SALISBURY STATE UNIVERSITY

Preface

Many questions are frequently asked of the personnel in the Office of Institutional Research about student enrollments and student characteristics, faculty, academic disciplines, and numerous other subjects, with reference both to the present and the past. Some people simply need an enrollment figure while others might require a more in-depth analysis of data over a period of time, while still others might need an entire research report.

The purpose of this FACTBOOK is to provide a ready source of current and trend information. It is not meant to provide a complete history of Salisbury State University, but to provide a picture of Salisbury State University as it is today, with reference to the past five and in some cases the past ten years. Factbooks have been produced by the Institutional Research Office since the 1983-84 academic year. This year's edition contains data up to and including the Fall 1993 semester; data about the Spring 1994 semester will be distributed in about mid-April. All "trend" tables dealing with academic programs have been reorganized according to the 1993-94 organizational structure of four schools (rather than the five of previous years) to allow for ease in making comparisons.

Please note as well that a new section entitled "Academic Program Review Support" has been added in order to meet the data needs of those programs undergoing review. This section appears last in the document, and its content is outlined in the Table of Contents. The data contained here cover the five-year period of Fall 1989 through Fall 1993, with additional tables for Fall 1988, if needed. Student credit hour and degree data for double majors are also available for the 1988-89 through 1992-93 academic years. Please note that separate tables are available for graduate programs in terms of numbers of students by sex, ethnicity, age, and residency for the same periods as described above. If readers have any questions about the data in the section, please contact the Institutional Research Office.

I hope many of your questions will be answered in this FACTBOOK. If you require additional information, please do not hesitate to call this office. Suggestions for improvement in the presentation of the data are welcome.

Linda A. Cashman
Director of Institutional Research
November 1993

This FACTBOOK was prepared for Salisbury State University.

Its usage is restricted to University personnel and persons authorized by the University.

Salisbury State University PROFILE FALL 1993

Founding Date:

1925

Location:

Wicomico County, Maryland

Mission:

Salisbury State University is a comprehensive institution of higher learning offering a traditional liberal arts curriculum and a variety of preprofessional and professional programs

on both the graduate and undergraduate levels.

President:

Dr. Thomas E. Bellavance

Total Enrollment:

5,956

55% increase from Fall 1975 (3840) 38% increase from Fall 1980 (4318)

Number of courses:

1380 course sections are scheduled between 8:00 a.m. and 10:00 p.m.

Average Undergraduate

Class Size:

46% of classes have under 20 students 48% have between 20-40 students 6% have over 40 students

Source: Datatrieve Report, Computer Services

Faculty:

240 full-time, of which 203 are tenured/tenure-track positions

93 part-time

82% with terminal degrees (of tenured/tenure-track) 80% with doctorates (of tenured/tenure-track)

12.6 years average length of service

Faculty highest (terminal) degrees represent 40 states and 1 foreign country.

Faculty have received degrees from 162 institutions in 45 states.

Degree Offerings:

29 Undergraduate degree programs; 5 Graduate degree programs

Degrees Conferred

1992-93:

1186 bachelor's, 126 master's

Equal Opportunity Policy: Salisbury State University provides equal employment and educational opportunity without regard to race, color, religion, national origin, sex, age, marital status or handicap as required by Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Civil Rights Act of 1991, Section 504 of the Rehabilitation Act of 1973, Americans With Disabilities Act of 190, and other equal opportunity regulations. The University makes all decisions regarding employment including recruitment, hiring, promotion and all other terms and conditions of employment without discrimination. Inquiries should be directed to the Affirmative Action Officer, Salisbury State University, Holloway Hall, Camden Avenue, Salisbury, Md. 21801. Telephone: 410-543-6025.

UNIVERSITY ENVIRONMENT

Salisbury State University is located in Salisbury, Maryland, centrally located on the Eastern Shore of Maryland. The Eastern Shore of Maryland is that part of the Delmarva Peninsula in Maryland between the Chesapeake Bay on the west and the Atlantic Ocean on the east. The state of Delaware borders the region and a portion of the state of Virginia lies to the south.

