This meeting was dedicated to discussing Faculty roles and rewards. We attempted to describe an S.S.U. faculty member. We all agreed that teaching was central to an S.S.U. faculty member and should figure first and prominently in the definition. There was some discussion on how this should be elaborated and what it means and some felt that we needed to be more explicit about what good teaching is and how it is measured. The discussion will continue perhaps in subcommittees at our November 17 meeting.
