of Article 4, title "Judiciary Department," of the Constitution of this State, and if adopted by the legal and qualified voters thereof, as herein provided, said section shall supersede and stand in the place and in stead of Section 37 of said Article 4 of the Constitution of Maryland.

SEC. 37. There shall be a Clerk of each of the said Courts of Baltimore City, except the Supreme Bench, who shall be elected by the legal and qualified voters of said city at the election to be held in said city on the Tuesday next after the first Monday of November, in the year eighteen hundred and sixty-seven, and shall hold his office for six years from the time of his election, and his successor is elected and qualified and be re-eligible thereto, subject to be removed for wilful neglect of duty or other misdemeanor in office, on conviction in a Court of Law. The salary of each of the said Clerks shall be forty-five hundred dollars a year, payable only out of the fees and receipts collected by the Clerks of said city, and they shall be entitled to no other perquisites or compensation. In case of a vacancy in the office of Clerk of any of said Courts, the Judges of said Supreme Bench of Baltimore City shall have power to fill such vacancy until the general election of Delegates to the General Assembly to be held next thereafter. A Clerk of said Court shall be elected to serve for six years thereafter; and the provisions of this Article in relation to the appointment of Deputies by the Clerks of the Circuit Courts in the counties shall apply to the Clerks of the Courts in Baltimore City.

SEC. 2. And be it further enacted by the Authority aforesaid, That said foregoing section hereby proposed as an amendment to the Constitution shall, at the next election for members of Congress to be held on the Tuesday next after the first Monday in the month of November, nineteen hundred and twenty (1920), be submitted to the legal and qualified voters thereof for their adoption or rejection, in pursuance of the direction contained in Article 14 of the Constitution of this State; and at said election the vote on said proposed amendment to the Constitution shall be by ballot, and upon each ballot there shall be printed the words "For Constitutional Amendment," and "Against the Constitutional Amendment," as now provided by law, and immediately after said election due returns shall be made to the Governor of the vote for and against said proposed amendment, as directed by the said Article 14 of the said Constitution.

Approved April 9, 1920.

Now, therefore, I, Albert C. Ritchie, Governor of the State of Maryland, in pursuance of the direction contained in Section 1 of Article 14 of the Constitution of Maryland do hereby order and direct that this Proclamation containing a full, true and correct copy of the text of said Chapters 319 and 555 of the Acts of the General Assembly of Maryland of 1920, be published in, at least two newspapers in each of the counties of the State where so many may be published and where not more than one may be published then in that newspaper, and in three newspapers published in the City of Baltimore, one of which shall be published in the German language, once a week for at least three months next preceding the general election to be held in the State of Maryland on Tuesday, the 2nd day of November, 1920, at which election the said proposed amendments to the Constitution shall be submitted in form and manner prescribed by the General Assembly, to the legal and qualified voters of the State for their adoption or rejection.

Given under my hand and the Great Seal of the State of Maryland, Done at the City of Baltimore, this 23rd day of July, nineteen hundred and twenty.

ALBERT C. RITCHIE.

## USE AX IF DISEASE DEVELOPS IN FLOCK

Chicks Will Not Grow Properly if Not Healthy.

Far Better Plan to Prevent Ailments Than to Attempt to Cure an Ailing Fowl—Give Good Attention to Their Houses.

Disease is one of the handicaps to successful poultry keeping and should be guarded against at all times. Unless kept in a healthy condition, chicks will not grow properly and mature fowls will lose their vigor and vitality and become unproductive and unprofitable.

It is far better to prevent disease by proper care and attention than to attempt to cure a bird after it is sick. Therefore it is important to watch the flock closely at all times for any signs of disease, so in case an outbreak occurs it may be checked at once. Prevention is always better than cure, and all those who wish to succeed with poultry should give their birds such good care and keep their houses so well cleaned and disinfected that both fowls and chicks will keep hardy and vigorous.