First explored by Captain John Smith, the Shore retains much of its historical charm and natural beauty. Because of its miles of shoreline and many rivers, the Eastern Shore has become known for its recreational offerings. Tourism and both recreational and commercial fishing, although diminished in recent years, have been important sources of income. Agriculture has remained an important industry since settlers first landed in the early 1600's. The Atlantic beaches, relatively mild winter temperatures, and relaxed lifestyle attract both summer vacationers and permanent residents. As the population has increased and the economy diversified, more persons have become employed in manufacturing, wholesale and retail trade, and professional services. According to a 1990 Maryland Office of Planning estimate, the total population of the Eastern Shore, consisting of nine Maryland counties, was 351,050. This figure represents an 18.4% increase from the 1980 census (296,620). The population is projected to increase another 10% by the year 2000.

Salisbury, which is the cultural and economic hub of the Eastern Shore, is its largest city with a metropolitan population of 60,000. Located at the crossroads of Routes 50 and 13 and along the Wicomico River, Salisbury is the county seat for Wicomico County and a major distribution point for supplies and materials to the rest of the area. Unknown to many, Salisbury is the busiest port in Maryland after Baltimore. Its Salisbury-Wicomico Airport is also the state's busiest after Baltimore-Washington International. Manufacturing and processing industries employ the largest number of residents, but both wholesale and retail firms and service industries are important components of the community's economy.

Salisbury is located 115 miles east of Washington, D.C., 125 miles south of Philadelphia, and 30 miles west of Ocean City, Maryland, which swells to a population of 300,000 during the summer months. The 1990 population of Wicomico County is 74,900, an increase of 38% from 1970. The population is expected to increase another 9.5% by the year 2000.

Along with its economic importance, Salisbury offers many social and cultural opportunities. Its newspapers, television and radio stations, movie theaters, stores, businesses and industries, museums, libraries, civic center, cultural programs, houses of worship, public and private schools, and community college and university all contribute to an on-going vitality and significance in the life of the peninsula, and Maryland.

Wor-Wic Community College is in the process of building a new campus on the eastern outskirts of Salisbury and is currently operating as a "college without walls". The University of Maryland, Eastern Shore (UMES), is located 12 miles to the south in Princess Anne, Maryland, and is a regional sister institution within the University of Maryland System. Salisbury State and UMES have been working together to expand educational programming opportunities for students.

HISTORY OF THE UNIVERSITY

In 1922, the Maryland State Legislature established a commission to determine a location for a two-year normal school on the Eastern Shore of Maryland. A site at Salisbury was selected by the commission and the institution was opened in September, 1925.

The school offered a two-year course for the preparation of elementary school teachers-until 1931 when the program was expanded to three years. In 1934, the course of studies was again expanded to four years and in 1935, by action of the Legislature, the University was authorized to grant the bachelor of science degree and to change its name to the State Teachers College at Salisbury.

In 1947, expansion of the teacher preparation program occurred to include the junior high school level. In 1960, the program was expanded to include teacher preparation for the senior high school level and the establishment of a four-year program in the arts and sciences, with majors in several academic fields, leading to the bachelor of arts and the bachelor of science degrees. In 1962, the State Board of Trustees approved a graduate program leading to the master of education degree.

By legislative action, the five state teachers colleges in Maryland became state colleges in 1963, with the word "teachers" deleted from the name, and a new board of trustees was established known as the Board of Trustees of the State Colleges. Under the jurisdiction of this governing board, the major emphasis was placed on the development of the University's undergraduate program, with majors in the arts and sciences as well as professional preparation leading to teacher certification.

Since 1963, the University has expanded rapidly and presently offers 32 undergraduate majors including professional programs in business administration, social work, medical technology, and nursing, in addition to curricula in education and the arts and sciences. In 1971, a program leading to the master of arts degree in history was approved; in 1974, a master of arts degree in psychology was established. Most recently, graduate programs leading to a master's of business administration and a master's in nursing were added in 1982.