Some diseases may be treated successfully, while others of a more serious nature usually prove fatal. If only one or two birds of a flock become sick it is usually advisable to kill them immediately (unless they are choice specimens) and burn or bury the carcasses, say poultry specialists in the United States department of agriculture. If the birds are kept and an attempt is made to doctor or cure them the disease may prove contagious and spread throughout the entire flock.

## AXLE USEFUL AS GATE HINGE

Illustration Shows How Discarded Part of Wagon or Other Implement May Be Utilized.

On almost every farm can be found an old wagon or implement wheel with its axle. The illustration shows how it can be made to form one side and a very effective hinge for the farm gate.

An Old Axle, With Parts of the Two Wheels Remaining Upon It Forms an Essential Part of This Easy-Winging Farm Gate.

The axle is set upright with the slats of the gate bolted to it. The lower end of the axle should be fitted with an old hub to serve as a bearing. The hub on the upper end should have at least one spoke remaining in it, so that the latter can be thrust through a hole bored in the gate post. Some stout wire, or iron strips, will be necessary to hold the hub up against the post.

## PRODUCE BEST CAULIFLOWER

Tie Leaves Over Head to Protect It From Sun or Weather—Three Cuttings of Crop.

When the cauliflower head is about the size of a dollar, the leaves should be tied or twisted over the head to protect it from sun and weather. This method should produce a perfectly white product. The leaves should be so tied that snow or rain that enters may find a ready exit at the bottom, as an accumulation of moisture on the head or curd will cause dark spots and eventually ruin the product. There are usually three cuttings of the crop. If the earliest heads are tied with string, the second with raffia and the last have the leaves broken over, the grower will be aided at cutting time and will not have to examine all the plants.

## HIRE LABOR ON HOUR BASIS

Specialist Says Farmers Will Find Employing Hands on That Plan Advantageous.

Experience the last several seasons, says W. L. Cavert, farm management specialist of the Minnesota College of Agriculture, indicates that farmers will find it advantageous to employ harvest and threshing labor on the hour basis instead of the day basis. "The hour plan," says Mr. Cavert, "is absolutely fair to both farmer and laborer and has the advantage that the help is not likely to object when it seems necessary to put in long hours."

## FEW WEEDS ARE DESIRABLE

Detailed Purity Test Will Enable Farmer to Decide Whether He Wants Weeds or Not.

Not all weeds are equally undesirable in fields, hence a detailed purity test showing the various weeds in a sample will enable the farmer to decide whether he is willing to plant the weed seeds his sample contains or whether he will look farther for pure seed. Clean seed is always obtainable, usually at a somewhat higher price. The decision must be made on an accurate and detailed test of the seed under consideration.

## Maryland Sends Representative to Orient on Baptist Missionary Ship

The Empress of Japan, Canadian Pacific liner, on which practically 100 Southern Baptist missionaries sailed from Vancouver, B. C., Aug. 17, for China and Japan. Maryland was represented in the group by Rev. Robert Lord Bausum, of Baltimore, a young pastor who will take up educational work in South China, and whose picture is shown above.

When approximately one hundred Southern Baptist missionaries sailed on the Canadian Pacific liner, the Empress of Japan, from Vancouver, British Columbia, Tuesday, August 17, for fields in the Orient, they formed the largest group of evangelists of the Christian religion that has ever been sent to foreign fields at a single time by a single denomination since the beginning of Christian missions.

The majority of the appointees of the Foreign Mission Board are new workers, recently come from the various educational institutions of the South where they have spent years in preparation for the duties they are about to assume in other lands.

Appointment and sending forward of so large a number of workers at a single time was made possible by the larger proceeds from missions from the Baptist 75 Million Campaign, from which \$20,000,000 will be realized for foreign missions during the five years covered by the campaign. Not all of this fund will be used in employing new workers, though approximately 500 additional men and women will be sent out during the five years. Other sums will go to providing more church buildings, schools and hospitals, homes for the missionaries and improvements of that character, including publishing houses for turning out the Bible and other religious literature. Many improvements will be made in missionary institutions already in operation on the foreign fields.

Missionary Operations Enlarged. In the new appointees of the Foreign Mission Board—and a new record was established when sixty-six were named by it this summer—are a number of

Christian doctors, nurses, teachers, scientists and women workers, and one expert in farming and stock raising. These will supplement the work of the evangelists in that they will seek to relieve bodily suffering, teach the boys and girls, pave the way for more efficient homes by interesting mothers in sanitary housekeeping, and by their good work create in the minds of the people a favorable attitude toward the Christian religion. The instructor in agriculture and stock raising will undertake to reach many Chinese farmers with better methods of production and thus prove that the Christian missionary is the farmer's friend. The majority of the missionaries were born on the farm.

While the majority of the new appointees are going to China and Japan, others will sail in September for work in Africa, Brazil, Argentina and Chile.

World Program Is Planned. Ten foreign fields are occupied by Southern Baptists today in Africa, Asia, Europe, South America and Mexico. The work in all these fields will be strengthened and enlarged as a result of the larger funds made available for foreign missions through the Baptist 75 Million Campaign. New fields have been opened in Europe and the Near East and a million dollars has been appropriated for launching an intensive work in Russia the moment the doors of opportunity are opened there. The Board is greatly strengthening its work in Palestine and hopes ultimately to give the gospel to hundreds of thousands of people in the land which witnessed the earthly labors of Jesus Christ.

Dr. J. B. Gambrell, of Fort Worth, Texas, president of the Southern Baptist Convention, and Dr. E. Y. Mullins of Louisville, Ky., president of the Southern Baptist Theological Seminary, are now on a visit to all the Baptist families of the world, conveying to them the greetings of good will from Southern Baptists and laying the foundation for a fuller Baptist program for the evangelization of the world.

Money Apportioned to Mission Fields. In the distribution of funds to new work among the various mission fields occupied by Southern Baptists the following appropriations have been made by the Foreign Mission Board: Africa, \$233,925, calling for 31 new missionaries; Argentina, \$263,550, calling for 17 new missionaries; Brazil, \$1,339,109, calling for 54 new missionaries; Chile, \$58,900, calling for six new missionaries; China, \$3,279,125, calling for 331 new missionaries; Europe and the Near East, \$3,558,950, calling for 40 new missionaries and Mexico, \$420,000, calling for eight new missionaries.

Work in Homeland Fostered. While a large sum from the campaign is appropriated to foreign missions, home interests have not been overlooked. Appropriations to home objects include \$12,000,000 for home missions; \$11,000,000 to state missions; \$20,000,000 to Christian education, or the better equipment and partial endowment of the 114 educational institutions owned by Southern Baptists; \$4,800,000 for the thirteen Baptist hospitals in the South; \$4,039,688 for the sixteen orphanages, and \$2,500,000 for the relief of aged ministers and their dependent families.

## EARTH NOT ALONE

Many Universes Besides Our Own in Space.

Recent Discoveries Have Greatly Expanded Mankind's Knowledge of Astronomy—Now We Know the "Sun Do Move."

The high priests of Babylon and Egypt, 3000 years and more ago, had a considerable knowledge of astronomy; but, leaving out of question the few thus learned in science, creation to the ancients was a three-story affair, or rather two stories and a cellar, the latter being the abode of the dead, while on the second floor, ornamentally bespangled with stars, dwelt the gods.

Earth, of course, was flat. The sun passed across the heavens once in every 24 hours, and, going under, appeared again in the east next morning. There was also the moon, which had a similar habit; and that was about all there was of the cosmos.

Since then our ideas on the subject have vastly expanded, and now, in view of recent discoveries, they seem destined to expand enormously beyond anything hitherto imagined. We are beginning to grasp the notion of other universes outside of our own—at distances from our own universe well-nigh inconceivable.

Rev. Jasper declared that "the sun do move." He was right. Not only does it revolve on its own axis (as may be plainly seen by the "spots" which travel across its disc), but it is moving in a straight line through space, like a gigantic projectile, at a speed of at least ten miles a second. As it thus moves, the earth and its sister planets, of course, go with it.