Through legislation effective July 1, 1988, Salisbury State along with five other institutions formerly governed by the Board of Trustees of the State Universities and Colleges, became a part of the University of Maryland System. On the same date, the name of the institution was officially changed from Salisbury State College to Salisbury State University, through separate legislative action.

Salisbury State University is the largest higher education institution on the Eastern Shore of Maryland with a fall 1993 enrollment of 4995 F.T.E. (Full-Time Equivalent) students. As an integral part of the public system of higher education in the state, the university is supported, in part, by appropriations authorized by the State Legislature.

THE UNIVERSITY MISSION STATEMENT

Salisbury State University is a comprehensive institution of higher learning offering a traditional, liberal arts curriculum and a variety of pre-professional and professional programs on both the graduate and undergraduate levels. The following Mission Statement approved by the faculty and the administration in 1984 expresses the ideals which underlie the service of the University to its students and to the regional and state community of which it is a part.

- 1. The faculty and administration of Salisbury State University accept the responsibility to foster in our students an ability to obtain, understand and accurately assess information and ideas, to think reasonably and independently, and to speak and write intelligently and effectively.
- 2. In order to give focus and direction to the students' course of study, the University is committed to introducing students to a system of ideas about the nature of humanity, the universe, and the world created by art and thought. To this end, the University offers as the cornerstone of learning an integrated curriculum which examines the salient ideas in the humanities, social sciences, natural sciences and mathematics. This curriculum serves students both as the foundation for specialized study and as the source for a set of convictions which can guide the conduct of their lives.
- 3. Furthermore, the University assumes that what we teach and how we teach ought to foster in our students a disposition for responsible conduct. As such, we are committed to encouraging attitudes of integrity and fairness, respect for others, dedication to the pursuit of truth, and the willingness to uphold and to challenge one's own convictions. It is expected that these attitudes will instill in our students a desire to do things well, to sustain rather than disparage high principles, and to participate as informed, committed citizens in the public forum.
- 4. The University also assumes the responsibility to prepare students to work confidently and effectively in their chosen careers; to this end we provide practicable counseling and a number of professional and technical degree programs. Career preparation is not the exclusive province of such programs, however; certain attributes—the power to think clearly, judge soundly, and communicate effectively, the ability to interact with people in a productive and considerate way, and the capacity to adapt and learn in new and unfamiliar situations—must be learned in all courses. And, most important, we attempt to instill in our graduates a spirit of dedication to their vocations and a sense of service to society.
- 5. The University is also committed to graduate study beyond the baccalaureate level. To help graduate students enrich and extend their knowledge and competence in their respective fields of study, the University encourages them to embrace an ethos dedicated to the continuing acquisition of knowledge and the pursuit of the intellectual ideal. We expect those engaged in graduate study to commit themselves to excellence through the consistent exercise of coherent thought, sound judgement and effective communication.
- 6. The University recognizes that the students have needs and interests that go beyond the scope of academic life, and we therefore provide additional services and sponsor extra-curricular and co-curricular activities which are consistent with the goals and purposes of the institution. Services that support the physical and mental health of the students, and activities such as student government, athletics and cultural events that enhance their lives, are sponsored by the University as necessary components of the education of the whole person.
- 7. Finally, we recognize the important contribution that the University and our faculty make to the local region, and therefore provide to the surrounding community when and where feasible, the cultural, social and professional resources of the University.

NOTE: An officially recognized five-page amplification of the mission statement is available from the Office of Institutional Research.

A:\mission.934

THE BOARD OF REGENTS THE UNIVERSITY OF MARYLAND SYSTEM Elkins Building Adelphi, Maryland 20783

The Board of Regents of the University of Maryland System has responsibility for the direction and control of the following public universities and colleges of the State: Bowie State University, Coppin State College, Frostburg State University, Salisbury State University, Towson State University, University of Baltimore, University of Maryland at Baltimore, University of Maryland Baltimore County, University of Maryland College Park, University of Maryland Eastern Shore, and the University of Maryland University College.