Astronomers, in the course of centuries, have actually been able to observe this movement, by the closer gathering of stars in the sun's wake and the widening out of constellations ahead of us—just as might be noticed of trees and houses passed or approached in a railroad train.

All the stars are suns, most of them much bigger than our own solar luminary, and every one of them is traveling at a terrific speed. The so-called Runaway Star (known to astronomers as 1830 Groombridge) is going at a rate of 200 miles a second. What imaginable power could have set all these suns in motion? And why are they all traveling in different directions, apparently? Our own seeming destination is the constellation Lyra.

It is now thought probable that our universe, which we call the Milky Way (we seem to be not far from the center of it) is in reality a vast spiral in form, and that this spiral is revolving, so to speak, in its own plane. Assuming this to be true, the straight line in which our sun appears to travel is actually a curve.

What has led to this belief is observation of other spirals which are now thought to be distant universes, many of them so far away that light from them, traveling 186,000 miles a second, takes something like 10,000,000 years to reach us. Their form plainly shows that they are revolving. Everything in the cosmos seems to go round and round. The moon travels around the earth, the earth around the sun; and presumably the sun is following an orbit about some center, whether a giant sun or merely a point in space. Our universe (if the theory above outlined be accepted) is whirling. Probably, as it whirls, it is making a journey of its own about some center, perhaps in concert with other universes.

Space being infinite in extent, it is, when one comes to think of it, absurd for us to imagine that ours is the only universe.

We shall never know. But at least we may claim that our ideas on the subject of creation are expanding.—Kansas City Star.

Women War Workers in Waxworks. London is collecting in photographs and wax figures a complete record of what women did to help win the war. For the present a part of the record is displayed in the Whitechapel art gallery. There is the woman ship painter, the tanner, the coke quencher, the stoker, the airship maker, the munition worker, the farmerette. There is a picture of a woman operating a 100-kilowatt electric engine, and of another driving an electric crane. Women are shown working in gas works, dressing bricks, spreading tar, sieving, gauging burner parts, testing meters, wheeling coke, carrying heavy sacks, and working in naphthalene factories, flour mills and sawmills.

Increase in Foreign Mails. A comparison of United States mails dispatched to foreign countries by steamers for the first nine months of the last two fiscal years shows that 2,500,043 pounds of letters and postcards were dispatched in 1920 and 1,794,822 pounds in 1919, or 32.63 per cent increase. In 1920 there were 17,377,424 pounds of prints dispatched and 16,943,543 pounds in 1919, or 2.56 per cent increase. The dispatch of parcel post amounted to 26,453,543 pounds in 1920 and 12,883,722 pounds in 1919, or an increase of 105.25 per cent.

## HOW TO PREVENT BEES SWARMING

Advice and Suggestions on Subject Given by Professor Conradi of Clemson.

### BROOD CHAMBER TOO SMALL

Emigration of Honey Gatherers Can Be Greatly Reduced by Proper Management—How Swarm May Be Hived to Best Advantage.

One of the problems of the beekeeper, says Prof. A. F. Conradi, entomologist, is how to prevent bees from swarming. The following questions and answers taken from information card No. 9, published recently by the extension service of Clemson college, give in brief form expert advice and suggestions on this subject:

1. Why do bees swarm? The bee colony is divided into workers, drones (or male bees), and a queen. Normally the queen alone lays eggs, and to perpetuate their race new colonies are necessary. This is their natural way of increase.

2. What are conditions that induce swarming?

(a) The brood chamber may be too small, allowing too little egg-laying space. (b) There may be too little storage space. (c) There may be lack of ventilation. (d) There may be too many drones.

3. At what season is swarming most frequent?

Mostly in early spring, but it may occur at any time during honey flow. If conditions named in No. 2 are not corrected.

4. Can swarming be entirely prevented?

No; but it can be greatly reduced by proper management.

5. Why should swarming be prevented as far as possible?

To keep the working force together. One hive full of bees is worth more than any number of weak colonies.

6. Are there two queens in the hive at swarming time?

Generally not. The young queen has not yet come out of the queen cell. The old queen leaves with the first swarm.

7. How may swarming be reduced or possibly prevented?

(a) If the brood chamber becomes crowded, add another brood chamber. (b) If bees cluster out, it may be due to a crowded condition, or lack of ventilation. Ventilate the hive and add supers when necessary. If possible remove drone comb and also queen cells.

8. How may a swarm be hived to best advantage?

(a) When the swarm has settled, shake or brush it into the new hive.

Swarming Bees.

(b) Remove the old hive from which the swarm came and place it where you want it to remain in the future. (c) Place the hive containing the new swarm on the old stand. The first bees returning home will enter the new hive on the old stand; by night the majority of bees are again in the new hive on the old stand, making a strong colony.

### POISONING GOPHERS IS EASY

Put Strychnine Sulphate on Pieces of Vegetable of Some Kind and Shove in Hole.

The easiest way to poison gophers is to put pieces of strychnine sulphate, about the size of half a wheat grain, on pieces of potato, carrots or turnips. Then take a sharp stick and push it down into the soft earth around the mound. Put the pieces of poisoned material down into these places and the gophers will get it. This way also keeps stock and children from picking it up. It has been proven to be very efficient in ridding the field.

### RICH SOIL FOR LATE GARDEN

To Withstand Summer Heat and Drought Plants Must Have Well-Prepared Seed Bed.

Late garden seeds should be planted in very rich and well-prepared soil. To stand summer heat and endure severe drought the plants must have rich, mellow soil, and it must be kept in that condition.

#### Vade Mecum.

Palpitatingly, the infatuated young man sought counsel at the bazaar of an ancient and prayed the ancient tell him how he might learn of his fair lady's faults. "Go forth among her women friends," spake the venerable one, "and praise her in their hearing."

—George Jean Nathan in Puck.

## I. O. O. F. Plans Drive

With the return of Grand Master H. Dorsey Etchison, Frederick, from an extended trip to the coast, visiting many jurisdictions in the Western States and inspecting the orphans' and aged homes of the Odd Fellows in Washington, Idaho, Montana, Oregon and California, the Grand Lodge of Maryland has outlined an extensive program for the fall and winter season.

There will be two campaigns—one for a fund of \$100,000 to erect in Maryland an Odd Fellows' Home and the other for 10,000 new members. To this end appeals have been sent out by Grand Secretary William A. Jones, of Baltimore, calling upon every Odd Fellow in the State to rally to the cause of humanity by subscribing to the Home Fund, it being pointed out that with 56 orphans' and aged homes in 40 States, it seems hardly believable that Maryland, the mother jurisdiction, should be without one, because it was in Baltimore, over a century ago, that the order had its inception, with but five members, and today there are more than 3,000,000 under the "Wildewy banner."

### Sow Grass Seed In The Fall

It is recommended by the State Experiment Station that grass seed be sown by itself in the early fall rather than with wheat as is the common practice. It has been found that better grass crops can be obtained by seeding the latter part of August than by sowing grass and clover seed in wheat. A better seed bed can be prepared and less seed will be needed to give a good stand of grass when it is sown by itself in rotation.

The ground for grass should be given the same preparation as for alfalfa and the seed should be sown the latter part of August or the first of September. It is not necessary to apply as much lime as is needed for alfalfa. However, for good grass crops the soil should not be in an acid condition.

### May Be Debarred From Voting

Chapter 133, Section 29, Acts of 1902, raises a point which may debar many women from exercising their new-gained franchise. This section provides:

All persons who after the passage of the act (March 29, 1902), shall remove into any county of this State or into the city of Baltimore, shall indicate their intent to become citizens and residents of this State by registering their names in a suitable record-book to be procured and kept for the purpose by the Clerk of the Circuit Court for the several counties and by the Clerk of the Superior Court of Baltimore city. And no person coming into this State from any other State, District or Territory shall be entitled to registration as a legal voter of this State until one year after his intent to become such legal voter shall be thus evidenced.