Salisbury State University Student Right to Know Statement

The federal Student Right to Know and Campus Security Act of 1990 (Public Law 101–542, as amended by Public Law 102–26, 1991) specifies that all colleges and universities disclose annually the graduation rates of degree–seeking undergraduate students after 150% of normal time. Salisbury State University is a 4 year institution, therefore 150% normal time is a 6 year graduation rate. The group, or cohort, that is tracked over this 6 year time period is established each fall and includes only first–time, full–time, degree–seeking freshmen. See the table below for six–year graduation rates of SSU freshmen from SSU, and from other institutions within the University of Maryland System. Complete information on this topic is available from the Institutional Research Office.

Reporting period July 1, 1991 to June 30, 1992

(Report due July 1, 1993)

The graduation rate of SSU first-time, full-time freshmen who entered in the Fall 1986 semester and graduated by June 30, 1992 was 48.0%.

Reporting period July 1, 1992 to June 30, 1993

(Report due July 1, 1994)

The graduation rate of SSU first-time, full-time freshmen who entered in the Fall 1987 semester and graduated by June 30, 1993 was 55.4%.

SUBJECT: Grade Distribution Report

As you can see from the attached Spring 1994 Grade Distribution Summary Report, the percentage of undergraduate "A" grades reached 30% this semester. Spring semester grades traditionally have been higher than fall, but this is the highest percentage of "A" grades since I've been keeping statistics.

As the 1993-94 <u>SSU FACTBOOK</u> (p. 40) shows, there has been a steady rise in the percentage of "A" grades from fall 1988 (when "A"s constituted 20% of the grades) to Fall 1992 (when "A"s constituted 27% of the grades). The average cumulative GPA for undergraduates has climbed from 2.58 in fall 1988 to 2.75 in fall 1992. Fall 1993 data reflect a one-semester "leveling off" in that the percentage of "A" grades (27%) and cumulative GPA (2.76) were almost identical to Fall 1992.

To put these grades in some sort of context, I've attempted to find some national data on the subject. The most recent national survey I could find pertains to 1985-86 bachelor-degree recipients and shows an average cumulative GPA of 2.7. While SSU does not have this comparative figure for 1985-86, it was 2.88 for the 1987-88 bachelor degree recipients. More recently, the group graduating in 1992-93 had an average cumulative GPA of 3.02.

¹ If you're interested in seeing a copy of the national study which shows average GPAs by program area (e.g., business and management, education, fine and applied arts, etc.), please let me know. The report is entitled "Estimates of 1985-86 Bachelor's Degree Recipients' Course-Taking Behavior," U.S. Department of Education, National Center for Education Statistics, February 1993.

Dr. Butler June 30, 1994 Grade Distribution Report

Last October <u>U.S. News and World Report</u> described widespread grade inflation in <u>U.S.</u> colleges and universities and stated that the percentage of "A" grades at Princeton rose from 33% of all grades to 40% in four years, and that in 1993, 83.6% of Harvard seniors graduated with honors. The author characterized the current climate as reminiscent of Garrison Keillor's fictional Lake Wobegon where "all the children are above average" and discussed possible explanatory factors including student demands, loss of faculty morale, fallout from the 1960's, etc. (<u>U.S. News & World Report</u>, October 18, 1993).

Since I had been hearing that rising SSU freshmen SAT scores explained the rising GPA levels, my office conducted a quick ANCOVA (Analysis of Co-Variance) study controlling for both SAT scores and high school GPA. We took the entering freshmen classes of 1987, 1990, and 1993 and discovered a statistically significant difference in the first-year cumulative GPA average after taking into account SAT scores and high school GPAs. Thus, there are other factors at work, beyond SAT scores and high school GPA, which must explain the differences in the first-year GPAs. If any of you wish to review the ANCOVA data, don't hesitate to contact my office.

I've enclosed a report which breaks down the cumulative GPA by School, major, and class for Fall 1993 and Spring 1994. If you have any questions, please give me a call.