### Gasoline May Cost 40 Cents

Gasoline will cost more than 40 cents a gallon throughout the United States by September 15th, officials at Washington believe, unless refiners succeed in persuading joy riders to curtail consumption.

Officials now are studying a tentative proposal of big refiners to cut down consumption through an informal system of rationing to apply in all 48 states. The system would be applied entirely by refiners and be without Government authority, though it probably will have the moral backing of Government officials. Approximately 10,000,000 owners of automobiles, power boats and airplanes would be affected.

### Dynamiting the Clams

The little pholas or boring clam is a great delicacy on the Pacific coast. Its meat is juicy and tender and is excellent in stew. Consequently, fishermen are not content to dislodge the clams slowly with pick and crowbar. They use dynamite, one blast of which dislodges hundreds of clams, according to the Popular Science Monthly.

### JUDGE FOR YOURSELF

Which Is Better—Try an Experiment or Profit By a Princess Anne Citizen's Experience

Something new is an experiment. Must be proved to be as represented. The statement of a manufacturer is not convincing proof of merit. But the endorsement of friends is. Now supposing you had a bad back, A lame, weak or aching one. Would you experiment on it? You will read of many so-called cures. Endorsed by strangers from far-away places.

It's different when the endorsement comes from home. Easy to prove local testimony. Read this Princess Anne case: Ernest M. Hayman, 402 Main street, says: "Some years ago I was in a bad way from disordered kidneys. Backache caused me considerable annoyance. When I passed the kidney secretions, they burned and scalded and were highly colored. I was obliged to pass the kidney secretions several times during the night and I was very miserable. Doan's Kidney Pills were recommended by Smith & Co., druggists. After using one box I was cured of the trouble. Since then I have said a good word for Doan's Kidney Pills whenever I have had the chance."

## NOTICE TO TAXPAYERS

Notice is hereby given that the levy of the year 1920 for State and County Taxes has been made in Somerset county.

Pursuant to said levy the taxes are now in my hands for collection. A discount of three per cent will be allowed on all county taxes paid on or before October 31st, 1920, and a discount of two per cent, if paid during November, 1920. No discount will be allowed on county taxes paid after November, 30th, 1920.

The law allowing discounts on State taxes has been abolished, therefore no discount will be allowed on State taxes.

The law provides that both County and State taxes must be paid in order to obtain the discount. State taxes bear interest from October 1st, 1920, at the rate of six per centum per annum. County taxes bear interest from January 1st, 1921, at the rate of six per centum per annum, and interest is charged for the full month from the first day of each month.

R. MARK WHITE, Treasurer and Collector of State and County Taxes.

### ENTRANCE EXAMINATIONS

#### State Scholarships In Engineering Courses

Entrance Examinations for the Department of Engineering, as well as for the College of Arts and Sciences, will be held in the Civil Engineering Building, Homewood, Monday to Thursday, September 13th to 16th, 1920, beginning at 9 a. m. each day.

Applications for Scholarships in the Department of Engineering, established under the provisions of the Laws of Maryland, Chapter 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, a competitive examination must be taken Friday, September 17th, 1920, beginning at 9 a. m. Appointments will be made soon thereafter.

Each Legislative District of Baltimore City and each county of the State, with the exception of Harford, Talbot and Worcester counties, will be entitled to one or more scholarships for the year 1920-1921, in addition to those which have already been assigned. In the counties mentioned above, all the available scholarships have been awarded.

Under the provisions of the Act of Assembly, the County and City Scholarships in the Department of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted to them. The scholarships entitle the holders to free tuition, free use of text-books, and exemption from all regular fees. One of the scholarships in each county and in each Legislative District of the city carries also the sum of \$200.

Scholarships may be awarded to graduates of Loyola College, St. John's College, Washington College, Western Maryland College, Maryland Agricultural College, Mt. St. Mary's College, Rock Hill College.

Two scholarships may be awarded "At Large".

Applicants should address The Registrar, The Johns Hopkins University, for blank forms of application and for catalogues giving information as to examinations, award of scholarships, and courses of instruction. The next session begins Tuesday, September 28th, 1920.
